The university reserves the right, through its established procedures, to modify the requirements for admission and graduation and to change other rules, regulations, and provisions, including those stated in this catalog and other publications, and to refuse admission to any student, or to require the withdrawal of a student if it is determined to be in the interest of the student or the university. All students, full- or part-time, who are enrolled in Vanderbilt courses are subject to the same policies.

Policies concerning noncurricular matters and concerning withdrawal for medical or emotional reasons can be found in the Student Handbook, which is on the Vanderbilt website at vanderbilt.edu/student_handbook.

NONDISCRIMINATION STATEMENT
In compliance with federal law, including the provisions of Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendment of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, the ADA Amendments Act of 2008, Executive Order 11246, the Uniformed Services Employment and Reemployment Rights Act, as amended, and the Genetic Information Nondiscrimination Act of 2008, Vanderbilt University does not discriminate against individuals on the basis of their race, sex, religion, color, national or ethnic origin, age, disability, military service, or genetic information in its administration of educational policies, programs, or activities; admissions policies; scholarship and loan programs; athletic or other university-administered programs; or employment. In addition, the university does not discriminate against individuals on the basis of their sexual orientation, gender identity, or gender expression consistent with the university’s nondiscrimination policy. Inquiries or complaints should be directed to the Equal Opportunity, Affirmative Action, and Disability Services Department, Baker Building, PMB 401809, Nashville, TN 37240-1809. Telephone (615) 322-4705 (V/TDD); FAX (615) 343-4969.

Graduate School Calendar 2014/2015

FALL SEMESTER 2014

Classes begin / Wednesday 20 August
Homecoming and related activities / Sunday 5 October–Saturday 11 October
Fall break / Thursday 16 October–Friday 17 October
Last day to withdraw from courses without academic penalty / Friday 17 October
Last day to submit Intent to Graduate forms for December graduation / Friday 24 October
Thanksgiving holidays / Saturday 22 November–Sunday 30 November
Final day for submission of theses and dissertations to the Graduate School for graduation in December / Monday 24 November
Reading days and examinations / Friday 5 December–Saturday 13 December
Fall semester ends / Saturday 13 December

SPRING SEMESTER 2015

Classes begin / Monday 5 January
Last day to submit Intent to Graduate forms for May graduation / Monday 9 February
Spring holidays / Saturday 28 February–Sunday 8 March
Last day to withdraw from courses without academic penalty / Friday 13 March
Final day for submission of theses and dissertations to the Graduate School for graduation in May / Monday 23 March
Reading days and examinations / Tuesday 21 April–Thursday 30 April
Commencement / Friday 8 May

SUMMER SESSION 2015

Last day to submit Intent to Graduate forms for August graduation / Friday 12 June
Final day for submission of theses and dissertations to the Graduate School for graduation in August / Friday 17 July
Graduate Study at Vanderbilt

Graduate education has held a central place in the program of Vanderbilt University since it opened in 1875. The first doctor of philosophy degree was granted in 1879; the 2,000th in 1975, the university’s centennial year. The 3,000th was given in 1985. As of 2014, more than 6,900 doctor of philosophy degrees have been awarded. By way of comparison, the first Ph.D. given by an American university was awarded in 1861, and the second American institution to offer the degree did so in 1870.

A separate Graduate School was established at Vanderbilt in 1935 by action of the Board of Trust, with an official faculty selected from various schools of the university. Selection is based on the individual faculty member’s administrative responsibility or substantial participation in graduate instruction.

Vanderbilt offers to able and serious students a faculty that is active in research and deeply committed to the development of scholars. Students participate in classroom, tutorial, and collegial modes of learning and in systematic independent inquiry, in a setting that allows them to see scholars at work, day in and day out, as an important means of learning the scholar’s art. Students are in situations in which they are known personally and well, and concern for what happens to them is very strong.

Vanderbilt is a member of the Association of American Universities, a sixty-two-member organization of research-intensive universities. The doctor of philosophy especially, but also the master of arts and master of science, are research degrees, offered by a faculty of research scholars.

The objectives of the Graduate School are to train scholars and to promote research. The faculty seeks to provide every student with thorough knowledge of a particular field and a mastery of the methods of productive scholarship. Wherever feasible, the faculty intends to provide opportunity for all Ph.D. candidates to have supervised teaching experiences.

The Graduate School enrolls about 2,200 students. About 46 percent are women, and 23 percent come from foreign countries.

The University

Commodore Cornelius Vanderbilt, who gave a million dollars to build and endow Vanderbilt University in 1873, expressed the wish that it “contribute . . . to strengthening the ties which should exist between all geographical sections of our common country.”

A little more than a hundred years later, the Vanderbilt Board of Trust adopted the following mission statement: “We reaffirm our belief in the unique and special contributions that Vanderbilt can make toward meeting the nation’s requirements for scholarly teaching, training, investigation, and service, and we reaffirm our conviction that to fulfill its inherited responsibilities, Vanderbilt must relentlessly pursue a lasting future and seek highest quality in its educational undertakings.”

Today as Vanderbilt pursues its mission, the university more than fulfills the Commodore’s hope. It is one of a few independent universities with both a quality undergraduate program and a full range of graduate and professional programs. It has a strong faculty of more than 3,600 full-time members and a diverse student body of more than 12,700. Students from many regions, backgrounds, and disciplines come together for multidisciplinary study and research.

The 330-acre campus is about one and one-half miles from the downtown business district of the city of Nashville, combining the advantages of an urban location with a peaceful, parklike setting of broad lawns, shaded paths, and quiet plazas. The schools of the university offer the following degrees:

- Graduate School. Master of Arts, Master of Fine Arts, Master of Liberal Arts and Science, Master of Science, Doctor of Philosophy.
- College of Arts and Science. Bachelor of Arts.
- Blair School of Music. Bachelor of Music.
- Divinity School. Master of Divinity, Master of Theological Studies.
- School of Engineering. Bachelor of Engineering, Bachelor of Science, Master of Engineering.
- School of Medicine. Master of Education of the Deaf, Master of Health Professions Education, Master of Public Health, Master of Science in Clinical Investigation, Master of Laboratory Investigation, Master of Science in Medical Physics, Master of Science (Speech-Language Pathology), Doctor of Audiology, Doctor of Medical Physics, Doctor of Medicine.
- School of Nursing. Master of Science in Nursing, Doctor of Nursing Practice.
- Owen Graduate School of Management. Master of Accountancy, Master of Business Administration, Master of Management in Health Care, Master of Science in Finance.
- Peabody College. Bachelor of Science, Master of Education, Master of Public Policy, Doctor of Education.

No honorary degrees are conferred.

Mission, Goals, and Values

Vanderbilt University is a center for scholarly research, informed and creative teaching, and service to the community and society at large. Vanderbilt will uphold the highest standards and be a leader in the

- quest for new knowledge through scholarship,
- dissemination of knowledge through teaching and outreach,
- creative experimentation of ideas and concepts.

In pursuit of these goals, Vanderbilt values most highly

- intellectual freedom that supports open inquiry,
- equality, compassion, and excellence in all endeavors.

Accreditation

Vanderbilt University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor’s, master’s, professional, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, or call (404) 679-4500 for questions about the accreditation of Vanderbilt University.

Facilities

Vanderbilt has many special facilities for study and research in particular areas, as well as the traditional classroom and laboratory facilities associated with graduate instruction.

Graduate instruction in the humanities, the biological sciences, and the social sciences is conducted in Benson, Buttrick, Calhoun, Furman, Garland, and Wilson halls. Graduate work in religion uses the full facilities of Vanderbilt Divinity School. The E. Bronson Ingram Studio Arts Center, opened in fall 2005, has studios for sculpture, ceramics, photography, computer arts, painting, and drawing. Gallery space is designated for exhibits primarily of students’ work.
The Libraries

The Jean and Alexander Heard Library System

Vanderbilt University’s libraries are among the top research libraries in the nation, home to more than eight million items, including print publications, microfilm items, and digital collections. The libraries provide electronic access to tens of thousands of full-text journals and more than 800,000 e-books and other research resources accessible via the campus network, from 250 workstations and circulating laptops in campus libraries, as well as authenticated access (VUnetID and e-password) from off campus. The libraries’ website offers searches for articles, books, electronic resources, and more, as well as links to subject liaisons and research guides in many areas of interest.

The oldest manuscript in the collection dates from c. 1300 and new publications are being added every day. Among the libraries’ collection strengths are the W. T. Bandy Center for Baudelaire and Modern French Studies, a comprehensive collection of materials on Charles Baudelaire and French literature and culture; the Southern Literature and Culture Collection; Latin American collections for Brazil, Colombia, the Andes, Mesoamerica, and Argentina; the Television News Archive, the world’s most extensive and complete archive of television news covering 1968 to present; the Revised Common Lectionary, one of the first published Web-based resources of scriptural readings for the liturgical year; and the Global Music Archive, a multimedia reference archive and resource center for traditional and popular song, music, and dance of Africa and the Americas.

In partnership with faculty, library staff teach students valuable skills for locating and evaluating the latest information in a complex array of sources. Campus libraries with discipline-specific collections are home to professional librarians who provide expert support in that area of study. Online reference is available through the homepage. Options for individual study are complemented by group study spaces and instructional rooms, as well as learning commons and cafes. Exhibits throughout the libraries offer intellectual and creative insights that encourage students to see their own work in new ways. Students, faculty, and staff may come to the library to read in a cozy nook, meet friends for group study, grab a quick meal, or see an exhibit.

Information Technology

Vanderbilt University Information Technology (VUIT) offers voice, video, data, computing, and conferencing services to Vanderbilt students, faculty, and staff. VUIT provides free antivirus downloads and malware prevention in many campus areas. VUIT maintains and supports VUnet, the campuswide data network that provides access to the Internet, and VUnetID, the authentication service that enables Vanderbilt users to securely identify themselves to many services on VUnet. Those services include YES, Your Enrollment Services; Online Access to Knowledge (OAK); and Vmail, the university’s email system.

VUIT also partners with Sprint, Verizon, and AT&T to offer discounts for cellular phone service. For discount information see it.vanderbilt.edu/cellphone.

Vanderbilt offers all students the latest version of Microsoft Office and Microsoft Windows free of charge through our Microsoft Campus Agreement. See softwarestore.vanderbilt.edu for more information.

Through the Digital Life initiative, Vanderbilt highlights VUnix, legal, safe, inexpensive, and easy ways to explore and share music and digital content. See digitallife.vanderbilt.edu and vanderbilt.edu/vunix for details.

VUIT offers various conferencing and collaboration services for students. Vanderbilt’s blog service offers Wordpress Blogs at my.vanderbilt.edu. Audio and video conferencing via desktop or a Polycom bridge are just a few of the services available. See it.vanderbilt.edu/services/collaboration for more information.

The Help Desk provides information to students, faculty, and staff about VUnet and VUnet services. Help Desk locations, hours, contacts, and other information can be found at it.vanderbilt.edu/helpdesk.

For more information on IT services and computing at Vanderbilt, go to it.vanderbilt.edu.

Interdisciplinary Centers, Institutes, and Research Groups

Vanderbilt actively promotes research and teaching that crosses disciplines, departments, and institutional lines through a multitude of centers, institutes, and research groups. Below is a sampling of interdisciplinary initiatives at the university and medical center. For more information, see research.vanderbilt.edu/centers-institutes.

The Cal Turner Program for Moral Leadership in the Professions works to develop the leadership and ethical capacities of those serving in the professions. CTP brings together professionals from a range of disciplines to take on significant social challenges and fosters within Vanderbilt’s students and its broader constituents a deep sense of vocation, encouraging professionals to remember the deeper purposes that motivate their work. vanderbilt.edu/ctp

The Center for Biomedical Ethics and Society provides leadership in education, research, and clinical service at Vanderbilt University Medical Center concerning the ethical, legal, and social dimensions of medicine, health care, and health policy. medicineandpublichealth.vanderbilt.edu
The Center for Integrative and Cognitive Neuroscience investigates the relationship between brain function, behavior, and cognition, and promotes the development of new technologies like advanced prosthetics and autonomous robots. Brain scientists, psychologists, clinicians, and engineers collaborate on research and educate undergraduate and graduate students in a wide range of fields. cicn.vanderbilt.edu

The Center for Latin American Studies, established in 1947, works to advance knowledge about and understanding of the region's history, culture, political economy, and social organization. The center administers the Latin American studies undergraduate and master’s programs, as well as a joint Master of Arts and Master of Business Administration program with the Owen Graduate School of Management and a joint degree program in law and Latin American studies with Vanderbilt Law School. CLAS also fosters a lively research community on campus by sponsoring colloquia, conferences, films, and speakers, and reaches thousands in Nashville and the surrounding region through various outreach programs to the educational, business, medical, and media communities. vanderbilt.edu/clas

The MacArthur Foundation Research Network on Law and Neuroscience addresses a focused set of closely related problems at the intersection of neuroscience and criminal justice, including mental states, capacity, and evidence. lawneuro.org

The Max Kade Center for European and German Studies fosters an international perspective on issues relating to Europe and transatlantic relations. It offers an interdisciplinary major and minor along with joint majors in European studies (EUS) that are designed to broaden students’ appreciation of the European continent, the evolution of a European identity over the centuries, the emergence of the EU, and the way Europe responds to such challenges as migration and integration, energy and sustainability, security, and globalization. Its curriculum is designed to give majors disciplinary breadth as well as expertise in a specialty of their choosing. The MKC seeks to prepare students for international careers or advanced study. as.vanderbilt.edu/europeanstudies

The National Center on School Choice conducts scientific, comprehensive, and timely studies on school choice to inform policy and practice. The center is partly funded by a major grant from the Department of Education’s Institute of Education Sciences. Vanderbilt is the lead institution in a cooperative agreement with national doctoral universities and research organizations. vanderbilt.edu/schoolchoice

The Owen Entrepreneurship Center brings together investors, entrepreneurs, and Vanderbilt business students to share innovative ideas. The OEC has spawned an active angel investor network and allows Owen students to have easy access to a ready-made network of successful entrepreneurs. www2.owen.vanderbilt.edu/oec

The Robert Penn Warren Center for the Humanities promotes interdisciplinary research and study in the humanities, social sciences, and natural sciences. Members of the Vanderbilt community representing a wide variety of specializations take part in the center’s programs, which are designed to intensify and increase interdisciplinary discussion of academic, social, and cultural issues. The center also engages in outreach to the community by sponsoring teacher training, lectures, and seminars. vanderbilt.edu/rpw_center

The Vanderbilt Bill Wilkerson Center for Otolaryngology and Communication Sciences is an integrated educational, research, and patient care center dedicated to serving individuals with otolaryngologic and communicative disorders. The center restores health and the ability to communicate to thousands of people every year through patient care, professional education, and clinical research, and encourages interdisciplinary collaboration in all of the speech, language, and hearing sciences and otolaryngology specialties. vanderbilthealth.com/billwilkerson

The Vanderbilt Brain Institute promotes and facilitates the discovery efforts of Vanderbilt neuroscientists, the training of undergraduate and graduate students, and the coordination of public outreach in brain sciences. Research endeavors in the VBI include more than three hundred scientists from fifty departments, centers, and institutes across the campus, spanning a spectrum of study from molecules to the mind. Vanderbilt’s neuroscience training programs foster the development of trainees to independent research scientists and educators, preparing them for careers in an integrative discipline. The undergraduate neuroscience major is an interdisciplinary program from several departments and schools providing a comprehensive background in biology, chemistry, mathematics, and physics as well as a strong foundation in the fundamentals of neuroscience. braininstitute.vanderbilt.edu

The Vanderbilt Initiative in Surgery and Engineering creates, develops, implements, and evaluates solutions to complex interventional problems. Physicians, engineers, and computer scientists work together to improve patient care. vanderbilt.edu/vise

The Vanderbilt Institute for Energy and Environment considers social, economic, legal, and technical aspects of environmental and energy problems to find solutions that are practical, achievable, and cost-effective. A crucial part of its mission is to train the next generation of leaders in the energy and environmental arena. vanderbilt.edu/viie

The Vanderbilt Institute for Global Health is committed to advancing health and development in resource-limited regions with projects in Africa, Asia, Latin America, and the Caribbean. Vanderbilt faculty and staff provide leadership and expertise in establishing sustainable, scalable health development programs. globalhealth.vanderbilt.edu

The Vanderbilt Institute for Integrative Biosystems Research and Education fosters and enhances interdisciplinary research in the biophysical sciences and bioengineering at Vanderbilt, integrated with a strong focus on undergraduate, graduate, and postdoctoral education. VIBRE’s mission is to invent the tools and develop the skills that are required to understand biological systems across spatiotemporal scales. VIBRE’s research and educational programs focus on an integrated multidisciplinary approach to microscale engineering and instrumentation for dynamic control and analysis of biological systems, i.e., instrumenting and controlling the single cell and small cell populations. vanderbilt.edu/vibre

The Vanderbilt Institute of Chemical Biology, a transinstitutional initiative between the College of Arts and Science and the School of Medicine, provides research and training in the application of chemical approaches to the solution of important biomedical problems. Particular strengths of the institute include analytical methodology and molecular imaging, cellular responses to chemical stress, drug discovery, enzyme and receptor chemistry, proteomics, structural biology, and chemical synthesis. The institute trains graduate students and has a rich assortment of core facilities that provide access to techniques and equipment at the frontiers of biomedical research. vanderbilt.edu/vicb

The Vanderbilt Institute of Nanoscale Science and Engineering engages in theoretical and experimental research in science and engineering at the nanoscale (from one millionth to one billionth of a meter in size). VINSE supports an extensive infrastructure of materials fabrication and analytical facilities for research in nanoscale science and engineering. Research encompasses students and faculty in various areas of nanoscience, with a special emphasis on interdisciplinary activities. vanderbilt.edu/vinse

The Vanderbilt Kennedy Center for Research on Education and Human Development is one of fourteen Eunice Kennedy Shriver Intercultural and Developmental Disabilities Research Centers supported in part by the Eunice Kennedy Shriver National Institute of Child Health and Human Development. It also is a University Center for Excellence in Developmental Disabilities Education, Research, and Service in the national network of sixty-seven such centers in every U.S. state and territory supported by the U.S. Administration on Developmental Disabilities. The mission of the Vanderbilt Kennedy Center is to facilitate discoveries and best practices that make positive differences in the lives of persons with disabilities and their families. We support and apply scientific research to bring better
services and training to the community. The center is a university-wide institute, with interdisciplinary research programs addressing four broad areas: basic mechanisms of nervous system development, cognitive processes and interventions, mental health dysfunction and intervention, and life impact of disabilities on individuals and families. The center includes the Treatment and Research Institute for Autism Spectrum Disorders. Students have the opportunity to collaborate in research with mentorship from renowned Vanderbilt Kennedy Center scientists in Vanderbilt research training programs in developmental disabilities, developmental psychopathology, neurogenomics, neuroscience, vision science, and special education. Observation, practicum, and clinical experiences are available in the center’s clinical programs and through the Vanderbilt Leadership Education in Neurodevelopmental Disabilities interdisciplinary training program for health professionals. vkc.mc.vanderbilt.edu

The Vanderbilt University Institute of Imaging Science aims to support and integrate advances in physics, engineering, chemistry, computing, and other basic sciences for the development and application of new and enhanced imaging techniques to address problems and stimulate new research directions in biology and medicine, in health and disease. vuiis.vanderbilt.edu

Other initiatives include:

Advanced Computing Center for Research and Education
African American Mental Health Research Scientist Consortium
American Economic Association
Arthritis and Joint Replacement Center
Bishop Joseph Johnson Black Cultural Center
Carpenter Program in Religion, Gender, and Sexuality
Center for Bone Biology
Center for Child Development
Center for Clinical Toxicology
Center for Cognitive Medicine
Center for Constructive Approximation
Center for Evaluation and Program Improvement
Center for Experiential Learning and Assessment
Center for Health Services Research at Vanderbilt

W. T. Bandy Center for Baudelaire and Modern French Studies
Life at Vanderbilt

VANDERBILT provides a full complement of auxiliary services to meet the personal needs of students, to make life on the campus comfortable and enjoyable, and to provide the proper setting for academic endeavor.

Graduate School Resources

Graduate Student Council
The Graduate Student Council (GSC) exists to enhance the overall educational experience at Vanderbilt University by promoting the general welfare and concerns of the Graduate School student body. This is achieved through the creation of new programs and initiatives to provide opportunities for growth and interaction, as well as through communication with the Vanderbilt faculty and administration on behalf of graduate students. The GSC consists of elected representatives, standing committees, and an annually elected executive board. In the recent past, the GSC has helped change policies involving campus dining, free bus transportation, parking, and student health insurance. The GSC is also a member of the National Association of Graduate-Professional Students (NAGPS).

In addition to its representative function, the GSC also organizes a number of events and hosts/sponsors various projects during the year, including co-sponsoring seminars and panels with individual departments, organizing the Vanderbilt 3 Minute Thesis competition (spring semester), facilitating the Graduate Student Honor Council, planning community outreach activities, and offering many social opportunities. The GSC also awards travel grants to graduate students who wish to present their research at conferences throughout the year. All Vanderbilt Graduate School students are welcome and encouraged to attend GSC’s monthly meetings and to get involved. For more information, visit studentorgs.vanderbilt.edu/gsc.

Career Development for Graduate School Students
The Dean’s Office of the Graduate School is dedicated to helping students navigate the transition from degree to career. Guidance and professional development opportunities are offered throughout a Graduate School student’s program, in the form of individual advising, workshops, seminars, and Web-based resources. Topics range from creating an effective CV/resume, to interviewing skills, to establishing a network for both academic and non-academic career searches. For Ph.D.’s in the biomedical disciplines, the Office of Biomedical Research Education and Training (BRET) offers similar services. For Ph.D.’s in Peabody College, the Peabody Office of Professional and Graduate Education (PPOGE) offers complementary resources. Additional resources for particular career interests are available through a campus partnership with the Center for Student Professional Development. Through these numerous services, students will find ample assistance for their career searches. For more information, visit my.vanderbilt.edu/gradcareer.

The Center for Teaching
The Center for Teaching offers services to the entire Vanderbilt University teaching community, including those who currently teach, those who are just beginning to teach, and those who anticipate that teaching will be a part of their future careers. The services of the center are available to all graduate students, with some programs designed especially for teaching assistants (TAs). Fall TA Orientation introduces participants to teaching at Vanderbilt, focusing on the information and skills necessary to take on TA roles in the classroom. Workshops and practice teaching sessions are led by experienced graduate student teaching assistants.

The Certificate in College Teaching has been designed to assist graduate students who wish to develop and refine their teaching skills. The certificate focuses on the research on how people learn and best teaching practices, and supports the university’s pursuit of excellence in teaching and learning. The certificate is ideal for graduate students whose goals are to become more effective educators and who want to prepare for future careers in higher education teaching.

The SoTL Scholars Program helps graduate students cultivate a scholarly, evidence-based approach to their students’ learning and their own teaching. Program participants will explore this approach, beginning to bridge the gap between their research and their teaching identities, by asking and answering meaningful questions about teaching and learning in ways that align with their disciplinary research practices.

The Graduate Student Teaching Event for Professional Development (GradSTEP) is a January conference that features workshops and discussions on teaching and professional development topics across the disciplines.

The Graduate Teaching Fellows and Teaching Affiliates Program provides graduate students the opportunity to work at the center, facilitating the programs offered to graduate students, consulting with TAs, and collaborating on teaching-related projects.

For more information and other services, please visit the Center for Teaching website at cft.vanderbilt.edu or call (615) 322-7290.

Other Campus Resources

Barnes & Noble at Vanderbilt
Barnes & Noble at Vanderbilt, the campus bookstore located at 2525 West End Avenue, offers textbooks (new, used, digital, and rental), computers, supplies, Nook e-readers, dorm accessories, licensed Vanderbilt apparel, and best-selling books. Students can order online or in-store and receive course materials accurately, conveniently, and on time. The bookstore features
extended hours of operation and hosts regular special events. Visitors to the bookstore café can enjoy Starbucks coffees, sandwiches, and desserts while studying. Free customer parking is available in the 2525 garage directly behind the bookstore. For more information, visit vubookstore.com, follow twitter.com/BN_Vanderbilt, find the bookstore on Facebook at facebook.com/VanderbiltBooks, or call (615) 343-2665.

The Commodore Card
The Commodore Card is the Vanderbilt student ID card. It can be used to access debit spending accounts, VU meal plans, and campus buildings such as residence halls, libraries, academic buildings, and the Vanderbilt Recreation and Wellness Center. ID cards are currently issued at the Commodore Card Office, 184 Sarratt Student Center, Monday through Friday from 8:30 a.m. to 4:30 p.m. For more information, go to vanderbilt.edu/cardservices.

Eating on Campus
Vanderbilt Campus Dining operates several restaurants, cafes, and markets throughout campus that provide a variety of food. The two largest dining facilities are Rand Dining Center in Rand Hall (connected to Sarratt Student Center) and The Ingram Commons dining hall. Six convenience stores on campus offer grab-and-go meals, snacks, beverages, and groceries. All units accept the Vanderbilt Card and Meal Plans. Graduate student Meal Plans are offered at a discount. For more information, hours, and menus, go to vanderbilt.edu/dining.

Housing
To support the housing needs of new and continuing graduate and professional students, the Office of Housing and Residential Education provides a Web-based off-campus referral service (apphosta.its.vanderbilt.edu/housing/Main/). The referral service lists information about housing accommodations off campus. The majority of listed rental properties are close to the campus. Cost, furnishings, and conditions vary greatly. For best choices, students seeking off-campus housing should visit the office or consult the website by early July for suggestions and guidance. The website includes advertisements by landlords looking specifically for Vanderbilt-affiliated tenants, as well as by Vanderbilt students looking for roommates. Listings are searchable by cost, distance from campus, number of bedrooms, and other parameters. Students may also post “wanted” ads seeking roommate or housemate situations. On-campus university housing for graduate or professional students is not available.

Change of Address
Students who change either their local or permanent mailing address are expected to notify the University Registrar immediately. Candidates for degrees who are not in residence should keep the school and the University Registrar informed of current mailing addresses. To change or update addresses, go to registrar.vanderbilt.edu/academicrec/address.htm.

International Student and Scholar Services
International Student and Scholar Services (ISSS), located in the Student Life Center, fosters the education and development of nonimmigrant students and scholars to enable them to achieve their academic and professional goals and objectives. ISSS provides advice, counseling, and advocacy regarding immigration, cross-cultural, and personal matters. ISSS supports an environment conducive to international education and intercultural awareness via educational, social, and cross-cultural programs.

ISSS provides immigration advising and services, including the processing of immigration paperwork, to more than 1,500 international students and scholars. The office works with admission units, schools, and departments to generate documentation needed to bring nonimmigrant students and scholars to the U.S. Further, ISSS keeps abreast of the regulations pertaining to international students and scholars in accordance with the Department of Homeland Security (Bureau of Citizenship and Immigration Services) and the Department of State. ISSS coordinates biannual orientation programs for students and ongoing orientations for scholars, who arrive throughout the year.

To help promote connection between international students and the greater Nashville community, ISSS coordinates the First Friends program, which matches international students with Americans both on and off campus for friendship and cross-cultural exchange. The weekly World on Wednesday presentations inform, broaden perspectives, and facilitate cross-cultural understanding through discussions led by students, faculty, and staff. International Education Week in the fall provides the campus with additional opportunities to learn about world cultures and to celebrate diversity. The International Lens Film Series brings more than forty international films to campus each year. ISSS provides a range of programs and activities throughout the year to address a variety of international student needs and interests. These programs include International Orientation Leaders and a selection of holiday parties. The Southern Culture Series is an opportunity for students to experience Southern culture in nearby cities such as Memphis, Chattanooga, and Atlanta.

Obtaining Information about the University
Notice to current and prospective students: In compliance with applicable state and federal law, the following information about Vanderbilt University is available:

Institutional information about Vanderbilt University, including accreditation, academic programs, faculty, tuition, and other costs, is available in the catalogs of the colleges and schools on the Vanderbilt University website at vanderbilt.edu/catalogs. A paper copy of the Undergraduate Catalog may be obtained by contacting the Office of Undergraduate Admissions, 2305 West End Avenue, Nashville, Tennessee 37203-1727, (800) 288-0432, (615) 322-2561, admissions@vanderbilt.edu. Paper copies of the catalogs for the graduate and professional schools may be available from the individual schools.

Information about financial aid for students at Vanderbilt University, including federal and other forms of financial aid for students, is available from the Office of Student Financial Aid on the Vanderbilt University website at vanderbilt.edu/financialaid. The Office of Student Financial Aid is located at 2309 West End Avenue, Nashville, Tennessee 37203-1725, (615) 322-3591 or (800) 288-0204.

Information about graduation rates for students at
Vanderbilt University is available on the Vanderbilt University website at virg.vanderbilt.edu. Select “Factbook,” then “Student,” then “Retention/Graduation Rates.” Paper copies of information about graduation rates may be obtained by writing the Office of the University Registrar, Vanderbilt University, PMB 407071, 2301 Vanderbilt Place, Nashville, Tennessee 37240-7701 or by calling (615) 322-7701.

The Vanderbilt University Annual Security Report on university-wide security and safety, including related policies, procedures, and crime statistics, is available from the Vanderbilt University Police Department on the university website at police.vanderbilt.edu/annual-security-report. A paper copy of the report may be obtained by writing the Vanderbilt University Police Department, 2800 Vanderbilt Place, Nashville, Tennessee 37212 or by calling (615) 343-9750. For more information, see “Vanderbilt University Police Department” in the following section of this catalog.

A copy of the annual Equity in Athletics Disclosure Act Report on the Vanderbilt University athletic program participation rates and financial support data may be obtained by writing the Vanderbilt University Office of Athletic Compliance, 2601 Jess Neely Drive, P.O. Box 120158, Nashville, Tennessee 37212 or by calling (615) 322-7992.

Information about your rights with respect to the privacy of your educational records under the Family Educational Rights and Privacy Act is available from the Office of the University Registrar on the Vanderbilt University website at registrar.vanderbilt.edu/academicrec/privacy.htm. Paper copies of this information about educational records may be obtained by writing the Office of the University Registrar, Vanderbilt University, PMB 407071, 2301 Vanderbilt Place, Nashville, Tennessee 37240-7701 or by calling (615) 322-7701. For more information, see “Confidentiality of Student Records” in the following section of this catalog.

The Writing Studio

The Writing Studio offers graduate students personal writing consultations, fifty-minute interactive discussions about writing. Trained writing consultants can act as sounding boards and guides for the development of arguments and the clarification of ideas. The focus of a consultation varies according to the individual writer and project. In addition to the standard fifty-minute consultations, the Writing Studio also offers dissertation writers the possibility of having extended appointments with the same consultant on an ongoing basis. Fifty-minute appointments can be scheduled online at vanderbilt.edu/writing. Extended appointments must be arranged in advance through writingstudio@vanderbilt.edu and are available on a first-come, first-served basis. Information about other programs for graduate students, like the journal article workshop and the annual dissertation writer’s retreat, can also be found at vanderbilt.edu/writing.

Bishop Joseph Johnson Black Cultural Center

The Bishop Joseph Johnson Black Cultural Center (BJBCC) represents one of Vanderbilt University’s numerous efforts at acknowledging and promoting diversity. It does so by providing educational and cultural programming on the black experience for the entire Vanderbilt community. Dedicated in 1984, the center is named for the first African American student admitted to Vanderbilt University in 1953, Bishop Joseph Johnson (B.D. ’54, Ph.D. ’58).

One of the center’s aims is to provide cultural programming. It sponsors lectures, musical performances, art exhibitions, films, and discussions on African and African American history and culture. The center also provides an office space for a scholarly journal, the Afro-Hispanic Review, edited by Vanderbilt faculty and graduate students.

Another of the center’s aims is student support and development. The center provides meeting spaces for numerous Vanderbilt student groups, including the Black Student Alliance, Every Nation Campus Ministries, and Vanderbilt Spoken Word. The center works with students on a wide range of campus projects and community service opportunities. The center also serves as an informal haven for students, with plenty of opportunities for fellowship and food.

One additional aim of the center is community outreach and service. To this end, the center reaches out to civic and cultural groups. The BJBCC facilitates tutoring and mentoring activities for young people from the Metro Nashville Public Schools, the YMCA, and other community agencies. VU students serve as tutors and mentors to young people in the Edgehill community. The center also helps promote student recruitment by hosting various pre-college groups.

The center houses a computer lab, a small library, a seminar room, an auditorium, a student lounge area, and staff offices. The center is open to all Vanderbilt students, faculty, and staff for programs and gatherings.

Margaret Cuninggim Women’s Center

As part of the Office of the Dean of Students, the Margaret Cuninggim Women’s Center welcomes all members of the Vanderbilt community to partake in our events and resources related to women’s and gender topics. Our Gender Matters program offers co-curricular programming aimed to increase awareness of the influence that gender has in our lives; in addition, Gender Matters provides individual support and advocacy around a variety of issues, including gender stereotyping, gender equity, students with children, body image, eating disorders, pregnancy and reproduction, sexual health, and more. The Women’s Center is open Monday through Friday, 8 a.m. to 5 p.m., and is located at 316 West Side Row. For more information, please call (615) 322-4843 or visit vanderbilt.edu/WomensCenter.

Office of LGBTQI Life

As a component of Vanderbilt’s Office of the Dean of Students, the Office of LGBTQI Life is a welcoming space for individuals of all identities and a resource for information and support about gender and sexuality. LGBTQI Life serves the entire Vanderbilt community through education, research, programming, support, and social events. Visitors are invited to use our DVD library for resources around LGBTQI issues and culture. In addition, LGBTQI Life conducts tailored trainings and consultations for the campus and community and coordinates the Safe Zone Ally program. The Office of LGBTQI Life is located in the K. C. Potter Center, Euclid House, 312 West Side Row. For more information, please visit vanderbilt.edu/lgbtqi.

Office of the University Chaplain and Religious Life

The Office of the University Chaplain and Religious Life provides opportunities to explore and practice religion, faith, and spirituality and to more deeply understand one’s personal values and social responsibility via educational programming, encounters with various faith perspectives, and engagement with religious and spiritual communities. The office welcomes
and serves all students, faculty, and staff and provides an intellectual home and ethical resource for anyone in the Vanderbilt community seeking to clarify, explore, and deepen understanding of their lives and/or faith.

Recognizing the importance of exploring one’s faith in community, the office facilitates opportunities for individuals of a shared faith to worship/practice their particular religious tradition. Whether guided by one of our affiliated chaplains or a student-run religious organization, these groups foster a sense of community and common values. For a complete listing of campus religious groups, resources, services, and programming opportunities, visit vanderbilt.edu/religiouslife.

Schulman Center for Jewish Life

The 10,000-square-foot Ben Schulman Center for Jewish Life is the home of Vanderbilt Hillel. The goal of the center is to provide a welcoming community for Jewish students at Vanderbilt and to further religious learning, cultural awareness, and social engagement. Vanderbilt Hillel is committed to enriching lives and enhancing Jewish identity. It provides a home away from home, where Jews of all denominations come together, united by a shared purpose. The Schulman Center is also home to Grin’s Café, Nashville’s only kosher and vegetarian restaurant. For further information about the Schulman Center, please call (615) 322-8376 or email hillel@vanderbilt.edu.

Parking, Vehicle Registration, and Alternative Transportation

Parking space on campus is limited. Motor vehicles operated on campus at any time by students, faculty, or staff must be registered with the Office of Traffic and Parking located in the Wesley Place garage. A fee is charged. Parking regulations are published annually and are strictly enforced. More information is available at vanderbilt.edu/traffic_parking.

Bicycles must be registered with the Vanderbilt University Police Department.

All Graduate School students can ride to and from the Vanderbilt campus free of charge on Nashville’s Metropolitan Transit Authority buses. To utilize this service, a valid student ID card is required for boarding the bus.

Psychological and Counseling Center

As part of the Vanderbilt University Medical Center, the PCC supports the mental health needs of all students to help them reach their academic and personal goals. Highly skilled and multidisciplinary staff collaborates with students to provide evidence-based treatment plans tailored to each individual’s unique background and needs. The PCC also emphasizes prevention through outreach and consultation focused on the development of the skills and self-awareness needed to excel in a challenging educational environment.

The PCC’s psychologists, licensed counselors, and psychiatric medical providers are available to any Vanderbilt student and address a range of student needs including stress management, crisis intervention, substance abuse counseling, management of medications, individual counseling, group counseling, biofeedback, emergency assessments, and psychiatric assessment and treatment. The PCC provides a team approach to the care of students with eating disorders and students who have experienced trauma as well as students needing both counseling and medication management. There is an on-call provider after hours and on weekends for emergency calls.

The PCC provides screening and full assessment when indicated for ADHD and learning disorders as well as assessment and support for reading and study skills.

A prevention program regarding substance use called BASICS is provided by the PCC. Students who have questions about their level of use may request an assessment through BASICS to learn more about risk related to substance use.

Students are encouraged to make contact with the PCC prior to the start of the school year if they have a history of mental health care needs. This will help facilitate the transition of care and ensure that students are fully aware of PCC resources. Contact the center at (615) 322-2571 for more information.

There is no charge for services with the exceptions of reduced fees for LD/ADHD screening and assessment. Over the course of a year, approximately 20 percent of the Vanderbilt student population will seek out the services of the PCC.

Throughout the year, the PCC outreach coordinator and other PCC staff also produce presentations, including educational programs, thematic presentations, and special events, focused on education of the Vanderbilt community about mental health issues and resources. The PCC is proud to provide a program focusing on suicide prevention and mental health awareness at Vanderbilt called MAPS: Mental Health Awareness and the Prevention of Suicide.

For more information, visit medschool.vanderbilt.edu/pcc.

Project Safe Center

The Project Safe Center (PSC) partners with students, faculty, and staff to create a campus culture that rejects sexual misconduct and sexual violence, and serves as a resource for all members of the Vanderbilt community. Operating under the auspices of the Office of the Dean of Students, the center is charged with supporting survivors of sexual violence and engaging the campus community in bystander intervention efforts and sexual assault prevention.

The Green Dot Campaign, a bystander intervention program used on the campuses of colleges and universities nationwide, and Vanderbilt University’s Personal Empowerment Through Self Awareness (VU PETSAM), an online education module addressing the issue of power-based violence, are available through the PSC. A 24/7 resource and support hotline is also available through the center at (615) 322-SAFE (7233).

The Project Safe Center located at 304 West Side Row is open Monday through Friday, 8:00 a.m. to 5:00 p.m. For more information, call (615) 322-6400 or visit medschool.vanderbilt.edu/project_safe.

Student Health Center

The Student Health Center provides primary care services for students and is staffed by physicians, nurse practitioners, nurses, and a lab technician. The Student Health Center provides services similar to those provided in a private physician’s office or HMO, including routine medical care, specialty care (e.g., nutrition and sports medicine), and some routine lab tests. Most of the services students receive at the Student Health Center are pre-paid, but those services that are not are the responsibility of students to coordinate with their health insurance.

When the university is in session, during fall and spring semesters, the Student Health Center is open Monday through Friday from 8:00 a.m. to 4:30 p.m., and Saturdays from 8:30 a.m. to noon. Students should call ahead to schedule an appointment at (615) 322-2427. Students with urgent problems will be seen on
a same-day basis. They will be given an appointment that day, or “worked in” on a first-come, first-served basis if no appointments are available.

Emergency consultations services (at (615) 322-2427) are available 24 hours a day, 7 days a week from on-call professionals. For more detailed information on the services available at the Student Health Center and information on other health-related topics, please visit the Student Health Center website at medschool.vanderbilt.edu/student-health.

Immunization Requirements

The State of Tennessee requires certain immunizations for all students on university campuses. As such, Vanderbilt University will block student registration for those who are not in compliance with the requirements.

The requirements include:

1. Varicella vaccine (two injections) is required for all students who have not had documented chickenpox. Any waivers for this vaccine are very strict, and include only certain religious or medical exemptions that must be approved by the medical director of the Student Health Center. For more information regarding this waiver, please call the director’s assistant at (615) 322-2254 or email studenthealth@vanderbilt.edu.

2. Measles, mumps, and rubella (2 injections) for all incoming students. Any waivers for this vaccine are very strict, and include only certain religious or medical exemptions that must be approved by the medical director of the Student Health Center. For more information regarding this waiver, please call the director’s assistant at (615) 322-2254 or email studenthealth@vanderbilt.edu.

The Student Health Center requires all incoming students to complete a Health Questionnaire that includes further information regarding the state-mandated vaccinations, as well as information on other strongly recommended vaccinations.

Information regarding this Health Questionnaire is communicated to students by email after admission to Vanderbilt University. This Health Questionnaire must be returned to the Student Health Center by June 1 with vaccination information.

Students should go to medschool.vanderbilt.edu/student-health/immunization-requirements in order to access more information regarding the immunization requirements. This site also contains links to the PDFs of the required forms.

All vaccines can be administered at either a private provider office or at the Student Health Center.

Student Injury and Sickness Insurance Plan

All students registered in degree programs for 4 or more credit hours, or who are actively enrolled in research courses (including but not limited to dissertation or thesis courses) that are designated by Vanderbilt University as full-time enrollment are required to have health insurance coverage. The university offers a sickness and injury insurance plan that is designed to provide hospital, surgical, and major medical benefits. A brochure explaining the limits, exclusions, and benefits of insurance coverage is available to students online at gallagherstudent.com/vanderbilt or medschool.vanderbilt.edu/student-health/student-health-insurance

The annual premium is in addition to tuition and is automatically billed to the student’s account. Coverage extends from August 12 until August 11 of the following year, whether a student remains in school or is away from the university.

A student who does not want to subscribe to the insurance plan offered through the university must complete an online waiver process at gallagherstudent.com/vanderbilt. This process must be completed by August 1 for students enrolling in the fall for annual coverage. Newly enrolled students for the spring term must complete the online waiver process by January 2. The online waiver process indicating comparable coverage must be completed every year by August 1 in order to waive participation in and the premium for the Student Injury and Sickness Insurance Plan.

Family Coverage: Students who want to obtain coverage for their families (spouse, children, or domestic partner) may do so at gallagherstudent.com/vanderbilt. Additional premiums are charged for family health insurance coverage and cannot be put on a student’s VU account.

International Student Coverage

International students and their dependents residing in the United States are required to purchase the university’s international student injury and sickness insurance. If you have other comparable insurance and do not wish to participate in the Student Injury and Sickness Insurance Plan offered through the university, you must complete an online waiver form (gallagherstudent.com/vanderbilt) indicating your other insurance information. This online waiver form must be completed no later than September 7 or you will remain enrolled in the plan offered by the university and will be responsible for paying the insurance premium. This insurance is required for part-time as well as full-time students.

Services for Students with Disabilities

Vanderbilt is committed to the provisions of the Rehabilitation Act of 1973 and Americans with Disabilities Act as it strives to be an inclusive community for students with disabilities. Students seeking accommodations for any type of disability are encouraged to contact the Equal Opportunity, Affirmative Action, and Disability Services Department. Services include, but are not limited to, extended time for testing, assistance with locating sign language interpreters, audiotaped textbooks, physical adaptations, notetakers, and reading services. Accommodations are tailored to meet the needs of each student with a documented disability. The Equal Opportunity, Affirmative Action, and Disability Services Department also investigates alleged violations of Vanderbilt’s nondiscrimination and anti-harassment policies. Specific concerns pertaining to services for people with disabilities or any disability issue should be directed to the Disability Program Director, Equal Opportunity, Affirmative Action, and Disability Services Department (EAD), PMB 401809, 2301 Vanderbilt Place, Nashville, Tennessee 37240-1809; phone (615) 322-4705 (V/TDD); fax (615) 343-0671; vanderbilt.edu/ead.

Student Records (Family Educational Rights and Privacy Act)

Vanderbilt University is subject to the provisions of federal law known as the Family Educational Rights and Privacy Act (also referred to as FERPA). This act affords matriculated students certain rights with respect to their educational records. These rights include:

1. The right to inspect and review their education records within 45 days of the day the University receives a request for access. Students should submit to the University Registrar written requests that identify the
record(s) they wish to inspect. The University Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected. If the University Registrar does not maintain the records, the student will be directed to the University official to whom the request should be addressed.

2. The right to request the amendment of any part of their education records that a student believes is inaccurate or misleading. Students who wish to request an amendment to their educational record should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the student will be notified of the decision and advised of his or her right to a hearing. These exceptions include:

- Disclosure to school officials with legitimate educational interests. A “school official” is a person employed by the University in an administrative, supervisory, academic or research, or support-staff position (including University law enforcement personnel and health staff; contractors, consultants, and other outside service providers with whom the University has contracted; a member of the Board of Trust; or a student serving on an official University committee, such as the Honor Council, Student Conduct Council, or a grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

- Disclosure to parents if the student is a dependent for tax purposes.

- Disclosure to appropriate individuals (e.g., parents/guardians, spouses, housing staff, health care personnel, police, etc.) where disclosure is in connection with a health or safety emergency and knowledge of such information is necessary to protect the health or safety of the student or other individuals.

- Disclosure to a parent or legal guardian of a student, information regarding the student’s violation of any federal, state, or local law, or of any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance if the University has determined that the student has committed a disciplinary violation with respect to the use or possession and the student is under the age of 21 at the time of the disclosure to the parent/guardian.

FERPA provides the University the ability to designate certain student information as “directory information.” Directory information may be made available to any person without the student’s consent unless the student gives notice as provided for, below. Vanderbilt has designated the following as directory information: the student’s name, addresses, telephone number, email address, student ID photos, major field of study, school, classification, participation in officially recognized activities and sports, weights and heights of members of athletic teams, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended by the student, and other information that would not generally be considered harmful or an invasion of privacy if disclosed. Any student who does not wish disclosure of directory information should notify the University Registrar in writing. No element of directory information as defined above is released for students who request nondisclosure except as required by statute.

The request for nondisclosure does not apply to class rosters in online class management applications, or to residential rosters—or rosters of groups a student may join voluntarily—in online, co-curricular engagement applications, or rosters of other information on the websites of student organizations that a student may join. Neither class rosters in online class management applications, nor residential rosters in online co-curricular engagement applications, are available to the public.

As of January 3, 2012, the U.S. Department of Education’s FERPA regulations expand the circumstances under which students’ education records and personally identifiable information (PII) contained in such records—including Social Security Numbers, grades, or other private information—may be accessed without consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities ("Federal and State Authorities") may allow access to student records and PII without consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is "principally engaged in the provision of education," such as early childhood education and job training, as well as any program that is administered by an education agency or institution.

Second, Federal and State Authorities may allow access to education records and PII without consent, to researchers performing certain types of studies, in certain cases even when the University objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the third parties that they authorize to receive PII, but the Authorities need not maintain direct control over the third parties.

In addition, in connection with Statewide Longitudinal Data Systems, State Authorities may collect, compile, permanently retain, and share without student consent, PII from education records, and may track student participation in education and other programs by linking such PII to other personal information that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

If a student believes the University has failed to comply with FERPA, he or she may file a complaint using the Student Complaint and Grievance Procedures as outlined in the Student Handbook. If dissatisfied with the outcome of this procedure, students may file a written complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202-5920.

Questions about the application of the provisions of the Family Educational Rights and Privacy Act should be directed to the University Registrar or to the Office of General Counsel.

Vanderbilt Directory

Individual listings in the online People Finder Directory consist of the student’s full name, school, academic classification, local phone number, email address, local address, box number, and permanent address.

Student listings in the People Finder Directory are available to the Vanderbilt community via logon ID and e-password. Students may choose to make their online People Finder listings available to the general public (i.e., viewable by anyone with access to the Internet), to add additional contact information such as cell phone, pager, and fax numbers, or to block individual directory items.

Students who have placed a directory hold with the University Registrar will not be listed in the online directory. Directory information should be kept current.

Students may report address changes, emergency contact information, and missing person contact information via the
Vanderbilt Child and Family Center

The Vanderbilt Child and Family Center supports the health and productivity of the Vanderbilt community by providing resource and referral services and quality early childhood education and care to the children of faculty, staff, and students. The center’s website at childandfamilycenter.vanderbilt.edu provides information concerning child care, elder care, summer camps, tutoring services, and school-age child care. Parents in a Pinch and the Vanderbilt Sitter Service provide back-up care options for dependents of all ages and evening, night, and weekend care. The Child Care Center serves children ages six weeks through five years. Applications for the waiting list may be downloaded from the website. The Family Center offers a monthly latchkey series, Boomers, Elders, and More, and a caregiver support group.

Vanderbilt University Police Department

The Vanderbilt University Police Department, (615) 322-2745, is a professional law enforcement agency dedicated to the protection and security of Vanderbilt University and its diverse community (police.vanderbilt.edu).

The Vanderbilt University Police Department comes under the charge of the Office of the Vice Chancellor for Administration. As one of Tennessee’s larger law enforcement agencies, the Vanderbilt University Police Department provides comprehensive law enforcement and security services to all components of Vanderbilt University including the academic campus, Vanderbilt University Medical Center, Vanderbilt Health at One Hundred Oaks, and a variety of university-owned facilities throughout the Davidson County area.

The Police Department includes a staff of more than one hundred people, organized into four bureaus: Office of the Chief, Administrative Services, Support Services, and Patrol (Main Campus and Medical Center). All of Vanderbilt’s commissioned police officers have completed officer training at a state-certified police academy and are required to complete on-the-job training as well as attend annual in-service training. Vanderbilt police officers hold Special Police Commissions and have the same authority as that of a municipal law enforcement officer, while on property owned by Vanderbilt, on adjacent public streets and sidewalks, and in nearby neighborhoods. When a Vanderbilt student is involved in an off-campus offense, police officers may assist with the investigation in cooperation with local, state, or federal law enforcement. The department also employs non-academy-trained officers called community service officers (commonly referred to as CSOs) who lend assistance 24/7 to the Vanderbilt community through services that include providing walking escorts, providing jump starts, and unlocking cars. For non-emergency assistance from a community service officer, dial (615) 322-2745 (2-2745 from an on-campus extension).

The Vanderbilt University Police Department provides several services and programs to members of the Vanderbilt community:

- **Vandy Vans**—The Vanderbilt University Police Department administers the Vandy Vans escort system at Vanderbilt University. The Vandy Vans escort system provides vehicular escorts to designated locations on campus. The service consists of vans that operate from 5:00 p.m. to 5:00 a.m. GPS technology allows students to track Vandy Vans on their route via computer or mobile phone, and to set up text message alerts to let them know when a van will be arriving at their stop.

- **Stop locations** were chosen based on location, the accessibility of a secure waiting area, and student input. Signs, freestanding or located on existing structures, identify each stop. A walking escort can be requested to walk a student from his/her stop to the final destination. A van is also accessible to students with mobility impairments. For complete information about the Vandy Vans service, including routes, stops, and times, please visit vandyvans.com or call (615) 322-2558.

- **As a supplement to the Vandy Vans service, walking escorts are available for students walking to and from any location on campus during nighttime hours. Walking escorts are provided by VUPD officers. The telephone number to call for a walking escort is (615) 421-8888, or 1-8888 from a campus phone, after which, a representative from VUPD will be dispatched to the caller’s location, or to a designated meeting point to accompany the caller to his or her destination.**

- **Emergency Phones**—Emergency telephones (Blue Light Phones) are located throughout the university campus, medical center, and 100 Oaks.

  Each phone has an emergency button that when pressed automatically dials the VUPD Communications Center. An open line on any emergency phone will activate a priority response from an officer. An officer will be sent to check on the user of the phone, even if nothing is communicated to the dispatcher. Cooperation is essential to help us maintain the integrity of the emergency phone system. These phones should be used only for actual or perceived emergency situations.

  An emergency response can also be activated by dialing 911 from any campus phone. Cell phone users can dial (615) 421-1911 to summon an emergency response on campus. Cell phone users should dial 911 for off-campus emergencies. Callers should be prepared to state the location from which they are calling.

- **Security Notices**—In compliance with the U.S. Department of Higher Education and the Jeanne Clery Act, Security Notices are issued to provide timely warning information concerning a potentially dangerous situation on or near Vanderbilt University. This information is provided to empower our students and employees with the information necessary to make decisions or take appropriate actions concerning their own personal safety. Security Notices are distributed throughout Vanderbilt to make community members aware of significant crimes that occur at the university. They are distributed through Vanderbilt email lists and through the department’s webpage, police.vanderbilt.edu/crime-info/crime-alerts.

- **Educational and Assistance Programs**—The Community Relations Division of Vanderbilt University Police Department offers programs addressing issues such as sexual assault, domestic violence, workplace violence, personal safety, RAD (Rape Aggression Defense) classes, and victim assistance. VUPD provides additional services including property registration (for bikes, laptops, etc.), lost and found, weapons safekeeping, and Submit a Crime Tip. For further information on available programs and services, call (615) 322-2558 or visit police.vanderbilt.edu.

  Additional information on security measures and crime statistics for Vanderbilt is available from the Vanderbilt University Police Department, 2800 Vanderbilt Place, Nashville, Tennessee 37212. Information is also available at police.vanderbilt.edu.

- **Annual Security Report**—The Vanderbilt University Annual Security Report is published each year to provide you with information on security-related services offered by the university and campus crime statistics in compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus

This booklet is prepared with information provided by the Nashville Metropolitan Police Department, the Department of Student Athletics, Office of the Dean of Students, the Office of Housing and Residential Education, and the Vanderbilt University Police Department. It summarizes university programs, policies, and procedures designed to enhance personal safety for everyone at Vanderbilt.

A copy of this report may be obtained by writing or calling the Vanderbilt University Police Department, 2800 Vanderbilt Place, Nashville, Tennessee 37212 or by telephone at (615) 343-9750. This report may also be obtained on the website at police.vanderbilt.edu/annual-security-report.

Extracurricular Activities

Student Centers

A variety of facilities, programs, and activities are provided in four separate student center locations—Alumni Hall, Kissam Center, Sarratt Student Center|Rand Hall, and the Student Life Center.

Sarratt Student Center|Rand Hall is the main student center hub, housing a 300-seat cinema, art gallery, art studios, multicultural space, rehearsal rooms, large lounge spaces, large and small meeting spaces, and a courtyard. The facility is also home to Vanderbilt Student Communications, radio station, TV station, Last Drop Coffee Shop, and the Pub at Overcup Oak restaurant. Rand Hall houses the Rand Dining Center, campus store, student-operated businesses, the Anchor (student organization space), a multipurpose venue, meeting and seminar rooms, plus large, open lounge space. Some of the offices located in Sarratt Student Center|Rand Hall include the Dean of Students, Greek Life, Leadership, and the Office of Active Citizenship and Service. Also included in this facility is a Ticketmaster™ outlet.

The Vanderbilt Student Life Center is the university’s community keystone. It is both the fulfillment of students’ vision to have a large social space on campus and a wonderful complement to Sarratt Student Center|Rand Hall. The Student Life Center has more than 18,000 square feet of event and meeting space, including the 9,000-square-foot Commodore Ballroom, which is one of the most popular spaces to have events on campus. The center is also home to the Center for Student Professional Development, International Student and Scholar Services, Global Education Office, and Vanderbilt International Office.

Alumni Hall is a recent addition to the Vanderbilt student centers family, although it was actually the original student center on campus when the building opened in 1925. Re-opened in fall 2013 after a yearlong renovation that transformed every space in the facility, Alumni Hall has returned to its role as a student center after serving other purposes over the years. In the newly renovated Alumni Hall, students now have access to an exercise room as well as several new meeting and event spaces and a new dining option known as Bamboo Bistro. Offices in the building include the Tutoring Center, Writing Studio, and the new Vanderbilt Institute of Digital Learning.

Opening in fall 2014, Kissam Center will be the fourth student center, located near the new Warren College and Moore College residential living-learning communities. A completely new facility, Kissam Center will be home to more meeting and event spaces as well as another dining option for students on campus.

Recreation and Sports

Graduate and professional students are encouraged to participate in the many physical activity classes, intramurals, and sport clubs offered by the university. All students pay a mandatory recreation fee which supports facilities, fields, and programs (see the chapter on Financial Information). Spouses must also pay a fee to use the facilities.

Physical activity classes offered include racquetball, fly fishing, and lifeguarding/CPR/first aid, along with rock climbing and kayaking. Forty-five sport clubs provide opportunity for participation in such favorites as sailing, fencing, rugby, and various martial arts.

The university recreation facilities include gymnasiums, tracks, and two softball diamonds. The three lighted multipurpose playing fields are irrigated and maintained to assure prime field conditions.

The Vanderbilt Recreation and Wellness Center is 289,000 square feet and houses a 36 meter x 25 yard swimming pool; four courts for basketball, volleyball, and badminton; six racquetball and two squash courts; a four-lane bowling alley; more than 14,000 square feet of weight/fitness room space; a wood-floor activity room; a rock-climbing wall; a mat room; seven multipurpose rooms; locker rooms; and a wellness center. The field house includes a 120 yard turf field surrounded by a 300 meter indoor track. An outside sand volleyball court and an Outdoor Recreation facility complement the VRWC. The facility is available for varsity teams, intramural sports, club sports, and informal recreation.

For additional information, please visit vanderbilt.edu/recreationandwellnesscenter.
Academic Programs

THE Graduate School accepts candidates for advanced degrees in more than fifty fields. The following table lists degree programs and the degrees available. Please note that many of the programs listed below awarding a master’s degree do not allow admission for a terminal master’s degree. Please check the particular program for further information. A page reference indicates the location in this catalog of the program description and course offerings.

</tbody>
</table>
Courses of study on the graduate level are offered in a number of areas in which graduate degrees are not offered. Such courses are available as minor work and are described in this catalog’s Courses of Study section.

Vanderbilt also offers professional degrees in business administration, divinity, education and human development, engineering, law, management, medicine, nursing, and public policy. Descriptions of these programs may be found in other Vanderbilt catalogs.

Special Programs

Graduate Program in Economic Development
The Graduate Program in Economic Development (GPED) is a professionally oriented master's program in economics preparing students for both domestic and international careers in economic development. The curriculum contains five courses—microeconomics, macroeconomics, statistics, econometrics, and a one-semester research project—and five electives. The program offers courses on a wide range of subjects including: international trade, project evaluation, policy analysis, and development economics. Students may also take courses in other areas of economics, business, finance, and public policy.

Center for Latin American Studies
The university offers a program of graduate instruction and specialized research that relates the disciplines of the social sciences and humanities to Latin America, with emphasis on Brazil, Colombia, Venezuela, Peru, and Mexico. A joint degree program in which students may earn the M.B.A. and M.A. degrees is available through the Center for Latin American Studies and the Owen Graduate School of Management. For further information, see Latin American Studies in the Courses of Study section.

Master of Fine Arts in Creative Writing
The English department’s M.F.A. in creative writing offers writing workshops and supervision in the composition of creative work. Students are required to take a complement of literature courses along with their workshops. The goal of the M.F.A. program is to produce creative writers with a broad and deep knowledge of their genres.

Applicants for the M.F.A. must submit scores in the General Test of the Graduate Record Examination, a college transcript, a manuscript of creative work, a statement of purpose, and three letters of recommendation. For more details see Vanderbilt’s M.F.A. website: vanderbilt.edu/english/mfa.

Requirements for the M.F.A. include 42 to 48 hours of course work, a thesis of creative work (a novel, a book of short stories, a collection of poems, or a collection of personal essays), plus an oral defense of the thesis. The course work includes 16 hours of graduate workshops (one per semester for four semesters). Literature courses might consist of 200-level courses taken for graduate credit, for which 3 hours would be given. M.F.A. students may petition the director of graduate studies in the Department of English for admission to 300-level courses other than English 303, 304, 305, 307, or 370.

Master of Liberal Arts and Science
The master of liberal arts and science (M.L.A.S.) degree offers part-time adult students the intellectual stimulation of post-baccalaureate course work at a time in their lives when they can contemplate great ideas and enduring questions and measure them against their own life experiences. In discussion with other adult students under the leadership of distinguished faculty members, they are encouraged to look beyond disciplinary boundaries and explore connections that more specialized undergraduate degrees and focused career responsibilities may have obscured. Students often discover important professional and career benefits as well as personal development in earning a master of liberal arts and science degree. The requirements and curriculum provide flexibility in program design and course selection, and the tuition, scheduling, admission, and registration procedures acknowledge the special circumstances of the part-time adult student.

Courses are taught by tenured Vanderbilt faculty members (and, perhaps, some distinguished emeritus faculty) carefully selected for their recognized abilities as teachers and their special interest in the M.L.A.S. program. Each course meets one evening a week throughout the semester. Classes are limited in size to encourage optimal student-student and student-faculty interaction.

The master of liberal arts and science is awarded by the Graduate School and administered by the Dean’s Office of the College of Arts and Science. For more information contact the director of the M.L.A.S. program in the College of Arts and Science.

Joint Master of Arts in Latin American Studies and Master of Laws
The joint M.A./LL.M. program will allow law students interested in international law in Latin America to gain the cultural, political, and economic background that they will need to work there. Students entering the program will have to be accepted by both the Law School and the Graduate School. At present, to apply to the LL.M. program, students must not be U.S. citizens and must already have a J.D. degree (or its equivalent from their home country). Students successfully completing the program will receive an M.A. in Latin American Studies (following an established non-thesis option) and an LL.M. from the Law School (includes writing a thesis).
Medical Scientist Training Program (M.D./Ph.D.)

A combined course of study leading to the M.D. and Ph.D. degrees is offered through Vanderbilt School of Medicine and Vanderbilt Graduate School. The program facilitates the development of teachers and medical investigators in clinical and basic medical sciences. Six to seven calendar years are usually required for completion of the combined degree program.

All candidates must meet both School of Medicine and Graduate School requirements for matriculation and graduation. Candidates are admitted into the program by the deans of the two schools upon the recommendation of the Medical Scientist Training Program Committee. After their acceptance in the program, students must select and be accepted into the graduate program of an affiliated department. The graduate programs currently affiliated with the Medical Scientist Training Program are biochemistry, biological sciences, biomedical engineering, cancer biology, cell and developmental biology, cellular and molecular pathology, microbiology and immunology, molecular physiology and biophysics, neuroscience, and pharmacology.

M.D./Ph.D. students must pass the qualifying examination for the Ph.D. degree and present an acceptable dissertation within their field of study in the usual manner. Most M.D./Ph.D. students begin full-time study and research for the Ph.D. degree after the second year in medical school and complete the dissertation research before entering the third year of medical study.

Courses in Professional Degree Programs

Students may include in their programs of study certain professional degree courses offered by other schools in the university. They register for these courses through the Graduate School and often do additional work appropriate for a research degree. Six hours of such credit may be applied to a master’s degree program and 12 hours to a Ph.D. program. Students must obtain written approval from their adviser, from the other school, and from the Graduate School. The courses may constitute part of the major or minor field, as approved by the student’s adviser.

Individualized Programs

Students with special course goals should inquire in the Graduate School office about the possibility of individualized, interdisciplinary programs of study leading to the master’s and Ph.D. degrees. The Graduate School may permit programs that combine several disciplines in unique ways. Financial support for individualized programs must be arranged with specific faculty members as there are no program or departmental financial awards available.

Master’s and Ph.D. students may not apply for admission to the individualized program until they have been admitted to and enrolled in a department currently offering that degree. Except under extraordinary circumstances, interested students will be expected to apply, or make preliminary inquiry, to the Graduate School during their first year of graduate studies.

Combined B.A./M.A. (4+1) Program

The College of Arts and Science in collaboration with the Graduate School offers students in most departments and programs the opportunity to earn both the bachelor’s degree and the master’s degree in a shorter period of time and at less cost than is normally the case. Exceptional students in the College of Arts and Science can obtain both degrees in an expedited period, typically within but not less than five years.

The usual period of study for both the bachelor’s and the master’s degree is six years. Through the 4+1 option, the student and her or his adviser plan a five-year program of study. It is important to note that there is no provision for obtaining both degrees in a period shorter than five years. The program is intended for selected students for whom the master’s degree is sufficient preparation for their career goals, is desirable as a goal in itself, or is viewed as additional preparation before pursuing a doctorate or a professional degree.

The areas of study available for the Combined B.A./M.A. (4+1) option within Arts and Science are determined by individual departments and programs, who also determine the policies and guidelines to be followed. Students will be admitted to the Combined B.A./M.A. program only by approval of the department or program.

Programs of Study

The 4+1 option is currently available in the following departments and programs: English; French; German; history; Latin American studies; mathematics; medicine, health, and society; philosophy; political science; and psychology. Students are welcome to discuss the Combined B.A./M.A. (4+1) option with any of these departments and programs.

Admissions Overview

The Integrated B.A./M.A. program allows Vanderbilt University students to study for both degrees often, but not necessarily, in the same department. Undergraduates with strong academic records may apply for admission to the program after the first semester of their junior year. Qualifying students are normally accepted into the program in the second semester of the junior year.

To apply for admission, students will first consult with Associate Dean Martin Rapisarda, and then submit to the prospective graduate department or program a “Petition to Apply to the Combined B.A./M.A. (4+1) Degree Program” (available at vanderbilt.edu/aplus1), a statement of purpose, a formal application to the Graduate School, a preliminary program proposal, two letters of recommendation from Vanderbilt faculty, and a current transcript. Application forms can be completed online at vanderbilt.edu/gradschool/prospective_students/apply_online. GRE scores or other admissions requirements may be specified by the prospective department. Admission to the 4+1 option is highly selective. An accomplished academic record, a demonstrated commitment to pursue graduate study, and a strong endorsement from Vanderbilt faculty are key elements to the successful applicant. Students will be provisionally accepted as Graduate School students, pending completion of all undergraduate requirements. Graduate student status will apply in the fifth year.

Scholarships and Financial Aid

Students who are receiving scholarships or other forms of financial aid as a Vanderbilt undergraduate are advised that such aid applies in most cases only toward the completion of the bachelor’s degree or the first four years of their studies (which may include their taking some graduate courses during their senior year). Students wishing to pursue the 4+1 option should seek support for their fifth year of study through
student loans and other financial aid. For additional information, consult the website vanderbilt.edu/4plus1.

**Accelerated Graduate Program in Engineering**

Students who enter Vanderbilt with a significant number of credits (20 to 30 hours), earned either through Advanced Placement Tests or in college courses taken during high school, may be eligible for the Accelerated Graduate Program in Engineering. Through this program, a student is able to earn both a bachelor’s degree and an M.S. degree in about the same time required for the bachelor’s degree. To be eligible for the program a student must complete 86 hours (senior standing) by the end of the sophomore year with at least a 3.5 grade point average. With the approval of the faculty in their major department, students apply through the Associate Dean for Research and Graduate Studies for provisional admission and take one course approved for graduate credit each semester of the junior year. These courses will be credited toward the M.S. degree. Upon successful completion of these courses, the student is admitted to the Graduate School.

During the fourth year the student takes three courses (9 hours) for graduate credit each semester, and the remaining 6 to 10 undergraduate hours required for the bachelor’s degree. The student receives the bachelor’s degree at the end of the fourth year and spends the summer finishing a master’s thesis to complete the M.S. degree. Further information can be obtained from the chair of the student’s major department.

**Summer Session**

Information concerning the summer session may be found on the Graduate School webpages at vanderbilt.edu/gradschool and at vanderbilt.edu/summersessions. A summer session announcement in mid-March of each year will describe the registration procedures. Students may log in to YES (Your Enrollment Services) to view the schedule which lists the limited course offerings.
Admission

QUALIFIED applicants with bachelor’s or comparable non-U.S. degrees are eligible for admission to the Graduate School. Applications from international students with three-year bachelor’s degrees will also be considered. Admission is competitive and students are selected on the basis of their scholastic preparation and intellectual capacity.

Generally, minimum requirements for admission are these: an applicant should have completed or soon will complete a course of study equivalent to that required for the bachelor’s degree at an accredited institution, maintained a minimum of a B average in undergraduate work, and maintained a B average in the field of expected graduate concentration. Individual programs in the Graduate School have additional requirements for admission.

Application for admission may be made electronically through the Graduate School website (vanderbilt.edu/gradschool). Those unable to use our online application should contact the Graduate School for a printable application. There is no application fee for electronic applications.

Applicants must upload an unofficial copy of transcripts from prior undergraduate and graduate work as part of their online application for admission. Official transcripts are required only after an offer of admission is made and accepted.

Deadlines for fall admission range between December and January 15. Applicants should verify the deadline for the program to which they wish to apply by checking the website for that department or program. Typically, admission decisions for fall semester will be communicated by March 31 to all applicants whose files are complete by January 15.

The deadline for responses to offers of financial aid and admission is April 15. If your reply is not received by April 15, the department may rescind the offer of admission and financial award.

Most programs do not admit students for the spring semester. Please check with the program in which you are interested before applying for spring semester admission.

Students seeking admission for the spring semester should file applications no later than November 1. Decisions are usually announced before December 1.

Further information regarding the application and admissions process is available at vanderbilt.edu/gradschool.

Graduate Record Examination

Submission of scores on the General Test of the Graduate Record Examination (GRE) is required as part of the application to the Graduate School. Some departments also require a report of the score on the Subject Test of the GRE before an application will be considered.

Information concerning the GRE may be obtained from Graduate Record Examinations, Educational Testing Service, Box 6000, Princeton, New Jersey 08541-6000, U.S.A., or the GRE website at gre.org.

Master of Liberal Arts and Science

Candidates for admission to the M.L.A.S. degree program must present to the Graduate School a formal application, two letters of recommendation, a short essay on “Why this degree? Why now?” and a transcript indicating a completed course of study equivalent to that required for a bachelor’s degree at an accredited institution, with a minimum of a B average in all undergraduate work (or significant life/work achievement that could compensate for a lower grade point average). Graduate Record Examination scores are not required. After receipt of all materials, the director of the program will interview all prospective students.

International Students

Vanderbilt has a large international community representing approximately one hundred countries. The university welcomes the diversity that international students bring to the campus and encourages academic and social interaction at all levels. International applicants who are offered admission will be contacted by the Vanderbilt Office of International Student and Scholar Services (ISSS) with instructions for initiating the visa process.

English Language Proficiency. Proficiency in written and oral English is required for enrollment in an academic program. Applicants whose native language is not English must present the results of the Test of English as a Foreign Language (TOEFL) with the application, unless they have earned a degree from an American or English-speaking institution.

International students transferring from unfinished degree programs of other universities in the United States should present TOEFL scores. The International TOEFL is administered at test centers throughout the world at different times during the year. You may access information regarding the TOEFL exam, including registration and sample tests, at ets.org/toefl. Inquiries and requests for application forms should be addressed to TOEFL, Box 6151, Princeton, New Jersey 08541-6151 USA.

The minimum acceptable score on the paper-based Test of English as a Foreign Language is 570, and for the Internet-based test, 88. Many programs, however, require a considerably higher level of proficiency.

Although IELTS (International English Language Testing System) test scores are not required, applicants who have taken the IELTS can report their scores in the online application.

English Instruction. Applicants whose proficiency in English is low or marginal may be asked to enroll in an English language program before beginning academic studies. Vanderbilt offers such a program at its English Language Center (ELC). Intensive, semi-intensive, or part-time English study is offered throughout the year. Noncredit enrollment in at least one academic course may be recommended while the student is improving proficiency in English. Academic studies for credit may begin after recommendation by ELC in consultation with the student’s academic adviser. For more information, write to ELC, Vanderbilt University, Peabody #510, 230 Appleton Place, Nashville, Tennessee 37203-5721, USA; vanderbilt.edu/ELC.
Financial Resources. To meet requirements for entry into the United States for study, applicants must demonstrate that they have sufficient financial resources to meet expected costs of their educational program. Applicants must provide documentary evidence of their financial resources before visa documents can be issued.

United States laws and regulations restrict the opportunity for international students to be employed. International students may work up to twenty hours per week on campus. Students may be allowed to work off campus only under special circumstances. Many spouses and dependents of international students are not allowed to be employed while in the United States.

Injury and Sickness Insurance. International students are encouraged to purchase the university’s international student injury and sickness insurance. The student must provide proof of coverage that is equal to or greater than that in the university-sponsored policy. Information concerning the limits, exclusions, and benefits of this insurance coverage may be obtained from Student Health Services or from International Student and Scholar Services.

Information. Assistance in nonacademic matters before and during the international student’s stay at Vanderbilt is provided by International Student and Scholar Services, Vanderbilt University, Student Life Center, 310 25th Avenue South, Suite 103, Nashville, Tennessee 37240, USA; vanderbilt.edu/iss.
Financial Information

Tuition in the Graduate School for 2014/2015 is charged at the rate of $1,782 per semester hour with a minimum tuition charge of $200 per semester.

Tuition and fees are set annually by the Board of Trust and are subject to review and change without further notice.

Students who have completed the hours required and who are conducting research full time, register for thesis or dissertation research without hourly credit and are subject to a minimum tuition charge of $200 per semester.

Master of Liberal Arts and Science Courses

Students in the M.L.A.S. program pay one-half of the regular graduate tuition rate for M.L.A.S. courses and full tuition for courses selected from the regular curriculum. M.L.A.S. course tuition for 2014/2015 is $2,673 per 3-hour course.

Supplemental Tuition and Continuous Registration

Continuous registration is required of all full-time degree candidates until the required number of course work hours have been completed. Responsibility to maintain registration rests with the student. To retain student status, individuals must register each fall and spring semester or secure an approved leave of absence. A person is in student status only if:

- registered, or
- on authorized leave of absence

A student who has completed the formal course work required for the degree may, with approval of the student’s department and the Graduate School, conduct full-time thesis or dissertation research away from the university and register for research hours needed for the degree. Tuition is charged at the current rate per semester hour, or $200 per semester if the student has completed the hours required for the degree.

In general, individuals who have completed the number of hours required for the degree and who are employed full time are not eligible to register as full-time students. Such persons pursuing the Ph.D. degree may register as half-time students if they are devoting a minimum of 20 hours per week to dissertation research and their program offers the half-time research course (3995) for a $200 per semester fee.

A former student wanting to re-enter the Graduate School must apply for reinstatement, which is granted only on the recommendation of the student’s graduate program and with approval of the Graduate School.

Payment of Tuition and Fees

Tuition, fees, and all other university charges incurred prior to or at registration are due and payment must be received by August 13 for the fall semester and January 2 for the spring semester. All charges incurred after classes begin are due and payment must be received in full by the last business day of the month in which they are billed to the student. If payment is not made within that time, Commodore Cash and Meal Money will not be available and your classes may be canceled. Visit vanderbilt.edu/stuacct for payment options.

Students/Guarantors will be responsible for payment of all costs, including reasonable attorney fees and collection agency fees, incurred by the university in collecting monies owed to the university. The university will assess a $25.00 fee for any check or e-payment returned by the bank and reserves the right to invoke the laws of the State of Tennessee governing bad check laws.

E-Billing and Access to a Student’s Vanderbilt Account

Vanderbilt exclusively uses convenient and secure electronic billing (e-bills) for student account charges. Students may need to take action to enable parents, guardians, and other “invited payers” to receive e-bill notices and access to the e-bill website. Students may access their online invoices from their YES landing page at yes.vanderbilt.edu. Once they have signed in to YES, they may view invoices under the SM Billing Portal link.

Students are responsible for granting access to parents, guardians, or other payers who should receive email billing notifications. To do this, students log in to the e-bill website and select the “My Profile” tab to access the “Invite Other Payer” option. Students should communicate their Commodore ID (nine-digit number beginning with 000) to the invited payers, as it will be needed to complete their process of gaining access to the account.

Once a student generates an invitation from the e-bill website, an email will be sent to the parent or invited payer with an Activation ID number and the link to enroll. The parent/invited payer will need to enter the student’s Commodore ID to complete the process. Tutorials are located online at vanderbilt.edu/stuacct/ebill.html.

Any month in which there is activity on the student’s account, an e-bill will be generated and an email notification sent to the student’s Vanderbilt email address, as well as to the email addresses of others they have invited (and have completed the activation process). The email notification will have the subject line “Your New Vanderbilt E-Bill Is Now Available” and will contain a link to the secure e-bill website.

Payments may be made electronically, or for those wishing to mail a payment, a payment coupon can be printed. When an electronic payment is made, a confirmation email will be sent. It remains the responsibility of the student to ensure that bills are paid on or before the due date.
The Office of Student Accounts can be contacted at (615) 322-6693, toll-free at (800) 288-1144, or via email at student.accounts@vanderbilt.edu. For additional information, please visit the Student Accounts website at vanderbilt.edu/stuaccts.

Refunds of Tuition and Housing Charges

University policy for the refund of tuition and housing charges provides a percentage refund based on the time of withdrawal. Students who withdraw officially or are dismissed from the university for any reason may be entitled to a partial refund in accordance with the established schedule below. Students who register for more than 18 hours and later reduce their registration to 18 hours or fewer may be entitled to a partial refund of the extra tuition for hours over 18 in accordance with the same schedule. Fees are nonrefundable.

No refund after March 20, 2015

For the summer 2015 withdrawal/refund schedule, please see https://finance.vanderbilt.edu/stuaccts/withdrawal-schedule

Payment Options

Direct Payment: Tuition, fees, and all other charges are paid directly to the university. Payment for the fall semester is due by August 13, 2014. Payment for the spring semester is due by January 2, 2015. Students can pay online after viewing their e-bill at vanderbilt.edu/stuaccts. There is no further action required for this option.

Interest-Free Monthly Payment Plan: Students can spread payment over ten monthly installments, interest free, by enrolling in the VANDYPlan, currently administered by Higher One. The deadline to enroll in the VANDYPlan is July 25, 2014 (payments begin May 15). Enroll at tuitionpaymentplan.com/vanderbilt.

The current estimated charges for the 2014/2015 academic year are available at vanderbilt.edu/stuaccts to assist students in determining their annual expenses. For further information, please contact the Office of Student Accounts at (615) 322-6693 or (800) 288-1144.

Late Payment of Fees

All charges not paid by the specified due dates will be assessed a late payment fee of $1.50 on each $100 owed (minimum late fee of $5).

Financial Clearance

Current charges can be deferred if a Student Account Agreement form is on file in the Office of Student Accounts (the Office of Student Accounts may refuse to allow a deferment if it is determined that the deferment is unwarranted). However, a late payment fee will be assessed each month until the balance is paid. All amounts deferred are due no later than November 1 for the fall semester, April 1 for the spring semester, and July 31 for the May and Summer sessions. No transcript (official or unofficial) will be issued for a student who has an outstanding or deferred balance. Diplomas of graduating students will be withheld until bills are paid.

Activities and Recreation Fees

The required student activities and recreation fees entitle degree-seeking students to use the facilities of Sarratt Student Center and the Vanderbilt Recreation and Wellness Center. The fees also cover admission to certain social and cultural events and subscriptions to certain campus publications. The activities fee for graduate students also includes funding for activities sponsored by the Graduate Student Council. Specific information on these fees is published annually in the Student Handbook. By payment of an additional fee, students and their spouses may use their identification cards for admission to athletic events.

The student activities fee and the student recreation fee will be waived automatically if the student is a part-time student registered for four or fewer semester hours and not registered in a thesis or dissertation research course. Students who reside beyond an approximate sixty-mile radius from campus as determined by ZIP code and students who want to have fees waived due to exceptional circumstances must petition in writing for a waiver through the Office of Recreation Administration, PMB 406206, 2301 Vanderbilt Place, Nashville, Tennessee 37240-6206. For waiver requirements and for an online waiver request form, please visit our website at vanderbilt.edu/recadmin. A $10 late fee is assessed to eligible students who apply for waivers after August 14 for the fall semester and January 2 for the spring semester. No waivers are granted after the end of the semester in which the fee occurs, and per the Student Handbook, there are no waivers of the summer activity and recreation fees. For more information, please see vanderbilt.edu/recadmin.

Transcripts

Official academic transcripts are supplied by the University Registrar on authorization from the student. Transcripts are not released for students with financial or other university holds.
Honor Scholarships

Harold Stirling Vanderbilt Graduate Scholarships and University Graduate Fellowships
Each year several Harold Stirling Vanderbilt Graduate Scholarships and University Graduate Fellowships are awarded to students entering a Ph.D. program for the first time. Based solely on merit, they are offered to students nominated by departments or programs in recognition of exceptional promise for research and academic excellence.

Harold Stirling Vanderbilt Graduate Scholarships. These scholarships provide a stipend of $6,000 per year in addition to regular assistantship or fellowship awards. Faculty committees review nominations from all graduate programs and make recommendations to the Graduate School which then selects the recipients.

University Graduate Fellowships. These premier fellowships provide a stipend of $10,000 in addition to a departmental award (fellowship or assistantship). Recipients are selected in the same manner as for the Harold Stirling Vanderbilt Graduate Scholarships.

Provost’s Graduate Fellowships
Each year the Graduate School awards Provost’s Graduate Fellowships to outstanding students from under-represented groups showing academic promise who want to study for the Ph.D. These fellowships carry a stipend of $10,000 in addition to a departmental award.

Normally all three of these awards run concurrently with the departmental awards.

The status of these programs is presently under review.

Other Awards and Assistantships
The university intends, within its resources, to provide adequate financial assistance to students with high academic potential who need help in meeting expenses. Some support is service-free; most requires assigned service to the university. Duties are compatible with the student’s development and progress.

All applicants to the Graduate School are considered for awards and assistantships available in their proposed area of study if they request such consideration and if the application for admission is complete by the application deadline.

University Fellowships
University fellowships with stipends up to $32,200 are available in some programs. A full Tuition Scholarship is normally provided in addition to the stipend. The fellowships are service-free and the student is expected to devote full time to graduate study and to have no other occupation.

Teaching Assistantships
Teaching assistantships are awarded for the twin purposes of attracting superior students and providing supervised assistance to faculty in the instruction of undergraduate students. Assistants receive a stipend ranging up to $21,200 for nine months or $28,400 for the calendar year and normally receive an additional service-free full tuition scholarship. Duties are assigned by the program director and require up to twenty hours of work each week. Appointments are made for one year with renewal in subsequent years dependent upon satisfactory performance of assigned duties, as evaluated by the program director and school deans. Graduate teaching assistants are expected to pursue graduate study full time.

All persons who have responsibility for instruction, including graduate teaching assistants, are subject to university policies as outlined in the Faculty Manual, and any additional school and departmental policies that govern instruction. Graduate teaching assistants with major instructional responsibilities must have a master’s degree or the equivalent.

Research Assistantships
Research assistantships ranging up to $28,000 for twelve months are available in certain graduate programs. The holder is expected to assist an individual faculty member in research. Full or partial tuition scholarships may accompany a research assistantship.

Traineeships
Traineeships ranging up to $28,000 for twelve months are available in certain graduate programs. The recipient is expected to carry out research with an individual faculty member. Full or partial tuition scholarships usually accompany a traineeship.

Tuition Scholarships
Some departments or programs offer service-free full or partial tuition scholarships without an accompanying fellowship or assistantship. Programs offering such tuition scholarships include Biostatistics, Economic Development, the Graduate Department of Religion, and Nursing Science.

Other Graduate Fellowships
Various types of financial assistance other than university assistantships and fellowships are available. A number of private foundations and business and industrial firms support fellowships. The U.S. Government provides training grants for Ph.D. programs through the U.S. Public Health Service, the National Institutes of Health, the National Science Foundation, and other agencies. Awards are allocated to specific departments and to interdepartmental graduate programs of study. Traineeships and fellowships provide stipends and cover tuition and fees.

Loan Assistance
Loan assistance is available for graduate students in the form of the Federal Direct Unsubsidized Loan program, the Federal Perkins Loan program, the Federal Graduate PLUS Loan program, and certain alternative/private loan programs. Eligibility for the Federal Perkins Loan is based on financial need, but the Federal Direct Unsubsidized Loan is available regardless of need. The Federal Graduate PLUS Loan is not based on demonstrated need, but the student must be credit worthy. Alternative/private loans are available from private sources that are not based on financial need.

Under the Federal Perkins Loan program, a graduate student may borrow up to a maximum annual limit of $8,000, and the maximum aggregate amount of Federal Perkins Loans an eligible student may borrow is $60,000, including any Federal Perkins Loans borrowed for undergraduate study. Under the Federal Direct Loan program, a student may borrow up
to a maximum annual limit of $20,500 a year, all of which is unsubsidized. The maximum aggregate amount of Federal Direct Loans an eligible student may borrow is $138,500 including any Federal Direct Subsidized/Unsubsidized Loans borrowed for undergraduate study. Under the Federal Graduate PLUS Loan program, a graduate/professional student may borrow up to the annual cost of attending Vanderbilt minus any other aid for which the student is eligible. There is no maximum aggregate limit.

In order to be considered for the Federal Direct Loan programs, Federal Perkins Loan, and/or the Federal Work-Study program, students must complete the Free Application for Federal Student Aid (FAFSA). The FAFSA application and additional information may be found on the Office of Student Financial Aid webpage, vanderbilt.edu/financialaid.
Academic Regulations

Vanderbilt’s students are bound by the Honor System inaugurated in 1875. Fundamental responsibility for the preservation of the system inevitably falls on the individual student. It is assumed that students will demand of themselves and their fellow students complete respect for the Honor System. All work submitted as a part of course requirements is presumed to be the product of the student submitting it unless credit is given by the student in the manner prescribed by the course instructor. Cheating, plagiarizing, or otherwise falsifying results of study are specifically prohibited under the Honor System. The system applies not only to examinations but also to written work and computer programs submitted to instructors. The student, by registration, acknowledges the authority of the Graduate Honor Council.

The university’s Graduate Student Conduct Council has original jurisdiction in all cases of non-academic misconduct involving graduate and professional students.

Students are expected to become familiar with the Rules Governing the Graduate Honor Council of Vanderbilt University, available at the time of registration. It contains the constitution and bylaws of the Graduate Student Honor Council, Appellate Review Board, and related regulations.

Detailed descriptions of Honor System violations and procedures are also available on the Web at studentorgs.vanderbilt.edu/gsc/honor-council.

Academic Requirements

Candidates for graduate degrees must have satisfactorily completed all residency, academic course, and dissertation requirements, have passed all prescribed examinations, and be free of indebtedness to the university at the time of graduation.

The academic requirements described on the following pages have been established by the Graduate faculty and are applicable to all graduate students at Vanderbilt.

Individual degree programs may have additional requirements. Students are advised to refer to the various program descriptions listed in this catalog and to consult their major advisers for requirements in the specialty of interest.

Students who were completing undergraduate or advanced degrees at the time of their admission must provide to the Graduate School, before initial registration, an official final transcript showing that the degree has been received and the date it was granted.

Responsible Conduct in Research

Vanderbilt University has an obligation to model, teach, and actively promote the responsible conduct of research in scholarship and science. Research integrity is fundamental to good research and crosses all disciplines and areas of focus. Vanderbilt’s approach incorporates online and discussion-based content based on the individual’s experience level and discipline. In addition to online education, individuals are expected to participate in discussion-based sessions to further explore the issues and challenges in conducting ethical research and scholarship.

Intent to Graduate

An Intent to Graduate form must be submitted to the Graduate School at the beginning of the semester in which the student expects to receive a degree. Intent to Graduate forms and dates are available at the Graduate School website, vanderbilt.edu/gradschool.

Requirements for the Master’s Degree

The following master’s degrees are awarded in the Graduate School: master of arts, master of science, master of fine arts, and master of liberal arts and science. Students should check regulations of their particular program; many have requirements in addition to those listed here.

Residence

The candidate for the master’s degree shall spend at least one academic year of graduate study at Vanderbilt. Candidates for the master’s degree are expected to be enrolled in the Graduate School during each fall or spring semester until completion of degree.

Course Work

A minimum of 30 semester hours is required for the master’s degree. This includes enrollment in at least 24 semester hours of formal didactic course work plus enrollment in 6 additional hours of didactic course work or 6 credit hours of research.

All requirements for the master’s degree must be completed within a six-year period calculated from the student’s first semester of enrollment in the Graduate School. International students should contact the Office of International Student and Scholar Services concerning time limitations for completion of master’s degrees.

On recommendation of the student’s program and approval of the Graduate School, credit up to 6 semester hours toward the master’s degree may be transferred from graduate schools in accredited institutions, or other schools of the university.

An incoming graduate student deficient in areas the major department considers prerequisite to a graduate program shall take such course work without graduate credit, in addition to the courses required for the advanced degree.

Thesis

Electronic submission is expected. The document is converted to a PDF and uploaded on the ETD (Electronic Theses and Dissertations) website (etd.library.vanderbilt.edu). Links on the Graduate School webpage outline the process. (See “Steps in Submitting Your Thesis or Dissertation” under “Information for Current Students.”) There are no fees associated with electronic submission.

Two copies of the thesis are required, if the printed option is elected. Both copies will be placed in the Vanderbilt University library system. There is a binding fee of $19 per copy. Whether submitting electronically or as printed copies, the student must provide the Graduate School with two hard copies of the title page and one copy of the abstract. Both copies of the title page must contain the original signatures of at
least two graduate faculty members in the student’s program. The abstract must contain the original signature of the thesis adviser. Specifications about required format, including the quality of paper to be used, are available at vanderbilt.edu/gradschool.

Due dates are listed on page 6.

Some programs require an examination or defense in addition to the thesis.

Non-Thesis Programs
Certain programs offer non-thesis master’s degree programs and specify additional course work up to at least 30 hours. Some programs require an examination in addition to the 30 hours in lieu of a thesis. Not later than fourteen days prior to the end of the term, the student’s department will verify that all degree requirements have been completed.

Master’s Degree in Passing
Certain departments offering the Ph.D. degree allow, as an alternate to the master’s thesis requirement, passing the Ph.D. qualifying examination and the completion of at least 42 hours of graduate study. Students should consult the chairs of their departments or with their graduate advisers to determine whether such an optional plan is available in their program.

Final Examination
The candidate for the master’s degree may, at the discretion of the program faculty, be required to take a final examination in the field of specialization. Such examination shall be completed not later than fourteen days before the end of the term in which the degree is to be granted.

Requirements for the M.L.A.S. Degree
A minimum of 30 semester hours of academic credit (ten courses) is required, with at least seven M.L.A.S. courses (21 hours) and the option of selecting the remaining three courses (9 hours) from the regular course offerings available to graduate students. Students normally take only one course each semester. All work must be completed within six years of the initial registration. A maximum of 6 credit hours may be transferred from graduate schools of other accredited universities and will count as part of the 9-hour non-M.L.A.S. course work.

Curriculum
A range of courses is offered from the disciplines of the liberal arts, including core courses for beginning students and selected topics courses, available to students after successful completion of two core courses. When nine M.L.A.S. credit hours have been earned, students may select up to three courses offering graduate credit from the regular schedule of courses (M.L.A.S. discount tuition does not apply to the courses from the regular schedule).

Requirements for the Ph.D. Degree
The degree of doctor of philosophy is awarded in recognition of high attainment in a special field of knowledge, as evidenced by examination and by a dissertation presenting the results of independent research. General requirements are listed below. In many programs there are additional requirements, and students should carefully check regulations in their particular programs.

Admission to Candidacy
Admission to the Graduate School does not imply admission to candidacy for the Ph.D. degree. To be admitted to candidacy the student must satisfy the language requirements, if any, in the program, and must pass a qualifying examination. The examination will be administered by the student’s Ph.D. committee, which will supervise subsequent work toward the degree. Upon completion of these requirements the Ph.D. committee will recommend to the Graduate School that the student be admitted to candidacy.

Residence and Course Work
The Ph.D. degree requires at least three academic years of graduate study. A student must complete 72 hours of graduate work for credit, of which a minimum of 24 hours in formal, didactic course and seminar work in the Vanderbilt Graduate School is required. In most programs students are required to present considerably more hours in formal course work than the 24-hour minimum. The remainder of the 72 hours, above the program requirements in formal course hours, may be in dissertation research hours, in special readings, and in transfer credit if applicable. Performance in dissertation research does not affect the grade point average.

“Formal, didactic course work” is approved courses taken for credit other than thesis and dissertation research courses. Students should check departmental regulations for the number of “formal course” hours required for their particular program.

All students working full time toward the Ph.D. must register each fall and spring semester. When the required 72 hours of course work have been completed, registration for dissertation research without hourly credit applies; this reflects full-time effort on research and confers full-time student status. The minimum tuition of $200 is charged.

Qualifying Examination
The purpose of the qualifying examination is to test the student’s knowledge of the field of specialization, to assess familiarity with the published research in the field, and to determine whether the student possesses those critical and analytic skills needed for a scholarly career.

The examination is conducted by a Ph.D. committee appointed by the Graduate School on advice of the chair or director of graduate studies of the program. The committee consists of not fewer than four members of the Graduate faculty. Three of the members must be graduate faculty from within the student’s department/program and one from outside the program. Any variation of the committee makeup must be approved by the Graduate School. The committee must be appointed by the Graduate School no less than two weeks before the time the student expects to take the qualifying examination.

Graduate faculty include all full-time tenured and tenure-track Vanderbilt University faculty members with primary appointments in departments or programs offering the M.A., M.S., and/or Ph.D. degrees. Those tenured or tenure-track faculty having secondary appointments in departments offering
the M.A., M.S., and/or Ph.D. degrees will also be considered Graduate faculty members.

Appointment of other faculty members to the Graduate faculty can occur upon recommendation by the faculty member’s department and with the approval of the Graduate School. Such appointment would require a majority vote by the Graduate faculty of the department/program, plus the recommendation of the chair/director of graduate studies and approval by the Graduate School. Such appointments are restricted to full-time faculty members with the rank of assistant professor or above, with a primary or secondary appointment in programs offering the M.A., M.S., and/or Ph.D. degree. Faculty members appointed to the Graduate faculty in this manner have all the privileges of Graduate faculty, including supervising graduate students’ research.

Other faculty can be assigned some duties normally reserved for Graduate faculty on the recommendation of the chair and/or director of graduate studies of the department and with the approval of the Graduate School. The duties assigned must be specified and time-limited, e.g., membership on a Ph.D. committee or teaching a graduate-level class/seminar in a particular semester. On occasion, these duties within a program or department may be specified without a specific time limit, e.g., standard graduate teaching duties or membership on any Ph.D. committee in the program. Such faculty will not be permitted to direct theses or dissertations.

Faculty members, or others carrying out research or scholarship from outside universities, may also be appointed to serve on a specific student’s Ph.D. committee without being considered for Graduate faculty status, e.g., a faculty member from outside of Vanderbilt, a faculty member from a professional school such as law or medicine, or a scientist working in a national laboratory, with the approvals of the director of graduate studies or chair of the student’s department and of the Graduate School. The request to appoint someone in this manner must be accompanied by a short letter of justification explaining what expertise this person brings to the student’s committee along with a copy of the faculty member’s curriculum vitae.

The functions of the Ph.D. committee are (a) to administer the qualifying examination, (b) to approve the dissertation subject, (c) to aid the student and monitor the progress of the dissertation, and (d) to read and approve the dissertation and administer the final oral examination.

The qualifying examination may be administered at any time during the school year and shall be completed within a period of four weeks. Before a qualifying examination can be scheduled, the student must have completed at least 24 hours of graduate work (to include all course work required for the degree) and the language requirement, if any. In some programs the student may be required to demonstrate basic competence in the discipline through a written preliminary examination prior to the actual qualifying examination.

All departments and other units offering Ph.D. programs must set a maximum time limit within which a student, under normal circumstances, is required to take the qualifying examination. That maximum time limit must not exceed four years.

The qualifying examination may be written or oral, or both. The Graduate School must be notified of the time and place of the qualifying examination at least two weeks in advance. The qualifying examination is not a public examination, and voice recordings of it are not permitted. A student is allowed only two opportunities to pass the qualifying examination. The qualifying examination results form, signed by the committee members and the director of graduate studies for the program, shall be forwarded to the Graduate School immediately after the examination.

When the student has passed the qualifying examination, the Ph.D. committee shall recommend to the Graduate School that the student be admitted to candidacy for the degree.

Dissertation

A candidate for the Ph.D. degree must present an acceptable dissertation. The dissertation demonstrates that the candidate has technical competence in the field and has done research of an independent character. It must add to or modify what was previously known, or present a significant interpretation of the subject based upon original investigation. The subject of the dissertation must be approved by the student’s faculty adviser and Ph.D. committee.

The dissertation must be completed within four years after a student has been admitted to candidacy for the degree. Upon petition to the Graduate School, a one-year extension of candidacy may be granted. If such a period has expired without successful completion of the dissertation, the student may be dismissed from the Graduate School. Readmission to the Graduate School, and to candidacy, requires application to the Graduate School, with approval of the program faculty. In such cases the student may be required, by the Graduate School or by the Ph.D. committee, to demonstrate competence for readmission by taking a qualifying examination or additional course work.

The candidate submits a copy of the completed dissertation to the Ph.D. committee at least two weeks prior to the dissertation defense. The committee reviews the dissertation and conducts the final examination.

Final copies of the approved dissertation may be submitted to the Graduate School in electronic or printed form. Electronic submission is expected. Style specifications, paper requirements, fees, and further details are listed at vanderbilt.edu/gradschool. With either option, two copies of the title page, with the original signatures of not less than a majority of the Ph.D. committee, and two copies of an abstract of not more than three hundred fifty words, signed by the student’s adviser, must be turned in to the Graduate School by the date specified on page 6. Students who submit their dissertations electronically revise the title page, convert the documents to a PDF file, and upload the document on the Electronic Theses and Dissertations (ETD) website, etd.library.vanderbilt.edu.

Dissertations are intended to be of benefit to the academic community and to society in general, and thus are required to be publicly available. This is accomplished by placing a copy in the Vanderbilt Heard Library, posting an electronic version on the library website, and by filing with UMI/ProQuest authorization for inclusion in an accessible database. In some instances, students may request a delay in the release or posting of their dissertations for a limited time period. This can be done, for example, to protect intellectual property, to allow time to file a patent application, or to coordinate with the timing of publication in another form. In no circumstance will the release of the dissertation be delayed for more than two years. Unless requested for a shorter period of time, any request to delay public release will expire at the end of two years and the Graduate School will proceed with the public release through the library.

For students who choose to register the copyright with the U.S. Copyright Office, the Graduate School will help facilitate the process. Registration is not required to ensure copyright protection for your work, but certain additional rights are
gained by virtue of registration. All applicable fees must be paid at the time the dissertation is turned in to the Graduate School. The abstract is published in *Dissertation Abstracts*, which publicizes the completion of the dissertation and announces its availability on microfilm.

**Final Examination**

The candidate must pass his or her dissertation defense at least fourteen days before the end of the term in which the degree is to be conferred, or by April 1 for May graduation. The final oral examination is administered by the student’s Ph.D. committee and is on the dissertation and significant related material; the student is expected to demonstrate an understanding of the larger context in which the dissertation lies. The public is invited to attend the final examination, which is announced in advance in Vanderbilt’s electronic calendar.

The chair of the Ph.D. committee or the director of graduate studies of the program, after consultation with the candidate, shall notify the Graduate School in advance of the place and time of the examination and the title of the dissertation. This should be done no later than two weeks prior to the examination. The Graduate School then formally notifies the Ph.D. committee and submits the defense notice to Vanderbilt’s electronic calendar. The dissertation defense results form, signed by the committee members and the director of graduate studies for the program, should be forwarded immediately to the Graduate School.

**Further Requirements**

It should be understood that the requirements stated above are minimum and that individual programs may add others. Students are urged to consult individual program entries in this catalog and departmental chairs and directors of graduate studies to learn the requirements of programs in which they are interested.

**Language Requirements for the Master’s and Ph.D. Degrees**

The language requirements, if any, for the master’s and Ph.D. degrees in each graduate program are determined by the program faculty, and are set forth in this catalog in the section devoted to program descriptions and course offerings.

Foreign language requirements are usually met by demonstration of proficiency in one or more of the following: French, German, or Spanish. Certain programs either permit or require proficiency in other languages; and some others restrict the choice to certain combinations within this group. Students should refer to the various program statements in this catalog and should consult their advisers regarding specific requirements.

Examinations in languages are usually administered by the appropriate language faculty by arrangement with the program. As an alternative to certification of proficiency by examination, the Graduate School may accept certification from the program that the minimum requirement in a language has been met if the student is able to present an acceptable academic record of the equivalent of at least 12 semester hours in the language.

A student who has fulfilled the language requirement at another graduate school prior to entering Vanderbilt may, at the discretion of the program and the Graduate School, transfer the certification if the student does so within three years after having received it.

International students may petition the Graduate School through the program to substitute their native language for one of the usual languages required for the Ph.D. degree.

**Registration**

The normal academic load for full-time registration is 9 to 13 hours in the fall and spring semesters. Students registered for 9 or more credit hours in fall or spring are defined as full time. Those registered for 6 to 7 hours in fall or spring are half time, and those registered for less than 6 hours in fall or spring are less than half time. In the summer term, 6 or more hours is defined as full time, 3 to 5 hours is half time, and less than 3 hours is less than half time. After completing the hourly requirements for the degree, full-time students register for master’s (369) or Ph.D. (379, 399) research without hourly credit to reflect full-time effort on research. Certain programs offer a half-time Ph.D. research course (3995) for students who are able to devote only half-time effort to dissertation research.

During each semester currently enrolled students are asked to meet with their advisors and directors of graduate studies to plan their schedules for the coming semester. All students must later complete official registration at the appropriate time using YES (Your Enrollment Services). At the beginning of each semester and the summer session, students must validate their registration by submission of an online registration data form. A late registration fee of $30 is charged to students who fail to register by the stated registration dates.

All full-time graduate students, including those receiving scholarship, assistantship, fellowship, or traineeship support through the university, must register each fall and spring semester with no breaks in registration to remain in good standing.

**Changes in Registration**

Changes in registration may be made through YES during the change period (the first ten class days of the semester) with consent of the major department. A student is not permitted to add or drop a course, change the number of hours in a variable-credit course, or change from audit to credit status after the end of the change period. A student may formally withdraw from a course after the end of the change period with the permission of the department, and a grade of W will be given. A student is not permitted to withdraw from the course after the Last Day to Withdraw (see Graduate School calendar) except under certain circumstances. Failing the course is not considered one of the circumstances. Students should note, in the section on tuition and fees, the regulations concerning tuition obligations for courses dropped after the first week of the term.

Courses in which there is a significant change in subject matter each semester (e.g., special topics courses) may be repeated for credit within limits noted in the course listings of this catalog.

**Grading System**

The grading system in the Graduate School includes the letter grades A, B, C, and F. A student will not be granted graduate credit for any course in which a grade less than C– is received. Courses with failing (F) grades may be repeated once at the discretion of the course director and the department. In this situation, the more recent grade will be calculated in the final grade point average. The letter I may be used at the discretion of the instructor in those cases in which the student is not
A grade point average of 3.0 is necessary for graduation. Letter grades are assigned grade point values as follows:

- A+ = 4.0
- A  = 4.0
- A– = 3.7
- B+ = 3.3
- B  = 3.0
- B– = 2.7
- C+ = 2.3
- C  = 2.0
- C– = 1.7
- F  = 0.0

S/U grades are given every semester for all research courses (369, 379, and 399), regardless of the number of hours registered. The accumulation of three (3) U grades over the course of study will lead to dismissal from the program and the Graduate School. No credit will be granted for courses in which a grade of U is received.

Students receive grades in all courses except those approved for credit/non-credit, audits, and some seminars. An I that is not replaced by a letter grade within one year may be changed to the grade F at the discretion of the instructor; otherwise, the I may become permanent and remain on the transcript as such.

Certain courses approved by the graduate faculty for credit/non-credit or Pass/Fail count toward total hours. Courses that are strictly non-credit, however, do not count toward total hours or in calculating grade point average, although grades for such courses are entered on the student’s record.

With the instructor’s permission, students are permitted to audit certain courses. Students who audit are expected to attend the course regularly. Students must be registered for regular courses in order to audit. Audits are listed on the student’s transcript. Audits are limited to two per semester.

Grade Change Policy
For a student enrolled in the Graduate School, a grade recorded in the University Registrar’s Office may be changed only upon the written request of the instructor, endorsed by the appropriate official (usually an associate dean) within the school/college that offered the course, and then the approval of the associate dean of the Graduate School. An instructor’s petition to change a grade must include a brief rationale for the change. Changing a recorded grade is a serious matter and, in general, petitions will be approved only upon certification that the original grade was in error or, in the case of an Incomplete, that the outstanding requirement(s) have been completed. Request for exceptions to this policy should be directed to the associate dean of the Graduate School and will be considered on an individual basis; these may require additional certifications and approvals.

Academic Probation
A grade point average of 3.0 is necessary for graduation. Students who fall below an average of 3.0 are placed on probation for one semester. If the student’s performance does not improve during that semester, the Graduate School and the appropriate department chair will decide whether to dismiss the student or to allow the continuation of probation. If at the end of the second semester the grade point average is still below 3.0, the student may be advised to withdraw or face dismissal. Students who earn a grade point average of 2.0 or less during their first semester of residence are subject to dismissal at the end of that semester. Accumulation of three U grades in research courses can lead to dismissal.

Student Grievances and Appeals
Students who believe their academic performance has not been judged reasonably or fairly, or who believe their intellectual contributions have not been fairly acknowledged, should discuss their concerns with the director of graduate studies in their program or, as necessary, the chair of the department. If the student’s concerns cannot be resolved at the program or departmental level, the student may request a further review of the issues in question by the associate dean for graduate studies or similar official in their school dean’s office. The student may appeal the outcome of the school-level review to the Graduate School.

Credit
Courses not listed in this catalog that are numbered in the 200s and 300s may be taken for credit by graduate students on the recommendation and consent of the faculty adviser and the director of graduate studies, unless some limit is noted in the description. Not all courses offered by various divisions of the university have been approved by the Graduate faculty for graduate credit. In these cases, students should complete a “Request for Graduate Credit” form. In arranging schedules, students should consult their advisers and carefully check the Graduate School catalog for approved courses.

Students may register for graduate courses or other courses in the university on a non-credit basis—either to fulfill their own interests or to meet certain prerequisites and requirements. The designation “no-credit” presupposes the student’s participation in the course, including written assignments and examinations. Grades are received and recorded in no-credit courses and tuition is billed at the regular hourly rate.

Credit Policy
Credit hours are semester hours; e.g., a three-hour course carries credit of 3 semester hours. One semester credit hour represents at least three hours of academic work per week, on average, for one semester. Academic work includes, but is not necessarily limited to, lectures, laboratory work, homework, research, class readings, independent study, internships, and practica. Some Vanderbilt courses may have requirements that exceed this definition.

Transfer Credit
Graduate credit may be transferred from graduate schools in accredited institutions. Transfer is made only on the recommendation of the chair or director of graduate studies of the major department and approval of the Graduate School.

A maximum of 6 semester hours of transfer credit may be applied toward the master’s degree and, in very special cases, 48 hours toward the Ph.D. (See requirements for the master’s degree and Ph.D. degree elsewhere in this catalog.) Only those hours in which the student has achieved the grade B or its equivalent will be considered for transfer. Grades earned on transferred credit do not affect the student’s Graduate School average unless such courses are to be counted as didactic hours.

Students who want to transfer to the Graduate School from professional degree programs offered by other schools at Vanderbilt must submit a formal application for admission and are expected to do so not later than the end of their first year of graduate-level studies at Vanderbilt.
Credits earned through the Division of Unclassified Studies cannot generally be used toward a graduate degree at Vanderbilt University.

Special Non-Degree Students
Special non-degree student status is reserved for limited circumstances. It is not intended for students who seek regular admission or to be admitted later as degree-seeking students. Examples appropriate for special non-degree status include a student enrolled in an accredited university but will be in residence at Vanderbilt for up to one year, such as a student participating in an approved exchange program. Another example is a student enrolled for a degree at another accredited university and whose adviser becomes a faculty member at Vanderbilt. In those instances, the special student status at Vanderbilt is to maintain a connection to that faculty member and/or receive financial support while at Vanderbilt and completing the degree at their home university. Other circumstances may be considered on a case by case basis.

Students admitted as non-degree students may register for selected courses in areas where they are qualified. Such students must submit an application and transcript(s) of their previous academic work with the Graduate School. Approval of the instructor, the department in which the course is offered, and the Graduate School is required. GRE scores are not required. Status as a non-degree student is expected to last no longer than one year. No more than 6 semester hours earned as a non-degree graduate student may be applied to graduate degrees at Vanderbilt.

Leave of Absence
The Graduate School requires continuous registration except for summer sessions. Students who want to interrupt their graduate study must petition the department, who on their behalf apply to the Graduate School for an authorized leave of absence. Leave of absence is granted for a maximum of one year. Those without authorized leave who do not register are dismissed from the Graduate School and are not considered students. If they want to resume graduate study at Vanderbilt, they must petition for reinstatement.

Parental Leave
All students enrolled full-time in the Graduate School and supported by funding from either internal or external sources are covered by this policy. This includes students with funding through stipends, such as training grants or service-free fellowships, and students compensated for services, such as teaching or research assistants. Prior to and/or following childbirth or adoption of an infant, the primary caregiver (whether mother or father) will be allowed to take six weeks of parental leave. During this period, the student’s current stipend, and, if applicable, funding for health insurance and tuition, will be continued without interruption. The student’s enrollment status will be continued during this period as well.

Withdrawal
Students who intend to withdraw from the university should inform the department, who then informs the Graduate School in writing. Improper notification may result in academic and financial penalties.

Credit for Graduate Courses Taken as an Undergraduate
A qualified Vanderbilt University senior undergraduate may enroll in graduate courses and receive credit which, upon the student’s admission to the Graduate School, may be applicable toward a graduate degree. Undergraduate seniors interested in this option should review the regulations appearing in the Undergraduate Catalog and consult their advisers and the Graduate School. Undergraduates should note that those wanting to take 300-level courses, whether under this option or not, must obtain the written approval of their academic adviser, the instructor of the course, and the Graduate School.

In certain special cases, credit may be transferred for graduate-level course work completed during undergraduate degree studies by a student at another accredited institution. The course hours must be in excess of the minimum required for the undergraduate degree and the course(s) must not be a required part of the undergraduate degree or major. Requests for such transfer of credit must be carefully justified by the student’s major department and approved by the Graduate School.

Commencement
The university holds its annual Commencement ceremony following the spring semester. Degree candidates must have completed successfully all curriculum requirements and have passed all prescribed examinations by the published deadlines to be allowed to participate in the ceremony. A student completing degree requirements in the summer or fall semester will be invited to participate in Commencement the following May; however, the semester in which the degree was actually earned will be the one recorded on the diploma and the student’s permanent record. Students unable to participate in the graduation ceremony will receive their diplomas by mail. Please refer to the Commencement webpage at vanderbilt.edu/commencement for complete information on the May ceremony.
Programs of Study

African American and Diaspora Studies

DIRECTOR Tracy D. Sharpless-Whiting
DIRECTOR OF GRADUATE STUDIES Gilman W. Whiting
PROFESSORS Victor Anderson, Houston Baker, Tracy D. Sharpless-Whiting
ASSOCIATE PROFESSORS Trica D. Keaton, Tiffany Ruby Patterson, Gilman W. Whiting
WRITER-IN-RESIDENCE Alice Randall

VANDERBILT University’s African American and Diaspora Studies program offers an interdisciplinary, cross-cultural, and comparative curriculum of study of the histories, literatures, music, visual cultures, and politics of people of African descent around the world. To that end, the African American and Diaspora Studies program focuses on several geographic areas: Africa, Europe, the Americas, and the Caribbean. The certificate in diaspora studies has been designed to complement students’ disciplinary training, expose them to the interdisciplinary trends in the academy, and broaden their career possibilities. The diaspora studies certificate provides graduate students with access to interdisciplinary scholarship in the dynamic and continually evolving field of studies in the worldwide African diaspora. The certificate also gives students a competitive edge and interdisciplinary training for the still robust career outlook for specialists in pan-black studies as well as in the search for postdoctoral fellowships in the humanities and social sciences.

The certificate in diaspora studies is open to any student enrolled in graduate study at Vanderbilt University. Acceptance to the program requires the approval of the African American and Diaspora Studies program graduate committee, comprised of the director of graduate studies, one faculty member from African American and Diaspora Studies, and the director of African American and Diaspora Studies. Students must also submit as part of the application to the certificate program a one-page description of their interests in diaspora studies. Students should also submit a letter of approval with respect to the certificate from their faculty adviser or their departmental director of graduate studies. The letter should speak as well to the student’s standing in the department. Courses taken at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the African American and Diaspora Studies program’s director of graduate studies. The conferral of the certificate requires an overall GPA of 3.3, satisfactory performance of B+ or better in AADS 300, completion of all distribution requirements with a B+ or better, and a “pass” on the graduate certificate paper.

For more detailed information on the diaspora certificate, please go to www.vanderbilt.edu/aframst or contact the director of graduate studies in the African American and Diaspora Studies program.

Requirements for the Graduate Certificate in Diaspora Studies

1. African American and Diaspora Studies 300.
2. Four additional graduate-level courses on race and its intersection with gender, class, religion, power, and/or sexuality, which are appropriate to the student’s graduate program of study, are eligible. All courses must be approved for credit by the African American and Diaspora Studies program graduate committee, and include at least three courses outside the student’s home discipline. Students will be required to provide a copy of course syllabi to the graduate committee so that the committee may determine whether the courses taken or proposed to be taken by the student are indeed appropriate for certificate credit. One course may be satisfied through an independent study (AADS 395 Directed Study) with a core or affiliated faculty member in African American and Diaspora Studies.
3. A paper (thirty-five pages) submitted to the African American and Diaspora Studies program graduate committee for evaluation. The paper must be comparative and cross-cultural in keeping with the certificate’s diasporic emphasis. Moreover, the final paper must build upon work explored in AADS 300, AADS 395a–395b, or another course approved for certificate credit. The committee will assess the paper on a pass/fail basis.

Approved List of Courses

AFRICAN AMERICAN AND DIASPORA STUDIES: 300, Theories of Diaspora; 395a, Directed Study.

ANTHROPOLOGY: 349, The Historical Archaeology of Latin America.

ENGLISH: 320, Studies in American Literature; 321, Studies in Southern Literature; 325, Seminar in Modern British and American Literature; 337a, Introduction to Literary Theory; 350, Special Problems in English and American Literature; 355, Special Topics in English and American Literature.

FRENCH: 388, Seminar in Francophone Literature.

PHILOSOPHY: 352, Topics in Philosophy (must be AADS-related); 353, Figures in Philosophy (must be AADS-related).

RELIGIOUS STUDIES: 3134, The Ideology of Race and Gender in the Hebrew Bible; 3214, Women and Religion in America; 3235, African American Religious History; 3239, Roots of American Evangelicalism 1770–1879; 3249, Seminar: Colonial American Religious History; 3415, Feminist/Womanist Ethics; 3442, African American Political Theology; 3535, Black Islam
American studies has been designed to complement students’ disciplinary training, expose them to interdisciplinary trends in the academy, and broaden their career possibilities. The American studies certificate provides graduate students with training across an array of American studies disciplines as well as training in interdisciplinary methodology. The certificate provides students with a valuable professional credential and strengthens their ability to compete for jobs as well as national fellowships and postdoctoral awards.

The certificate in American studies is open to any student enrolled in graduate study at Vanderbilt University. Acceptance to the program requires the approval of both the graduate director of the student’s home department and the director of the American Studies program. Students must also submit an application that includes a one-page rationale for their course of study to the American studies graduate committee for approval. Courses taken at Vanderbilt University prior to admission to the program may be counted toward the certificate requirements with the approval of the director. The awarding of a certificate requires an overall GPA of 3.3, satisfactory performance of B+ or better in AMER 300, completion of all distributional requirements, and successful completion of the graduate certificate paper.

Please contact the American Studies program for more information at americansudies@vanderbilt.edu.

**Requirements for Graduate Certificate in American Studies**

1. American Studies 300.
2. Four additional graduate-level American studies courses appropriate to the student’s program of study. Courses must be approved by the graduate committee for credit and should include at least three courses outside the student’s home discipline. The student’s total course work must include courses from at least three different departments. One course may be satisfied through an independent study with a faculty member affiliated with the American Studies program, with the approval of the director of the American Studies program. (See below for a list of approved graduate courses.)
3. A paper (thirty pages) submitted to the graduate committee for evaluation. The paper must demonstrate the application of an American studies methodology to research, teaching, or fieldwork. It should be a synthesis of interdisciplinary American studies work in the context of the student’s primary field.

**Approved List of Courses**

**AMERICAN STUDIES:** 300, Graduate Workshop in American Studies.

**ECONOMICS:** 329a–329b, Labor Economics.

**ENGLISH:** 320, Studies in American Literature; 321, Studies in Southern Literature; 325, Seminar in Modern British and American Literature (when an American topic is offered); 337a, Introduction to Literary Theory (when an American topic is offered); 337b, Introduction to Literary Theory (when an American topic is offered); 350, Special Problems in English and American Literature (when an American topic is offered); 355, Special Topics in English and American Literature (when an American topic is offered).

**PHILOSOPHY:** 350, Readings in Philosophy (when an American topic is offered); 351, History of Philosophy (when an American topic is offered); 352, Topics in Philosophy (when an American topic is offered); 353, Figures in Philosophy (when an American topic is offered).

**POLITICAL SCIENCE:** 330, Studies in American Politics; 332, Electoral Behavior and Public Opinion; 335, Politics of American Legislation; 370, Topics in Political Science (when an American topic is offered).

**RELIGION:** 3464, Healthcare Ethics.

**SOCIOLGY:** 301, Classical Theory; 302, Contemporary Theory; 331, Survey Seminar on Inequalities and Movements; 333, Survey Seminar on Cultural Sociology; 335, Survey Seminar on Deviant Behavior and Social Control; 343, Survey Seminar on Social Psychology; 345, Survey Seminar on Social Stratification; 361, Special-Topic Seminars on Social Phenomena at the Macro Level; 363, Special-Topic Seminars on Institutions and Organizations; 367, Special-Topic Seminars on Norms, Power, and Related Normative Phenomena; 368, Special-Topic Seminars on Social Processes and Social Change.

**SPANISH AND PORTUGUESE:** 354, The Politics of Identity in Latino U.S. Literature.

**WOMEN’S AND GENDER STUDIES:** 301, Gender and Sexuality: Feminist Approaches; 302, Gender and Pedagogy.

**Course descriptions begin on page 69.**
Anthropology

CHAIR Beth A. Conklin
DIRECTOR OF GRADUATE STUDIES Tiffiny A. Tung
PROFESSORS EMERITI Thomas A. Gregor, Ronald Spores
PROFESSORS Arthur A. Demarest, Tom D. Dillehay, Edward F. Fischer, Lesley Gill
RESEARCH PROFESSOR Charles E. Orser, Jr.
ASSOCIATE PROFESSORS Beth A. Conklin, William R. Fowler Jr., John Janusek, Norbert Ross, Tiffiny A. Tung, Steven A. Wernke
RESEARCH ASSOCIATE PROFESSOR Patricia J. Netherly
ASSISTANT PROFESSORS Carwil Bjork-James, Markus Eberl, Amy Non
RESEARCH ASSISTANT PROFESSOR Ahmad Mohammadpour

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

THE graduate program in anthropology is designed to prepare students for careers in teaching and research, especially with an emphasis on specializations in the anthropology of Central America, Mexico, and South America. The graduate enrollment of approximately thirty graduate students assures a close tutorial relationship with faculty and ample student opportunities for field research and publication in Latin America.

Requirements for the master’s degree in anthropology include 24 hours of course work, a comprehensive examination, and a thesis. An alternative master’s degree track involves 36 hours of course work and a comprehensive examination, rather than a thesis. Although students are expected to acquire a general knowledge of anthropology, the program encourages independent research on special subjects, particularly in archaeology, ethnography, ethnohistory, native Latin America, and contemporary political economy.

The Ph.D. program requires at least 45 hours of formal course work and four semesters of residency. A high level of proficiency in one foreign language is expected. Doctoral candidates pass general examinations, present and defend a dissertation proposal, complete a dissertation on original field or archival research, and defend the dissertation. Subject to the approval of the director of graduate studies, students entering the program with a master’s degree or with studies elsewhere may transfer up to 18 hours of graduate credit.

Course descriptions begin on page 69.

Asian Studies

DIRECTOR Robert Campany
PROFESSOR Robert Campany
ASSISTANT PROFESSOR Ben Tran

Affiliated Faculty
PROFESSORS Gerald Figal (History), Tony Stewart (Religious Studies)
ASSOCIATE PROFESSORS Brett Benson (Political Science), Yoshikuni Igarashi (History), Tracy Miller (History of Art), Ruth Rogaski (History), Samira Sheikh (History)
ASSISTANT PROFESSORS Nancy Lin (Religious Studies), Peter Lorge (History), Bryan Lowe (Religious Studies), Cecilia Mo (Political Science), Haerin Shin (English), Lijun Song (Sociology), Anand V. Taneja (Religious Studies)

A NUMBER of courses are available in Asian languages, social sciences, and humanities for graduate credit.

A partial listing of relevant courses follows. See departmental listings for courses offered in the current academic year.

ASIAN STUDIES: 211, Popular Culture in Modern Japan; 212, Explorations of Japanese Animation; 233, Self-Cultivation in Ancient China; 240, Current Japan-U.S. Relations; 250W, Hollywood Hanoi; 251, The Third World and Literature; 289a–289b, Independent Study; 294a–294b, Special Topics.

HISTORY: 205, Play and Pleasure in Early Modern Japan; 206, Post-WWII Japan; 211a, The Mughal World; 212a, India and the Indian Ocean.

RELIGIOUS STUDIES: 253, East Asian Buddhism; 265, Mythologies and Epics of South Asia; 266, Devotional Traditions of South Asia: Hindu, Muslim, Sikh; 269, Sacred Space in the Tibetan World; 275, Chinese Religions through Stories.

CHAIR John D. York  
DIRECTOR OF GRADUATE STUDIES Charles R. Sanders  
ASSOCIATE PROFESSORS Brian Bachmann, Brandt Eichman, Tina Iverson, Borden Lacy, Thomas N. Oeltmann, David Tabb  
ASSISTANT PROFESSOR Nicholas Reiter

The intent of the department is to maintain a small graduate program that emphasizes quality of experience, academic scholarship, and professional achievement. Faculty members are involved in active research programs. Thirty to thirty-five graduate students are generally enrolled. To maintain close student-faculty interaction, only a limited number of students are admitted each year.

Major research efforts are concerned with studies on mechanisms of mutagenesis; cytochromes P450, regulation of expression, and mechanisms of detoxication; oxygenase and arachidonic acid biochemistry; cancer drug development; proteinase inhibitor structure and regulation; DNA-binding proteins; DNA topoisomerase; biochemistry of epidermal growth factor action; biochemistry and endocrinology of hypertension; intracellular signaling in growth and development; neoplastic transformation by oncogenic transcription factors; cellular responses to DNA damage; chromatin structure and histone modifications; long non-coding RNA structure and function, and one-carbon metabolism. These studies use state-of-the-art technology including molecular biology, NMR spectroscopy, mass spectrometry, and X-ray crystallography.

Faculty of the department also participate in interdisciplinary training programs, supported by National Institutes of Health training grants, to offer specialized biochemical training in the areas of molecular toxicology, chemical biology, biochemical nutrition, molecular biophysics, cancer research, and molecular endocrinology.

Course descriptions begin on page 74.

Biological Sciences

CHAIR Douglas G. McMahon  
DIRECTOR OF GRADUATE STUDIES Katherine L. Friedman  
RESEARCH PROFESSOR Hans-Willi Honegger  
ASSOCIATE PROFESSORS D. Kilpatrick Abbot, Seth R. Bordenstein, Chang Chung, Brandt F. Eichman, Katherine L. Friedman, Daniel J. Funk, Julian F. Hillyer, Antonia Rokas, Louise Rollo-Smith, Donna J. Webb  
RESEARCH ASSOCIATE PROFESSOR Yao Xu  
ASSISTANT PROFFESSORS John Anthony Capra, Kevin Ess, Lauren Parker Jackson, Maria Luisa Jorge, Maulik Patel  
RESEARCH ASSISTANT PROFESSORS Cheryl Gatto, Tetsuya Mori, Jason Pitts, Shuqun Shi

The program is designed to lead to the Ph.D. degree; however, M.S. degrees are granted under special circumstances and require a research thesis. The Ph.D. degree requires 72 hours of credit for graduation, including at least 24 credit hours of formal course work with the remainder earned through dissertation research. Credit hours earned in the first-year IGP program will be counted toward the required 24 hours of formal course work.

Desirable backgrounds for graduate study in the Department of Biological Sciences, depending upon the specific interests of the student, would be undergraduate programs emphasizing biological sciences, chemistry, mathematics, or physics course work, but students from other disciplines are also eligible.

Visit the departmental website at as.vanderbilt.edu/biosci for more information.

Note: The following courses (described in the course listing) are usually not available for graduate credit for students in the Biological Sciences program: 201, 205, 210, 220. Graduate students in biological sciences may take graduate courses in School of Medicine departments by arrangement.

Course descriptions begin on page 75.
Biomedical Engineering

CHAIR Todd D. Giorgio
DIRECTOR OF GRADUATE STUDIES Mark D. Does
DIRECTOR OF GRADUATE RECRUITING W. David Merryman
DIRECTOR OF UNDERGRADUATE STUDIES Adam W. Anderson

PROFESSORS EMERITI Thomas R. Harris, Paul H. King, Robert J. Roselli, Richard G. Shiavi
ASSOCIATE PROFESSORS Adam W. Anderson, Franz Baudenbacher, Cynthia B. Paschal
ASSISTANT PROFESSORS Brett C. Byram, Craig L. Duvall, William A. Grissom, W. David Merryman, Melissa C. Skala, Hak-Joon Sung

DEGREES OFFERED: Master of Science, Master of Engineering, Doctor of Philosophy

BIOMEDICAL engineering as a research discipline is concerned with the development of new physical and mathematical concepts applicable to problems in biology, medicine, and the organization of health care. Biomedical engineering also deals with more pragmatic problems, such as biomedical use of information systems and development of advanced biomedical instrumentation. The vision of the BME graduate program is to provide the best advanced education to our graduate students such that they are optimally prepared for successful careers in academia, industry, and related fields. The goal of the program is to provide advanced education and research training in quantitative biology, biomaterials, cellular bioengineering, biomedical photonics, medical imaging, biomedical instrumentation, and the scientific principles underlying the origination of diagnostic and therapeutic devices and processes. The program is specifically concerned with the interface between biology, medicine, and the engineering, physical, computing, and mathematical sciences.

Candidates for the master of science (M.S.) degree must complete 30 hours of graduate-level credit, approved by the faculty, with the following minimum distribution of didactic hours: 12 hours in biomedical engineering, 3 hours in life science (physiology [MPB 330 or equivalent]) and 9 hours in advanced life science, physical science, or engineering. At least 6 of the BME hours and 3 of the advanced science or engineering hours must be 300-level courses. The remainder of the 72 hours required for a Ph.D. will primarily consist of dissertation research, but may also include seminar and other approved (didactic) courses. In addition, students must pass a qualifying examination consisting of written and oral presentations of a proposal for doctoral research, present a dissertation showing the results of original research in biomedical engineering, and successfully defend the dissertation results in an oral examination.

Course descriptions begin on page 76.

Biomedical Informatics

CHAIR Kevin B. Johnson
DIRECTOR OF GRADUATE STUDIES Cynthia S. Gadd
PROFESSORS Mark E. Frisse, Cynthia S. Gadd, Nunzia B. Giuse, Kevin B. Johnson, Nancy M. Lorenzi, Blackford Middleton, Randolph A. Miller, William W. Stead
ASSOCIATE PROFESSORS Steven H. Brown, Joshua C. Denny, Dario A. Giuse, Paul A. Harris, Bradley Malin, S. Trent Rosenbloom, Edward K. Shultz, David L. Tabb, Stuart T. Weinberg, Bing Zhang, Zhongming Zhao
ADJUNCT ASSOCIATE PROFESSOR Hua Xu
RESEARCH ASSISTANT PROFESSORS Stephany Duda, Fern FitzHenry, Peillin Jia, Qi Liu, Firas H. Wehbe
INSTRUCTOR Shane Stenner

DEGREES OFFERED: Master of Science, Doctor of Philosophy

BIOMEDICAL informatics studies the structure, discovery, acquisition, integration, management, and optimal use of biomedical information. The field involves multidisciplinary research in all aspects of health care delivery, biomedical research, computational biology, and public health. Biomedical informatics applies, evaluates, and expands results from a variety of disciplines including information and computer science, library science, cognitive science, business management and organization, statistics and biometrics, mathematics, artificial intelligence, operations research, economics, and of course, basic and clinical health sciences. Biomedical informatics has both "knowledge and methods" and "application domain" components. It expands beyond biomedical computer systems design, application, and evaluation to provide theory, tools, and systems that address today’s most urgent challenges in health care delivery, biomedical research, and health professions education.

The curriculum offers concentration areas: Clinical Informatics, the application of informatics to direct patient care, such as advanced decision support and person-centered health records; Translational Bioinformatics, the application of informatics to support basic research in such areas as genomics, proteomics, and systems biology; and Clinical Research Informatics, which focus on innovative applications of informatics methods and principles to facilitating "bench to bedside" translational and clinical research.

Students typically enter with a background in one of the health professions (e.g., M.D., R.N., D.D.S., Ph.D. in a health-related area such as psychology or biostatistics), or with a background in computing, engineering, biology, or
mathematics. After graduation they pursue careers as full-time academic researchers, part-time academic researchers/part-time clinicians, scientific managers or advanced scientists in industry, information managers in health care settings, consultants, or entrepreneurs.

All students take the five core Biomedical Informatics courses: Foundations of Biomedical Informatics, Foundations of Bioinformatics, Methodological Foundations of Biomedical Informatics, Scientific Communication, and Research Rotation in Biomedical Informatics. In addition, M.S. degree students take two selectives (advanced courses in Biomedical Informatics); two courses in each of two competency areas (unless satisfied by prior education or experience): Computer/Information Science, Biology/Medicine, and Research Methods; and take one additional elective. Ph.D. students take three selectives; two courses in each of three competency areas (unless satisfied by prior education or experience), depending on background; and three additional electives. The curriculum is adapted to students’ backgrounds and concentration area. Thus a minimum of 30 course credit hours and a thesis are required for the M.S. degree, and a minimum of 72 credits is required for the Ph.D. degree. In addition to earning the M.S. degree, Ph.D. students must pass a qualifying examination and successfully propose and defend a dissertation. A teaching practicum is strongly recommended.

Course descriptions begin on page 78.

Biomedical Sciences

ELEVEN programs participate in the Interdisciplinary Graduate Program: Biochemistry, Biological Sciences, Cancer Biology, Cell and Developmental Biology, Cellular and Molecular Pathology, Chemical and Physical Biology program, Microbiology and Immunology, Molecular Physiology and Biophysics, Neuroscience, Pharmacology, and Human Genetics. During their first year, students take a core curriculum and conduct research in four laboratories before selecting the discipline in which they will earn the Ph.D. degree. Additional course work during subsequent years is appropriate to each discipline and the student’s interests.

Ph.D. dissertation research may be conducted in any one of over 250–300 laboratories. Research opportunities are available in the following areas: biochemistry, biological sciences, cancer biology, cell biology, developmental biology, genetics, microbiology, immunology, pharmacology, molecular biology, molecular pathology, molecular toxicology, molecular neuroscience, reproductive biology, signal transduction, structural biology, molecular biophysics, and vascular biology.

Course descriptions begin on page 79.

Biophysics

See Molecular Physiology and Biophysics, Physics and Astronomy
Master of Science

Candidates for the Master of Science (M.S.) must complete a minimum of 24 semester hours of graduate-level courses in biostatistics. The core M.S. curriculum consists of one probability course, one statistical inference course, five courses on statistical methods, and one course of signature training. A minimum of eight core biostatistics courses and four elective courses is required for the M.S. degree. Students who are currently Ph.D. candidates in other departments may be eligible for a waiver of the elective course requirement. M.S. candidates must also pass the first-year comprehensive examination, complete the second-year interdisciplinary research rotation, submit a master’s thesis detailing an original investigation in an area of biostatistics, and present their thesis in a departmental seminar.

Course descriptions begin on page 79.

Cancer Biology

ACTING CHAIR: Harold L. Moses
DIRECTOR OF GRADUATE STUDIES: Jin Chen
PROFESSORS: Harold L. Moses, Cathleen C. Pettersen, Vito Quaranta, Albert B. Reynolds, Ann Richmond
ASSOCIATE PROFESSORS: Alissa Weaver, Fiona Yull
RESEARCH ASSOCIATE PROFESSORS: Mikhail Dikov, Lisa Joy McCawley
ASSISTANT PROFESSORS: Robert Carnahan, Rebecca Cook, Lourdes Estrada, Barbara Fingleton, Rebecca A. Ihrie, Jonathan M. Irish, Carlos F. Lopez
RESEARCH ASSISTANT PROFESSORS: Christopher Coldren, Kimberly Brown Dahman, Yan Guo, Sergey Novitsky, Dayanidhi Raman, Jiqing Sai, Robbert Slabos, Darren Tyson
RESEARCH INSTRUCTOR: Oleg Y. Tikhomirov

DEGREE OFFERED: Doctor of Philosophy

(Cancer Biology does not offer a master of science degree program; however, if a student’s goals change during the course of the Ph.D. program, an M.S. degree can be awarded provided the criteria as outlined in the program guidelines are met.)

STUDENTS interested in this program participate in the Interdisciplinary Graduate Program within the Division of Biomedical Sciences (see Biomedical Sciences) or in the Chemical and Physical Biology Program during the first year. The second year of study encompasses two required courses in Cancer Biology (340 and 342) and electives to complete a total of at least 24 hours of formal course work toward the Ph.D. degree (this includes the 16 hours completed in the first year). Additional requirements are: successful completion of the qualifying exam; regular meetings, initially with a mentor committee and then biannual meetings with a dissertation committee; and an annual presentation at the department’s weekly “Science Hour Seminar Series,” starting in the spring of the third year of study. Attendance at the annual Vanderbilt-Ingram Cancer Center retreat and the annual Cancer Biology departmental retreat is encouraged. Most Cancer Biology students participate in the Cancer Biology Student Association (CBSA), which organizes a variety of events each year to enhance the quality of student experience in the Cancer Biology program.

The program offers focused and comprehensive training in the discipline of cancer biology. Modern cancer research is based on a broad range of technical skills, including molecular biology, cell biology, genetics, biochemistry, and bioinformatics, all of which the student will learn through course work and laboratory training. Further training includes exercises designed to develop independent thinking, skills in oral and written presentation, analysis of data and information, and dissemination of information through teaching. The program prepares students with the necessary theoretical and practical skills to succeed in an increasingly wide range of available careers, including academic research, undergraduate teaching, science writing, and basic or applied science in the biotechnology and pharmaceutical industry.

Major research efforts include studies on tumor-stroma interactions, angiogenesis, growth factor and cytokine signaling, oncogenes, tumor suppressors, matrix and matrix degradation, cell adhesion, and metastasis, as well as systems biology as applied to cancer growth, metastasis, and response to drugs. These studies use state-of-the-art technologies, including all aspects of molecular and cell biology, biochemistry, genetically modified mice, “omics,” mathematical modeling, and others.

Faculty within the department also participate in interdisciplinary training programs in cancer research supported by the National Cancer Institute of the National Institutes of Health.

Course descriptions begin on page 81.

Cell and Developmental Biology

CHAIR: Ian G. Macara
DIRECTOR OF GRADUATE STUDIES: Matthew J. Tyska
PROFESSORS EMERITI: Steven Hanks, Jeanette Norden
ASSOCIATE PROFESSORS: Guoqiang Gu, Irina N. Kaverina, Ethan Lee, Melanie Ohi, Ryoma Ohi, Andrea Page-McCaw, Matthew J. Tyska
ASSISTANT PROFESSORS: Dylan T. Burnette, Ken Lau, Jason A. MacGurn

DEGREE OFFERED: Doctor of Philosophy

GRADUATE study in cell and developmental biology at Vanderbilt emphasizes an interdisciplinary approach to biological research. Ongoing research programs bridge a wide range of scales, from single molecules to whole organisms, with exciting opportunities in both basic and disease-oriented biomedical science. Faculty are affiliated with several centers (Center for Molecular Neuroscience, Center for Stem Cell Biology, Center for Structural Biology, Digestive Disease Research Center, Vanderbilt Diabetes Research and Training Center, Vanderbilt Kennedy Center for Research on Human Development, the Epithelial Biology Center, and the Vanderbilt-Ingram Cancer Center), and there are significant collaborative interactions with the transinstitutional Program in Developmental Biology.

The department provides specialized training in basic cellular and organismal processes with the goal of solving fundamental biological problems as a foundation for addressing questions of biomedical significance. In each research area, multidisciplinary approaches in genetics, proteomics, and imaging are employed;
key model systems include yeast, C. elegans, Drosophila, Xenopus, zebrafish, chick, mice, and cultured cell lines. Research areas include cell-cycle progression, cell signaling, motility and polarity, vesicle trafficking, gene regulation, cytoskeletal dynamics and molecular motors, apoptosis, cell differentiation and cell fate decisions, tissue patterning, embryogenesis, morphogenesis, organogenesis, and tumorigenesis. Graduate studies in each of these areas may also include interdepartmental courses from Cell and Developmental Biology, Biochemistry, Pharmacology, Psychology, Biological Sciences, Neuroscience, and Molecular Physiology and Biophysics. The program is designed to lead to the Ph.D. degree.

Course descriptions begin on page 82.

Chemical and Biomolecular Engineering

CHAIR G. Kane Jennings
DIRECTOR OF GRADUATE RECRUITING Bridget R. Rogers
DIRECTOR OF GRADUATE PROGRAM Clare McCabe
DIRECTOR OF UNDERGRADUATE PROGRAM Kenneth A. Debelak
PROFESSORS EMERITI Thomas R. Harris, Robert J. Roselli, John A. Roth, Karl B. Schnelle Jr., Robert D. Tannen
PROFESSORS Peter T. Cummings, Todd D. Giorgio, G. Kane Jennings, David S. Kosson, Paul E. Laibinis, M. Douglas LeVan, Clare McCabe, K. Arthur Overholser, Peter N. Pintauro, David W. Piston, Sandra J. Rosenthal
PROFESSOR OF THE PRACTICE Julie E. Sharp
ASSOCIATE PROFESSORS Kenneth A. Debelak, Scott A. Guelcher, Eva M. Harth, Matthew J. Lang, Bridget R. Rogers
ASSOCIATE PROFESSOR OF THE PRACTICE Russell F. Dunn
ASSISTANT PROFESSORS Rizia Bardhan, Shihong Lin, John T. Wilson, Jamey D. Young

DEGREES OFFERED: Master of Science, Doctor of Philosophy

CHEMICAL engineers play key roles in the development and production of commodity chemicals, pharmaceuticals and bioengineered materials, high-strength composites and specialty polymers, semiconductors and microelectronic devices, and a wide range of ultrapure fine chemicals. Indeed, chemical and biomolecular engineering is essential for the operation of contemporary society. The solutions to many of the problems that we face today—e.g., energy, the environment, development of high-performance materials—will involve chemical engineers.

Graduate work in chemical and biomolecular engineering provides an opportunity for study and research at the cutting edge—to contribute to shaping a new model of what chemical engineering is and what chemical engineers do. Formal course work essentially increases the exposure to chemical and biomolecular engineering principles that students receive as undergraduates. Thesis research gives unparalleled experience in problem solving, the key to challenging research assignments in industry and admission to the worldwide community of scholars.

All faculty members are active in research and direction of graduate student projects. Current research areas include adsorption and surface chemistry, electrochemical engineering, bio- and nano-materials, tissue engineering, and molecular and mathematical modeling, all to address problems in biotechnology, alternative energy, nanotechnology, and the environment.

Programs leading to the M.S. and Ph.D. degrees are offered through the Graduate School. Both require a combination of course work and a thesis. The master of engineering, an advanced professional degree for engineers, is offered by the School of Engineering. There is no language requirement for any degree.

Candidates for the master of science must complete 30 semester hours of graduate-level courses (12 hours in chemical engineering core courses, with the remaining hours selected from courses in the major or from related areas of interest approved by the research adviser). In addition to course work, each degree candidate conducts research under the supervision of a faculty adviser, prepares a written thesis, and presents it orally to the faculty. An M.S. program for non-chemical engineering undergraduates also exists at Vanderbilt. Persons interested in this program should contact the director of the graduate program in the Department of Chemical and Biomolecular Engineering for more detailed information.

Candidates for the doctor of philosophy complete a minimum of 72 semester hours of work beyond the bachelor’s degree. At least 24 of these hours are course work including 12 hours in required chemical and biomolecular engineering courses. Of the remaining 12 hours at least 3 hours must be taken outside the department (and cannot be for a co-listed course). These courses should complement the student’s research interests. The remaining hours are Ph.D. dissertation research. The course load is designed to allow students to spend the majority of their studies on original research. Up to 24 hours of graduate course work with an equivalent of A or B grade may be transferred to Vanderbilt and applied to the Ph.D. At the end of the first year in residence, students complete a departmental examination. Admission to candidacy in the Ph.D. program is based upon this departmental examination, as well as the Ph.D. qualifying examination, which consists of written and oral presentation of a proposal for doctoral research. Following the examinations and at least 24 semester hours of dissertation research, the student prepares and publicly defends a dissertation presenting results of original research.

Course descriptions begin on page 85.

Chemical and Physical Biology

Ph.D. Training Program in Chemical and Physical Biology

The Ph.D. degree in chemical and physical biology is available to all students who enter the transinstitutional CPB or IGP graduate admissions program, the MSTP, or any of the
departmentally based graduate programs. The Ph.D. training program is designed to provide rigorous integrated training at the interface of the chemical and/or physical sciences and the biological sciences. The course work and research components of the program prepare students for research careers in which they are able to bring state-of-the-art tools of the modern chemical and physical sciences to bear on cutting-edge biological problems.

The curriculum prepares students for research careers at the chemistry-biology interface, in imaging sciences, in structural biology, or in molecular biophysics. Research opportunities are available in a broad range of areas including: biological mass spectroscopy, biomagnetics and nonlinear dynamics, computational biology and molecular modeling, protein-protein interactions, NMR and EPR, cryo-Electron Microscopy, chemical biology, fluorescence spectroscopy and microscopy, in vivo imaging, protein-nucleic acid interactions, structural biology, nanocrystals, macromolecular structure and dynamics, mechanistic enzymology, proteomics, molecular toxicology, and mathematical modeling of biological systems.

Course descriptions begin on page 86.

Chemistry

CHAIR David W. Wright
DIRECTOR OF GRADUATE STUDIES Carmelo J. Rizzo
PROFESSORS EMERITI Robert V. Ditts, Larry C. Hall, Thomas M. Harris, David M. Hercules, Melvin D. Joesten, Mark M. Jones, Joel Tellinghuisen, David L. Tuleen, David J. Wilson
RESEARCH PROFESSORS Thomas M. Harris, David M. Hercules, Charles M. Lukelhart, Ned A. Porter
ADJUNCT PROFESSOR Lidia Smentek
ASSOCIATE PROFESSORS Brian O. Bachmann, Evi M. Harth, Piotr Kaszynski, Jens Meier
RESEARCH ASSOCIATE PROFESSORS Markus W. Voehler, Huiyong Yin
ADJUNCT ASSOCIATE PROFESSOR Norma K. Dunlap
ADJUNCT ASSOCIATE PROFESSOR Joshua T. Moore
ASSISTANT PROFESSORS Janet E. Macdonald, Steven D. Townsend
ADJUNCT ASSISTANT PROFESSORS Natalie Y. Arnett, Andrienne C. Friedli

DEGREES OFFERED: Master of Science, Doctor of Philosophy

RESEARCH programs are offered in analytical, biological, inorganic, organic, and physical chemistry along with interdisciplinary research programs in chemical biology, molecular toxicology, materials chemistry, nanoscale science, structural and computational biology, and chemical physics. A wide range of research is supported by excellent research facilities, modern instrumentation, and external funding.

A research thesis is required for the master’s degree. Specific requirements for the Ph.D. degree are defined in the Ph.D. program document that is available upon request from the Department of Chemistry. Both the master’s and Ph.D. degrees require a minimum of 24 hours of formal course work.

Course descriptions begin on page 86.

Civil Engineering

CHAIR Douglas E. Adams
DIRECTOR OF GRADUATE STUDIES Prodyot K. Basu
PROFESSORS EMERITI Paul Harrawood, Peter G. Hoadley, Hugh F. Keedy, Frank L. Parker, Richard E. Speece, Edward L. Thackston
PROFESSORS Mark D. Abkowitz, Douglas E. Adams, Prodyot K. Basu, George M. Homberger, David S. Kosson, Sankaran Mahadevan
PROFESSORS OF THE PRACTICE Curtis D. Byers, James H. Clarke, Sanjiv Gokhale
ADJUNCT PROFESSORS Gregory L. Cashion, Vic L. McConnell
ASSOCIATE PROFESSORS OF THE PRACTICE Lori Troxel, John R. Veillette
ASSISTANT PROFESSORS Ravindra Duddu, Shihong Lin

DEGREES OFFERED: Master of Engineering, Master of Science, Doctor of Philosophy

DEGREE programs at the M.S. and Ph.D. level are offered in risk, reliability, and optimization; structural mechanics and materials; computational science and mechanics; and transportation engineering, and at the M.E. level in construction management, structural engineering, and transportation engineering. M.S. and Ph.D. programs in environmental engineering are offered by a separate graduate program in that subject. The Ph.D. requires a minimum of 36 hours of formal course work and a dissertation. The M.S. degree has two options: (1) 24 hours of graduate-level course work and a research thesis, or (2) 30 hours of graduate-level course work.

The master of engineering degree, an advanced professional degree for engineers, is offered by the School of Engineering, requiring 30 hours of graduate-level course work and a project report.

Course descriptions begin on page 88.
Classical Studies

CHAIR Thomas A. J. McGinn
DIRECTOR OF GRADUATE STUDIES Barbara Tsakirgis
PROFESSORS EMERITI Robert Drews, F. Carter Philips, Susan Ford Wiltshire
PROFESSORS Thomas A. J. McGinn, Jack M. Sasson, David J. Wasserstein
ASSOCIATE PROFESSORS Kathy L. Gaca, Joseph L. Rife, Betsey A. Robinson, Barbara Tsakirgis
ASSISTANT PROFESSORS Scott F. Aikin, Michael Johnson, Mireille Lee, David E. Petrain, David A. Michelson

DEGREE OFFERED: CLASSICS. Master of Arts

THE Department of Classical Studies offers a selective M.A. program that provides a solid basis for either of two important goals in the field of Classics. First, the department trains promising M.A. candidates who aspire to apply to and enter a nationally ranked Ph.D. program in classical languages or in other recognized fields of Classics, such as ancient history and classical art and archaeology. The department also trains M.A. candidates who aspire to become effective teachers of Latin and/or Greek. The program, as broadly defined, involves a minimum of 36 hours and a maximum of 48 hours of course work over a two-year period. During the two years, the Classics M.A. student is also required to pass proficiency examinations in Greek and Latin and either proficiency examinations or course requirements in history and art. The student must also demonstrate reasonable proficiency in reading classical scholarship in German or French, or in another Romance language (e.g., Italian or Spanish). Applicants should be able to read both Latin and Greek, though not necessarily both at the same level of proficiency, and they also should have completed an elementary course in German, French, or another Romance language.

On entering, every student takes diagnostic examinations in Greek and Latin prose and poetry. The examinations are not graded and are intended only to determine a student’s proficiency in the languages at the time of matriculation and for placement in courses. The examinations test familiarity with language and with scansion.

Each semester each student takes at least three and no more than four courses for credit. It is expected that all Classics M.A. students will take both graduate seminars regularly offered in Greek and Latin each semester and that they will strive to produce first-rate master’s seminar papers in these graduate courses. When their papers attain an A+ level of excellence, they are encouraged to present their papers to the Classics faculty and to submit their papers to professional academic conferences, such as the American Philological Association (APA), the Archaeological Institute of America (AIA), and the Classical Association of the Middle West and South (CAMWS). The proficiency examinations in Greek and Latin are made up of passages taken from the M.A. reading list. The two examinations test familiarity with language and scansion. The proficiency examinations are offered regularly over the course of the M.A. program.

Classics M.A. students are required to take at least one course in each of the areas of ancient history and the history of art, and both courses must be in either the Greek or the Roman tradition. Students may fulfill their Greek or Roman history of art requirement in several possible ways, including:

1. undergraduate courses in Greek or Roman art history,
2. graduate seminars in Greek or Roman art and archaeology,
3. summer participation in the summer program of the American School of Classical Studies at Athens, Greece, or of the American Academy in Rome, Italy. To fulfill the requirement for ancient history, M.A. students can either (1) take a regular course in Greek history (CLAS 208 or 209) or Roman history (CLAS 212 or 213), or (2) take an examination. In order to fulfill the requirement with course work, a student must earn a B+ or better in each of the two courses in the given areas. If the student chooses to fulfill the requirement with an examination, the examination of two hours’ length is taken at the very beginning of the fourth semester. One re-take of each examination is allowed.

A distinguished feature of Vanderbilt’s M.A. program in Classics is the anticipation that in the summer following the first year in residence, M.A. candidates will study in the Mediterranean. Students in good standing are urged to apply for the summer programs offered by the American School of Classical Studies in Athens (ASCSA) and the American Academy in Rome (AAR) in the hope of being accepted into one of these two summer programs. They also generally receive Rankin Fellowship funding from the department to support this study abroad in either the AAR or ASCSA summer program.

Because students pursuing a graduate degree in Classics normally do so with aims that include teaching Latin, Greek, or Classics, the department makes every effort to provide each student with some teaching experience. In the second year of residence, an M.A. candidate may expect to gain experience as a teaching assistant, primarily as an instructor in an elementary Latin section or, secondarily, as an assistant in a Greek, Latin, or Classics course.

Successful students in the Classics M.A. program are encouraged to pursue Classics Ph.D. studies in a nationally ranked doctoral program that is well positioned to help its Classics doctoral recipients to find a rewarding professional appointment. Faculty in the department are eager to support this aspiration, such as by advising the student about which Classics Ph.D. programs are best suited to his or her interests, and by doing their best to facilitate the student’s successful entry into such a doctoral program.

If they so choose, Classics M.A. students with interdisciplinary interests are also welcome to apply for, and may be accepted into, an interdisciplinary Ph.D. program at Vanderbilt that promotes further graduate study in Classics, such as history, religious studies, Greek philosophy, English, and art history.

Note: New students are not being accepted for the 2014/2015 academic year.

Course descriptions begin on page 90 for Classics, on page 105 for Greek, and on page 114 for Latin.

Community Research and Action

CHAIR Marybeth Shinn
DIRECTOR OF GRADUATE STUDIES Craig Anne Heflinger
PROFESSORS EMERITI Joseph Cunningham, Paul Dolcecki, Robert Innes
PROFESSORS Sandra Barnes, Craig Anne Heflinger, Velma Murry, Douglas Perkins, Marybeth Shinn, William Turner
RESEARCH PROFESSOR Mark Lipsey
ASSOCIATE PROFESSORS James Fraser, Maury Nation, Paul Speer
The graduate program in computer science is structured around six primary research areas: (1) distributed and networked systems, (2) embedded and hybrid systems, (3) image processing and graphics, (4) intelligent systems, (5) software and systems engineering, and (6) theory. A variety of advanced graduate courses are offered in each of these areas. Doctoral candidates are required to complete a minimum of 36 hours of formal course work, which may include at most 6 hours of independent study. The distribution of courses must contain three 300-level courses in the student’s primary research area, and four 300-level courses in at least three of the other primary research areas. All students must take CS 310, which can be used to satisfy the distribution requirements above. CS 258 and CS 253 may be counted as 300-level courses for satisfying the distributional requirements.

The master’s degree in computer science may be earned through (a) the regular program that includes a thesis or (b) a non-thesis program requiring 30 hours of formal course work. For option (a), up to 6 hours of M.S. thesis research may be applied to the 30 hour total. Under either plan at least 12 hours must be in approved 300-level courses. A master’s degree in passing option is available to students who have passed the Ph.D. qualifying exam and completed at least 42 hours of graduate studies.

The master of engineering, an advanced professional degree for engineers, is offered by the School of Engineering.

Course descriptions begin on page 91.
Economics

CHAIR Kamal Saggi
VICE CHAIR Eric Bond
DIRECTOR OF GRADUATE STUDIES Jennifer F. Reinganum
DIRECTOR OF THE GRADUATE PROGRAM IN ECONOMIC DEVELOPMENT Kamal Saggi

PROFESSORS Kathrynn H. Anderson, Eric Bond, Christopher (Kit) Carpenter, William J. Collins, John Conley, Mario Crucini, William W. Damon, Andrew F. Daughety, Robert A. Driskill, Benjamin Eden, Kevin X. D. Huang, Gregory Huffman, Atsushi Inoue, Tong Li, Jennifer F. Reinganum, Peter L. Rousseau, Kamal Saggi, Mototsugu Shintani, John A. Weymark, Myrna Wooders

ASSOCIATE PROFESSORS Malcolm Getz, Andrea Moro
ASSISTANT PROFESSORS Andrew Dustan, Federico Gutierrez, Eun Jeong Heo, Dong-Hyuk Kim, Alejandro Molnar, Hyunseung Oh, Claudia Rei, Joel Rodrigue, Peter Saveliev, Diana N. Weymark

DEGREE OFFERED: Doctor of Philosophy

GRADUATE study in economics at Vanderbilt prepares students for research and teaching careers in universities and for leadership positions in government, international agencies, and business. The curriculum emphasizes economic theory, econometrics, and the use of theory and measurement in understanding economic phenomena and policy issues. Students have been attracted to the program from all parts of the United States and from more than sixty countries.

A master’s degree (without thesis) may be awarded after completion of 42 hours of Ph.D. course work with an average of at least B or better.

For the Ph.D. degree, which requires 72 hours and a thesis, the student normally takes required courses in microeconomics and macroeconomics, economic history, statistics, and econometrics. Economics courses in this catalog numbered below 250 may be available for minor credit in other graduate programs. Only those courses numbered 250 and above may carry graduate credit in economics graduate programs. There is a mathematics requirement, normally satisfied by taking Economics 300, Selected Topics in Mathematics for Economists. There is no foreign language requirement.

The faculty requires that all doctoral students, before undertaking the oral qualifying examination, pass written examinations in economic theory (micro and macro) and in one major elective field chosen from the following: advanced economic theory, econometrics, economic growth and development, economic history, finance, industrial organization, international economics, labor, money, and public finance. A second field chosen from that list may be completed by either passing a written examination or by passing two courses in this field numbered above 300 with a grade of B or better in each course. A second field in which the department offers only one course above 300 or a field requested by petition must be passed by written examination. Each year the department offers a variety of graduate-level courses beyond the core.

At a minimum, it is expected that each entering student has completed one year of calculus and courses in intermediate microeconomic and macroeconomic theory, statistics, and linear algebra.

Detailed information is available on request from the department.

Graduate Program in Economic Development

The GPED is intended primarily for students seeking a master’s degree in economics with an interest in international development. Students who meet the academic requirements of 30 hours of course work, with at least a B average, receive the master of arts degree in economics. Students typically complete the program in sixteen to twenty-four months. Prospective students with a strong undergraduate background in economics, a good command of English, and high quantitative scores on the GRE are encouraged to apply. The program is described under Special Programs.

Course descriptions begin on page 95.

Electrical Engineering

CHAIR Daniel M. Fleetwood
ASSOCIATE CHAIR William H. Robinson
DIRECTOR OF GRADUATE STUDIES Robert A. Reed

PROFESSOR OF THE PRACTICE Ralph W. Bruce

RESEARCH ASSOCIATE PROFESSORS Michael L. Alles, Theodore Bapty, Zhaohua Ding, W. Timothy Holman, Marcus H. Mendenhall, Sandeep Neema, Arthur F. Witulski

ASSISTANT PROFESSORS Kirill Bolotin, William A. Grissom, Bennett Landman, Pietro Valdastri, Jason Valentine, Robert Webster, Yaqiong Xu

RESEARCH ASSISTANT PROFESSORS Pierre-Francois D’Haese, Jeremy Mares, Jack Noble, Supil Raina, Enxia Zhang

ADJUNCT ASSISTANT PROFESSORS Brian D. Sierawski, T. Daniel Loveless, Janos Salloi

DEGREES OFFERED: Master of Science, Doctor of Philosophy

PROGRAMS in electrical engineering are offered in the areas of analog and digital circuits, computer engineering, intelligent systems, solid state devices, signal and image processing and analysis, robotics, microelectronics, photonics, nanotechnology, and related areas in biomedical engineering.

The Master of Science degree program requires 24 credit hours, including 18 hours in the major area (within EECE) and 6 hours in a minor area. At least 12 hours in the major area must be taken at or above the 300 level. The courses taken must also include one of the gateway courses in each of two of the
following areas: electronics, computer, and signals and systems. Gateway courses are graduate-level courses with senior-level prerequisites, the list of which is maintained by the DGS. The remainder of the course work in the major must be taken at or above the 250 level. The minor will be six hours of graduate-level course work, typically outside of EECE. A maximum of 3 hours of independent study may be applied to the 18 hours required in the major area. The student’s adviser must approve all courses. A research thesis is required. A non-thesis option is also offered, which requires an additional 6 hours of independent study constituting one single unit of research work.

A total of 72 hours is required for the Ph.D. Of these, 36 hours must be in course work with at least 24 of the 36 hours in EECE (exceptions can be made to this rule based on the recommendation of the student’s adviser if the student research topic requires taking additional courses outside EECE). The courses taken must also include one of the gateway courses in each of the three following areas: electronics, computers, and signals and systems. Gateway courses are graduate-level courses with senior-level prerequisites, the list of which is maintained by the EE director of graduate studies, and posted on the EECS department website. Up to 6 hours of independent studies may be taken to fulfill the 36 hours requirement. Up to 24 hours of course work toward the master’s degree or in transfer credit will normally be applied to this total on approval by the committee. Up to 12 total hours of course work in the range 250–299 are allowed. CS courses in the student’s area of research can also be taken for EECE graduate program credit with written approval of the student’s adviser. The remainder of the 72 hours may be in dissertation research hours and in additional course work or independent study classes applicable to the student’s program of study. Students must complete at least 24 hours while in residence at Vanderbilt. At least 12 of these hours must be in formal course work.

Specific and current degree requirements (including course selection, committee selection, preliminary examination, thesis/dissertation, and dissertation defense policies) are detailed in the Graduate Policy Document. A copy of this document should be obtained from the program office.

The master of engineering, an advanced professional degree for engineers, is offered by the School of Engineering.

Course descriptions begin on page 98.

Engineering Management

DIRECTOR Christopher John Rowe
DIRECTOR OF UNDERGRADUATE STUDIES John A. Bers
PROFESSORS EMERITI Jimmy L. Davidson, Robert W. House, Barry D. Lichter, Robert T. Nash
PROFESSORS Mark D. Abkowitz, Gautam Biswas, David M. Dlits, Kazuhiko Kawamura, Frank L. Parker
ADJUNCT PROFESSORS David A. Berezov, Christopher D. McKinney
ASSISTANT PROFESSOR OF THE PRACTICE Kenneth R. Pence

COURSES in engineering management are available for minor credit. Students should consult their advisers about the acceptability of the courses as related work in their specific program of study.

Course descriptions begin on page 99.

English

CHAIR Michael Kreyling
ASSOCIATE CHAIR Mark Jarman
DIRECTOR OF GRADUATE STUDIES Mark A. Wollaeger
DIRECTOR OF CREATING WRITING PROGRAM Kate Daniels
PROFESSORS EMERITI Vereen M. Bell, Paul Elledge, John Halperin, R. Chris Hassel Jr., Harold Lerow Weatherby Jr.
ASSOCIATE PROFESSORS Jennifer Fay, Humberto Garcia, Teresa A. Goddu, Rick Hilles, Lorraine Lopez, Ifeoma Nwankwo, Bridget Orr, Nancy Reisman, Allison Schachter, Rachel Teukolsky
ASSISTANT PROFESSORS Candice Amich, Christin Essin, Marzia Miallazzio, Haein Shin, Ben Tran
WRITERS IN RESIDENCE Beth Bachmann, Peter Guralnick, Amanda Little, Sandy Solomon

DEGREES OFFERED: Master of Fine Arts, Doctor of Philosophy

THE graduate program in English offers course work and research supervision in all areas of British and American literature, Anglophone literature from other countries, film, cultural studies, and literary theory. The goal of the Ph.D. program is to produce scholars, critics, and teachers of literature and culture for colleges and universities.

Applicants must submit scores on the General Test of the Graduate Record Examination.

Requirements for the master’s degree include 24 hours of course work and a thesis at the end of the M.A. year.

Requirements for the M.F.A. include 42 to 48 hours of course work, a thesis of creative work (a novel, a book of short stories, a collection of poems, or a collection of personal essays), plus an oral defense of the thesis.

Requirements for the Ph.D. include at least 52 hours of course work, Ph.D.–level proficiency in a foreign language, comprehensive examinations, and a dissertation.

Through the Combined B.A./M.A. (4+1) Option, the Department of English offers exceptional students the opportunity to earn both the B.A. and the M.A. in five years. Students will be provisionally admitted to the 4+1 program only by approval of the department. Further information about the program is available from the director of graduate studies.

Other regulations governing graduate work are available from the director of graduate studies. For more information on the M.F.A., see the Academic Programs chapter of this catalog.

Graduate seminars in creative writing may be repeated for credit with program director’s approval. Other graduate seminars may be repeated for credit if topics are not duplicated.

Course descriptions begin on page 100.
Environmental Engineering

CHAIR Douglas E. Adams
DIRECTOR OF GRADUATE STUDIES James H. Clarke
PROFESSORS Emeriti Frank L. Parker, John A. Roth, Karl B. Schnelle Jr., Richard E. Speece, Edward L. Thackston
PROFESSORS OF THE PRACTICE Curtis D. Byers, James H. Clarke, Sanjiv Gokhale, Steven L. Krah
ADJUNCT PROFESSORS Gregory L. Cashion, Ann N. Clarke, Allan Croft, B. John Garrick, Vic L. McConnell, Michael T. Ryan, Raymond G. Wymer
ASSOCIATE PROFESSORS John C. Ayers, Alan R. Bowers, Steven L. Goodbred, Eugene J. LeBoeuf, Caglar Oskay, Florence Sanchez, Michael G. Stabin
ASSISTANT PROFESSORS Ravindra Duddu, Shihong Lin
RESEARCH ASSISTANT PROFESSOR Janey V. Camp

DEGREES OFFERED:
- Master of Engineering, Master of Science
- Doctor of Philosophy

The graduate program in environmental engineering provides options for study and research in environmental engineering and environmental science. Students pursuing advanced degrees focus their course work and research in nuclear environmental engineering, water quality and water resources, waste management and remediation, energy choices and environmental consequences, environmental engineering, policy and management, or environmental resources and geologic processes.

The unique focus of the Ph.D. program in environmental engineering is training environmental engineers with unparalleled excellence in advanced quantitative methods who have a strong grasp of causal logic, inference, probability, and other theoretical aspects of study design and data analysis, in addition to content area expertise. The curriculum features classroom, computing, and experience-based teaching. The program integrates training and research across clinical, laboratory, and quantitative disciplines. At the completion of the program, graduates will be prepared to develop an independent research portfolio in academia, research, or industry. Our goal is to train critical thinkers prepared to make fundamental advances using rigorous and cutting-edge approaches to research. Graduates will be able to contribute across a wide spectrum of content areas and research foci.

Students admitted to the program are required to complete a total of 72 credit hours, including course work and research. Selected core courses will be shared with the biostatistics graduate programs. In addition to the required methods curriculum, students will take content area and advanced methods electives. Students are eligible to take relevant course work, for which they meet the prerequisites, in any Vanderbilt department. Requirements for program completion include a comprehensive examination at the end of the second year, an oral defense of the dissertation proposal, and the doctoral dissertation. The program is expected to take four years to complete. Students can accelerate their studies to complete the program in three years.

Students will be matched shortly after acceptance with research preceptor teams. These established multidisciplinary teams include environmental engineering, biostatistics, and clinical researchers, biostatisticians, and experienced research staff. The research preceptor team commits to involving the student as a co-investigator from the beginning of the student’s graduate studies. Students will use actual data from their research teams in their course work. The goal is to create a mutually beneficial partnership that produces synergy between education, professional development, and the conduct of research.

Strong candidates for admission will have a master’s degree in environmental engineering, biostatistics, or another quantitative discipline; experience in the conduct of research and independent data analysis; and strong quantitative preparation and aptitude, including high GRE scores. Top applicants will have an expenses-paid, on-campus interview during which they will meet with research teams. Both students and research teams will then have the opportunity to rank whom they feel would be the best match(es).

For further information, please visit our website at epi.phd.vanderbilt.edu.

Epidemiology

DIRECTOR OF GRADUATE STUDIES Katherine E. Hartmann
ASSOCIATE DIRECTOR OF GRADUATE STUDIES Toddi Edwards
PROFESSORS William Blot, Peter Buerhaus, Robert Dittus, Wes Ely, Marie Griffin, Joseph McLaughlin, David Penson, Wayne Ray, Maureen Sanderson, Xiao-ou Shu, Flora Uko, Sten Vermund, Wei Zheng

RESEARCH ASSOCIATE PROFESSORS Loren Lipworth, Melissa McPheeters, Martha Shrubsole, Wanqing Wen, Gong Yang
ADJUNCT RESEARCH ASSOCIATE PROFESSOR Lisa Signorello

ASSISTANT PROFESSORS Melinda Aldrich, Kristin Archer, Alicia Beeghly-Fadie, Stephen Deppen, Todd Edwards, Meira Epel, Jirong Long, Han-Zhu Qian, Digna Velez-Edwards, Raquel Villegas, Xianglan Zhang
RESEARCH ASSISTANT PROFESSOR Hui Cai
ADJUNCT ASSOCIATE PROFESSOR Sandra Deming-Halverson
RESEARCH INSTRUCTORS Natalia Jimenez-Truque, Aaron Kipp

DEGREE OFFERED: Doctor of Philosophy

The unique focus of the Ph.D. program in epidemiology is training epidemiologists with unparalleled excellence in advanced quantitative methods who have a strong grasp of causal logic, inference, probability, and other theoretical aspects of study design and data analysis, in addition to content area expertise. The curriculum features classroom, computing, and experience-based teaching. The program integrates training and research across clinical, laboratory, and quantitative disciplines. At the completion of the program, graduates will be prepared to develop an independent research portfolio in academia, research, or industry. Our goal is to train critical thinkers prepared to make fundamental advances using rigorous and cutting-edge approaches to research. Graduates will be able to contribute across a wide spectrum of content areas and research foci.

Students admitted to the program are required to complete a total of 72 credit hours, including course work and research. Selected core courses will be shared with the biostatistics graduate programs. In addition to the required methods curriculum, students will take content area and advanced methods electives. Students are eligible to take relevant course work, for which they meet the prerequisites, in any Vanderbilt department. Requirements for program completion include a comprehensive examination at the end of the second year, an oral defense of the dissertation proposal, and the doctoral dissertation. The program is expected to take four years to complete. Students can accelerate their studies to complete the program in three years.

Students will be matched shortly after acceptance with research preceptor teams. These established multidisciplinary teams include epidemiology faculty, clinical experts and clinical researchers, biostatisticians, and experienced research staff. The research preceptor team commits to involving the student as a co-investigator from the beginning of the student’s graduate studies. Students will use actual data from their research teams in their course work. The goal is to create a mutually beneficial partnership that produces synergy between education, professional development, and the conduct of research.

Strong candidates for admission will have a master’s degree in environmental engineering, biostatistics, or another quantitative discipline; experience in the conduct of research and independent data analysis; and strong quantitative preparation and aptitude, including high GRE scores. Top applicants will have an expenses-paid, on-campus interview during which they will meet with research teams. Both students and research teams will then have the opportunity to rank whom they feel would be the best match(es).

For further information, please visit our website at epi.phd.vanderbilt.edu.

Course descriptions begin on page 100.

French and Italian

CHAIR Virginia M. Scott
DIRECTOR OF GRADUATE STUDIES Nathalie Debrauwere-Miller
PROFESSORS EMERITI Barbara C. Bowen, Dan M. Church, Patricia A. Ward, Ruth G. Zibart
PROFESSORS Robert Barsky, William Franke, Marc Froment-Meurice, Virginia M. Scott, Tracy Sharpley-Whiting, Holly A. Tucker
ASSOCIATE PROFESSORS Nathalie Debrauwere-Miller, Andrea Mirabile, Letizia Modena, Anthère Nzabatsinda, Lynn Ramey
ASSISTANT PROFESSORS Elsa Filosa, Paul Miller

DEGREE OFFERED: FRENCH. Doctor of Philosophy

Requirements for the Ph.D. degree include a total of 52 credit hours of course work, taken in the Department of French and Italian in other departments with the approval of the director of graduate studies. French 310 and French 380 are required as part of the 36 credit hours that make up the M.A. component of the degree. A comprehensive examination, based on a departmental reading list, must be taken no later than before the beginning of classes in the student's fourth semester of study, and students who successfully pass the exam enter the Ph.D. stage.

Requirements for the Ph.D. include 52 credit hours of course work. Students are expected to begin to register for research credit no later than their fifth semester of study. Up to 20 credit hours may be taken as research credit. Students are required to take F300 and 310 during their first year of study. In addition to French and English, doctoral candidates must demonstrate a reading knowledge of an additional language to be determined in consultation with the student's dissertation adviser. Other regulations governing graduate work are available from the director of graduate studies.

The Jean and Alexander Heard Library's rich collection of French materials makes research possible in all periods of French literature. The library's special collections department also houses the W. T. Bandy Center for Baudelaire and Modern French Studies, the Pascal Pia collection (nineteenth- and twentieth-century literary criticism), the Gilbert Sigaux collection (twentieth-century French literature), and the Wachs collection (eighteenth-century fiction and almanacs).

The French department has formal ties to the Université de Provence through its Vanderbilt in France program, McGill University through its Vanderbilt-McGill Initiative, and the Sorbonne through MICEFA.

MELLON ASSISTANT PROFESSOR Tatiana Filimonova
DISTINGUISHED MAX KADE VISITING PROFESSOR Alice Stašková

DEGREES OFFERED: GERMAN. Master of Arts, Doctor of Philosophy

GRADUATE studies in German at Vanderbilt lead to the M.A. and the Ph.D. The program leading to the M.A. degree is designed primarily to deepen and broaden the student's knowledge of German literature from its beginnings to the present day, with special emphasis on major areas not usually covered in-depth in an undergraduate course of study. The program is also intended to lay the groundwork for possible continuing study toward the Ph.D.

Candidates for the master's degree must meet three separate requirements: complete 30 hours of formal course work, submit written evidence of research abilities, and pass an oral examination based on course work and the departmental core reading list. Nine of the 30 hours are to be at the 300 level in the department, and a minimum of 3 hours should be in a graduate seminar (i.e., numbered 386–391). Up to 6 credit hours may be transferred from outside the university. The oral examination is normally taken at the end of the student's third semester. As a rule, independent study will not fulfill the requirement of formal course work. Evidence of research abilities will usually take the form of a research paper of twenty-five to thirty pages that is based on a term paper and is to be submitted no later than the end of the student's fourth semester at Vanderbilt. As an alternative, students may choose to complete 24 hours of formal course work and to write a master's thesis. The latter is a research paper of sixty to eighty pages in length that gives evidence of scholarly competence and independent, critical thought. The research-writing requirement for this latter option is satisfied after the formal course work and the oral examination have been completed.

The department expects candidates to meet all formal course requirements for the master's degree within three semesters. The student must maintain a minimum B average, provide evidence of scholarly research abilities, and pass the oral examination to receive her/his degree. The M.A. examination committee consists of three faculty members drawn from the department; usually—but not necessarily—the chair or the director of graduate studies serves as one of the examiners.

In order to be admitted to candidacy for the Master of Arts degree, a student is required to prove ability in writing and speaking German to the satisfaction of the department.

All candidates awarded a Teaching Assistantship will enroll in Foreign Language Teaching Theory and Practice during their first term of teaching. The student arranges her/his program in consultation with the director of graduate studies and in recognition of departmental objectives.
Doctor of Philosophy

Admission to the program does not imply acceptance for candidacy in the Ph.D. program. Performance well above the minimum Graduate School requirement of a B is expected for admission to the Ph.D. program. Candidates normally obtain the M.A. before going on for the Ph.D. The purpose of the doctoral degree at Vanderbilt is to develop the talented candidate’s capacity to make independent contributions to the field of German literature and cultural studies. Transfer students should consult the Graduate School requirements for the doctorate.

The Ph.D. degree requires at least two academic years of graduate study beyond the master’s degree. A total of 72 credits beyond the B.A. degree is mandated by the Graduate School, thus 42 credits beyond the M.A. at Vanderbilt are necessary. A minimum of 36 of these hours are done in formal course work; most should be at the 300 level with a minimum of 12 required seminar hours. Moreover, at this advanced level of study, the candidate will have considerable latitude in developing a focus (9 hours) in a related discipline or in crossdisciplinary studies relevant to Germanics, for example, in comparative literature, critical theory, philosophy, political science, or history. The department encourages students of German to incorporate an interdisciplinary dimension into their doctoral work that might include the philosophy of language, political and social history, women’s writing and the production of culture, censorship practices, or the impact of philosophy on aesthetic concepts and forms. Students completing a dissertation have the option under certain conditions of enrolling in 3995, half-time research (maximum of six years).

The director of graduate studies in German assists in devising related areas of concentration so that the student, at this stage, can be narrowing her/his focus for a dissertation topic. Faculty members actively assist students to determine the most promising topics for innovative research by pointing out interesting knowledge gaps, theoretical issues, or interdisciplinary questions.

A reading knowledge of French is usually expected, but another language may be substituted with the approval of the examination committee if it is felt that this language is relevant to the candidate’s area of concentration or dissertation research. The second language requirement must be fulfilled before the candidate may take the comprehensive examination.

The teaching program option offers up to 12 credit hours in the area of teaching methodology (courses, research projects, and teaching internships). Work in this area does not count toward minimum degree requirements; 4 hours is normally the minimum in this program. Students opting for the full program should expect to add at least one semester to their course of study.

Course descriptions begin on page 103 for German and on page 167 for Russian.

Hearing and Speech Sciences

CHAIR Anne Marie Tharpe
DIRECTOR OF GRADUATE STUDIES Todd A. Ricketts
ASSOCIATE DIRECTOR OF GRADUATE STUDIES, PH.D. PROGRAM Daniel H. Ashmead
PROFESSORS EMERITI Edward G. Conture, D. Wesley Grantham, Ralph N. Ohde, R. E. Stone Jr., Robert T. Wertz

ASSOCIATE PROFESSOR EMERITA Judith Rassi
ASSOCIATE PROFESSORS Gene W. Bratt, René H. Gifford, Troy Hackett, Sue Hale, P. Lynn Hayas, Ellen Kelly, Devin McCaslin, Todd A. Ricketts, Bernard Roussau, C. Melanie Schuelle, G. Christopher Sliecker
RESEARCH ASSOCIATE PROFESSOR Alexandra Key
ASSISTANT PROFESSORS Tamala Bradham, Michael de Riesthol, Lea Helen Evans, Mary Sue Fino-Szumski, Michelle L. Gutmann, Charles Hausman, Melissa Henry, Benjamin W. Y. Hornsby, Barbara H. Jacobson, Robin Jones, Ramnarayan Ramachandran, Marcy Sipes, Jennifer Pilkington, Wanda G. Webb
RESEARCH ASSISTANT PROFESSOR Erin Picou
ADJUNCT ASSISTANT PROFESSORS Barbara Peek, Mia Rosenfeld

DEGREE OFFERED: Doctor of Philosophy

The Ph.D. degree normally requires three to four years of study with a minimum of 72 graduate credit hours. There are no foreign language requirements. The student must complete two research projects and 12 hours of course work in statistics and research methodology prior to the dissertation. Laboratory work throughout the program and a teaching experience are also required as part of training. Doctoral candidates also present a minor of not less than 12 hours taken outside the department or from another subject area in hearing, speech, and language. The final year of the program is typically devoted to the dissertation.

This department also offers the doctorate of audiology (Au.D.), master of education of the deaf (M.D.E.), and the master of science in speech-language pathology (M.S.) through the School of Medicine (vanderbilt.edu/catalogs/medical).

The teaching, clinical, and research programs of the department are housed primarily in Vanderbilt’s Bill Wilkerson Center. For further information, visit vanderbilthealth.com/billwilkerson.

Course descriptions begin on page 73 for Audiology, page 97 for Education of the Deaf, page 105 for Hearing and Speech Sciences, and page 176 for Speech Language Pathology.

History

CHAIR Joel F. Harrington
ASSOCIATE CHAIR Celia Applegate
DIRECTOR OF GRADUATE STUDIES Sarah Igo
PROFESSORS EMERITI Paul K. Conkin, Jimmie L. Franklin, J. León Helguera, Samuel T. McSeveney, V. Jacques Vogelgi, Donald L. Winters
ASSOCIATE PROFESSORS David Lee Carlton, Leor Halevi, Yoshikuni Igarashi, Sarah Igo, Paul A. Kramer, Catherine Molineux, Moses Ochonu, Matthew Ramsey, Ruth Rogaski, Samira Sheikh, Francis W. Wcislo, Edward Wright-Rios
ASSISTANT PROFESSORS Celso Castilho, Lauren Clay, Julia Phillips Cohen, Peter Lorge, Frank Robinson, Alistair Sponsel
DEGREES OFFERED: Master of Arts, Doctor of Philosophy

Master of Arts

The Department of History does not accept external applications for a terminal master’s degree. The M.A. is usually earned en route to the Ph.D. It is also available to Vanderbilt undergraduates who enroll in Vanderbilt’s 4+1 program.

Doctor of Philosophy

The Ph.D. requires 72 hours of graduate credit, including 45 quality hours.

All candidates for the Ph.D. must demonstrate a reading knowledge of a foreign language or languages. In U.S. and British history, one language is required. In all other fields, the minimum is two. In addition, students are expected to develop proficiency in any languages required for their dissertation research.

The first two years in the Ph.D. program are devoted to taking classes, writing two substantial research papers, passing the necessary language examination(s), and preparing for the qualifying examination. A full list of graduate history courses is available in the courses section of this catalog. All first-year students take a two-semester introduction to methods and research, History 300a–300b. The course is designed to familiarize students with a range of theoretical and methodological approaches. Each second-year student, in consultation with his or her adviser and the director of graduate studies, chooses a Ph.D. Committee, consisting of the dissertation director, two other members of the Graduate Faculty from the Department of History, and one from outside the department, either at Vanderbilt or at another university.

Students take their qualifying examination either in the spring of the second year or winter of the third year. The examination is administered by the student’s Ph.D. committee. Note: the examination cannot be scheduled until the student has 24 quality hours, with at least a B average and no Incompletes, and has met the language requirement. When the student has passed the qualifying examination, the Ph.D. committee shall recommend to the Graduate School that the student be admitted to candidacy for the Ph.D.

The Vanderbilt history program does not have predetermined fields of study. In consultation with their adviser and the director of graduate studies, students define a major field and two minor fields that meet their interests and needs. The major field is typically defined as a long time span and either a regional or a national geographic framework (for example, Europe 1600–1789 or modern Germany). An example would be a major field on modern British history, one language is required. In all other fields, the minimum is two. In addition, students are expected to develop proficiency in any languages required for their dissertation research.

The first two years in the Ph.D. program are devoted to taking classes, writing two substantial research papers, passing the necessary language examination(s), and preparing for the qualifying examination. A full list of graduate history courses is available in the courses section of this catalog. All first-year students take a two-semester introduction to methods and research, History 300a–300b. The course is designed to familiarize students with a range of theoretical and methodological approaches. Each second-year student, in consultation with his or her adviser and the director of graduate studies, chooses a Ph.D. Committee, consisting of the dissertation director, two other members of the Graduate Faculty from the Department of History, and one from outside the department, either at Vanderbilt or at another university.

Students take their qualifying examination either in the spring of the second year or winter of the third year. The examination is administered by the student’s Ph.D. committee. Note: the examination cannot be scheduled until the student has 24 quality hours, with at least a B average and no Incompletes, and has met the language requirement. When the student has passed the qualifying examination, the Ph.D. committee shall recommend to the Graduate School that the student be admitted to candidacy for the Ph.D.

The Vanderbilt history program does not have predetermined fields of study. In consultation with their adviser and the director of graduate studies, students define a major field and two minor fields that meet their interests and needs. The major field is typically defined as a long time span and either a regional or a national geographic framework (for example, Europe 1600–1789 or modern Germany). A large topical field such as modern medical history, Anglo-American legal history, or the Reformation may also be appropriate. One of the minor fields may be a subfield of the major field, defined by topic and/or geography. An example would be a major field on modern Latin America combined with a minor field on Brazil. The other minor field must be distant from the major field in terms of topic, chronology, and/or geography. Typically, this field will have theoretical, cross-cultural, and/or interdisciplinary components (e.g. comparative slavery, postcolonial theory and history, comparative nationalisms). This field may be primarily based in a department other than history or in an interdisciplinary program that trains students at the graduate level.

In the third year, the fall term schedule includes History 301 (The Art and Craft of Teaching History), an introduction to teaching methods and teaching practicum designed to familiarize students with techniques for lecturing, leading discussions, designing examinations, and grading undergraduates. All students also take History 397a, which aids students in preparing the dissertation prospectus and beginning work on the dissertation itself. The dissertation prospectus is defended in an oral examination conducted by members of the student’s Ph.D. committee.

From the fourth year forward, students will normally enroll in History 398, Dissertation Seminar, each semester they are in residence.

The dissertation should be completed within four years after admission to candidacy for the Ph.D. The candidate will defend the dissertation at a public examination conducted by the Ph.D. committee.

Course descriptions begin on page 108.

Human Genetics

DIRECTOR David Samuels
DIRECTOR OF GRADUATE STUDIES David Samuels
ASSOCIATE DIRECTOR OF EDUCATION Douglas Mortlock
PROFESSORS Thomas Aune, H. Scott Baldwin, Randy D. Blakely, Kendall Broadie, Ellen Wright Clayton, James Crowe, Sergio Fazio, Carl Johnson, MacRae Linton, David McCaulley, James Patton, John A. Phillips III, Dan Roden, Laurence J. Zwiebel
ASSOCIATE PROFESSORS Milam Brantley, Joshua Denny, Katherine Friedman, Rizwan Hamid, Ela Knapik, Antonis Rokas, David Samuels, Jeffrey Smith, Michelle Southard-Smith, James S. Sutcliffe, Zhongming Zhao
ASSISTANT PROFESSORS Melinda Aldrich, John Capra, Todd Edwards, Binghan Li, Thomas Morgan, Douglas Mortlock, Deborah Murdock, Amy Non, Shirley Russell, Tricia Thornton-Wells, Digna Velez-Edwards, Bryan Venter

DEGREE OFFERED: Doctor of Philosophy

THE overall goal of the Human Genetics Ph.D. degree program is to provide students with a solid foundation for a career in genetics research and teaching. Training is available in human genetic analysis and in genetic analysis of model systems that contribute to our understanding of human disease. The training combines a prescribed set of basic courses intended to ground students in the fundamentals of genetic analyses, the basics of human genetics, a set of elective courses designed to meet individual needs, and a rigorous research experience that will contribute to the field of genetics. Students completing the requirements of the Ph.D. program in Human Genetics will have demonstrated mastery of knowledge in genetics and contributed substantial and original scientific knowledge to the field.

Ph.D. students in the Human Genetics program are required to complete a minimum of 30 credit hours of formal course work, consisting of 24 hours of required course work and 6 hours of electives. One of the required courses will be a statistics course to be chosen from several currently available on campus and approved by the program faculty. Students will take a minimum of 6 hours of didactic classes per semester during their first two years of study. It is expected that during the second year at least one semester will exceed this minimum in order to complete the required courses prior to year three of study. The electives come from an approved list of advanced
genetics courses and the choice of these courses will be based on
the individual student’s research interests.

For additional information, see chgr.mc.vanderbilt.edu/page/
education.

Course descriptions begin on page 111.

Interdisciplinary Materials Science

DIRECTOR D. Greg Walker
DIRECTOR OF GRADUATE STUDIES D. Greg Walker
PROFESSORS EMERITI Jimmy L. Davidson, William F. Flanagan,
George T. Hahn, Donald L. Kinser, Taylor G. Wang, James J. Wert
PROFESSORS Charles Brau, Peter Cummings, Daniel M. Fleetwood,
Todd D. Giorgio, Richard F. Haglund, Timothy P. Hanusa, Frederick R.
Haselton, G. Kane Jennings, Weng Poo Kang, Paul Laibinis,
M. Douglas LeVan, Charles M. Lukehart, H. Charles Manning, Clare
McCabe, Sokrates T. Pantelides, Sandra Rosenthal, Ronald D.
Schrimpf, Norman Tolk
ASSOCIATE PROFESSORS David E. Cliftel, Scott A. Guelcher, Eva
Harth, Deyu Li, Charles H. Manning, Bridget R. Rogers, Florence
Sanchez, Kalman Varga, D. Greg Walker, Sharon Weiss, James E.
Wittig, David W. Wright
RESEARCH ASSOCIATE PROFESSOR Anthony Hmelo
ASSISTANT PROFESSORS Rizia Bardhan, Leon M. Bellan,
Kiril I. Bolotin, Craig L. Duvall, Janet Macdonald, Cary Pint,
Haek-Joon Sung, Jason G. Valentine, Yaqiong Xu, Qi Zhang

DEGREES OFFERED: Master of Science, Doctor of
Philosophy

MATERIALS advancements improve the standard and the
quality of living of societies everywhere. They are indeed the
underpinning of the development of new technologies with
the potential for global impact. In today’s sophisticated and
complicated world, continued advancements in materials
demand intimacy among a variety of disciplines. In recogni-
tion of this multidisciplinary need, professors at Vanderbilt
University from Departments of Chemistry, Physics, Bio-
medical Engineering, Chemical and Biomolecular Engineer-
ing, Electrical Engineering, Mechanical Engineering, Civil
Engineering, and School of Medicine have come together in
the Interdisciplinary Materials Science program. Therefore,
extensive collaboration in both the teaching of and research in
materials science is pervasive, where multidisciplinary study is
a hallmark of the educational experience.

The M.S. degree in materials science requires a minimum
of 24 semester hours (beyond the baccalaureate) of formal
course work plus a thesis. Nine semester hours are a selection
of three of the four Materials Science core program courses.
The core courses are Thermodynamics, Materials Chemistry,
Atomic Arrangements in Solids, and Solid State Physics of
Condensed Matter. Six additional hours are taken from the
approved list of Interdisciplinary Materials Science program
courses. A minor consisting of 6 semester hours is chosen in
a separate but related field. The remaining 3 hours are an elec-
tive selected from either Interdisciplinary Materials Science
program offerings or a related field.

The Ph.D. degree in materials science requires a total of
72 semester hours (beyond the baccalaureate) plus a disserta-
ion. Within the requirement are a minimum of 24 semester

hours of course work that include 12 hours from the materials
science core curriculum and 12 hours from the approved list
of Interdisciplinary Materials Science program courses. The
intent of these courses is to complement the student’s technical
interests. The remaining semester hours may be in research
dissertation hours or in additional course electives.
The master of engineering, an advanced professional degree
for engineers, is offered by the School of Engineering.

Course descriptions begin on page 112.

Interdisciplinary Social
and Political Thought

STUDENTS with an interest in expanding their knowledge
of social and political thought beyond traditional disciplinary
boundaries are invited to propose an individualized interdis-
ciplinary Master of Arts degree in social and political thought.
The program is coordinated by Professor Brooke Ackerly
(Political Science). Students develop, in consultation with
the coordinator, a set of courses, including Interdisciplinary
Social and Political Thought 320a–320b, drawing on courses
from any of the following graduate programs, to complete
the 24 semester hours required for a master’s degree: English,
History, Philosophy, Political Science, Religion, and Sociology.
The thesis topic must cross disciplinary boundaries.

Course descriptions begin on page 113.

Japanese

JAPANESE LANGUAGE SENIOR LECTURERS Michiru Lowe,
Keiko Nakajima

COURSES in Japanese are available for minor credit in
master’s degree programs only. Students should consult their
advisers about the acceptability of the courses as related work.
Courses are not designed for advanced native speakers.

Course descriptions begin on page 113.

Jewish Studies

Course descriptions begin on page 113. See also Religion.

SENIOR LECTURER Mareike Sattler (Anthropology)

DEGREE OFFERED: LATIN AMERICAN STUDIES.

Master of Arts

THE Latin American Studies program offers interdisciplinary graduate instruction in Latin American studies in cooperation with the Departments of Anthropology, Economics, History, History of Art, Political Science, Sociology, and Spanish and Portuguese. Affiliated faculty from other schools, including Peabody College (education and human development), Vanderbilt Law School, Owen School (management), School of Medicine, and School of Nursing also participate in the program. Students work toward an M.A. in Latin American studies, a master’s or doctoral degree in one of the related programs with a minor in Latin American studies, or a certificate in Latin American studies.

Candidates for the M.A. in Latin American studies choose a thesis (42 hours and thesis) or non-thesis (33 hours) option. Each option includes Latin American Studies 290. While students may spend part of their third or fourth semester doing research in Latin America, subject to approval by the program, the dean of the College of Arts and Science, and the Graduate School, the candidate for the master’s degree must complete four semesters of graduate study as a full-time student. Master’s degree candidates are expected to demonstrate language ability in Spanish, Portuguese, or an indigenous Latin American language; this means advanced ability in one of the three languages and intermediate ability in another.

Students combining a master’s degree from a related discipline with a minor in Latin American studies select area courses as their minor and knowledge of either Spanish, Portuguese, or an indigenous Latin American language. Doctoral candidates with a minor in Latin American studies must have a reading and speaking competence in one of Spanish, Portuguese, or an indigenous Latin American language, and a technical reading knowledge of another. The doctoral minor consists of not less than 15 hours, selected from area courses in two disciplines.

A certificate in Latin American studies is awarded with either the M.A. or Ph.D. degree upon completion of at least 15 hours of course work across two or more disciplines and demonstration of language competence.

A joint master of arts and master of business administration degree program is available. Students apply both to Owen Graduate School of Management and the Latin American Studies program. Successful applicants must be accepted both by the Owen School and the Graduate School. The first year of study is devoted to the M.B.A. program (30 hours), the second to course work in Latin American studies (24 hours), and the final year is divided between M.B.A. studies and the writing of the master’s thesis for the M.A. degree. Interested students should contact the Latin American Studies program.

See departmental listings for courses offered 2014/2015. The following are specialized courses in the participating programs.

HISTORY: 245, Reform, Crisis, and Independence in Latin America, 1700–1820; 246, Colonial Mexico; 247, Modern Mexico; 248, Central America; 249, Brazilian Civilization; 251, Reform and Revolution in Latin America; 253, African Religions in the Americas; 253a, Latin America and the United States; 257, Caribbean History, 1492–1983; 358, Comparative Slavery in the Colonial Americas; 359, Atlantic World History, Fifteenth to the Nineteenth Century; 361, Studies in Latin American History; 365, Research Seminar in Latin American History.

PORTUGUESE: 200, Intermediate Portuguese; 201, Portuguese Composition and Conversation; 203, Brazilian Pop Culture; 205, Introduction to Luso-Brazilian Literature; 209, Brazilian Culture through Native Material; 232, Brazilian Literature through the Nineteenth Century; 233, Modern Brazilian Literature; 289, Independent Study; 294, Special Topics in Portuguese Language, Literature, or Civilization; 314, Introduction to Latin American Colonial Studies; 338 Seminar: Studies in Colonial Literature; 340, Seminar: Hispanic American Essay; 341, Spanish American and Brazilian Literatures I; 342, Spanish American and Brazilian Literature II; 355, Seminar: Studies in Contemporary Literature of the Portuguese-Speaking World; 398, Special Studies in Brazilian Literature.

SOCIOLOGY: 274, Immigration in America; 390a–390b, Directed Studies.

In addition, qualified graduate students in the Latin American Studies program may, with appropriate permission, enroll in Special Topics (294) courses directly relating to Latin America.

Course descriptions begin on page 115.

Leadership and Policy Studies

CHAIR Ellen B. Goldring
DIRECTOR OF GRADUATE STUDIES Thomas M. Smith
PROFESSOR EMERITUS James W. Guthrie
PROFESSORS John M. Braxton, Robert L. Crowson Jr., Ellen B. Goldring, Gary Henry, Stephen P. Heyneman, Joseph Murphy
ASSOCIATE PROFESSORS Robert Dale Ballou, Mark D. Cannon, Will Doyle, Stella Flores, Thomas M. Smith, Claire E. Smrekar, Ron Zimmer
ASSOCIATE PROFESSOR OF THE PRACTICE Christine Quinn Trank
ASSISTANT PROFESSORS Angela Boatman, Mimi Engel, Brent Evans, Jason Grissom, Christopher Loss, Matthew Springer
ASSISTANT PROFESSORS OF THE PRACTICE Xiu Cravens, Brian L. Heuser, Carrie Kortegast, David Laird, Catherine Gavin Loss, Dayle A. Savage

DEGREE OFFERED: Doctor of Philosophy

THE Ph.D. Program in Law and Economics combines analytical training in economic theory and methodology with the study of law. The program is designed to allow students to satisfy the requirements for the Ph.D. within four to five years. For students who matriculate without a J.D., the requirements for the Ph.D. and the J.D. degrees can be completed within six to seven years. The Ph.D. degree is designed for students who wish to pursue careers in universities, research institutions, or government. It is not designed for students who wish to pursue careers in corporate finance.

The program is based in Vanderbilt Law School, and courses are taught by faculty in the Law School and the Department of Economics. Students receive a solid grounding in microeconomic theory, econometrics, and law and economics theory.

Students admitted to the Ph.D. program are required to complete 72 hours of course work and research. This includes a minimum of 47 hours of formal course work in core, field, and elective courses and 6 hours of Ph.D. Law and Economics Workshop. The core consists of 27 hours in law and economics theory, economic theory, and empirical analysis.

After completing the first year of graduate study, all students must pass a written comprehensive examination in economic theory, law and economics theory, behavioral law and economics, and econometrics.

In year 3 for joint-degree students and year 2 for Ph.D.-only students, students select two fields of concentration from a pre-approved list of fields and begin taking the associated field courses. Currently, the list of identified fields includes behavioral law and economics, labor and human resources, and risk and environmental regulation. Field requirements include 12 hours of formal course work (6 hours in each field). In some circumstances, and with the consent of the director of graduate studies and program faculty, students are allowed to develop a new field.

Detailed information is available upon request from program staff (email phd.lawecon@vanderbilt.edu) or from the program webpage, law.vanderbilt.edu/phd.

Course descriptions begin on page 115.
expected to develop strong statistical and data analysis skills, while developing expertise in other tools of inquiry, including experimental and quasi-experimental design, survey research methods, and qualitative research methods.

At the heart of the program is the mentor-apprentice model, where students work on research projects alongside a collection of esteemed faculty. As part of their course work and apprenticeship experiences, students learn to present papers at scholarly conferences and submit journal articles for publication.

Transfer Hours: Up to 15 hours of transfer credit may be accepted in consultation with the student’s adviser.

Total Minimum Hours: 72 hours

Educational Leadership and Policy
Areas of study include accountability, improving teachers’ instructional practices, leadership development, performance incentives, school choice, teacher hiring and retention, and urban school reform.

Higher Education Leadership and Policy
Areas of study include international higher education policies, the delineation of a normative structure for undergraduate college teaching, or an analysis of state higher education policy initiatives. You might also develop and test theories of student persistence.

International Education Policy
Incorporates course work in both the K–12 and higher education concentrations, but includes international organizations and trends in education policy reform, economics, sociology, and political science.

Requirements for All Specializations
I. Social Science Core Requirements (15 hours)
   - Politics of Education
   - Sociology of Education
   - Economics of Education
   - History of Education
   - International Issues in Education Policy
II. Ph.D. Research Seminars (Requirements differ by specialization)
   - Education Leadership and Policy (9 hours)
   - Higher Education Leadership and Policy (15 hours)
   - International Education Policy (15 hours)
III. Research Tools (18 hours)
   - Research Design and Methods for Education Policy
   - Intro to Statistics and Probability
   - Regression Analysis I
   - Regression Analysis II
   - Causal Inference
   - Qualitative Research Methods
IV. Research Practicum (6 hours)
V. Ph.D. Proseminar (3 hours)
VI. Electives (15–21 hours)

Course descriptions begin on page 115.
**Liberal Arts and Science**

DIRECTOR Martin Rapisarda

**DEGREE OFFERED:** Master of Liberal Arts and Science

The Master of Liberal Arts and Science degree program offers part-time, adult students the opportunity to earn an interdisciplinary, nontraditional graduate degree.

Each course generally meets one night per week, and students select one course per semester. While the program is designed primarily for personal enrichment, students often discover important professional career benefits as well. The requirements and curriculum provide flexibility in program design and course selection, and the tuition, scheduling, admission, and registration procedures acknowledge the special circumstances of the part-time adult student.

Specific titles, topics, and instructors of courses are available for each semester from the director of the Master of Liberal Arts and Science degree program. Requirements for the degree are listed in the chapter on Academic Regulations in the front of this catalog. Prospective students may also consult the website for additional information: vanderbilt.edu/mlas.

Course descriptions begin on page 121.

CHAIR Dietmar Bisch
VICE CHAIR Alexander Powell
DIRECTOR OF GRADUATE STUDIES Nilanjan Sarkar
DIRECTOR OF UNDERGRADUATE STUDIES Kenneth D. Frampton

PROFESSORS Michael Goldfarb, Robert W. Pitz, Nilanjan Sarkar, Alvin M. Strauss

PROFESSOR OF THE PRACTICE Amrutur V. Anilkumar

ADJUNCT PROFESSOR Ahmad Nasab

ASSOCIATE PROFESSORS Eric J. Barth, Deyu Li, Haoxiang Luo, Matthew Gould, Robert L. Hemminger, Ettore F. Infante, Bjarni Jonsson, Richard J. Larsen, Michael D. Plummer, Eric Schechter, Horace E. Williams

ADJUNCT ASSISTANT PROFESSOR Colette Calmelet

**Mechanical Engineering**

CHAIR Robert W. Pitz
DIRECTOR OF GRADUATE STUDIES Nilanjan Sarkar
DIRECTOR OF UNDERGRADUATE STUDIES Kenneth D. Frampton

ADJUNCT ASSISTANT PROFESSOR Colette Calmelet

**DEGREES OFFERED:** Master of Arts, Master of Science, Doctor of Philosophy

A MASTER’S degree may be earned by completing 36 hours of course work.

By careful selection of courses, a master’s candidate may achieve special preparation in applied mathematics or computer science and thus become qualified for a position in industry or government or as a teacher in high school or junior college. Each of the master’s programs is adequate preparation for advanced graduate work in mathematics.

Candidates for the Ph.D. degree take at least 48 hours of formal course work, including seven courses from 272a–272b, 283a–283b, 330a–330b, and 331a–331b, and at least eight additional courses at the 300 level. A complete description of Ph.D. requirements in mathematics may be obtained on request from the director of graduate studies.

Courses acceptable for credit toward an advanced degree in mathematics are those that are numbered 247, 248, or 270 or above, unless exception has been granted. Courses numbered below 270 may be used for minor credit by students in other disciplines. All graduate students with a teaching assistantship participate in teaching activities.

Course descriptions begin on page 126.
and an acceptable dissertation. This course work must include a 6-hour minor in an area separate from, but related to, the field of study. At least 12 hours of the 24 must be at or above the 300 level. A maximum of 6 hours in independent study may be included in the 24-hour requirement. The master of engineering, an advanced professional degree, is offered by the School of Engineering. There is also a master of science/doctor of medicine degree program joint between the Department of Mechanical Engineering and the School of Medicine. Details may be obtained from the director of graduate studies in Mechanical Engineering.

Course descriptions begin on page 129.

Medical Scientist Training Program (M.D./Ph.D.)

DIRECTOR Terence S. Dermody
ASSOCIATE DIRECTOR Danny G. Winder
ASSISTANT DIRECTORS James L. Bills, Michelle M. Grundy
PROGRAM COORDINATOR Melissa S. Krasnove

DEGREES OFFERED: Doctor of Medicine, Doctor of Philosophy

The central goal of the Medical Scientist Training Program (MSTP) is to train leaders in biomedical research and human medicine. The program is based on solid clinical and research training and designed to foster the development of independent scientific careers. The MSTP provides students with an integrated curriculum comprising a strong core education in medicine and intensive training in scientific inquiry. Successful completion of the program leads to both the M.D. and Ph.D. degrees. MSTP students come from a diverse applicant pool drawn from throughout the nation and abroad and are admitted to the program through the deans of the two schools upon recommendation of the MSTP Faculty Advisory Committee.

The MSTP is a joint endeavor between Vanderbilt University School of Medicine and Vanderbilt University Graduate School. Trainees are required to fulfill all the requirements for both the M.D. and Ph.D. degrees. Most M.D./Ph.D. students begin full-time study and research for the Ph.D. degree after the second year in medical school. After completing at least two laboratory rotations prior to their second year of medical school, students will select and be accepted into the graduate program of an affiliated department. The graduate programs currently affiliated with the MSTP are biochemistry, biological sciences, biomedical informatics, biomedical engineering, cancer biology, cell and developmental biology, cellular and molecular pathology, chemical and physical biology, epidemiology, human genetics, microbiology and immunology, molecular physiology and biophysics, neuroscience, and pharmacology. MSTP students must pass the qualifying examination for the Ph.D. degree and present an acceptable dissertation within their field of study in the usual manner. Requirements for successful completion of the Ph.D. degree are the same for all students at Vanderbilt. The Ph.D. thesis must be successfully defended prior to reentry into medical school.

The MSTP-Clinical Investigation Track (MSTP-CIT) is offered to facilitate the training of clinical investigators. The goal of the MSTP-CIT is to provide comprehensive training in science for physician scientists engaged in translational and patient-oriented research. This program is intended for students who enter the MSTP after the second year of medical school or during the later stages of residency or fellowship.

For additional information about the Vanderbilt MSTP, including application information, visit the program’s website at https://medschool.vanderbilt.edu/mstp.

Course descriptions begin on page 130.

Medical, Health, and Society

DIRECTOR Jonathan M. Metzl
ASSISTANT DIRECTOR Juleigh Petty
DIRECTOR OF GRADUATE STUDIES Jonathan M. Metzl
PROFESSORS Jonathan M. Metzl, Hector Myers
ASSOCIATE PROFESSORS Dominique Béhague, Derek Griffith, Martha W. Jones
VISITING ASSISTANT PROFESSORS Jorge C. Román Aponte, Aimi Hamraie, Kenneth MacLeish, Amy Non, Liun Song, Laura Stark

Affiliated Faculty

PROFESSORS Kathryn Anderson (Economics), Victor Anderson (Christian Ethics), Michael Bess (History), James Blumstein (Health Law and Policy), Frank Boehm (Obstetrics and Gynecology), Peter Buerhaus (Nursing), Christopher Carpenter (Economics), Vera Chatman (Human and Organizational Development), Larry Churchill (Medicine), Ellen Clayton (Pediatrics and Law), Jay Clayton (English), Bruce Compas (Psychology and Human Development), Katherine Crawford (History), Kate Daniels (English), Richard D’Aquila (Infectious Diseases), Dennis Dickerson (History), Katharine Donato (Sociology), Voiney Gay (Religious Studies), Lenn Goodman (Philosophy), Douglas Hernburger (Medicine), Joni Hersch (Law and Economics), George Hill (Microbiology and Immunology), Carl Johnson (Biological Sciences), John Lachs (Philosophy), Jane Landers (History), Jana Launderdale (Nursing), Pat Levitt (Pharmacology), Elizabeth Lunbeck (History), Leah Marcus (English), John McCarthy (German), Richard McCarty (Psychology), Timothy McNamara (Psychology), Velma McBride Murry (Human and Organizational Development), Linda Norman (Nursing), Sharon Shields (Human and Organizational Development), John Tarpley (Surgery), Benigno Trigo (Spanish), Arleen Tuchman (History), Holly Tucker (French), R. Jay Turner (Sociology), Sten Vermund (Pediatrics and Global Health), Bart Victor (Organization Studies), Kip Viscusi (Law and Economics), Lynn Walker (Pediatrics and Psychology and Human Development), Kenneth Wallston (Nursing and Psychology), David W. Wright (Chemistry), Laurence Zwiebel (Biological Sciences)

ASSOCIATE PROFESSORS Gregory Barz (Ethnomusicology), Mark Bliton (Medicine), Tony N. Brown (Sociology), Karen Campbell (Sociology), Laura Carpenter (Sociology), André Christie-Mizell (Sociology), Beth Conklin (Anthropology), Elizabeth Heitman (Medicine), Julián F. Hillyer (Biological Sciences), Kathleen Hoover-Dempsey (Psychology and Human Development), Melanie Lutenbacher (Nursing), Matthew Ramsey (History), Ruth Rogaski (History), Norbert Ross (Anthropology), Russell Rothman (Medicine), David Schlundt (Psychology), Tiffany Tung (Anthropology), Timothy J. Vogus (Management and Organization Studies)

ASSISTANT PROFESSORS Carolyn Audel (Preventive Medicine), Tyson Brown (Sociology), Joseph B. Fanning (Medicine), Rolanda Johnson (Nursing), Chase Lesane-Brown (Psychology and Human Development), Chandra Y. Osborn (Medicine), Scott Pearson (Surgery), Michele Salisbury (Nursing), Kevin T. Seale (Biomedical Engineering)
**DEGREE OFFERED:** Master of Arts

GRADUATE study in medicine, health, and society at Vanderbilt offers an interdisciplinary master of arts and a graduate certificate for students interested in studying health-related beliefs and practices in their social and cultural contexts. It is available to graduate and professional students from the six participating Vanderbilt schools (Arts and Science, Divinity, Law, Medicine, Nursing, and Peabody). External candidates are also considered for admission, as are Vanderbilt undergraduates applying through the 4+1 program in the College of Arts and Science.

MHS draws on a variety of fields in the social sciences and humanities—anthropology, economics, history, literature, psychology, sociology, philosophy/ethics, and religious studies. It should be of particular interest to students preparing for careers in a health-related profession, but also has much to offer any graduate or professional student interested in examining an important part of human experience from multiple perspectives and developing a critical understanding of contemporary society.

**Master of Arts**

Students may choose a thesis option (24 credit hours of course work plus 6 credit hours of thesis research) or non-thesis option (30 hours). The thesis should draw on at least two disciplines.

Requirements include the 3 credit hour core colloquium (MHS 300) and an additional 21 or 27 credit hours (depending on the option) of courses approved for the MHS graduate program.

It is expected that students who can devote themselves to the MHS program full time will complete their studies in three terms (i.e., two semesters and one summer or three semesters). However, the length of the program will be flexible to accommodate the needs of different constituencies.

**M.D./M.A.**

This program is available to current medical students, who may choose between the thesis and non-thesis options described above. The M.A. may be completed in one year, plus either a summer or two research electives.

**4+1 M.A. Program**

This program is available only to current Vanderbilt undergraduate students. Students may choose between the thesis and non-thesis options described above.

**Graduate Certificate**

The certificate is available only to current graduate students. Requirements include the 3 credit hour core colloquium (MHS 300) and an additional four courses drawn from the list of approved courses. Students are required to submit a paper to the MHS curricular committee for evaluation.

**Course descriptions begin on page 131.**

**Other Approved Courses**

Additional courses not on this list may be approved at the discretion of the CMHS director. Graduate students enrolled in 200-level courses will complete additional work in order to gain graduate credit.

Microbiology and Immunology

See Pathology, Microbiology, and Immunology

Molecular Physiology and Biophysics

CHAIR Roger D. Cone
DIRECTOR OF GRADUATE STUDIES Alyssa H. Hasty

RESEARCH PROFESSORS Eric Hustedt, Robert Matthews

ASSOCIATE DEAN Pamela Schneller (Blair School of Music)
ASSOCIATE DEAN Melissa K. Rose (Blair School of Music)

SENIOR ARTIST TEACHER Marianne Ploger (Musicianship)

DEAN Mark Wait (Blair School of Music)
ASSOCIATE DEAN Melissa K. Rose (Blair School of Music)
ASSOCIATE DEAN Pamela Schneller (Blair School of Music)

THREE courses are currently available in Humanities for graduate credit: MUSC 341A, Intensive Musicianship I; MUSC 341B, Intensive Musicianship II; MUSC 342, Intensive Musicianship III.

Course descriptions begin on page 135.

Music

Neuroscience

DIRECTOR Mark Wallace
DIRECTOR OF GRADUATE STUDIES Bruce D. Carter

PROFESSORS EMERITI Ford F. Ebner, Elaine Sanders-Bush

ASSOCIATE PROFESSORS Kevin Currie, Laura Cutting, Martin Gallagher, Eugenia Gurevich, Fiona Harrison, Amanda Jefferson, Elena Lagrange, Terunaga Nakagawa, Kevin Niswender, Michelle Southard-Smith, James S. Suttle, Frank Tong, Zhongming Zhao

ASSISTANT PROFESSORS Brandon Aly, Jennifer Blackford, Aaron Bowman, Ana Carneiro, Michael Cooper, Blythe Corbett, Joshua Gamse, Rene Gifford, Bradley Grueter, Rebecca Ihrie, Jing-Qiong Kang, Jennifer Kearney, Alex Maier, Bethann McLaughlin, Sachin Patel, Wellington Pham, Sean Polyn, Gavin Price, Ramanarayan Ramachandran, Tonia Rex, Rebecca Sappington, Gregg Stanwood, Tricia A. Thornton-Wells, Jeremy Veenstra-Vander Weele, Qi Zhang

Degree Offered: Doctor of Philosophy

Students interested in this program participate in the Interdisciplinary Graduate Program in the Biomedical Sciences or Chemical and Physical Biology program during the first year (see Biomedical Sciences). The second year comprises required and elective courses in Molecular Physiology and Biophysics for a total of at least 24 hours of formal course work toward the Ph.D. degree. Variations are permitted in the number of formal course hours above the minimum of 24 required for the degree. A thesis-based master’s degree is awarded only under special circumstances.

The emphasis of the graduate program is on research and research training in the areas of molecular and cell biology, cellular regulation and endocrinology, electrophysiology, and biophysics, whole animal physiology and pathophysiology, and genetics. Students obtain a general background in physiology, biochemistry, molecular biology, and genetics through course work and laboratory exercises. Students are encouraged to rotate freely among various research laboratories in their first year in order to select a particular research area and thesis adviser for dissertation research.

Research areas available to the student include hormonal and developmental aspects of gene control at the molecular level, with emphasis on the role played by DNA-protein interactions. There is also a focus on cellular aspects of hormonal regulation of biological process involving glucose, fatty acid, and ion transport, as well as the mechanism of action of hormonal second messengers such as cAMP, cGMP, and calcium. In addition, neuroendocrine studies of CNS-mediated energy homeostasis are the focus of several groups. Studies are conducted using various biophysical techniques to study membrane function and the action of proteins in membranes and free solution, with a focus on the regulation of synaptic transmission. Studies are also carried out to investigate the hormonal regulation of metabolism in whole animal models. Examination of the genetic basis of neurological and metabolic disorders is also ongoing in the department. Research in the department has relevance to a range of human diseases including diabetes, obesity, cancer, nutritional deficiencies, developmental abnormalities, and addiction.

Course descriptions begin on page 133.
DEGREE OFFERED: Doctor of Philosophy

THE program of study provides a broad background in neuroscience and related disciplines, preparing a student for a career as a research scientist and teacher. Graduates are recruited for positions into academic institutions where the discipline of neuroscience is growing rapidly, as well as into government, industry, and biotechnology.

The Ph.D. program requires a minimum of 24 hours of formal didactic course work. Students enter the program via one of two paths—either directly or via the IGP (see Biomedical Sciences), and complete an interdisciplinary core of course work in their first year. This course work consists of a two-semester survey course of neuroscience along with a two-semester professional development course. These courses survey the broad areas of neuroscience and are designed to link fundamental principles to contemporary research, as well as focus on building the skills necessary for success. An individualized elective schedule augments the required material in areas that relate directly to the student’s area of chosen research. Major research emphases within the program span the breadth of contemporary neuroscience, and are divided into twelve themes: addiction and reward, circadian rhythms and sleep, cognitive neuroscience, computational neuroscience and neuroengineering, developmental neuroscience, educational neuroscience, law and society, learning and memory, mood, anxiety and psychosis, neurodegeneration and neuroinflammation, synaptic function and neuroendocrine signaling, and sensory and motor neuroscience. An original research dissertation is required for the Ph.D. degree.

For additional information, see braininstitute.vanderbilt.edu.

Course descriptions begin on page 135.

Nursing Science

DEAN Linda D. Norman
RESEARCH PROFESSORS OF NURSING Mary S. Dietrich, Nancy L. Wells
ASSOCIATE PROFESSORS Sarah C. Fogel, Jana L. Lauderdale, Melanie Lutenbacher, Anne M. Miller, Elizabeth R. Moore, Shelagh A. Mulvaney
ASSISTANT PROFESSORS Terrah L. Akard, Thomas L. Christenbery, Jie Deng, Catherine H. Ivory, Sharon M. Karp, Cathy A. Maxwell, Todd B. Monroe, Jeremy Neal, Julia C. Philippi

DEGREE OFFERED: Doctor of Philosophy

THIS program prepares scholars for research and academic careers in major universities and for research positions in public or private sectors of health care. Two tracks of study are available: Clinical Research and Health Services Research. These areas of study are reflective of the overall research interests and expertise of School of Nursing faculty members and the resources available in the medical center, the university, the School of Nursing nurse-managed and interdisciplinary care delivery centers, and the Veterans Affairs Tennessee Valley Healthcare System (Nashville campus). Faculty research interests include stress and coping, perceived control, health promotion, oncology, pediatric palliative care, impact of chronic conditions on individuals and families, family violence, health psychology/behavioral medicine, life transitions, and symptom management. Health services research topics include outcomes measurement and interventions, workforce policy, and economic aspects of health care delivery.

Admission to the Ph.D. in Nursing Science Program is through the Graduate School, which oversees all doctoral programs in the university. For additional information, go to nursing.vanderbilt.edu/phd. Application materials are online. Successful applicants to the program are those whose previous academic performance, letters of recommendation, Graduate Record Examination scores, and written goal statement meet admission standards for the School of Nursing and the Graduate School and whose research and career goals best match the school’s research foci and faculty expertise.

The program requires 72 credit hours of study, of which 16 may be transferred from master’s course work, pending review and approval by the graduate faculty. The core curriculum of the program includes 31 credit hours of required course work for all Ph.D. students, 15 credit hours of required course work specific to the selected track of study, and 10 credit hours of course work that supports the student’s focus of research (4 research practica and 6 dissertation research credits).

Course work is delivered using a combination of formats using Internet technology with limited on-campus visits. Students work with faculty mentors who guide and oversee their educational program from admission through completion of degree requirements. Students participate in intensive research experiences connected with faculty research projects and are exposed to a variety of research designs and analytic techniques. Requirements for the degree include successful completion of advanced course work, a qualifying paper, oral qualifying exam, and dissertation (including an oral defense). Full-time and part-time options are available.

Further information about the doctoral program can be obtained by writing the Ph.D. Program Office, Godchaux Hall, 461 21st Avenue South, Nashville, Tennessee 37240, calling (615) 322-7410 or toll-free 1-855-868-7410, or visiting the website at nursing.vanderbilt.edu/phd.

Course descriptions begin on page 136.

Pathology, Microbiology, and Immunology

CHAIR Samuel A. Santoro
DIRECTOR OF GRADUATE STUDIES Cellular and Molecular Pathology, W. Gray Jerome
DIRECTOR OF GRADUATE STUDIES Microbiology and Immunology, Christopher R. Aiken
PROFESSORS EMERITI John H. Hash, George C. Hill

RESEARCH ASSOCIATE PROFESSOR Lan Wu

Mosse, Jonathan Irish, Oliver G. McDonald, Uche Sampson, Jonathan G. Schoenecker, Eric Sebzda, Adam Seegmiller, Ben Spiller, Thomas P. Stricker, Alison L. Woodworth, Andries Zijlstra

RESEARCH ASSISTANT PROFESSORS Danyvid Olivares-Villagómez, Kyra Oswald-Richter, Ingrid A. M. Verhamme, Jing Zhou

RESEARCH INSTRUCTORS Sung Hoon Cho, Melissa Farrow, Takashi Suzuki, Haichun Yang

Cell and Molecular Pathology Program

DEGREE OFFERED: Doctor of Philosophy

STUDENTS interested in the Cell and Molecular Pathology Program participate in the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). Cellular and molecular pathology occupies a unique place among the biomedical sciences in that it bridges the basic science and clinical disciplines. It seeks to determine the mechanism and etiology of disease, to study the agents and conditions that cause disease, and to elucidate the steps in the transformation of a normal tissue or process into an abnormal one. Pathology is ideally positioned to influence the conceptual and methodologic transfer of advances in the basic biological sciences to the alleviation of disease and the maintenance of health. It uses, therefore, a methodology that encompasses in part the techniques of all other basic and clinical science. Undergraduate majors in biology, chemistry, biochemistry, and molecular biology are appropriate preparation for graduate work in pathology, which requires a foundation in biochemistry, immunology, molecular genetics, and structural biology.

The program in cellular and molecular pathology leading to the Ph.D. degree is designed to prepare students for careers in biomedical sciences, focusing on research. Students in their first year complete a core of course work through the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). The second year of study comprises required and elective courses for a total of at least 24 hours of formal course work (including the 16 hours in the first year). Course selection is tailored to the interests and particular needs of the student, and elective hours are usually taken in areas such as cell biology, biochemistry, molecular biology, and molecular physiology and biophysics. Qualifying examinations are administered after the second year of study, and the final two to three years of the program are devoted to research. A thesis-based master’s degree is awarded only under special circumstances.

The research interests of the faculty include vascular biology and biochemistry, tumor biology, the immune response, inflammation and repair, the biology of the extracellular matrix in response to disease processes, the pathogenesis of infectious agents, and the regulation of gene expression in disease. The department is fully equipped with modern research training facilities and provides close faculty mentoring through a high faculty-to-student ratio.

Course descriptions begin on page 84.

Microbiology and Immunology Program

DEGREE OFFERED: Doctor of Philosophy

STUDENTS interested in the Microbiology and Immunology Program participate in the Interdisciplinary Graduate Program in the Biomedical Sciences during their first year (see Biomedical Sciences). The second year of study comprises required and elective courses in Microbiology and Immunology for a total of at least 24 hours of formal course work toward the Ph.D. degree.

The Microbiology and Immunology Program is designed to provide state-of-the-art training in modern virology, molecular and cellular immunology, bacteriology, molecular genetics and pathogenesis, and biotechnology. Research experience in a specific area provides the basis for a dissertation. Entering students normally serve brief apprenticeships in the laboratories of four faculty members during the first year as preparation for choosing a field of study. Dissertation research may be initiated in any of the following areas:

- Signal transduction and gene transcription in T and B cells; developmental immunology and cell-mediated immunity in parasitic and viral infections (Algood, Aronoff, Aune, Boothby, Crowe, Irish, Joyce, Kalams, Kendell, Kernodle, Mallal, Moore, Oswald-Richter, Rollins-Smith, Sebzda, Sriram, Thomas, Van Kaer);
- Molecular biology of viruses, including DNA and RNA viruses (Aiken, Crowe, Denison, Dermody, Rubin, Williams);
- Molecular cell biology of inflammation (Ruley, Van Kaer);
- Bacterial pathogenesis, including mechanisms of toxin action (Cover, Drake, Gomez, Hadjifrangiskou, Lacy, Skaar, Spiller)
- Molecular genetics (Aiken, Bordenstein, Crowe, Dermody, Hadjifrangiskou, Ruley, Skaar, Williams);
- Functional genomics, protein structure, and proteomics (Lacy, Link, Ruley, Spiller).

Emphasis is on basic research aimed at understanding molecular mechanisms of microbial infections and the defenses mounted by the immune system. Students whose interests are primarily in diagnostic, ecological, or taxonomic aspects of microbiology are not encouraged to apply.

Doctoral study is emphasized. However, an M.S. degree may be granted under special circumstances and may require a research thesis.

Course descriptions begin on page 132.
Pharmacology

ACTING CHAIR (2013–Present) Joey V. Barnett
DIRECTOR OF GRADUATE STUDIES Christine Konradi
PROFESSORS EMERITI Wolf D. Dettbarn, Joel G. Hardman, Elaine Sanders-Bush, Jack N. Wells

Luther, BethAnn McLaughlin, W. David Merryman, Rebecca Sappington, Jonathan Schoenecker, Benjamin Spiller, Gregg D. Stanwood, C. David Weaver, Xiangli Yang, Qi Zhang

RESEARCH ASSISTANT PROFESSORS Randy S. Barrett, Christopher B. Brown, Michael Bubser, Michael R. Dohn, Kyle A. Emmitte, Paul Gresch, Maureen Hahn, Corey Hopkins, Hideki Iwamoto, Aurea Pimenta, Shaun Stauffer, Alex Waterson, Michael Wood, Zixiu Xiang

ADJUNCT ASSISTANT PROFESSORS R. Nathan Daniels, Hugh Fentress, Klariisa Hardy, Susan Mercer

INSTRUCTORS Alice Rodriguez, Quinn Wells

DEGREE OFFERED: Doctor of Philosophy
STUDENTS interested in pharmacology participate in the Interdisciplinary Graduate Program in the Biomedical Sciences (see Biomedical Sciences). The program of study provides a broad background in pharmacology and other biomedical disciplines, preparing the student for a career as a research investigator. Graduates have been highly successful in obtaining positions in medical schools, government research institutes, and the pharmaceutical industry.

Students in their first year complete a core of course work through the Interdisciplinary Graduate Program in the Biomedical Sciences. The second year of study is composed of required and elective courses in Pharmacology for a total of 32 hours of formal course work toward the Ph.D. degree (including the 16 hours in the first year IGP). Requirements vary regarding the amount and distribution of course work that must be taken in related fields, but substantial work is usually taken in such other areas as cell biology, biochemistry, molecular physiology, biophysics, and chemistry. Subsequent years focus upon research and specialized course work as directed by mentors in the Pharmacological Sciences Training Program. Fields of research include molecular and biochemical pharmacology; neuropharmacology; autonomic, cardiovascular, endocrine, and clinical pharmacology; and drug metabolism and toxicology. A research dissertation is required for the Ph.D. degree. A thesis-based master’s degree is awarded only under special circumstances.

For more information, visit medschool.vanderbilt.edu/pharmacology.

Course descriptions begin on page 138.

Philosophy

CHAIR Robert Talisse
DIRECTOR OF GRADUATE STUDIES José Medina

PROFESSORS EMERITI Clement Dore, Robert R. Ehman, John F. Post, Charles E. Scott, Donald W. Sherburne, Henry A. Teloh

PROFESSORS Marilyn Friedman, Lenn E. Goodman, Michael P. Hodges, John Lachs, Larry May, José Medina, Kelly Oliver, Lucius T. Outlaw Jr., Robert Talisse, David Wood

ASSOCIATE PROFESSORS Ildt Dobbs-Weinstein, Lisa Guenther, Jeffrey Trumak, Julian Wuerth

ASSISTANT PROFESSOR Scott Aikin, Karen Ng

DEGREES OFFERED: Master of Arts (en route and 4+1), Doctor of Philosophy

WORK for the Ph.D. degree is offered in all major fields in the discipline. Candidates must complete at least 47 hours of formal course work and satisfy additional requirements. When appropriate, course work may include a limited number of seminars in other disciplines. A 4+1 M.A. is also offered for qualified Vanderbilt undergraduates. For further details and current information, see the Department of Philosophy webpage: vanderbilt.edu/Ans/philosophy.

Course descriptions begin on page 139.

Physics and Astronomy

CHAIR Robert J. Scherrer
DIRECTOR OF GRADUATE STUDIES Julia Velkovska

DISTINGUISHED RESEARCH PROFESSOR C. Robert O’Dell
DEGREES OFFERED: PHYSICS. Master of Arts, Master of Science, Doctor of Philosophy

PHYSICS and astronomy are driving intellectual forces that expand our understanding of the universe, discover the science that underlies new technologies, and applies these technologies to both curiosity-driven and applied research. In keeping with this role, the Department of Physics and Astronomy has active research groups studying the theoretical and experimental physics of elementary particles; nuclear structure, heavy-ion reactions, and relativistic heavy-ion physics; linear and nonlinear interactions of photons, electrons, atoms, and molecules with nanocrystals, surfaces, and interfaces; the electric, magnetic, and active mechanical properties of living systems; the structure and dynamics of biopolymers; the physics and technology of medical imaging; computational physics; low mass and young stars; detection of extrasolar planets; structure and dynamics of galaxies; observational and theoretical cosmology; ultra-high energy cosmic rays; and cosmology.

The master of science degree in physics requires a minimum of 30 credit hours consisting of at least 24 hours of formal didactic course work and normally including 6 credit hours of master thesis research. The didactic course work must include at least 9 credit hours above the 300 level. The master of science degree requires a written thesis approved by at least two graduate faculty members in the physics and astronomy program.

A non-thesis option (master of arts in physics) is available to students admitted to candidacy for the Ph.D. in physics. Under the non-thesis plan, the student presents an oral report on a research subject in the field of investigation and submits a written account of this subject to the program faculty. This degree also requires a minimum of 30 credit hours. A master’s degree in physics with emphasis in health physics is also available. For information regarding the master degree in health physics, see the medical physics section in the School of Medicine catalog.

The Ph.D. degree requires 72 hours of graduate work, including 15 hours of core courses, the 1 hour Physics 300 seminar, 3 hours in one breadth course outside the student’s main research area, and 9 hours of elective physics graduate courses. The remaining credit hours may be earned through some combination of non-candidate research, dissertation research, and approved lecture courses.

Course descriptions begin on page 73 for Astronomy and on page 141 for Physics.

DEGREES OFFERED: Master of Arts, Master of Science,
Doctor of Philosophy

THE doctoral program in psychological sciences is offered
jointly by the Department of Psychology in the College of Arts
and Science and the Department of Psychology and Human
Development in Peabody College. The Psychological Sciences
program focuses on psychological theory and the development
of original empirical research. Students are admitted to work
forward to the Ph.D. degree in the following areas:

- Clinical Science
- Cognition and Cognitive Neuroscience
- Developmental Science
- Neuroscience
- Quantitative Methods

A major goal of our doctoral program is the placement of its
graduates in academic settings. The faculty aim to tailor gradu-
ate training to meet the needs and the interests of each indi-
vidual student. Students are monitored very closely from
the beginning of their training, and emphasis is on active student
participation during every stage of training.

The curriculum is designed to: (a) familiarize students
with the major areas of psychology; (b) provide specialized
training in at least one of the five specific areas of psychology
emphasized in the program; and (c) provide students sufficient
flexibility to enroll in classes consistent with their interests and
long-term developmental trajectory. During the first two to
three years, students take several core courses in quantitative
methods and in substantive areas. Beyond this, the program
consists of seminars, further research participation, and other
inquiries expressly designed to fulfill career objectives. Each of
the five areas offers a seminar on current research every semes-
ter, attended by all faculty and graduate students in that area.

We expect students to be continually involved in research
throughout their tenure in our program. We use a one-on-one
mentoring model as a primary though not exclusive means for
the acquisition of scientific skills by students. As such, students
work very closely with their advisers in all phases of the research
process. In addition, advisory committees that consist of both
the adviser and other faculty members offer guidance through-
out the student’s graduate school years. There is also potential
for considerable interaction among programs and with other
disciplines across campus. This interaction produces an exciting
intellectual environment that is further enriched by visiting
faculty members and speakers. Interested students are encour-
aged to find out more about our research programs by reading
the descriptions of faculty research interests available on our
program website (vanderbilt.edu/psychological_sciences).

The Clinical Science program in Psychological Sciences at
Vanderbilt subscribes to the clinical scientist model of training,
with the primary goal of training clinical scientists. Through the
combination of advanced course work, practicum experiences,
and research emphases, students concentrate in one or more of
the following areas: developmental psychopathology (includ-
ing children and/or adults), prevention and treatment, clinical
health psychology, clinical neuroscience, socioaffective science,
developmental disabilities (including children and/or adults),
and quantitative methods. Regardless of concentration, the
training experience includes a core curriculum, a common set
of course requirements and research milestones, and a variety of
practicum opportunities.

All of our Ph.D. program areas offer a range of financial
support options for graduate students, including research fel-
loships, research assistantships, teaching assistantships, and
graduate fellowships.

Applicants to our program need to submit scores on the
Graduate Record Examination General Test. Applicants may
also submit scores on the Psychology subject test, but this is not
required. In addition to overall potential for a scientific career,
the fit between an applicant’s research interests and those of a
potential faculty mentor significantly influence admissions deci-
sions. Admission is not limited to students with undergraduate
backgrounds in psychology.

Specific program requirements are described in the Gradu-
ate Student Handbook, which is available on the Psychological
Sciences website.

The Department of Psychology and Human Development
offers a master of education (M.Ed.) in child studies that is
described in the Peabody College catalog. Outside of this
program, master’s degrees are generally only available to those
students who are accepted into the Ph.D. program.

Course descriptions for courses offered through the Department
of Psychology in the College of Arts and Science begin on page 146.

Course descriptions for courses offered through the Department
of Psychology and Human Development in Peabody College begin on
page 147.
Quantitative and Chemical Biology

The Quantitative and Chemical Biology program is an interdisciplinary umbrella graduate program seeking students who have earned undergraduate degrees in the quantitative and/or physical sciences (e.g., chemistry, computer science, engineering, mathematics, or physics) who wish to pursue a doctoral degree at the interface of the chemical, physical, engineering and biological sciences.

In the first year, students will complete four laboratory rotations of their choice as well as take courses related to their interests. The curriculum is designed to familiarize students from a quantitative sciences background with the concepts and nomenclature of modern biomedical research in an expeditious and efficient fashion. Following the completion of the first year, students may enter any of the Ph.D. degree programs housed in the School of Engineering, School of Medicine, and College of Arts and Science, or alternatively, one of three transinstitutional Ph.D. degree programs, which are Chemical and Physical Biology, Human Genetics, and Molecular Neuroscience.

Religion

CHAIR Paul J. DeHart
ASSOCIATE DEAN FOR GRADUATE EDUCATION AND RESEARCH James P. Byrd
ASSISTANT PROFESSORS Annalisa Azzoni, Dianna Bell, Nancy G. Lin, Bryan Lowe, David A. Michelson, Graham Reside, Anand V. Taneja

DEGREES OFFERED: Master of Arts, Doctor of Philosophy

STUDENTS may be admitted upon graduation from an accredited college with a baccalaureate degree or from an accredited seminary or graduate school with a post-baccalaureate degree. Ordinarily, students with only the baccalaureate degree are admitted to the M.A. program. Successful completion of the latter provides a foundation for doctoral studies but does not guarantee admission to the Ph.D. program. Students with an M.Div., M.T.S., or M.A. degree may be admitted directly to the Ph.D. program. Applicants with the B.A. degree are advised to consider not only the M.A. program in the Graduate School, but also the two-year M.T.S. program in the Divinity School of Vanderbilt University as preparation for Ph.D. work.

Degree programs are offered in ethics and society; Hebrew Bible; historical studies; history and critical theories of religion; homiletics and liturgics; Jewish studies (M.A. only at present); New Testament; religion, psychology, and culture; and theological studies. Interdisciplinary studies, both within religion and in other areas of knowledge, are encouraged. The study of religion is pursued both as a critical, humanistic discipline, employing a variety of methodological perspectives, and as a theological discipline, interpreting religions and their historical, theological, and ethical heritage.

Master of Arts

The M.A. program is designed to enable students to explore personal interests or vocational options, to acquire a background for teaching at the secondary level, or to attain a foundation for further studies at the doctoral level. A total of 30 credit hours and a thesis are required for the first two programs described below, while the final two programs have special requirements.

1. **Specialty M.A.** This program involves a concentration in one of the subspecialties of religious study. Students will select a major of at least 12 hours and a minor of at least 6 hours from the following areas: ethics and society; Hebrew Bible; historical studies; history and critical theories of religion; homiletics and liturgics; Jewish studies; New Testament; religion, psychology, and culture; and theological studies. The remaining hours may be chosen from the above areas or from other departments of the Graduate School.

2. **Cross-Disciplinary M.A.** This program, to which students are admitted under exceptional circumstances, provides an opportunity for students to relate one of the subspecialties of religious studies to an appropriate supportive discipline. Normally, 12 hours are taken in one of the areas listed under the specialty M.A., with the remaining hours taken in another department of the Graduate School. The thesis will attempt to integrate the methods and subject matters of the two disciplines in relation to a chosen problem.

3. **Terminal M.A.** The terminal M.A., offered exclusively for Ph.D. students who elect not to complete the Ph.D. program, may be received by students who have demonstrated reading knowledge in at least one foreign language at the level required for the M.A. degree; have completed 48 semester hours of formal, graded course work at the graduate level, including at least 24 hours at Vanderbilt; have passed an oral examination conducted by a committee of faculty members from the Graduate Department of Religion; and do not seek candidacy for the Ph.D. degree.

4. **Master’s Degree in Passing.** Ph.D. candidates may earn the M.A. degree upon completion of at least 42 hours of graduate study, satisfaction of the language requirements, passing of the Ph.D. qualifying exam, and approval of the dissertation proposal according to the GDR guidelines.
M.A. candidates demonstrate reading competence in foreign languages, ancient or modern, as required in the program or area of concentration. Students should consult area policies for specific requirements. In most cases, however, reading knowledge in one foreign language is required for the M.A. Students will normally satisfy this requirement by performing satisfactorily in the departmentally administered Ph.D. language examination, taking and passing with a grade of B+ or higher a Vanderbilt University course designed specifically to teach graduate students to use the language in research, or by presenting an acceptable record of at least 12 hours (or its equivalent) in a language. Candidates specializing in Hebrew Bible or New Testament are expected to work with the original texts in Hebrew or Greek. Students designating Greek or Hebrew as the foreign language may not count introductory courses in these languages toward the requisite 30 hours for the degree.

Joint J.D.–M.A. Program. Students who have been admitted to both the Law School and the Graduate School may work toward the J.D. and the M.A. in religion concurrently. Six hours of religion credits will be accepted toward the J.D. degree, and 6 hours of law credits will be accepted toward the M.A. in religion. The joint program normally takes four years. For further information, write to the chair of the Graduate Department of Religion.

Doctor of Philosophy

Ph.D. programs are currently available in the following areas of major concentration: ethics and society; Hebrew Bible; historical studies; history and critical theories of religion; homiletics and liturgics; New Testament; religion, psychology, and culture; and theological studies. Students applying to each of these areas may also apply for a fellowship from The Program in Theology and Practice (vanderbilt.edu/gradschool/religion/t&p).

Candidates for the Ph.D. degree must demonstrate reading knowledge of one modern language of research, a second language as designated and approved by the Area and the GDR, and additional languages as specified by the Area (see Area requirements). Each of the areas of major concentration specifies which languages are acceptable for its students. The requirement for modern languages may be satisfied by taking and passing with the grade of B+ or higher a Vanderbilt University course designed specifically to teach graduate students to use the language in research, or by passing the departmental reading examination. Beyond this department-wide requirement, in biblical studies a knowledge of Hebrew or Greek is required, and in some areas of historical studies a knowledge of Latin or Greek is required. Students should be prepared to learn such other languages, ancient and modern, as may appear requisite for scholarly interests. Students should check with their area directors concerning specific requirements.

Certificate Programs

Students enrolled full time in the M.A. or Ph.D. programs may earn graduate certificates in two areas: (1) Jewish Studies (offered through the interdisciplinary program in Jewish Studies, vanderbilt.edu/jewishstudies/Cert in JS.htm) and (2) Religion, Gender, and Sexuality (offered through the Carpenter program in Religion, Gender, and Sexuality, vanderbilt.edu/divinity/carpenter).

Course descriptions begin on page 149.

CHAIR Benigno Trigo (Spring 2015)
INTERIM CHAIR Victoria A. Burrus (Fall 2014)
VICE CHAIR Victoria A. Burrus
DIRECTOR OF GRADUATE STUDIES Christina Karageorgou-Bastea
PROFESSORS EMERITI J. Richard Andrews, M. Frãncille Bergquist,
Susan Berk-Seligson, Russell G. Hamilton, C. Enrique Pupo-Walker,
Francisco Ruiz-Ramón
PROFESSORS Earl E. Fitz, Edward H. Friedman, Ruth Hill, Cathy L. Jrade,
William Luis, Philip D. Rasico, Benigno Trigo
ASSOCIATE PROFESSORS Victoria A. Burrus, Christina Karageorgou-
Bastea, Emanuelle Oliveira-Monte, Andrés Zamora
ASSISTANT PROFESSORS Márcio Bahia, José Cárdenas-Bunsen,
N. Michelle Murray

DEGREES OFFERED:
SPANISH. Master of Arts, Doctor of Philosophy
SPANISH-PORTUGUESE. Doctor of Philosophy
SPANISH-PORTUGUESE. With specialization in Comparative Literature, Doctor of Philosophy
SPANISH-PORTUGUESE. With specialization in Inter-American Literature, Doctor of Philosophy
PORTUGUESE. Master of Arts

The Department of Spanish and Portuguese does not accept external applications for a terminal master’s degree. The M.A. programs in Spanish and in Portuguese are degrees earned in passing en route to the Ph.D. and are awarded after successful completion of the comprehensive exam required of all Ph.D. candidates. A reading knowledge of another foreign language is also required. (For Portuguese M.A. students, the required language is Spanish; for Spanish M.A. students, Portuguese is recommended.) Students seeking a combined Spanish/Portuguese Ph.D. take a combined comprehensive exam upon successful completion of which those who come with an M.A. in Spanish receive an M.A. in Portuguese and those who come with an M.A. in Portuguese receive an M.A. in Spanish. Those who come to Vanderbilt with just a B.A. will be awarded an M.A. in either Spanish or Portuguese or they may opt to take separate exams in Spanish and in Portuguese in order to obtain two M.A. degrees.

The Ph.D. program in Spanish requires 63 hours of course work, which includes an M.A. in passing for those who come with just a B.A. and 9 hours for a minor, which may be Portuguese, a certificate program in Latin American studies, an interdisciplinary minor in philosophy and literature, or another approved program of courses from one or more departments. Candidates must demonstrate either a reading knowledge of an additional foreign language beyond the one required for the M.A. (normally Portuguese) or they may continue in the study of Portuguese (or another approved language) to an advanced level.

The combined Ph.D. in Spanish and Portuguese requires 66 hours of course work, which includes an M.A. in passing as described above and course work reflecting both of the two areas. No minor is necessary. Candidates must have near-native proficiency in either Spanish or Portuguese, and advanced proficiency in the other language must be acquired or demonstrated at Vanderbilt. There is no additional language requirement.

The combined Ph.D. in Spanish and Portuguese with a specialization in Comparative Literature requires 72 hours of course work, which includes an M.A. in passing as described above. Students must develop a plan of study that focuses on a unifying theme that emphasizes a rigorously comparative methodology. Courses are taken in Spanish and Spanish American literature and in Portuguese, Lusophone African, and Brazilian literature, as well as in a related language field, such as English, French, German, or Classics, or in a related area of humanistic endeavor such as history, religion, Latin American studies, art, the history of art, philosophy, literary theory, or music. In addition to English, candidates must have near-native proficiency in either Spanish or Portuguese, and advanced proficiency in the other language must be acquired or demonstrated at Vanderbilt.

The combined Ph.D. in Spanish and Portuguese with a specialization in Inter-American Literature requires a minimum of 72 hours of course work, which includes an M.A. in passing as described above. Students are expected to develop a plan of study that is both comparative and inter-American in its design through course work in both Spanish American and Brazilian literature, as well as in one of a number of related fields such as English (American and Caribbean literature), French (Canadian and Caribbean literature, subject to course availability), and Latin American studies (cultural anthropology). In addition to English, candidates must demonstrate near-native proficiency in either Spanish or Portuguese, and advanced proficiency in the other language must be acquired or demonstrated at Vanderbilt.

Specific program requirements are described under the Graduate Studies tab on the Department of Spanish and Portuguese website.

Course descriptions begin on page 145 for Portuguese and on page 170 for Spanish.

Special Education

ASSISTANT PROFESSORS Erin E. Barton, Victoria F. Knight,
Christopher J. Lemons, Blair P. Lloyd
ASSISTANT PROFESSORS OF THE PRACTICE Karen Blankenship,
Andrea M. Capilzzi, Alexandra Da Fontis, Joseph Lambert

DEGREE OFFERED: Doctor of Philosophy

The program of study is based in the multidisciplinary body of knowledge relevant to the understanding, education, and treatment of persons with disabilities. The Ph.D. degree is composed of three major elements of course work: core studies in special education, including 9 hours of proseminar in special education; at least 12 formal course hours in research methods; and a 15 hour minor or related area of study. The program of study will be planned individually with the major professor and approved by the student’s qualifying committee. In addition, the program requires demonstration of competence in research
methods and dissemination and in college teaching/supervision. Students who enter without a master’s degree may earn a thesis-based M.S. degree while working on their Ph.D.

Course descriptions begin on page 172.

Teaching and Learning

See Learning, Teaching, and Diversity

Women’s and Gender Studies

INTERIM DIRECTOR Laura Carpenter
ASSOCIATE DIRECTOR Rory Dicker

VANDERBILT University’s Women’s and Gender Studies program offers an interdisciplinary graduate certificate program in gender studies. The certificate program provides graduate students across campus with access to interdisciplinary scholarship in the robust field of gender studies; supplies them with a valuable professional credential; enhances pedagogical skills; and strengthens their ability to compete for jobs as well as national fellowships and postdoctoral awards.

Any student enrolled in a graduate program at Vanderbilt University is eligible to apply for the certificate program in gender studies. Acceptance to the program requires a minimum GPA of 3.3, satisfactory performance of B+ or better in Women’s and Gender Studies 301, and the approval of both the student’s adviser and the director of the Women’s and Gender Studies program.

Please contact the Women’s and Gender Studies program for more information at womens-studies@vanderbilt.edu or phone (615) 343-7808.

Requirements for Graduate Certificate in Gender Studies

1. Women’s and Gender Studies 301.
2. Women’s and Gender Studies 302.
3. Three additional graduate-level courses on women, gender, and/or sexuality, appropriate to the student’s program of study. Courses must be approved for credit and include at least one course outside the student’s area. One course may be satisfied through an independent study with a faculty member affiliated with the Women’s and Gender Studies program, with the approval of the director of Women’s and Gender Studies.
4. A paper submitted to the Women’s and Gender Studies steering committee for evaluation. The paper must demonstrate the application of a gender studies methodology to research, teaching, or fieldwork.

Course descriptions begin on page 176.
Graduate School Courses

Explanation of Symbols

200-level courses listed in this catalog may be taken by graduate stu-
dents for credit unless a specific restriction is indicated in the course
description and provided there is no duplication of the student’s
previous courses.

300-level courses and above listed in this catalog are graduate
courses. They are on a level normally considered too high for un-
dergraduates and are not open to undergraduates without consent
of the instructor, the adviser, and the Graduate School. Courses in
the graduate program in religion carry four-digit numbers. Generally,
courses in religion numbered greater than 3000 are at a higher level
than those numbered 2000.

Length of a course (one semester or two) is indicated by whether it has
a single or double number. Double-number courses may be divided at
the option of the student if the numbers are different.

210–211. Note that numbers are different, indicating that students
may take either semester without the other, at their own option. In the
election of such options, students must not disregard statements of
prerequisites or the major department’s requirements.

220a–220b. Note that numbers are the same, indicating a year-long
course.

The semester in which a one-semester course is offered is indicated by
the word FALL (or SPRING) in the course description, or FALL,
SPRING in the case of a course offered both semesters. All two-se-

termer courses begin in FALL and end in SPRING unless the course
description specifies otherwise.

Hours referred to are semester hours, and figures in brackets always
indicate semester hours credit—e.g., 3 for one semester and 3–3 for
a two-semester course.

Formal course work means all courses taken for credit except thesis
and dissertation research courses.

The university reserves the right to change the arrangement or content
of courses, to change texts and other materials used, or to cancel any
course on the basis of insufficient enrollment or for any other reason.

African American and Diaspora Studies

AADS 265. Twentieth-Century African American Biography. Biogra-
phies and autobiographies as lenses for the study of historical trends and
events; development of gender, sexual, and racial identities in subjects. [3]

AADS 300. Theories of Diaspora. Interdisciplinary introduction to materi-
als, methods, debates, and theoretical language of scholarly research in
Diaspora Studies. [3]

AADS 395a. Directed Study. [3]

American Studies

AMER 300. Graduate Workshop In American Studies. Issues, meth-
odologies, traditions, approaches, and problems in the interdiscipli-
ary field of American Studies. May be repeated for credit more than once if
there is no duplication in topic. Students may enroll in more than one section of
this course each semester. [4]

AMER 301a. Independent Study. May be repeated for credit more than
once if there is no duplication in topic, but students may earn only up to 3
credits per semester of enrollment. [1-3]

AMER 301b. Independent Study. May be repeated for credit more than
once if there is no duplication in topic, but students may earn only up to 3
credits per semester of enrollment. [1-3]

Anthropology

ANTH 201. Introduction to Linguistics. Systematic study and analysis
of human language. Formation of language sounds, sound systems, the
structure of words, the structure of sentences, meaning, language change.
Data from diverse languages of the world. [3]

ANTH 203. Anthropological Linguistics. An introduction to the study of
language in its anthropological context. Language and culture, the structure
of symbolic systems, vocabulary as a guide to the ways societies classify
their universe. Linguistic analysis as a tool for ethnographic investigation. [3]

ANTH 206. Theories of Culture and Human Nature. Survey of the views
of anthropological thinkers, from the late nineteenth century to the present,
about the basic attributes of humankind and human culture. Comparison
of different ideas of how people create culture and in turn are molded by
culture. [3]

ANTH 207. Environmental Anthropology. The relationship between hu-
man beings and the environments that sustain them. Global diversity of
human ecological adaptations. Hunter-gatherers, pastoral nomads, slash-
and-burn agriculturists, and irrigation agriculturists. Human impact on
the environment. Theories of human ecological interaction. [3]

ANTH 208. Food Politics in America. The cultural, social, political, and
economic contexts of the contemporary food system. Issues of health
and nutrition. Land use, ecological relations, food chains, and links to cli-
mate change. Ethics of food production, distribution, and consumption.
Agricultural policy, immigration, work conditions, animal welfare, and local
economies. Roles of citizens and consumers. Rise of movements seeking
sustainable alternatives. [3]

How wealth is accumulated, lost, exchanged, and displayed; how poverty
is created, endured, and overcome. Explanations in terms of luck, hard
work, immorality, occult forces, and public policies. Case studies. [3]

ANTH 210. Culture and Power in Latin America. Survey of native cul-
tures and Spanish and Portuguese heritage. Fundamental traditions, in-
cluding marriage and the family, the relationship between men and women,
racial and ethnic identity, social class, and religion. Peasant communities
and contemporary urban life. [3]

ANTH 211. Archaeology. An introduction to the methods used by ar-
chaeologists to study the nature and development of prehistoric societies.
Approaches to survey, excavation, analysis, and interpretation are explored
through lectures, case studies, and problem assignments. [3]

ANTH 212. Ancient Mesoamerican Civilizations. Development of pre-
Hispanic civilization in Mesoamerica from the beginnings of village life to
the rise of the great states and empires: Olmec, Maya, Toltec, and Aztec
civilizations. [3]

ANTH 213. The Archaeology of the Ancient Maya Civilization. Case
study in cultural evolution. Archaeological evidence and social theory on
the enigmatic origins, complex nature, and sudden collapse of the ancient
Maya civilization. [3]

ANTH 215. The Collapse of Civilizations. Causes of the decline or col-
lapse of complex societies. Old World and New World examples. Historical,
anthropological, and paleoecological theories and controversies. [3]

ANTH 216. Ancient Cities. Comparative examination of early cities in the
Old World and pre-Columbian America. Analysis of social and economic
processes supporting preindustrial urbanism. Role of geography, ideology,
trade, and settlement systems in the rise of early urban societies. [3]

ANTH 221. Maya Language and Literature. Introduction to a contemporary Maya language. Linguistic analysis and cultural concepts. By permission of instructor. May be repeated for the study of different Maya languages for a total of 6 credits. [1-6; maximum of 6 credits total for all semesters of ANTH 221]

ANTH 232. The Anthropology of Globalization. Perspectives on globalization based on ethnographic case studies. The impact of new technologies on native cultures; different cultural meanings of global commodities; creation of new diaspora cultures; effects of neoliberal reforms on local economies; ethnic movements and terror networks. [3]

ANTH 234. Economic Anthropology. Modern and postmodern culture of Western and non-Western economies. Crosscultural comparison of concepts of self-interest and rationality. Relation of the growth of post-industrial (service and information) economies to economic strategies of ethnic groups. Survey of indigenous alternatives to development. Theoretical issues grounded in case studies from our own and other cultures. [3]

ANTH 244. Social and Health Consequences of Pandemics. Origins, spread, mortality, and the biological and social consequences. The epidemic of bubonic plague in the 1300s, known as the European Black Death. The devastation of indigenous New World populations by European diseases after 1492. Social and medical responses. Implications for modern societies. [3]

ANTH 247. The Aztecs. Origins of the Aztec peoples of central Mexico and their culture; history and structure of the Aztec empire; pre-Columbian social, political, and economic organization; warfare and religion; the Spanish conquest; colonial society in central Mexico; ethno-graphic study of modern descendants of the Aztecs. [3]

ANTH 248. Ancient Andean Civilizations. Introduction to the archaeology and peoples of ancient South America. Early hunters and gatherers, origins of agriculture and urbanism, and the rise and fall of the Huari and Inca empires. [3]

ANTH 249. Indigenous Peoples of Lowland South America. Native societies of Amazonia, the Oriñon basin, and other forest, savanna, and coastal regions of South America. Ecology, cosmology, social organization, and political relations in historical and contemporary populations. Government policies, human rights, environmentalism, sustainable development, and indigenous activism and advocacy. [3]

ANTH 252. South American Archaeology. From 12,000 years ago to the present. Archaeology, ethnography, and ethnography. [3]

ANTH 254. The Inca Empire. The rise and fall of the Inca state in the Southern American Andes. Inca society, agriculture, economy, warfare, ancestor worship, mummies, and royal wealth. Imperial expansion, the role of the feasting in Inca politics, and place of ecology in Inca religion. Destruction of the empire during the Spanish conquest; persistence of pre-Columbian culture among Inca descendants in Peru and Bolivia. [3]

ANTH 256. Medicine, Culture, and the Body. Also listed as History 283 Concepts of the human body from historical and cross-cultural perspectives. Exploration of experiences, representations, and medical theories of the body in birth, death, health, and illness in Western and non-Western societies. Comparison of methodologies of anthropology and history. Repeat credit for students who have completed HIST 283. [3]

ANTH 266. Gender and Cultural Politics. Cross-cultural comparison of women’s roles and status in western and non-Western societies. Role of myths, symbols, and rituals in the formation of gender identities and the politics of sexual cooperation, conflict, and inequality. Case studies from Africa, the Middle East, Europe, North and South America, Asia, and Melanesia. [3]

ANTH 289. Introduction to a Maya Language. Beginning instruction in Kaqchikel, K’iche’, or Q’eqchi’. Basic speaking, reading, and writing skills. [3]

ANTH 273. Human Evolutionary Genetics. Core issues in human evolution and population genetics. Molecular evidence for the origin of modern humans, reconstruction of human migrations, race, and detection of admixture between populations. Implications for human disease. Offered on a graded basis only. No credit for students who earned credit for 294 section 1 in fall 2012. Prerequisite or corequisite: BSCI 100, BSCI 105, or BSCI 110a. [3]

ANTH 275. Sociocultural Field Methods. Research design and proposal writing, access to data, ethical issues, sampling techniques, interviewing, questionnaire design and question writing, data analysis. [3]

ANTH 280. Introduction to Geographic Information Systems and Remote Sensing. Computerized graphics and statistical procedures to recognize and analyze spatial patterning. Spatial data-collection, storage and retrieval; spatial analysis and graphic output of map features. Integration of satellite imagery with data from other sources through hands-on experience. Assumes basic knowledge of computer hardware and software. [3]

ANTH 281. Classic Maya Religion and Politics. Anthropology of politics and religion in Classic Maya culture, A.D. 100-1000. Interpretation of Classic Maya iconography and epigraphy. [3]

ANTH 283. Ethics in Anthropology, Archaeology, and Development. Ethical perspectives on contemporary problems of archaeological and anthropological research, interaction, and interpretation of past and present non-Western societies. [3]

ANTH 284. Problems in Anthropological Theory. An advanced seminar in anthropological theory: cultural evolution, cultural history, ethnic relations, cultural ecology, archaeological method and theory, social structure, political organizations, religious institutions. [3]

ANTH 287a. Internship Readings and Research. Readings and research conducted under the supervision of a member of the Anthropology department and a substantial research paper are required. Students from any discipline can gain experience working with a local, national, or international organization in developing a project to broaden their understanding of anthropological issues. Hours for background readings and research will be completed in ANTH 287a concurrently with and regardless of the number of hours taken in internship training in 287b. Normally a 2.90 grade point average, 6 hours of prior work in ANTH, and prior approval of the student’s plan by the director of undergraduate studies in Anthropology are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Corequisites: 287b. [Variable credit: 1-6]

ANTH 287b. Internship Training. Offered on a Pass/Fail basis only and must be taken concurrently with 287a. Hours of 287b will not count toward the Anthropology major or minor. Students from any discipline can gain experience working with a local, national, or international organization in developing a project to broaden their understanding of anthropological issues. Hours for background readings and research will be completed in ANTH 287a concurrently with and regardless of the number of hours taken in internship training in 287b. Normally a 2.90 grade point average, 6 hours of prior work in ANTH, and prior approval of the student’s plan by the director of undergraduate studies in Anthropology are required. A research paper and report must be submitted at the end of the semester during which the internship training is completed. Corequisite: 287a. [Variable credit: 1-9]

ANTH 288a. Independent Research. Readings on selected topics (of the student’s choice) and the preparation of reports. [1-3]

ANTH 288b. Independent Research. Readings on selected topics (of the student’s choice) and the preparation of reports. [1-3]

ANTH 289. Field Research. Directed field research on topics of the student’s choice. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

ANTH 294. Special Topics. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ANTH 303. Seminar in Maya Ethnography. Ethnographic survey of the Maya of Mexico and Guatemala; historical and current data, methods, theories. [3]

ANTH 307. Human Variation and Osteology. Survey of physical and genetic variation in modern human populations. Laboratory techniques in osteological analysis. [3]

ANTH 310. Archaeological Method and Theory. Development of archaeology as a discipline; relationships with anthropology and history; intellectual trends. Prerequisite: consent of instructor. [3]

ANTH 312. GIS for Anthropology Research. Theoretical and methodological training for advanced GIS applications in anthropological research. Implementing GIS in research design, field spatial data acquisition methods, data processing, management, visualization, and analysis. [3]

ANTH 315. History of Anthropological Theory II. An advanced consideration of the history of anthropological theory from the mid-twentieth century to the present. [3]

ANTH 318. Political Violence. Comparative and ethnographic analysis of state violence, guerrilla insurgencies, paramilitarism and vigilantism; consequences of repression, impunity, and social fragmentation on historical memory and democratic processes. [3]

ANTH 319. Seminar in Research Design. Objectives and strategies of contemporary research problems in anthropology; formulation, writing, and construction of grant proposals; interplay between data, method, and theory; develop skill in critiquing research ideas, techniques, and designs. [3]

ANTH 325. The Collapse of Civilizations: General Theories and the Maya Collapse. An advanced consideration of the causes and processes involved in the decline of complex societies. General theory is then illustrated by detailed interactive study of the evidence and interpretations of the collapse of the civilization of the Classic Maya, arguably the New World’s most advanced society. A seminar allowing each student to develop and define their own perspective on this major problem in archaeology and social theory. [3]

ANTH 329. The Anthropology of Death: Body, Place, and Memory. Cultural responses to death in Western and non-Western societies. Emphasis on issues of how social relations, emotion, and memory are shaped in relation to ideas and practices focused on the body and the significance of places as sites of identity. Theory and perspectives from anthropology, religion, and philosophy. [3]

ANTH 330. Research Design in Anthropology. Research design, formulating research questions, and definition of appropriate data and methods. [3]

ANTH 331. Preindustrial Political Systems. History, structure, and change of pre-modern political systems around the world. [3]

ANTH 333. Race as a Cultural and Legal Construct. Historical and contemporary roles of race and racism in settler colonialism, slavery, the nation-state, and empire. Theoretical perspectives from social constructionism, anti-colonial literature, critical race theory, and standpoint theory. [3]

ANTH 335. Space, Place, and Landscape. Cross-disciplinary approaches to the significance of space and landscape for human societies in the past and present. [3]

ANTH 340. Historical Archaeology. Development, practice, methods, and theoretical perspectives in historical archaeology; relationships between archaeology and history. [3]

ANTH 345. Ethics in Anthropology. Ethical obligations of anthropologists in dealing with human subjects on the interpretation, interaction, and action with non-western societies. Ethics from Socrates to radical post-modernism. Debate of specific issues presented by non-Western practices, cultural property rights, sites versus sacred places, repatriation, cultural relativism, and anthropological activism. [3]

ANTH 349. The Historical Archaeology of Latin America. The study of archaeological, historic, and ethnohistorical materials in examining the conquest, colonization, and process of cultural change in Latin America. [3]

ANTH 350. Seminar in Mesoamerican Archaeology. The prehistory of pre-Columbian civilizations of Mexico and Central America. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ANTH 360. Seminar in South American Archaeology and Ethnohistory. The prehistory of pre-Columbian civilizations of the Andean and lowland regions of South America. [3]

ANTH 367. Special Topics. Problems, themes, or issues in anthropological theory and methods. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ANTH 369. Master's Thesis Research. [0]

ANTH 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

ANTH 399. Ph.D. Dissertation Research. [0-12]

Arabic

ARA 210a. Elementary Arabic. Development of reading, listening, speaking, and writing skills. No credit for students who have earned credit for a more advanced Arabic language course. [5]

ARA 210b. Elementary Arabic. Continuation of 210a. Development of reading, listening, speaking, and writing skills. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 210a. [5]

ARA 220a. Intermediate Arabic. Practice and development of all language skills at the intermediate-advanced level. Intensive work in spoken Arabic with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Arabic word formation, verb aspect usage, and structure of complex sentences. Three hours of class work per week with an additional two hours per week of individual work in the language laboratory. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 210b. [4]

ARA 220b. Intermediate Arabic. Continuation of 220a. Practice and development of all language skills at the intermediate-advanced level. Intensive work in spoken Arabic with emphasis on vocabulary acquisition, reading comprehension, and writing skills. Advanced grammar, modern Arabic word formation, verb aspect usage, and structure of complex sentences. Three hours of class work per week with an additional two hours per week of individual work in the language laboratory. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 220a. [4]

ARA 230a. Advanced Arabic. Further development of listening, reading, speaking, and writing skills in the Arabic language. Emphasis on grammar and literary techniques. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 220b. [3]

ARA 230b. Advanced Arabic. Continuation of 230a. Further development of listening, reading, speaking, and writing skills in the Arabic language. Emphasis on grammar and literary techniques. Offered on a graded basis only. No credit for students who have earned credit for a more advanced Arabic language course. Prerequisite: 230b. [3]

ARA 240. Media Arabic. Listening to, discussing, simulating, and analyzing Arabic media materials. Coverage of current and historical events, such as TV broadcasts, headline news, documentaries, and public discussions on political, religious, and cultural issues. Offered on a graded basis only. Prerequisite: 230b. [3]

ARA 250. Arabic of the Qur’an and Other Classical Texts. Syntactical and morphological features of Classical Arabic. Differences and similarities with Modern Standard Arabic in vocabulary usage, semantic extensions, and context; vocabulary borrowing. Texts drawn from the Qur’an, Hadith, and Sira (biographical) literature. Offered on a graded basis only. Prerequisite: 240. [4]
Asian Studies

ASIA 211. Popular Culture in Modern Japan. Popular culture in Japan from 1900 to the present. The rise of mass culture and media; song, sports, food, fashion, and popular film genres. [3]

ASIA 212. Explorations of Japanese Animation. Introduction to the form and content of Japanese animation as globalized popular entertainment and as a speculative artistic medium that explores history and memory, nature and technology, human identity, carnivalesque comedy, and gender relations. [3]

ASIA 233. Self-Cultivation in Ancient China. 300 BCE to 500 CE. Methods, goals, and contexts of self-cultivation in antiquity. Breathing exercises, meditation, visualization, sexual arts, sacrifice, alchemy, and other practices in their religious, cultural, and social contexts. [3]

ASIA 236. Inside China. First-hand experience of China’s dynamic society and expanding economy. Guided exploration of famous historical sites and contemporary institutions such as hospitals, businesses, factories, and art galleries in Beijing and Shanghai. Interviews with individuals from many different walks of life, including physicians, entrepreneurs, migrant workers, and college students. No knowledge of Chinese is required. Offered on a graded basis only. [3]

ASIA 240. Current Japan-U.S. Relations. Similarities and differences in theory and practice in the United States and Japan on public policy issues such as trade, defense, environment, education, medical care, and racial prejudice. [3]

ASIA 251. The Third World and Literature. The history of cultural and political concepts of the Third World from 1955 to the present. Contemporary literary and cultural debates regarding models of transnationalism and processes of globalization. National literatures and cultures foundational to the Third World model. The relationship between the genre of the novel and the formation of national communities. [3]

ASIA 289a. Independent Study. Designed primarily for majors who want to study Asian topics not regularly offered in the curriculum. Must have consent of instructor. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3]

ASIA 289b. Independent Study. Designed primarily for majors who want to study Asian topics not regularly offered in the curriculum. Must have consent of instructor. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3]

ASIA 29a. Special Topics. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ASIA 29b. Special Topics. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ASIA 29c. Special Topics. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ASIA 300W. Hollywood Hanoi. Cultural narratives of the Vietnam War, including novels and films. War and representation. International, minority, and antiauthor perspectives on the violence and aftermath. Muhammad Ali, Werner Herzog, Jean Genet, Graham Greene, and Dinh Linh. All texts in English translation. No credit for students who have earned credit for 115F section 4. [3]

ASTR 322. Methods in Observational and Computational Astronomy. Principles and techniques including accurate measurement of astronomical distance, data handling and error analysis, computer programming. Four to six experiments such as determination of Earth’s radius, distance to the Moon, refraction by the atmosphere, distance to a star cluster. Scheduled evening sessions at Vanderbilt Dyer Observatory. [3]

ASTR 353. The Structure and Dynamics of Galaxies. The stellar, gaseous, and dark matter content of galaxies; their internal bulk properties, structure, kinematics, and dynamics. Equilibrium and stability of stellar systems. Orbit theory, the gravitational N-body problem, relaxation, dynamical friction, and the Fokker-Planck equation. Galaxy evolution from the standpoint of stellar populations, the initial mass function, chemical evolution, and galaxy interactions. No credit for students who have completed 253. [3]

ASTR 355. Order of Magnitude Astrophysics. Order-of-magnitude estimates on astrophysical problems. May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [1]

ASTR 369. Master’s Thesis Research. [0]

ASTR 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

ASTR 390. Independent Study. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3]

ASTR 399. Ph.D. Dissertation Research. [0-12]

ASTR 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote half-time effort to dissertation research. [0]

Audiology

AUD 5310. Measurement of Hearing. The theory and practice of hearing measurement, with emphasis on routine clinical and screening audiometric techniques, testing environment, audiometric standards and calibration, applied impedance measurements, and interpretation of audiometric tests. Fall. [4]

AUD 5318. Educational Audiology and Aural Habilitation for Children. A survey of approaches to aural rehabilitation for children. Specific focus will be on intervention for children with hearing loss in educational and other habilitative settings. Spring. [3]

AUD 5325. Pediatric Audiology. A survey of methods and procedures used in the evaluation of the auditory function and management of neonates, infants, and young children. Includes identification and intervention procedures. There will be review of special populations of children with hearing loss. Fall. [3]

AUD 5327. Hearing Loss and Speech Understanding. This course examines various factors that may affect the speech understanding of persons with hearing loss. The contribution to the unaided and aided speech understanding of persons with hearing loss of (1) subject factors, such as degree of hearing loss, and deficits in frequency and temporal resolution, and (2) environmental factors, such as the level and type of background
noise, reverberation, and talker characteristics, will be examined. Methods for predicting speech understanding will also be discussed. Spring. [3]

AUD 5332. Pathology of the Auditory System. A study of pathologies involving the peripheral auditory system arising from genetic factors, disease, and trauma, with emphasis applied to presenting signs/symptoms, and medical/audiological management. Fall. [3]

AUD 5340. Lab: Amplification I. Laboratory that stresses instruction and practice in basic hearing aid techniques including Otoscopic examination, ear impressions, electroacoustic evaluation and probe microphone techniques. Co-requisite: AUD 5339. Spring [1]

AUD 5345. Amplification II. Advanced topics in amplification including advanced probe microphone techniques, single and multi-channel compression systems, analog and digital signal processing, and current and emerging prescriptive and fitting verification methods. Fall. [3]

AUD 5346. Vestibular Sciences I. This course offers an in-depth approach to the basic assessment of the dizzy patient. Subject matter will include: where the vestibular system assessment falls in the audiology scope of practice, detailed anatomy and physiology of the peripheral and central vestibular, ocular motor, and postural control systems; bedside testing, introduction to both electrical and video techniques for recording the vestibulocerebellar reflex; case history and bedside assessment of the dizzy patient, and the technique and interpretation of video and electronystagmography. Students will be expected to conduct practices outside the classroom. Fall. [3]

AUD 5347. Vestibular Sciences II. This course will focus on the description of advanced assessment techniques including whole body, yaw axis sinusoidal harmonic acceleration testing and step testing, and techniques for the assessment of the ocular system including on and off-axis centrifugation, and both cervical and ocular vestibular evoked myogenic potentials. A module will be taught on the topic of peripheral and central disease and disorders affecting the vestibular system. Embedded in this module will be a section describing the multidimensional assessment of falls risk, disequilibrium of aging and the medical/surgical and non-medical management (i.e., vestibular rehabilitation) of vestibular system impairments. A final module will focus on how results of the vestibular test battery form predictable patterns. Students will be expected to conduct practices outside the classroom. Prerequisite: successful completion of Vestibular Sciences I. Summer. [3]

AUD 5353. Cochlear Implants. This course covers basic principles of electrical stimulation of neural tissue, cochlear implant design, as well as the history of cochlear implants. Further it will cover current issues in the medical, audiological, speech/language, and educational management of adults and children with cochlear implants -- emphasis on multidisciplinary team function. Prerequisite: AUD 5318. Spring. [3]

AUD 5361. Family-Centered Counseling and Interviewing. Examines the helping relationship in the clinical process, counseling theory relative to audiology practices, and principles and methods of effective clinical interviewing and counseling. Summer. [2]

AUD 5363. Hearing and Aging. A survey of major concepts in gerontology, including demographics, psychosocial aspects of aging, biology of aging, and clinical conditions of the older adult. Physiological changes within the aging auditory system, and clinical issues in audiological assessment and intervention with older hearing-impaired patients. Fall. [3]

Biochemistry

BCHM-GS 300. Introduction to Structural Biology. Introduction to methods to determine the three-dimensional structures of biological macromolecules and macromolecular complexes at or near atomic resolution. Techniques covered include X-ray crystallography, NMR, EPR, and fluorescence spectroscopies, cryo-electron microscopy, and computational modeling. Emphasis is placed on practical aspects of each technique and the range of applications for which each technique is applicable. The course is given during the first third of the semester, just preceding Biochemistry 303. SPRING. [1] Chazin, Egli, Lacy, Lang, Mchouarab, Ohi, Reiter, Sheehan.

BCHM-GS 301. Molecular Structure and Function. This course considers the use of biochemical methods to answer important questions of function in systems involving interacting species. Protein-protein, protein-ligand, protein-nucleic acid, and nucleic acid-nucleic acid interactions are considered. Multiple approaches discussed include mutagenesis, kinetic, chemical, spectroscopic, and in vitro selection methods. SPRING. [2] Armstrong, Egli, Guengerich, Sanders, Schey.

BCHM-GS 302. Advanced Biochemistry, Cell Biology, and Genetics. Advanced concepts in genetics, biochemistry, and cell biology will be reviewed using a combination of lectures and discussion sections based on published manuscripts. Prerequisite: IGP core course or consent of instructor. FALL. [3] Hibert, Cortez, Reiter, York.

BCHM-GS 323. Special Problems and Experimental Techniques. Opportunity to master advanced laboratory techniques while pursuing special problems under direction of individual members of the faculty in areas of their specialized interests. Admission to course, hours, and credit by arrangement. FALL, SPRING, SUMMER. [Variable credit: 1-6] Cortez and Staff.

BCHM-GS 325. Special Topics in Biochemistry. Introduction to current research through the biochemical literature. Given on an individual basis by arrangement. May be taken more than once, but not for more than 2 hours credit with a single adviser, nor for more than 4 hours total. May be taken concurrently with 323 with a different adviser. Prerequisite: consent of instructor. FALL, SPRING, SUMMER. [Variable credit: 1-2] Carter and Staff.

BCHM-GS 327. Scientific Communication. This course will develop skills required for effective oral and written scientific communication. Students will present research from the current literature and will be required to write an NIH formatted grant proposal to be critiqued by faculty assigned by the course director. Students not working for a degree in biochemistry must have the consent of the instructor to enroll. FALL. [2] Schey, Wagner.

BCHM-GS 336. Biochemical Toxicology and Carcinogenesis. (Also listed as Chemistry 336) Chemical and biological aspects of toxicology and carcinogenesis, including basic principles and mechanisms, metabolism and enzymology, cellular biology, chemistry of reactive intermediates, tissue-specific toxicity, and a survey of several classes of environmentally important compounds and drugs. Prerequisite: organic chemistry and general biochemistry. Three lectures per week. FALL. [3] Liebler, Armstrong, Guengerich, Marnett, Pietenpol, Porter, Stone.

BCHM-GS 337. Molecula...
for predicting the outcome of experiments, topics to be covered will include multidimensional NMR, scalar and dipolar couplings, chemical exchange, relaxation, resonance assignment strategies, and determination of 3D structures. Prerequisite: Biochemistry 300. FALL. [3] Chazin, Sanders, Voehler.

**BCHM-GS 349. Graduate Seminar in Molecular Biophysics.** (Also listed as CPB 349) Introduction to research areas of current interest through examination of key publications in the preceding year. The weekly meetings consist of open discussions of assigned readings led by multiple student teams. May be repeated for credit. SPRING. [1] Chazin.

**BCHM-GS 352. Analytical Proteomics.** Introduces analytical proteomics methods and approaches through lectures, directed readings, and group and individual data analysis exercises. Topics include (a) mass spectrometry instrumentation, (b) mass spectrometry approaches to protein and peptide analysis, (c) protein and peptide preparation and separation methods, (d) bioinformatics tools for identification of proteins from mass spectrometry data, (e) quantitative proteomics methods, (f) applications of proteomics in common experimental designs in biochemistry and cell biology, (g) applications to clinical studies. SPRING. [2] Liebler, Codreanu, Norris, Rose, Schey, Sibos, Tabb, Zhang, Zimmerman.

**BCHM-GS 369. Master’s Thesis Research.**

**BCHM-GS 379. Non-Candidate Research.** Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

**BCHM-GS 381. Molecular Foundations of Medicine.** Molecular Foundations of Medicine is designed to familiarize students with the cellular structures, biomolecules, and processes that constitute life, human health, and disease at the molecular level. The course employs an integrated approach to teach underlying principles of biochemistry, cell and tissue biology, and genetics with an emphasis on human systems and medical conditions. The inclusion of clinical correlation sessions, small groups, and laboratory sessions will further integrate and broaden course material and relate molecular processes to the study of human disease. Prerequisite: MSTP students only. FALL. [Variable credit: 1-6] Osheroff, George, Pettepher.

**BCHM-GS 382. Structure, Function, and Development.** Structure, Function, and Development is designed to provide students with the means to develop an effective understanding of the normal micro and macrosopic structure, function, and development of the human body. The course employs a coordinated, integrated approach to the presentation and learning of the disciplines of human gross anatomy, cell and tissue biology (histology), human development (embryology), and physiology in a context of clinical application. Prerequisite: MSTP students only. SPRING. [Variable credit: 1-3] Dalley, Strom, Pettepher.

**BCHM-GS 399. Ph.D. Dissertation Research.** [Variable credit: 0-12]

### Biological Sciences

**BSCI 230. Biological Clocks.** Study of innate mechanisms for measurement of time in living organisms. Emphasis on the functional significance and physiological basis of biological clocks in animals and humans. Topics include circadian rhythms, time-compensated celestial navigation, photo-periodism, and the role of biological clocks in human behavior. Prerequisite: 110b. [3]

**BSCI 234. Microbiology.** Microorganisms, including bacteria, viruses, and mobile genetic elements. The origins and universality of microbial life, modes of genome evolution, symbioses between microbes and animals, biotechnology, and human microbiome. Prerequisite: 110b. [3]

**BSCI 236. Parasitology.** Biology and epidemiology of eukaryotic parasites of medical and veterinary significance. Diagnosis, treatment, and control of parasitic protists, platyhelminthes, nematodes, and arthropods. Impact on global health. Prerequisite: 110b. [3]

**BSCI 237. Ecology Lab.** One three-hour laboratory and discussion period or field trip per week. Satisfies the AXLE lab course requirement when completed with 238. Prerequisite or Corequisite: 238. [1]

**BSCI 238. Ecology.** Population biology, evolutionary ecology, community structure, with emphasis on species interactions, including competition, predation, and symbiosis. Prerequisite: 110b. [3]

**BSCI 239. Behavioral Ecology.** Theoretical and empirical research on shaping the evolution of behavior. The role of behavior in population regulation, habitat selection and spacing, foraging behavior, predatory-prey interactions, sexual selection, evolution of mating systems, new approaches to animal communication, game theory. Prerequisite: 110b and 205. [3]

**BSCI 245. Biology of Cancer.** Application of cell biology, molecular biology, and genetics to the study of cancer. Tumorogenesis; cellular oncogenes; growth factor signaling; tumor suppressor genes; apoptosis; metastasis and invasion. Prerequisite: 110b. [3]

**BSCI 247. Molecular Evolution.** The theory of evolution at the molecular level. The evolution of DNA and RNA sequences, proteins, and genome structures will be studied using models from population genetics and comparative approaches. Molecular clocks, the evolution of gene regulation and globin genes, molecular phylogeny, and human evolution. Prerequisite: 210 and 205. [3]

**BSCI 254. Neurobiology of Behavior.** Nerve cell interactions in neuronal networks of the central nervous system of animals and their impact for regulating behavior. Sensory systems, sensory-motor integration, central processing of information, neuronal-hormonal interactions; and brain anatomy and organization in invertebrates and vertebrates. Prerequisite: 110b. [3]

**BSCI 256. Molecules of the Brain.** Molecules of neural wiring, involving cell identity, pathfinding, synaptogenesis. Molecules of nerve cell communication, with relationship to drugs of addiction and abuse. Molecules of nervous system plasticity, and the mechanistic bases of learning and memory. Relation of these mechanisms to causes of human neurological diseases. Prerequisite: 110b. [3]

**BSCI 265. Nucleic Acid Transactions.** Biochemistry of the expression, transmission, and maintenance of genetic information. DNA transcription, replication, recombination, and repair. Structural mechanisms and biological functions of DNA processing proteins. Offered on a graded basis only. Prerequisite: 220. [3]

**BSCI 266. Advanced Molecular Genetics.** Principles of classical and molecular genetic analysis: mutation and recombination, mapping, and the application of genetic methodology to the study of complex systems. Special emphasis on modern genomic approaches. Prerequisite: 210. [3]

**BSCI 270. Statistical Methods in Biology.** An introduction to statistical methods used in the analysis of biological experiments, including the application of computer software packages. Emphasis on testing of hypotheses and experimental design. Topics include descriptive statistics, analysis of variance, regression, correlation, contingency analysis, and the testing of methods for sampling natural populations. Prerequisite: 110b. [3]

**BSCI 272. Genome Science.** Aims and importance of the science. Retrieval of genome data from public databases; experimental and computational methods used in analysis of genome data and their annotation. Functional aspects of genomics, transcriptomics, and proteomics; use of phylogenetics and population genomics to infer evolutionary relationships and mechanisms of genome evolution. Prerequisites: 110b. [3]

**BSCI 290. Special Topics in Biological Sciences.** Topics vary. May be repeated for credit more than once by permission of the director of undergraduate studies. Students may enroll in more than one section of this course each semester. Prerequisite: 110b. [3]
BME 285. Foundations of Medical Imaging. Physics and engineering of image formation by different modalities used for medical applications. Concepts common to different imaging modalities and limits of physical phenomena. Mathematical concepts of image formation and analysis; techniques for recording images using ionizing radiation (including CT), ultrasound, magnetic resonance, and nuclear (including SPECT and PET). Methods of evaluating image quality. Prerequisite: PHYS 116b, 118b, Math 196. Credit offered for only one of BME 258 and PHYS 228. SPRING. [3]

BME 263. Signal Measurement and Analysis. Discrete time analysis of signals with deterministic and random properties and the effect of linear systems on these properties. Brief review of relevant topics in probability and statistics and introduction to random processes. Discrete Fourier transforms, harmonic and correlation analysis, and signal modeling. Implementation of these techniques on a computer is required. Corequisite: BME 260 or MATH 216. SPRING. [3]

BSCI 369. Master's Thesis Research. [0-12]

BSCI 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

BSCI 384. The Brain and Behavior. Brain and Behavior provides a basic understanding of the human central nervous system and human behavior. The format includes lectures, lab exercises, small-group discussions, and patient case presentations. Brain and Behavior integrates three areas of medical science: (1) neuroanatomy, physiology, and biochemistry; (2) psychopathology and systems neuroscience; and (3) pathology, pharmacology, and radiology. Prerequisites: MSTP students only. [1]

BSCI 385. Advanced Reading in Biological Sciences. Specialized topics under the guidance of a member of the department’s faculty. Open to qualified graduate students only. Admission to course by arrangement. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

BSCI 390. Special Topics and Advanced Techniques in Biological Sciences. Specialized laboratory experiments, open to a limited number of properly qualified students. Admission to course, hours, and credit by arrangement. May be repeated for credit more than once. Students may enroll in more than one section of this course each semester. [2-4]

BSCI 399. Ph.D. Dissertation Research. [0-12]

Biomedical Engineering

BME 251. Systems Physiology. An introduction to quantitative physiology from the engineering point of view. Descriptive physiology of several organ systems (nervous, musculoskeletal, cardiovascular, gastrointestinal). Mathematical modeling and computer simulation of organ systems and physiologic control mechanisms. Prerequisite: CS 103. Corequisite: BSCI 110A. FALL. [3]

output, organ perfusion, brain function, and receptor density. Prerequisite: BME 258 and CS 103 or equivalent. FALL. [3]

BME 300. Quantitative Methods in Biomedical Engineering. Mathematics, quantitative analysis, and computational methods for biomedical engineering applications. Topics include applied probability and statistics, signal analysis and experiment design, linear systems, Fourier transforms, and numerical modeling and analysis. FALL. [3]

BME 302C. Applied Physics for Biomedical Engineering (Part C). Applied physics essential for biomedical engineering. The third in a three-unit sequence consisting of BME 301A, BME 301B and BME 301C (5 weeks each). Continuum mechanics, viscoelastic models of tissue, constitutive relations for tissue and biological fluid mechanics with applications to biology, physiology and devices. FALL. [1]

BME 303B. Cellular and Molecular Biomedical Engineering (Part B). Techniques and applications of cellular and molecular biology in biomedical engineering. The second in a three-unit sequence consisting of BME 303A, BME 303B and BME 303C (5 weeks each). Biomaterial properties, interfacial phenomena in vivo, nonmaterial applications. SPRING. [1]

BME 303C. Cellular and Molecular Biomedical Engineering (Part C). Techniques and applications of cellular and molecular biology in biomedical engineering. The third in a three-unit sequence consisting of BME 303A, BME 303B and BME 303C (5 weeks each). Biomechanics, biomechanical analysis, diffusion and active transport, convection applications. SPRING. [1]

BME 304A. Measurement Methods for Biomedical Engineering (Part A). Instrumentation and imaging for quantitative measurements in biomedical applications. The first in a three-unit sequence consisting of BME 304A, BME 304B and BME 304C (5 weeks each). Biomedical instrumentation, signal processing, measurement of electrical signals in the body, light, mechanical and chemical sensors. SPRING. [1]

BME 304B. Measurement Methods for Biomedical Engineers (Part B). Instrumentation and imaging for quantitative measurements in biomedical applications. The second in a three-unit sequence consisting of BME 304A, BME 304B and BME 304C (5 weeks each). Image properties, non-invasive imaging modalities, image reconstruction from projections and Fourier-encoded data. SPRING. [1]

BME 304C. Measurement Methods for Biomedical Engineers (Part C). Instrumentation and imaging for quantitative measurements in biomedical applications. The third in a three-unit sequence consisting of BME 304A, BME 304B and BME 304C (5 weeks each). Contrast mechanisms, interactions of electromagnetic radiation and acoustic waves with tissues, factors affecting nuclear magnetic resonance signals, imaging contrast agents. SPRING. [1]

BME 305. Research and Professional Development in Biomedical Engineering. Database search strategies, interpreting engineering and scientific literature, communication skills, engineering design, proposal writing, preparation of engineering publications, technology transfer/intellectual property, engineering laboratory documentation, regulatory oversight, ethics, funding. SPRING. [3]

BME 313. Advanced Biomechanics. Application of advanced concepts in statics, dynamics, continuum mechanics, and strength of materials to biological systems. Topics include measurement of mechanical properties of biological materials; rheological properties of blood; mechanics of cells, bone, skeletal muscle, and soft tissue; normal and abnormal dynamics of human movement; mechanics of articular joint movement; pulmonary mechanics; cardiac mechanics; arterial mechanics; mechanics of veins and collapsible vessels; and mechanics of flow in the microcirculation. Prerequisite: BME 101, BME 210 or equivalent. [3]

BME 317. Physiological Transport Phenomena. The quantitative description of momentum transport (viscous flow) and mass transport (convection and diffusion) in living systems. Prerequisite: BME 210 or equivalent courses in fluid dynamics and mass transfer. SPRING. [3]

BME 319. Engineering Models of Cellular Phenomena. Application of engineering models to model and quantify aspects of cell physiology. Topics include receptor mediated cell processes, cell-cell signaling, cooperative barrier behavior, cell structural components, and cell motility. SPRING. [3] (Offered alternate years)

BME 320. Laser-Tissue Interaction and Therapeutic Use of Lasers. Optical and thermal aspects and models of the interaction between laser/ light and biological tissue as it is used for therapeutic applications in medicine and biology. Issues and objectives in therapeutic and surgical applications of lasers, overview of state-of-the-art topics and current research. FALL. [3]

BME 321. Optical Diagnosis: Principles and Applications. Applications of light and tissue optical properties for the diagnosis of tissue pathology. Basic scientific and engineering principles for developing techniques and devices that use light to probe cells and tissues. Recent applications of different optical diagnostic techniques. SPRING. [3]

BME 325. Physical Measurements on Biological Systems. A survey of the state-of-the-art in quantitative physical measurement techniques applied to cellular or molecular biology. Topics include the basis for generation, measurement, and control of the transmembrane potential; electrochemical instrumentation; optical spectroscopy and imaging; x-ray diffraction for determination of macromolecular structure; magnetic resonance spectroscopy and imaging. Prerequisite: PHYS 225. SPRING. [3]

BME 329. Advanced Computational Modeling and Analysis in Biomedical Engineering. Survey of current topics within biomedical modeling: biotransport, biomechanics, tumor and virus growth dynamics, model-based medical imaging techniques, etc. Mathematical development and analysis of biomedical simulations using advanced numerical techniques for the solution of ordinary and partial differential equations. Emphasis will be on graduate research related topics. SPRING. [3]

BME 330. Cancer Imaging. Applications of noninvasive, in vivo imaging (i.e., MRI, optical, CT, SPECT, PET, and ultrasound) to cancer biology. Emphasis on assessing the response of tumors to treatment using emerging and quantitative imaging techniques. Prerequisites: BME 258 or BME 302b/304b/304c or PHYS 228. SPRING. (Offered alternate years) [3]
BME 331. Neuroimaging. Applications of noninvasive imaging techniques including MRI, fMRI, optical, EEG, and PET to the study of neural systems. Emphasis on the human brain, with a focus on current scientific literature. Prerequisites: BME 258 or BME 302b/304b/304c or PHYS 228. FALL. (Offered alternate years) [3]

BME 375. Design of Medical Products, Processes, and Services. Medical design projects involving teams of graduate level engineering and management students. Projects are solicited from industry or universities and are undertaken from the initial phase of a design request to the end product, prototype, plan, or feasibility analysis. Prerequisite: BME 272 or equivalent. SPRING. [3]

BME 377. Advanced Quantitative and Functional Imaging. Analysis of non-invasive image data to assess tissue structure and function in the body. Modeling and parameter estimation based on medical imaging data. Measurements of tissue volume, fiber structure, blood flow, brain function, and receptor density. Prerequisite: BME 301b, c and BME 304b, c or equivalent. No credit for both BME 277 and 377. FALL. [3]

BME 378. Magnetic Resonance Imaging Methods. MR techniques to image tissue for clinical evaluation and research. RF pulses, k-space trajectories, chemical shift, motion, flow, and relaxation. Derivation of signal equations for pulse sequence design and analysis. Course includes hands-on experimental studies. Prerequisites: BME 304b,c or equivalent. SPRING. [3]

BME 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

BME 389. Master of Engineering Project.

BME 390. Independent Study in Biomedical Engineering. Study of advanced biomedical engineering topics not regularly offered in the curriculum. Consent of instructor is required. FALL, SPRING. [3]

BME 391. Biomedical Research Seminar. [1]

BME 392. Biomedical Research Seminar. [1]

BME 393. Biomedical Research Seminar. [1]

BME 394. Biomedical Research Seminar. [1]

BME 395A. Special Topics. Different topics taught as a-d graduate level. [1-3]

BME 395B. Special Topics. Different topics taught as a-d graduate level. [1-3]

BME 395C. Special Topics. Different topics taught as a-d graduate level. [1-3]

BME 395D. Special Topics. Different topics taught as a-d graduate level. [1-3]

Biomedical Informatics

BMIF 300. Foundations of Biomedical Informatics. This introductory course examines the unique characteristics of clinical and life science data and the methods for representation and transformation of health data, information, and knowledge to improve health care. Principles of information security and confidentiality are taught, along with functional components of information systems in clinical settings and the use of databases for outcome management. Through skill modules and weekly programming exercises, the course provides an introduction to methods underlying many biomedical informatics applications, including information retrieval, medical decision making, evaluation of evidence, and knowledge representation. The historical evaluation of the field of biomedical informatics is taught concurrently, using examples of landmark systems developed by pioneers in the field. FALL. [3] Johnson, Weinberg.

BMIF 310. Foundations of Bioinformatics. This survey course introduces students to the experimental context and implementation of key algorithms in bioinformatics. The class begins with a review of basic biochemistry and molecular biology. The group will then focus on algorithms for matching and aligning biological sequences, given the context of molecular evolution. The emphasis will move from comparing sequences to the systems developed to enable high-throughput DNA sequencing, genome assembly, and gene annotation. Gene products will be the next focus as students consider the algorithms supporting proteomic mass spectrometry and protein structure inference and prediction. The informatics associated with transcriptional microarrays for genome-wide association studies will follow. Finally, the class will examine biological networks, including genetic regulatory networks, gene ontologies, and data integration. Formal training in software development is helpful but not required. Students will write and present individual projects. Undergraduates need the permission of the instructor to enroll. FALL. [3] Tabb.

BMIF 311. Systems Biology. This survey course presents the student with the historical, conceptual, and technical foundations of systems biology as it relates to biomedical research using model systems as well as human disease. SPRING. [3] Levy.

BMIF 315. Methodological Foundations of Biomedical Informatics. This course will examine the scientific, ethical, and regulatory issues that are instrumental in solving challenging problems in biomedical informatics. The course will use lectures and projects directed by co-instructors and guest lecturers. SPRING. [3] D. Guse.

BMIF 316A. Scientific Communication. The course will enhance students' skills in written and oral scientific communication. An introductory segment covers categories of scientific writing, the peer review process, and ethical issues in research communication. Through a two-semester sequence, it provides direct, hands-on experience in writing papers, abstracts, and grant proposals; critiquing and copy editing; and preparing and giving presentations for scientific meetings. FALL, SPRING. [1-1] Aronsky, Miller.

BMIF 316B. Scientific Communication. This course will enhance students' skills in written and oral scientific communication. An introductory segment covers categories of scientific writing, the peer review process, and ethical issues in research communication. Through a two-semester sequence, it provides direct, hands-on experience in writing papers, abstracts, and grant proposals; critiquing and copy editing; and preparing and giving presentations for scientific meetings. FALL, SPRING. [1-1] Aronsky, Miller.

BMIF 317A. Student Journal Club and Research Colloquium. The class meets weekly and is a seminar course that involves two revolving formats: journal club presentations and student research in progress presentations. For Biomedical Informatics graduate students only, usually taken in the second year of the program. Fall [1] Denny, Jerome.

BMIF 317B. Student Journal Club and Research Colloquium. The class meets weekly and is a seminar course that involves two revolving formats: journal club presentations and student research in progress presentations. For Biomedical Informatics graduate students only, usually taken in the second year of the program. Spring [1] Denny, Jerome.

BMIF 318A. Research Rotation in Biomedical Informatics. Students will perform research under the direction of a faculty adviser. FALL. [1-1] Staff.

BMIF 318B. Research Rotation in Biomedical Informatics. Students will perform research under the direction of a faculty adviser, SPRING. [1-1] Staff.

BMIF 320. Healthcare System and Informatics. The purpose of this course is for students to understand the organizational world in which they will spend most of their professional lives. A better understanding will lead to strategies to build partnerships with physicians, researchers, hospitals, and academic organizations. In turn, better understanding will lead to working more closely as a team in planning future directions and implementing technological programs and changes. This course provides an overview of theoretical concepts as well as the practical tools for the student to understand and work effectively with two major topic areas: (1) understanding the health care environment; and (2) understanding organizational informatics, including the implementation of informatics systems and the concepts of
behavioral change management. Prerequisite: BMIF 300 is a required prerequisite to this course. SPRING. [3] Lorenzi.

BMIF 325. Epidemiology I.

BMIF 326. Biostatistics I.

BMIF 327. Clinical Trials.

BMIF 330. Machine Learning for Biomedicine. This course builds on the material covered in Methodological Foundations of Biomedical Informatics (BMIF 315) by introducing several additional machine learning concepts and algorithms with a focus on biomedical decision making and discovery. Even though biomedical applications and examples will be discussed, the methods have broad applicability in science and engineering. The following topics will be covered in this course (may be expanded or modified based on the background of the class participants): decision support systems, natural language processing and text mining, Bayesian networks, neural networks, decision trees, feature selection, SVM regression and unsupervised SVMs, hidden Markov models, Bayesian network learning, and causal discovery using Bayesian networks. Prerequisite: for Biomedical Informatics students, BMIF 315; for non-Biomedical Informatics students, a course in data structures or algorithm design and analysis, the ability to program in MATLAB version 6 or later, and basic concepts of machine learning and fundamental mathematical concepts needed in machine learning at the level covered in BMIF 315. SPRING. [3] Mani.

BMIF 340. Clinical Information Systems and Databases. This course builds on material covered in Methodological Foundations of Biomedical Informatics (BMIF 315) by introducing and developing concepts in distributed systems and network computing: OSI stack, protocols, TCP/IP, Sockets, and DNS; clinical database concepts: synchronization, concurrency, deadlock, full-text databases; distributed database services, including high-availability techniques; and architectural considerations in the design of clinical information systems. The VUMC clinical database architecture is used as a case study. Prerequisite: for Biomedical Informatics students, BMIF 315 or permission of instructor; for non-Biomedical Informatics students, coding ability in some standard procedural or object-oriented computer language, preferably PERL. FALL. [3] D. Giuse.

BMIF 360. Graduate Seminar on Biomedical Informatics Algorithms. Graduate-level topics in intermediate or advanced algorithms, data structures, and knowledge representations for biomedical informatics that are not covered in the M.S./Ph.D. core courses. Note: covered topics will be highly dependent on faculty and student interests and will change from year to year to reflect research advances and interests. Students must obtain instructor permission to enter the class. [1-3] [Not currently offered]

BMIF 370. Evaluation Methods in Biomedical Informatics. Students are introduced to health information technology evaluation, with exposure to study design, including sampling, appropriate use of controls; data collection, including human subjects research considerations; analysis, including testing for statistical significance, definitions of sensitivity and specificity, ROC plots; and reporting of results. Quantitative and qualitative methods will be covered, as well as methods and issues specific to health care settings. FALL. [3] Gadd, Peterson, Aronsky.

BMIF 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

BMIF 380. Data Privacy in Biomedicine. This course introduces students to concepts for evaluating and constructing technologies that protect personal privacy in data collected for primary care and biomedical research. Material in this course touches on topics in biomedical knowledge modeling, data mining, policy design, and law. Prerequisite: students are expected to be proficient in writing basic software programs, although no specific programming language is required. SPRING. [3] Malin.

BMIF 391. Special Topics Seminar in Biomedical Informatics. This course is designed for faculty to offer small groups of students a study course on a topic of mutual interest and concern in the faculty member’s area of expertise.

BMIF 395. Directed Research/Independent Study. Students will work under close supervision of a specific faculty member on an ongoing research problem. Depending on the specific project, students will learn aspects of study design, research methods, data collection and analysis, research manuscript writing, and human factors engineering. SPRING/FALL. [1-3] Staff.

Biomedical Sciences

IGP 299. Fundamentals of Biomedical Research. Overview of basic principles of biomedical research. Course will cover the fundamentals of biochemistry, cell biology, and genetics, the three main components of the fall semester Bioregulation course. SUMMER. [3-6] Chalkley.

IGP 300A. Bioregulation I. Fundamental aspects of the utilization of genetic material from DNA to RNA to protein. This includes macromolecular structure and function, cell biology, and the regulation of cell growth. FALL. [1-8] Patton and Staff.

IGP 300B. Bioregulation II. Fundamental aspects of cell-cell communication and information flow through multicellular organs and the overall regulation of these processes. Includes immunologic defense, endocrine signalling, neuroscience, and molecular aspects of disease. SPRING. [Variable credit: 1-6] Patton and Staff.

IGP 302. Techniques and Preparations. Eight-week modules conducting laboratory research on a project designed by a faculty preceptor. Includes technical instruction, critical data analysis, experimental design, and literature review. FALL, SPRING. [Variable credit: 1-6] Patton and Staff.

IGP 303. Responsible Conduct in Research. Formal lectures and small group discussions on a range of issues encountered in research activities. Included are responsibilities of the investigator and the university to the federal government; scientific misconduct, ethical use of animals in research; ethics of publication, lab management, and grant writing.

IGP 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

Biostatistics

BIOS 301. Introduction to Statistical Computing. This course is designed for students who seek to develop skills in statistical computing. Students will learn how to use R and STATA for data management, database querying, reporting generating, data presentation, and data tabulation and summarization. Topics will include organization and documentation of data, input and export of data sets, methods of cleaning data, tabulation and graphing of data, programming capabilities, and an introduction to simulations and bootstrapping. Students will also be introduced to LaTeX and Sweave for report writing. Students will also be briefly introduced to SAS and SQL programming. FALL. [2] Staff.

BIOS 311. Principles of Modern Biostatistics. This is the first in a two-course series designed for students who seek to develop skills in modern biostatistical reasoning and data analysis. Students learn the statistical principles that govern the analysis of data in the health sciences and biomedical research. Traditional probabilistic concepts and modern computational techniques will be integrated with applied examples from biomedical and health sciences. Statistical computing uses software packages STATA and R; prior familiarity with these packages is helpful but not required. Topics include: types of data, tabulation of data, methods of exploring and presenting data, graphing techniques (boxplots, q-q plots, histograms), indirect and direct standardization of rates, axioms of probability, probability distributions and their moments, properties of estimators, the Law of Large numbers, the Central Limit Theorem, theory of confidence intervals and hypothesis testing (one sample and two sample problems), paradigms of statistical inference (Frequentist, Bayesian, Likelihood), introduction to non-parametric techniques, bootstrapping and simulation, sample size calculations and basic
study design issues. One hour lab required; Students are required to take 311L concurrently. Prerequisite: Calculus I. FALL. [3] Staff.

BIOS 311L. Principles of Modern Biostatistics Lab. This is a discussion section/lab for Principles of Modern Biostatistics. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 311 concurrently. FALL. [1] Staff.

BIOS 312. Modern Regression Analysis. This is the second in a two-course series designed for students who seek to develop skills in modern biostatistical reasoning and data analysis. Students learn modern regression analysis and modeling building techniques from an applied perspective. Theoretical principles will be demonstrated with real-world examples from biomedical studies. This course requires substantial statistical computing in software packages STATA and R; familiarity with at least one of these packages is required. The course covers regression modeling for continuous outcomes, including simple linear regression, multiple linear regression, and analysis of variance with one-way, two-way, three-way, and analysis of covariance models. This is a brief introduction to models for binary outcomes (logistic models), ordinal outcomes (proportional odds models), count outcomes (Poisson/negative binomial models), and time to event outcomes (Kaplan-Meier curves, Cox proportional hazard modeling). Incorporated into the presentation of these models are subtopics such as regression diagnostics, nonparametric regression, splines, data reduction techniques, model validation, parametric bootstrapping, and a very brief introduction to methods for handling missing data. One hour lab required. Students are required to take 312L concurrently. Prerequisite: Biostatistics 311 or equivalent; familiarity with STATA and R software packages. SPRING. [3] Staff.

BIOS 312L. Modern Regression Analysis Lab. This is a discussion section/lab for Modern Regression Analysis. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 312 concurrently. SPRING. [1]

BIOS 321. Clinical Trials and Experimental Design. This course covers the statistical aspects of study designs, monitoring, and analysis. Emphasis is on studies of human subjects. I.e. clinical trials. Topics include: principles of measurement, selection of endpoints, bias, masking, randomization and balance, blocking, study designs, sample size projections, study conduct, interim monitoring of accumulating results, flexible and adaptive designs, sequential analysis, analysis principles, adjustment techniques, compliance, data and safety monitoring boards (DSMB), Institutional Review Boards (IRB), the ethics of animal and human subject experimentation, history of clinical trials, and the Belmont report.

BIOS 323. Applied Survival Analysis. This course provides an introduction to methods for time-to-event data with censoring mechanisms. Topics include: life tables, nonparametric approaches (e.g., Kaplan-Meier, log-rank), semi-parametric approaches (e.g., Cox model), parametric approaches (e.g., Weibull, gamma, frailty) competing Risks (introduce Poisson regression as connection to Cox model), and time-dependent covariates. Focus is on fitting the models and the relevance of those models for the biomedical application. [3] Chen

BIOS 323L. Applied Survival Analysis Lab. This is a discussion section/lab for Applied Survival Analysis. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 323 concurrently. [1] Fall

BIOS 330. Regression Modeling Strategies. The course presents strategies for, and a survey of current thinking on, building predictive models. Multivariable predictive modeling for a single response variable: using regression splines to relax linearity assumptions, perils of variable selection and over-fitting, where to spend degrees of freedom, shrinkage, imputation of missing data, data reduction, and interaction surfaces. Methods for graphically understanding models (e.g., using nomograms) and using resampling to estimate a model’s likely performance on new data. Statistical methods related to binary logistic models and ordinal logistic and survival models will be covered. Students will develop, validate, and graphically describe multivariable regression models. Prerequisite: BIOS 311 and 312 or permission [3] Spring, Harrell.

BIOS 341. Fundamentals of Probability, The first in a two-course series (341-342), Fundamentals of Probability introduces and explores the probabilistic framework underlying statistical theory. Students learn probability theory -- the formal language of uncertainty -- and its application to everyday statistical concepts and analysis methods. Students will validate analytical solutions and explore limit theorems using R software. This course covers probability axioms, probability and sample space, events and random variables, transformation of random variables, probability inequalities, independence, discrete and continuous distributions, expectations and variances, conditional expectation, moment generating functions, random vectors, convergence concepts (in probability, in law, almost surely), Central Limit Theorem, weak and strong Law of Large Numbers, extreme value distributions, order statistics.

BIOS 341L. Fundamentals of Probability Lab. This is a discussion section/lab for Fundamentals of Probability. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 341 concurrently.

BIOS 342. Contemporary Statistical Inference. The second in a two-course series (341-342), Contemporary Statistical Inference introduces and explores the fundamental inferential framework for parameter estimation, hypothesis testing, and interval estimation. Students learn classical methods of inference (hypothesis testing), and modes of inference (Frequentist, Bayesian and Likelihood approaches) and their surrounding controversies. Topics include: delta method, sufficiency, minimal sufficiency, exponential family, ancillarity, completeness, conditionality principle, Fisher’s Information, Cramer-Rao inequality, hypothesis testing (likelihood ratios test, most powerful test, optimality, Neyman-Pearson lemma, inversion of test statistics), Likelihood principle, Law of Likelihood, Bayesian posterior estimation, Interval estimation (confidence intervals, support intervals, credible intervals), basic asymptotic and large sample theory, maximum likelihood estimation, resampling techniques (e.g., bootstrap).

BIOS 342L. Contemporary Statistical Inference Lab. This is a discussion section/lab for Contemporary Statistical Inference. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take 342 concurrently.

BIOS 345L. Advanced Regression Analysis I Lab. This is a discussion section/lab for Advanced Regression Analysis. Students will review relevant theory and work on applications as a group. Computing solutions and extension will be emphasized. Students are required to take 345 concurrently. [1] Fall.

BIOS 346. Advanced Regression Analysis II (General Linear & Longitudinal Models). Second in a yearlong series, students are exposed to a theoretical framework for generalized linear and longitudinal models. Covers classical repeated measures models, random effect models, generalized estimating equations (GEEs), Hierarchical models, and transitional models for binary data, marginal vs. mixed effects models, model fitting, model checking, clustering, and implication for study design. Also includes discussion of missing data techniques, Bayesian and Likelihood methods for GLMs, and various fitting algorithms such as maximum likelihood and generalized least squares. Prerequisite: BIOS 345 [3] Spring, Schildcrout.

BIOS 346L. Advanced Regression Analysis II Lab. This is a discussion lab for Advanced Regression Analysis II. Students will review relevant theory and work on applications as a group. Computing solutions and extensions will be emphasized. Students are required to take BIOS 346 concurrently. FALL. [1] Schildcrout.
BIOS 351. Statistical Collaboration in Health Sciences I. First course of two on collaboration in statistical science. Students are exposed to a variety of problems that arise in collaborative arrangements. The course’s goal is to sharpen students’ consulting skills while exposing them to the application of advanced statistical techniques in routine health science applications. The importance of understanding and learning the science underlying collaborations will be emphasized. Students will role-play with real investigators, discuss real consulting projects that have gone awry, and face real-life problems such as opaque scientific direction, poor scientific formulation, lack of time, and ill-formulated messy data. Students will engage in several consulting projects that will involve the use of a wide range of biostatistics methods from design to analysis. Course content will also make use of departmental clinics that are run concurrently. [3] Davidson.

BIOS 352. Statistical Collaboration in Health Sciences II. Second course of a yearlong sequence in collaboration in statistical science. Students are exposed to a variety of problems that arise in collaborative arrangements. The course’s goal is to sharpen students’ consulting skills while exposing them to the application of advanced statistical techniques in routine health science applications. The importance of understanding and learning the science underlying collaborations will be emphasized. Students will role-play with real investigators, discuss real consulting projects that have gone awry, and face real-life problems such as opaque scientific direction, poor scientific formulation, lack of time, and ill-formulated messy data. Students will engage in several consulting projects that will involve the use of a wide range of biostatistics methods from design to analysis. Course content will also make use of departmental clinics that are run concurrently. Prerequisite: BIOS 351 FALL. [3] Davidson.

BIOS 361. Advanced Concepts in Probability and Real Analysis for Biostatisticians. To include characteristic functions, modes of convergence, uniform integrability, Brownian motion, classical limit theorems, Lp spaces, projections, sigma-algebras and RVs, martingales, random walks, Markov chains, probabilistic asymptotics. Emphasis on measure theory is minimal. Concepts are illustrated in biomedical applications whenever possible. [3]

BIOS 362. Advanced Statistical Inference. This course is an in-depth examination of modern inferential tools. Topics include High-order asymptotics, Edgeworth expansions, nonparametric statistics, quasi-likelihood and estimating equations theory, multivariate classification methods, re-sampling techniques, statistical learning, methods and theory of high-dimensional data, estimation-maximization (EM) algorithms, and Gibbs sampling. Concepts are illustrated in biomedical applications whenever possible. SPRING. [3] Li.

BIOS 369. Master’s Thesis Research. Master’s Thesis Research

BIOS 372. Bayesian Methods. This course covers the methodology and rationale for Bayesian methods and their applications. Statistical topics include the historical development of Bayesian method such as hierarchical models, Markov Chain Monte Carlo (MCMC) and related sampling methods, specification of priors, sensitivity analysis, model specification and selection. This course features applications of Bayesian methods to biomedical research. FALL. [3] Choi.

BIOS 379. Non-Candidate Research.

BIOS 393. Independent Study in Biostatistics. Designed to allow the student to explore and/or master advanced or specialized topics in Biostatistics under the guidance of faculty with relevant expertise. May be repeated.

Cancer Biology

CANB 320. Cancer and Development. A cross-listed CDB/CB graduate-level course that will examine relationships between cellular responses in normal tissue development and cancer. The goal of the course is to familiarize the students with major cellular pathways and responses that are regulated in normal embryonic and post-natal tissue development and how abnormal re-activation of these responses gives rise to malignant disease. SPRING. [3] deCaestecker.

CANB 325. Histology. Histology. (Also listed as Cell and Developmental Biology 325 and Cellular and Molecular Pathology 325) This course focuses on the organization of cells to form tissues and organs both in terms of structure and function. Our studies begin with a discussion of the basic tissue types that form all multicellular organisms. Lecture and microscopic laboratory formats will introduce students to epithelia, connective tissue, muscle, nerve, and lymphoid tissues. Students will examine histological preparations microscopically in laboratory during this phase of the course. Next, a discussion of the organization of tissues into functioning organs will be pursued. Here, we will focus on basic concepts in organ arrangement rather than memorizing various structures. Students will have significant input on which adult or developing organs are used as models of organ structure and function. Learning laboratory methods in the analysis of tissues and organs will run concurrently with didactic instruction. Students will be asked to choose specific tissues/organs (often directly related to their thesis work) that they will prepare for morphological analysis. Specifically, students will learn techniques in fixation, processing, sectioning, and microscopic analysis including morphometrics, immunofluorescence, histochrometry, and electron microscopy. SUMMER. [3]

CANB 340. Introduction to Cancer Biology. This is a didactic lecture series in which general concepts in cancer biology will be reviewed. Topics range from molecular biology of cancer (oncogene and tumor suppressors) to novel concepts such as cancer stem cells and therapeutic approaches. Prerequisite: IGP core course or consent of instructor. FALL. [2] Yull.

CANB 341. Cell Migration in Normal and Diseased States. This course is focused on molecular and cellular biological underpinnings of cell migration, with emphasis on cancer motility, invasion and metastasis. It is an in-depth analysis of three to four research areas in molecular and cellular biology. It is intended for graduate students with a strong foundation in experimental biology. Students in interdisciplinary fields such as engineering and mathematics are welcome (and encouraged) to take the course if they already have some background biological knowledge, however it is encouraged to discuss enrollment with the instructor first. This course will add options for graduate students interested in cancer metastasis and related biological processes (leukocyte motility, bone and tissue remodeling, embryonic development, etc.) taught by experts in each sub-discipline through lectures and discussions of papers from the current literature.

CANB 342. Advanced Concepts in Cancer Biology. Advanced concepts in cancer biology will be reviewed in depth using a combination of lectures and student-led discussion sessions based on current literature. This course is offered only in tandem with the Introduction to Cancer Biology course to be taken concurrently. Prerequisite: must be a Cancer Biology graduate student or have consent of instructor. FALL. [4] Fingleton.

CANB 344. Current Topics in Cancer Biology: Integrative Cancer Biology. This is a graduate-level course focusing on cancer as a complex biological system. The goal of the course is to provide the students with comprehensive and up-to-date knowledge about the dynamic and spatial interactions that exist among molecules in a cancer cell, between cancer cells and their “microenvironment,” and between the organism and its “macroenvironment.” This class will integrate multiple cutting-edge research approaches from several disciplines, including cancer biology, proteomics and bioinformatics, functional imaging, mathematical modeling and bioengineering, and epidemiology. Class will include both presentations by the instructors and discussion of recent publications by students. SPRING. [2]

computer science in a multidisciplinary approach to the systematic analysis and modeling of complex biological phenomena, such as cancer. It is designed for students with an interest in interdisciplinary training and research in the area of computational and systems biology. This course will provide an overview of systems biology approaches and tools; it will familiarize the students with simple mathematical models for cell proliferation, motility and metabolism. It will also provide an introduction to computational biology with a special emphasis on biological networks, including: construction of gene or signaling networks using literature-based knowledge and existing databases, basics of graph theory, visualization and analysis of networks from high-throughput data. There will be a strong focus on hands-on training of system biology tools and their application to designing experiments and interpreting results in a modern cancer research laboratory.

CANB 351. Teaching Assistantship in Cancer Biology Curriculum. Enrollment in the course will act as teaching assistants for one of the Cancer Biology courses (340 or 342 in Fall; 347 or 384 in spring) with a maximum of 16 hours of work per week. All enrollment is required to participate in a monthly journal club for that semester devoted to teaching methods and to work with course directors on evaluations. Prerequisites: CANB 340 and CANB 342, Ph.D. candidacy. [1] Fingleton.

CANB 352A. Biophysical Models of Cancer. The study of biophysical modeling in cancer biology, including models of DNA damage, avascular tumor growth, tumor cell motion and invasion, angiogenesis, transport within tumors, and therapy response. Prerequisites: MATH 196 or MATH 198/208, one year calculus-based physics, or consent of instructor.

CANB 359. Ph.D. Dissertation Research. This lecture course will introduce students to issues that are regulated in normal embryonic and post-natal tissue development as well as alterations associated with disease. Two one-and-a-half-hour sessions per week, one-semester course; paper presentation and discussion within the class. Prerequisite: MSTP students only. [Variable credit: 0-12]

CANB 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

CANB 382. Structure, Function, and Development. Structure, Function, and Development is designed to provide students with the means to develop an effective understanding of the normal micro and macroscopic structure, function, and development of the human body. The course employs a coordinated, integrated approach to the presentation and learning of the disciplines of human gross anatomy, cell and tissue biology (histology), human development (embryology), and physiology in a context of clinical application. Prerequisite: MSTP students only. FALL. [1] Osheoff, George, Pettepher.

CANB 383. Disease, Diagnoses, and Therapeutics. The objectives of this course are to teach the pathogenesis and manifestations of disease and to introduce the fundamentals of diagnosis and pharmacologic as well as nonpharmacologic therapy. Diseases, their recognition, and treatment are presented in a systems-based format using an interdisciplinary approach to allow integration of pathology, clinical diagnosis, and therapy in a comprehensive manner. Principles of pharmacologic therapy are presented in the context of relevant pathophysiology and how humans react to drug therapies. The course utilizes a variety of teaching modalities that include lectures, laboratory sessions focused on the gross and microscopic pathology of disease, and technology-based modalities that include computer-based lessons, as well as formats that promote critical thinking. The role of nutrition in disease prevention and management is also emphasized. The impact of disease and its treatment on public health and society as well as strategies for prevention are explored. Prerequisite: MSTP students only. SPRING. [Variable credit: 1-4] Atkinson, Murray, Awad.

CANB 384. Clinical and Molecular Based Approaches to the Diagnosis and Treatment of Cancer. This course will provide a unique experience in Oncology where students will learn the risk factors for and signaling pathways that are often deregulated in melanoma, breast cancer, and lung cancer. Furthermore, student will be expose to cancer screening and diagnostic methodologies. Students will also discover how molecular changes are detected in the lab and leveraged in the clinic for optimal patient care. In addition, the advantages and barriers of clinical trials, socio-economic disparities, and ethical dilemmas will be presented. Although this course will focus on melanoma, breast cancer, and lung cancer, students will demonstrate an ability to apply their knowledge of tumor diagnosis and targeted inhibition to other tumor types through a group project. Prerequisite: CANB 340. [2] Dahman.

Cell and Developmental Biology

CBIO-GS 310. Cell Biology. This is a graduate-level course with three major goals pivotal for success as a graduate student: (1) To provide solid foundational knowledge of cell biology, (2) To learn to think critically about experimental design and interpretation, (3) To learn to communicate effectively, both orally and in writing. The class features faculty from the Department of Cell and Developmental Biology and emphasizes fundamental cell processes such as migration, mitosis, proliferation, and death. Critical signaling pathways are reviewed in relation to cell biological processes essential for developmental biology. Weekly student presentations help develop oral communication skills and weekly writing assignments hone writing skills, helping students learn classical and cutting-edge techniques while improving their ability to read and synthesize the literature. Final paper assignment is designed to help students learn to develop and design feasible experiments to test a strong hypothesis. Prerequisite: IGP curriculum, the entire Bioregulation class.

CBIO-GS 312. Introduction to Developmental Biology. This combined lecture and laboratory course will present students with the basics in the analysis of standard animal models used in modern developmental biology. Central concepts in development will be presented in lecture while the student will gain “hands on” training in the growth and care of embryos and analysis of embryonic development in model organisms. Standard methods of analysis (e.g. basic microscopy/morphological analysis, immunolabeling, time-lapse imaging, embryo microinjection) will be presented. Prerequisite: IGP Curriculum. Tuesday/Thursday; Summer Session. [3] Bader, Jessen.

CBIO-GS 313. Introduction to Modern Biological Microscopy. This lecture course will introduce students to modern microscopy and its biological applications. Topics will include diverse methods of light and electron microscopy, the basic principles of each method, details of specific instrumentation, historical background, advantages and restrictions, as well as applicability to various model systems and organisms. Sample preparation, technical hurdles, tricks of live imaging, micro- and nanomanipulation, quantitative image analysis and other issues will be addressed. The course will also include a tour of microscopy facilities available at Vanderbilt. SPRING. [2] Tyska/Kaverina

CBIO-GS 314. Basic Biological Microscopy. This lecture course will present students with an introduction to microscopy and its applications to biology. Lectures will cover basic principles of light and optics, transmitted light microscopy, fluorescence microscopy, digital image acquisition and the “do’s and don’ts” of digital image processing. Fixed sample preparation and basic live cell imaging will also be covered.

CBIO-GS 320. Cancer and Development. (Also listed as CANB 320) Graduate-level course that will examine relationships between cellular responses in normal tissue development and cancer. The goal of the course is to familiarize the students with major cellular pathways and responses that are regulated in normal embryonic and post-natal tissue development and how abnormal re-activation of these responses gives rise to malignant disease. Offered every other year. SPRING. [3] deCaestecker.

CBIO-GS 324. Epithelial Pathobiology. To introduce students to issues of polarized epithelial cell function in the context of normal physiology as well as alterations associated with disease. Two one-and-a-half-hour sessions per week, one-semester course; paper presentation and discussion on Wednesday, lecture on Friday by visiting scientists. During the course, five visiting scientists from outside Vanderbilt will present special topics
CBIO-GS 325. Histology. (Also listed as Cancer Biology 325) This course focuses on the organization of cells to form tissues and organs both in terms of structure and function. Our studies begin with a discussion of the basic tissue types that form all multicellular organisms. Lecture and microscopic laboratory formats will introduce students to epithelial, connective tissue, muscle, nerve, and lymphoid tissues. Students will examine histological preparations microscopically in laboratory during this phase of the course. Next, a discussion of the organization of tissues into functioning organs will be pursued. Here, we will focus on basic concepts in organ arrangement rather than memorizing various structures. Students will have significant input on which adult or developing organs are used as models of organ structure and function. Learning laboratory methods in the analysis of tissues and organs will run concurrently with didactic instruction. Students will be asked to choose specific tissues/organisms (often directly related to their thesis work) that they will prepare for morphological analysis. Specifically, students will learn methods in fixation, processing, sectioning, and microscopic analysis including morphometrics, immunofluorescence, histochemistry, and electron microscopy. Offered every other year. FALL. [3] Bader.

CBIO-GS 330. Seminar in Cell and Developmental Biology. The goal of the course is for graduate students to learn about two cutting-edge areas of research in cell and developmental biology. Each area will be presented by four outside speakers (eight dates total). The week before each seminar, the student will read and discuss, facilitated by a faculty member, a paper authored by the next week’s speaker and prepare written critiques. The students will attend the seminar followed by a discussion section with the speaker. FALL, SPRING. [1] L. Lee (fall); [2] Gu (spring).

CBIO-GS 331. Current Topics in Developmental Biology. This course is offered in both the fall and spring semesters and meets once per week to hear a graduate student, postdoctoral fellow, or faculty member discuss a research paper from outside his or her field of research, followed by an audience Q&A session. Students taking this course are paired with a PI mentor and together choose a topical scientific paper that the trainee presents at the end of the semester. FALL, SPRING. [1] Wright.

CBIO-GS 333. Reproductive Biology. A multidisciplinary approach to the study of reproductive biology. Topics covered center on cutting-edge research advances in modern reproductive biology, including: specification of germ cells; cell signaling and the germ line; gonadogenesis and sex determination; meiosis; X-inactivation; germ cell stem cells; spermatogenesis; oogenesis; fertilization; and implantation. The format will consist of a combination of lectures, faculty-led discussions, and faculty-mentored student presentations. Offered every other year. [3] (Not currently offered)

CBIO-GS 335. Special Topics in Neuroscience. (Also listed as Neuroscience 335 and Psychology 335) Basic issues in neuroscience. Possible topics include neural development, neural plasticity, regeneration, organization and function of cortex, sensory systems, motor systems, and research methodology in neuroscience. A new topic is considered each semester. Prerequisite: 323 or equivalent course, or permission of instructor. [2] (Not currently offered)

CBIO-GS 337. Molecular Aspects of Cancer Research. (Also listed as Biochemistry 337) A focused series of seminars and discussions to explore the molecular basis of cancer. Seminars rely heavily on extramural speakers with recognized expertise in selected research areas. Students meet with the speaker immediately following each seminar. Discussion sections led by a faculty member follow each series of three to four seminars. SPRING. [1] Hiebert (Biochemistry).

CBIO-GS 338. Special Topics Cell Biology. This course is intended to give first-year IGPs a personal perspective on the careers of exceptional cell and developmental biology researchers. Each session will focus on Nobel Prize or Lasker Award winners in Physiology or Medicine that have impacted cell and developmental biology fields. A faculty member with training or interest ties to the researcher will present and lead a discussion on the research topic and the history of the researcher’s career. In preparation for each session, the students will research the information at or linked to the award Web sites. For each session, the students will be given a key paper(s) of the winner (or the winner’s acceptance speech, or biographical articles, etc. at the discretion of the faculty member). During the class-time interactions with the faculty member, the students will incorporate their perspectives on what they found interesting about the winner’s history. For the last wrap-up session, each student will pick an award winner, who has not been discussed, and prepare a 15-minute presentation about that person. Prerequisite: Must be first year IG P student. [1] Gould.

CBIO-GS 339. Research Seminar in Cell Biology. Students and postdoctoral fellows present their research projects in an informal atmosphere. Students are critiqued on presentations.

CBIO-GS 340. Special Problems and Experimental Techniques. Designed to allow the student an opportunity to master advanced techniques in cell biology while pursuing special projects under individual members of the faculty in their areas of expertise. Admission to course, hours, and credit by arrangement. [Variable credit: 1-6] (Not currently offered)

CBIO-GS 341. Molecular Developmental Biology. This course comprises three cutting-edge areas of developmental biology per year. The aim of this course is to provide the student with a comprehensive and up-to-date understanding of fundamental issues in modern developmental biology. Faculty didactic lectures provide essential background to facilitate critical reading and discussions of the recent scientific literature. This course is modular, with each module (approximately one month) corresponding to a single thematic topic. Students meet with external lecturers. Topics to be selected. Offered every other year. SPRING. [Variable credit: 1-3] Wright.

CBIO-GS 342. Advanced Developmental Biology: Vertebrate Organogenesis. (Also listed as Biological Sciences 342) Cellular and molecular regulation of the morphogenetic processes that shape vertebrate tissues and organs. Emphasis on development of digestive, respiratory, hematopoietic, cardiovascular, urogenital, sensory and nervous systems. Where appropriate, correlation to invertebrate development and reference to evolutionary changes in organ structure and function. [3] (Not currently offered)

CBIO-GS 345. Cellular and Molecular Neuroscience. (Also listed as Molecular Physiology and Biophysics 345, Neuroscience 345, Pharmacology 345) This course is a required entry-level course for students in the Cell and Molecular Track of the Neuroscience Graduate Program at Vanderbilt that should be taken in the first graduate school year. It also serves as an elective for medical students and graduate students in a number of other programs. Its goal is to expose students to fundamental concepts and techniques in molecular and cellular neuroscience and provide a theoretical context for experimental analysis of brain function and disease. The course is divided into three modules. Module I: Cellular and Developmental Neurobiology provides an overview of the anatomy of the nervous system and neurotransmitters and examines concepts in neural pattern formation, neuronal migration, axon guidance, and synapse formation. Module II: Signaling, Plasticity, and Modulation reviews biophysical and molecular concepts relating to neuronal membrane excitability, secretion, and plasticity. Module III: Neural Diseases and Disease Models focuses on specific brain disorders such as epilepsy, pain disorders, Alzheimer's disease, depression, and schizophrenia and current models used to investigate their origin and/or treatment. This course combines faculty lecture with discussion of original articles, with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Faculty and assistants guide students through important research paradigms with a critical analysis of the primary literature in the topic area. Prerequisite: Bioregulation I (IGP 300A) or consent of instructor. Course directors may consider undergraduate course work in cell biology or biochemistry to meet this requirement. SPRING. [4] Currie, Carter, and Staff.

CBIO-GS 347. The Visual System. (Also listed as Neuroscience 347, Psychology 336) An interdisciplinary approach to how humans see and interpret their visual environment. Topics include the structure of the eye and brain (including optic), the physiology of individual cells and groups of cells, machine vision and models of visual function, visual attention, and mechanisms of complex visual perception. Lectures by faculty from Psychology and Cell and Developmental Biology. Graduate students attend one hour discussion section per week in addition to lecture, and turn in a more extensive paper than undergraduates. SPRING. [3] Roe.

CBIO-GS 349. Genetics of Model Organisms. (Also listed as Human Genetics 349, Molecular Physiology and Biophysics 349) Basic genetic
principles across a broad range of organisms (yeast, C. elegans, Droso phila melanogaster, plants, mouse, zebrafish) that are used in genetic analyses to investigate molecular pathways of interest for human disease will be presented. This course will provide students with in-depth terminology and understanding of the advantages, applications, and approaches specific to each organism. Genomic and bioinformatics tools that facilitate genetic analysis in each species will be emphasized. Specific examples of how each modell organism has successfully contributed to elucidation of a human disease gene, pathway, or genetic principle will be presented. Course combines faculty lectures with student presentation and discussion of original articles to emphasize the uniqueness of each model system. Prerequisite: one statistics course at the upper undergraduate level or higher and Fundamentals of Genetic Analysis (MPB 385), or permission of instructor. Offered every other year. SPRING. [3] Southard-Smith and Staff.

CBIO-GS 350. Cell Microbiology of the Pathogen-Host Interaction. (Also listed as Microbiology and Immunology 350) An interdisciplinary course designed to train students at the interface of molecular microbiology and cell biology. Students will be challenged to utilize new information from microbial genome sequencing to understand host cell subcellular compartments and signaling pathways. Prerequisite: A solid background at the graduate or undergraduate level in natural science curriculum, for example, molecular cell biology, microbiology, and immunology. SPRING. [3] Joyce, Skaar. (Not currently offered)

CBIO-GS 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

CBIO-GS 381. Molecular Foundations of Medicine. Molecular Foundations of Medicine is designed to familiarize students with the cellular structures, biomolecules, and processes that constitute life, human health, and disease at the molecular level. The course employs an integrated approach to teach underlying principles of biochemistry, cell and tissue biology, and genetics with an emphasis on human systems and medical conditions. The inclusion of clinical correlation sessions, small groups, and laboratory sessions will further integrate and broaden course material and relate molecular processes to the study of human disease. Prerequisite: MISTP students only. FALL. [Variable credit: 1-5] Osheroff, George, Pettipher.

CBIO-GS 382. Structure, Function and Development. Structure, Function, and Development is designed to provide students with the means to develop an effective understanding of the normal micro and macroscopic structure, function, and development of the human body. The course employs a coordinated, integrated approach to the presentation and learning of the disciplines of human gross anatomy, cell and tissue biology (histology), human development (embryology), and physiology in a context of clinical application. Prerequisite: MISTP students only. SPRING. [Variable credit: 1-10] Dalley, Strom, Pettipher.

Cellular and Molecular Pathology

PATH-GS 322. Experimental Methods in Pathology. Special techniques and preparations. Topics include electron microscopy, tissue culture, histochemistry, cytochemistry, and molecular biology. Admission to course, hours, and credit by arrangement. FALL, SPRING, SUMMER. [1-4]

PATH-GS 325. Histology. (Also listed as Cancer Biology 325 and Cell and Developmental Biology 325) This course focuses on the organization of cells to form tissues and organs both in terms of structure and function. Our studies begin with a discussion of the basic tissue types that form all multicellular organisms. Lecture and microscopic laboratory formats will introduce students to epithelia, connective tissue, muscle, nerve, and lymphoid tissues. Students will examine histological preparations microscopically in laboratory during this phase of the course. Next, a discussion of the organization of tissues into functioning organs will be pursued. Here, we will focus on basic concepts in organ arrangement rather than memorizing various structures. Students will have significant input on which adult or developing organs are used as models of organ structure and function. Learning laboratory methods in the analysis of tissues and organs will run concurrently with didactic instruction. Students will be asked to choose specific tissues/organs (often directly related to their thesis work) that they will prepare for morphological analysis. Specifically, students will learn methods in fixation, processing, sectioning, and microscopic analysis including morphometrics, immunofluorescence, histochemistry, and electron microscopy. SUMMER. [3] Bader.

PATH-GS 329. Lipoprotein Metabolism. Lectures, discussions, and assigned readings in the metabolism of plasma lipoproteins. Topics include the composition and structure of plasma lipoproteins; lipoprotein biosynthesis and assembly; enzyme, exchange proteins, and receptors involved in lipoprotein catabolism; and disorders of lipid metabolism. Presentation of oral reports is required. Prerequisite: an introductory course in biochemistry. Minimum enrollment six students. SPRING. [2] Swift.

PATH-GS 331. Seminar in Experimental Pathology. Students and faculty participate in a weekly discussion of current research projects and literature. FALL. [1] Hoover and Staff.

PATH-GS 333. Fundamentals of Scientific Communication. Focuses on development and enhancement of skills in written and oral scientific communication, and critical thinking in scientific problem solving. Lectures, student projects, presentations, and class discussions emphasizing manuscript and research grant proposal writing, poster and oral presentations. SPRING. [3] Bock, Hoover, and Staff.

PATH-GS 335. Molecular Pathology of Extracellular Matrix. Lectures on the structure, biology, metabolism, and regulation of the collagens, structural glycoproteins, proteoglycans, and elastin. The role of these molecules in maintaining normal tissue integrity and function and in development and wound healing is emphasized, as is the molecular basis for the involvement of these proteins in both inherited and acquired diseases (e.g., atherosclerosis, diabetes, and cancer). Prerequisite: biochemistry and/or cell biology. SPRING. [2] Davidson, Sephen, and Staff.

PATH-GS 337. Cellular and Molecular Basis of Vascular Disease. Lectures on contemporary research in cell biology, protein and lipid biochemistry, and molecular biology of the vascular system. Open to graduate and medical students, postdoctoral fellows, and undergraduate students with consent of instructors and the Graduate School. Prerequisite: a suitable background in biochemistry and cell biology. FALL. [3] Bock, Hoover.

PATH-GS 339. Topics in Pathobiology Methods: Student Teaching Experience. This is a dynamic course focused on topics in pathobiology with an emphasis on methodology and teaching. The course meets for 1.5 hours weekly to review a specific method in pathobiology and its evolution. For those interested, participation in the course provides an opportunity for the student to gain teaching experience in a supervised setting (optional). Students will pick a topic from an existing list of focus topics. Students will be responsible of constructing an in-depth, expert lecture on the selected topic and presenting this to the class body in a 45 minute presentation. Each session will be 50% didactic lecture (by the student) and 50% dialog including question/answer and discussion. Students attending the lecture will bring two questions as their contribution to the discussion. Grading will be based on the lecture presentation of each student and will encompass the physical presentation (quality of the material, organization, and relevance), oral presentation (depth, clarity, timing), and management of the discussion.

PATH-GS 351A. Cellular and Molecular Basis of Disease. An introduction to human disease and the accompanying changes in normal structure and function. The course consists of modules focused on a physiologic system and its related diseases. Each module includes a review of normal anatomy and physiology and the pathological changes occurring with the disease, an in-depth discussion of the molecular and cellular mechanisms of the disease along with clinical correlates, as well as a discussion of high-profile papers relevant to the disease. 351a (Spring) and 351b (Fall) are offered as a series, but they can be taken in any order. Prerequisite: basic knowledge of biochemistry, cell, and molecular biology. [3-3] Abdulkadir, Sephen, and Staff.

PATH-GS 351B. Cellular and Molecular Basis of Disease. An introduction to human disease and the accompanying changes in normal structure
and function. The course consists of modules focused on a physiologic system and its related diseases. Each module includes a review of normal anatomy and physiology and the pathological changes occurring with the disease, an in-depth discussion of the molecular and cellular mechanisms of the disease along with clinical correlates, as well as a discussion of high-profile papers relevant to the disease. 351a (Spring) and 351b (Fall) are offered as a series, but they can be taken in any order. Prerequisite: basic knowledge of biochemistry, cell, and molecular biology. [3-3] Abdulkadir, Sephel, and Staff.

PATH-GS 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

PATH-GS 383. Disease, Diagnoses, and Therapeutics. The objectives of this course are to teach the pathogenesis and manifestations of disease and to introduce the fundamentals of diagnosis and pharmacologic as well as nonpharmacologic therapy. Diseases, their recognition, and treatment are presented in a systems-based format using an interdisciplinary approach to allow integration of pathobiology, clinical diagnosis, and therapy in a comprehensive manner. Principles of pharmacologic therapy are presented in the context of relevant pathophysiology and how humans react to drug therapies. The course utilizes a variety of teaching modalities that include lectures, laboratory sessions focused on the gross and microscopic pathology of disease, and technology-based modalities that include computer-based lessons, as well as formats that promote critical thinking. The role of nutrition in disease prevention and management is also emphasized. The impact of disease and its treatment on public health and society as well as strategies for prevention are explored. Prerequisite: MSTP students only. SPRING. [Variable credit: 1-10] Atkinson, Murray, Awad.

Chemical and Biomolecular Engineering

CHBE 223. Phase Equilibria and Stage-Based Separations. Thermodynamic principles and calculations of mixture phase equilibrium. Development of correlations to design chemical separation processes. Applications to separation processes involving gases, liquids, and solids such as distillation, adsorption, and extraction. Simulation of separation processes. Prerequisite: CHBE 162, CHBE 180. FALL. [3]

CHBE 225. Chemical Reaction Engineering. Thermodynamic basis of chemical equilibrium. Analysis of chemical kinetic data and application to the design of chemical reactors. Batch, semibatch, and flow reactors are considered in both steady-state and transient operation. Brief treatments of catalysis and physical and chemical adsorption. Prerequisite: CHEM 218A or 220A; CHBE 223. SPRING. [3]

CHBE 231. Mass Transfer and Rate-Based Separations. Principles of mass transfer and their application to the analysis of chemical and biological engineering systems. Design of rate-based separation operations. Prerequisite: CHBE 230. SPRING. [3]

CHBE 280. Atmospheric Pollution. Fundamentals of atmospheric pollution and control. The sources and nature of gaseous and particulate air pollutants, the relation of meteorological conditions to their dispersal, and their effects on health and materials are discussed along with administration, standards, and control of air pollution. Prerequisite: junior standing. SPRING. [3]

CHBE 283. Bioprocess Engineering. Application of cellular and molecular biology to process engineering to describe the manufacture of products derived from cell cultures. Design and scale-up of bioreactors and separation equipment. Metabolic and protein engineering utilizing genetically engineered organisms. Prerequisite: BSCI 110A or CHBE 220; CHBE 225, CHBE 230. FALL. [3]

CHBE 284. Semiconductor Materials Processing. Introduction to the materials processing unit operations of silicon device manufacturing. Topics include basic semiconductor physics and device theory, production of substrates, dopant diffusion, ion implantation, thermal oxidation and deposition processes, plasma deposition processes, photolithography, wet chemical and plasma etching, and analytical techniques. FALL. [3]

CHBE 285. Molecular Simulation. Introduction to the modern tools of statistical mechanics, such as Monte Carlo and molecular dynamics simulation, and variations. Understanding the methods, capabilities, and limitations of molecular simulation and applications to simple and complex fluids relevant to the chemical and related processing industries. Prerequisite: CHBE 223, CHEM 230. [3]

CHBE 286. Molecular Aspects of Chemical Engineering. Integration of molecular chemistry, property-based thermodynamic descriptions, and a focus on intermolecular energetics for process analysis and product design. Case studies involve molecular, macromolecular, supramolecular, and biomolecular systems. Prerequisite: CHEM 218A or 220A; CHBE 162. [3]

CHBE 287. Polymer Science and Engineering. Macromolecular systems with emphasis on the interrelationship of chemical, physical, and engineering properties. Further relation of these properties to synthesis. Physicalchemical and biological applications. Prerequisite: CHBE 162, a basic understanding of organic and physical chemistry. [3]

CHBE 288. Corrosion Science and Engineering. Aqueous-phase metal and alloy corrosion phenomena. Fundamental chemistry and electrochemistry theories, as applied to corroding systems. Specific forms of corrosion including pitting, crevice corrosion, and galvanic corrosion. Methods for corrosion control based on electrochemical fundamentals. Prerequisite: CHBE 230 or graduate standing. SPRING [3]

CHBE 290. Special Topics. [Variable credit: 1-3 each semester]

CHBE 311. Advanced Chemical Engineering Thermodynamics. Application of the thermodynamics method to chemical engineering problems. Development of the first, second, and third laws of thermodynamics; estimation and correlation of thermodynamic properties; chemical and phase equilibria; irreversible thermodynamics. FALL. [3]

CHBE 312. Transport Phenomena. The theory of non-equilibrium processes. Development of the analogy between momentum, energy, and mass transport with applications to common engineering problems. SPRING. [3]

CHBE 315. Systems Analysis for Process Design and Control. The design and control of chemical process plants, including economic optimization under steady state and transient conditions. [3]

CHBE 320. Surfaces and Adsorption. Surface energy, capillarity, contact angles and wetting, surface films, insoluble monolayers, solid surfaces, membranes, surface area determination, adsorption, adhesion, interface thermodynamics, friction and lubrication, interface in composites, relationships of surface to bulk properties of materials. FALL. [3]
Chemical and Physical Biology

CPBP 306. Introduction to Chemical and Physical Biology. This course is designed to provide a basic overview of modern molecular and cellular biology, with particular emphasis on physical and quantitative approaches that are currently being used to address important questions in these fields. Topics covered include DNA, RNA, protein structure and function, protein machines, membrane structure and function, membrane proteins and signaling, cellular structure and function, metabolism, and cell cycle. [1]

CPBP 307. Advanced Membrane Protein Biology. This course’s objective is to provide an in-depth understanding of the role of membrane proteins in biology and medicine. Every year the module will focus on a different class of membrane proteins, channel, receptors or transporters. The selected course material will follow the evolution of our understanding of these molecules by focusing on a representative of each class and emphasizing the transdisciplinary nature of scientific advances. [1]

CPBP 308. Protein-Protein Interactions. Essentially all cellular functions depend on appropriately specific and dynamically modulated interactions of multiple proteins. This course is intended to provide students with a cohesive and comprehensive overview of current qualitative and quantitative methodology used in this field, and the application of these techniques to provide novel insights into disparate cellular functions/systems. [1]

CPBP 310. Graduate Seminar in Chemical Biology. [1]

CPBP 320. Foundations in Chemical Biology. A series of overviews and in-depth case studies will demonstrate the breadth of chemical biology and the importance of this emerging field in advancing biological sciences. [1]

CPBP 324. Tutorials in Chemical & Physical Biology. Each student will write, present, and defend a short research proposal based on their research area. This exercise will prepare the students for their candidacy exams. [1]

CPBP 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. FALL, SPRING, SUMMER. [0-12]

CPBP 384. The Brain and Behavior. The Brain and Behavior.

CHEM 312. Electrochemistry: Theory and Analysis. [3]
CHEM 313. Advanced Analytical Chemistry II. Signal processing, separation science, and electrochemical methods. [3]
CHEM 314a. Special Topics in Analytical Chemistry. [3]
CHEM 314b. Special Topics in Analytical Chemistry. [3]
CHEM 315. Separation Methods: A Practical Approach. Theories of separation science; distillation, capillary electrophoresis, membrane separation, and supercritical fluid extraction; emphasis on chromatography. [3]
CHEM 320, Organic Structure, Mechanism, and Reactions. Theory, models, and description of chemical bonding. Stereochemistry, and conformational analysis. Reaction thermodynamics, kinetics, and mechanism. Synthetic transformations employed in small molecule synthesis. No credit for students who have earned credit for 220c. Students who have earned credit for 320a will earn two hours of credit for this course. Prerequisite: One year of organic chemistry. [4]
CHEM 320a. Organic Chemistry Structure and Mechanism. The first half of 320. Theory, models, and description of chemical bonding. Stereochemistry, and conformational analysis. Reaction thermodynamics, kinetics, and mechanism. No credit for students who have earned credit for 220c or 320a. Prerequisite: One year of organic chemistry. [2]
CHEM 324. Special Topics in Organic Chemistry. [3]
CHEM 330. Advanced Quantum Chemistry. Advanced topics in the application of quantum mechanics to chemical bonding and spectroscopy. Prerequisite: 338. [3]
CHEM 332. Special Topics in Chemical Physics. [3]
CHEM 333. Molecular Modeling Methods. Computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Background theory, implementation details, capabilities and practical limitations. Prerequisite: 230 and 231. Includes one three-hour laboratory per week. Serves as repeat credit for students who completed 233 prior to fall 2010. [4]
CHEM 338. Quantum Chemistry. Limits of classical mechanics at the atomic and molecular level; postulates of quantum mechanics applied to problems in one, two, and three dimensions; perturbation and other methods. Prerequisite: 230 or equivalent. [3]
CHEM 360. Practicum in Chemistry Instruction. Preparation for and the teaching of chemistry to undergraduate students. No credit for chemistry graduate students. [0]
CHEM 369. Master's Thesis Research. [0-12]
CHEM 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]
CHEM 380. Introduction to Research. Introduction to chemical research under the guidance of individual faculty members. Students participate in three rotations among faculty research groups and provide graded work. For chemistry graduate students only. [1-2]
CHEM 385. Advanced Reading in Chemistry, Specialized topics under the guidance of a departmental faculty member. Open to qualified graduate students only. [3]
CHEM 399. Ph.D. Dissertation Research. [0-12]

Chinese

CHIN 201. Elementary Chinese I. Introduction to Modern Chinese pronunciation, grammar, conversation, reading, and writing. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for 200b or a more advanced Chinese language course. [5]
CHIN 202. Elementary Chinese II. Continuation of 201. Introduction to Modern Chinese pronunciation, grammar, conversation, reading, and writing. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 200b or 201. [5]
CHIN 211. Intermediate Chinese I (Formerly 214). Oral and written language training. Two hours of lecture and three hours of drill per week. Repeat credit for students who completed 214. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 202. [5]
CHIN 212. Intermediate Chinese II (Formerly 216). Continuation of 211. Language training in oral and written Chinese. Two hours of lecture and three hours of drill per week. Serves as repeat credit for 216. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 211. [5]
CHIN 241. Advanced Chinese I. Readings in Chinese culture to enhance proficiency in oral and written Chinese. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 212. [3]
CHIN 242. Advanced Chinese II. Continuation of 241. Readings in Chinese culture to enhance proficiency in oral and written Chinese. No credit for students who have earned credit for a more advanced Chinese language course. Prerequisite: 241. [3]
CHIN 250. Readings in Modern Chinese Media. Books, newspapers, Internet, and television documents and productions pertaining to political, social, and economic issues in China, including foreign trade-related issues. Prerequisite: 242. [3]
CHIN 252. Readings in Modern Chinese Media. Continuation of 251. Books, newspapers, and Internet sources pertaining to political, social, and cultural issues. Prerequisite: 242. [3]
Civil Engineering

CE 203. Fluid Mechanics. Physical properties of fluids, fluid statics; integral and differential equations of conservation of mass, energy, and momentum; principles of real fluid flows; boundary layer effects, flow through pipes, flow in open channels, drag forces on bodies. Emphasis on civil and environmental engineering applications. Credit not awarded for both CE 203 and ME 224. Prerequisite: ME 190, MATH 198. Graduate credit for students in earth and environmental sciences. FALL, SUMMER. [3]

CE 251. Foundation Analysis and Design. Study of shallow and deep foundation elements and systems for civil engineering structures. Soil exploration and site investigation. Prerequisite: CE 240. SPRING. [3]

CE 252. Civil and Environmental Engineering Seminar. A seminar designed to introduce students to current technical and professional issues through literature discussions, seminars by faculty and practicing engineers, and participation in panel discussions. Prerequisite: Senior standing. FALL. SPRING. [1]

CE 255. Transportation System Design. Geometric analysis of transportation ways with particular emphasis on horizontal and vertical curve alignment. Design of highways, intersections, and facilities for air, rail, and public transportation. Prerequisite: CE 225, junior standing. SPRING. [3]

CE 256. Urban Transportation Planning. Analytical methods and the decision-making process. Transportation studies, travel characteristic analysis, and land-use implications are applied to surface transportation systems. Emphasis is on trip generation, trip distribution, modal split, and traffic assignment. Computerized planning programs are used. Prerequisite: CE 225, junior standing. SPRING. [3]

CE 257. Traffic Engineering. Analysis of the characteristics of traffic, including the driver, vehicle, volumes, speeds, capacities, roadway conditions, and accidents. Traffic regulation, control, signing, signalization, and safety programs are also discussed. Prerequisite: CE 225. FALL. [3]

CE 259. Geographic Information Systems (GIS). Principles of computerized geographic information systems and analytical use of spatial information. Implementing GIS in project design, field spatial data acquisition methods including global positioning systems (GPS), data processing, management, visualization, and analysis using leading GIS software. Includes individual projects. SPRING. [3]

CE 286. Construction Project Management. Introduction to the theory and application of the fundamentals of construction project management. The construction process and the roles of professionals in the process. Broad overview of the construction project from conception through completion. Application of management practices including planning, directing, cost minimizing, resource allocation, and control of all aspects of construction operations and resources. Credit given for only one of ENGM 274, CE 286 or EECE 295. Prerequisite: CE 235. FALL. [3]

CE 288. Construction Planning and Scheduling. Fundamentals of construction planning and scheduling. Application of management practices including: process planning; directing; costing; resource allocation; and controlling all aspects of construction operations and resources, from pre-construction through operation and maintenance. Use of real-world examples and project scheduling software. Prerequisite: CE 286, CE 287. SPRING. [3]

CE 290. Reliability and Risk Case Studies. Review of case studies involving successes and failures in managing reliability and risk assessment of engineering systems from a wide range of perspectives, including design, production, operations, organizational culture, human factors and exogenous events. Analysis of event consequences in terms of public health and safety, the environment and business continuity, and the implications on regulation, legal liability and business practices. Evaluation of mitigation strategies based on achievable goals, technical and political feasibility and economic impact. Cases drawn from natural disasters, industrial accidents, and intentional acts. Prerequisite: Junior standing. FALL. [3]

CE 291. Construction Materials and Methods. Implications of design realities, material specifications, code limitations, and regulations on the construction process. Natural and man-made materials, construction techniques, and other issues that impact quality, constructability, and life-cycle assessment. Prerequisite: senior standing. SUMMER. [3]

CE 292. Construction Law and Contracts. Review of case studies involving successes and failures in legal principles and landmark cases relevant to civil engineering and construction. Contracts, torts, agency and professional liability, labor laws, insurance, expert testimony, arbitration, patents and copyrights, sureties, and ethics. Prerequisite: CE 286. SPRING. [3]

CE 293. Advanced Structural Steel Design. Advanced topics in column and beam design including local buckling, composite beams, plate girders, and torsion design. Behavior and design of bolted and welded connections. Structural planning and design of structural systems such as multistory buildings including computer applications. Prerequisite: CE 235. FALL. [3]

CE 296. Building Information Modeling. Generation and management of building data during its life cycle. Three-dimensional, real-time, dynamic modeling to increase productivity in building design and construction. Considerations of building geometry, spatial relationships, geographic information, and building components. Prerequisite: senior standing. FALL. [3]

CE 299. Special Topics. [3]

CE 302. Advanced Mechanics of Solids II. Modes of failure: creep and relaxation, plastic flow, fracture and fatigue. Stability of members, frames, and plates. Membrane and bending analyses of shells, including the beam on elastic foundation analogy for cylindrical shells. Inelastic behavior and plasticity including frame, planar, axi-symmetric, and slip line problems. Prerequisite: CE 301. SPRING. [3]

CE 311. Engineering Design Optimization. Methods for optimal design of engineering systems. Optimization under uncertainty, reliability-based design optimization, robust design, multidisciplinary problems, multi-objective optimization. Discrete and continuous design variables, advanced numerical algorithms, and formulations and strategies for computational efficiency. Practical applications and term projects in the student’s area of interest. Prerequisite: Math 287, Math 288 or CE 310. [3]

CE 312. Uncertainty Quantification. Computational methods for analysis and design of modern engineering systems under uncertainty. Emphasis on epistemic uncertainty due to data and models. Topics include stochastic finite elements; time-dependent reliability; Bayesian methods and networks; surrogate modeling; advanced simulation; global sensitivity analysis; model verification, validation, and calibration; and optimization under uncertainty. Applications to practical engineering systems. Prerequisite: CE 310. SPRING. [3]

CE 318. Prestressed Concrete. Behavior and design of statically determined prestressed concrete structures under bending moment, shear, torsion, and axial load effects. Design of statically determinate prestressed structures such as continuous beams, frames, slabs and shells. Creep and shrinkage effects and deflections of prestressed concrete structures. Application to the design and construction of bridges and buildings. Prerequisite: CE 235. [3]

CE 325A. Individual Study of Civil Engineering Problems. Literature review and analysis of special problems under faculty supervision. FALL, SPRING, SUMMER. [1-4 each semester]

CE 325B. Individual Study of Civil Engineering Problems. Literature review and analysis of special problems under faculty supervision. FALL, SPRING, SUMMER. [1-4 each semester]

CE 325C. Individual Study of Civil Engineering Problems. Literature review and analysis of special problems under faculty supervision. FALL, SPRING, SUMMER. [1-4 each semester]

CE 351. Public Transportation Systems. Comprehensive study of public transportation, with emphasis on planning, management, and operations; paratransit, ridesharing, and rural public transportation systems. Prerequisite: CE 256. SPRING. [3]

CE 353. Airport Planning and Design. Integration and application of the principles of airport master planning from the beginning stages of site selection through actual design of an airport facility. Specific study topics address demand forecasting, aircraft characteristics, capacity analyses, and geometric design of runways, terminals, and support facilities. Prerequisite: CE 225. [3]

CE 355. Advanced Transportation Design. An in-depth view of the design process. Complex design problems and solutions, with the use of computer-based analytical and design tools. Comprehensive design projects. Prerequisite: CE 255. SPRING. [3]

CE 356. Advanced Transportation Planning. A continuation of the concepts from CE 256, with emphasis on analytical techniques used in forecasting travel. Use of computer-based models, transportation and energy contingency planning methods. Prerequisite: CE 256. SPRING. [3]

CE 357. Theory of Traffic Flow. A study of traffic flow from the perspective of probability as applied to highway, intersection and weaving capacities. Discrete and continuous flow, vehicle distributions, queuing, and simulation. Prerequisite: CE 257. [3]

CE 359. Emerging Information Systems Applications. Introduction to emerging information systems technologies and their role in improving productivity and efficiency in managing engineering operations. Design of integrated approaches to enhance the speed, accuracy, reliability, and quantity of information available for decision support. Emphasis on case studies of innovative applications in transportation and manufacturing, leading to individual and group projects requiring new product development. Prerequisite: background transportation or manufacturing operations. FALL. [3]

CE 371A. Reliability and Risk Engineering Seminar. Seminars by expert speakers provide a wide range of perspectives on reliability and risk assessment and management of multi-disciplinary engineering systems. Topics on infrastructure and environmental systems, mechanical, automotive,
and aerospace systems; network systems (power distribution, water and sewage systems, transportation etc.); manufacturing and construction; and electronic and software systems. FALL, SPRING. [1]

CE 371B. Reliability and Risk Engineering Seminar. Seminars by expert speakers provide a wide range of perspectives on reliability and risk assessment and management of multidisciplinary engineering systems. Topics on infrastructure and environmental systems; mechanical, automotive, and aerospace systems; network systems (power distribution, water and sewage systems, transportation, etc.); manufacturing and construction; and electronic and software systems. FALL, SPRING. [1]

CE 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0–12]

CE 389. Master of Engineering Project.

Classics

CLAS 204. Archaic and Classical Greek Art and Architecture, 1000 to 400 B.C.E. Sculpture, vase painting, architecture, and the minor arts. Formal and stylistic developments in relation to changing cultural background. No credit for students who have earned credit for HART 255. Repeat credit for students who have completed HART 257. [3]

CLAS 205. Late Classical Greek and Hellenistic Art and Architecture. Sculpture, vase painting, architecture, and the minor arts from after the Parthenon to the Roman Empire. Media that developed significantly in this period, such as wall painting and mosaic. No credit for students who have earned credit for HART 255. Repeat credit for students who have completed HART 258. [3]

CLAS 206. Roman Art and Architecture. Sculpture, architecture, and painting from the tenth century B.C.E. to the early fourth century C.E. Daily life of the Romans as seen in excavations of the towns of Pompeii and Herculaneum. [3]

CLAS 207. History of the Ancient Near East. From the neolithic period to the conquests of Alexander the Great, in the geographical area from Persia to Troy and Egypt. Special attention to the history of Israel. [3]

CLAS 208. History of Greece to Alexander the Great. The Greek world from the beginning of the Mycenaean Age (1650 B.C.) to the end of the Classical period. Special attention to the relationship between political history and the development of Hellenism. [3]

CLAS 209. Greece and the Near East from Alexander to Theodosius. From Alexander’s conquest of the Persian Empire to the ascendency of Christianity in the late fourth century. Emphasis on social, cultural and religious transformations, within the framework of political history. [3]

CLAS 211. The Greek City. The example of ancient Athens. The stoa, the theatre, the house, and fortifications. Institutions such as the courts, the public assembly, and the family, literary, historical, archaeological, and philosophical sources. Serves as repeat credit for students who have completed HART 263. [3]

CLAS 212. History of the Roman Republic. The growth and evolution of the Roman world, from the foundation of the city in the seventh century B.C. to the reign of Caesar Augustus. The Romans’ unification of Italy, conquest of the Mediterranean and western Europe, adoption of Hellenism, and overthrow of the Republic. [3]

CLAS 213. History of the Roman Empire. The Roman world from Augustus to the collapse of the western empire in the fifth century. Political, military, social, and religious history. Special attention given to problems arising from use of the primary sources as well as to controversies in modern scholarship. [3]

CLAS 220. Women, Sexuality, and the Family in Ancient Greece and Rome. The status and role of women, law and the regulation of the private sphere, sexuality and gender roles, demography and family structure, marriage, children, religion, domestic architecture and the household economy, ancient critiques of the family, and the impact of Christianity. [3]

CLAS 222. Classical Tradition in America. Influences of classical Greece and Rome on the literature, politics, architecture, and values of the United States from the colonial period to the present. [3]

CLAS 223. From Late Antiquity to Islam. The Eastern Roman Empire from Constantine to the Arab conquests. Political, social, cultural, and religious history, including monasticism, barbarian invasions, and the changing roles of the Emperor and Church. Special attention to developments in urban life and landscape. [3]

CLAS 224. The Ancient Origins of Religious Conflict in the Middle East. Religious oppositions in the eastern Mediterranean world from the Maccabean revolt to the Muslim conquests of the seventh century; beginnings of religious militancy; challenges of monotheism to Greco-Roman civilization; conversion, persecution, and concepts of heresy and holy war in Christianity, Judaism, and Islam. [3]

CLAS 231. Akkadian. Introduction to the cuneiform script and to the grammar of Akkadian, the language of ancient Mesopotamia. Selected readings in Old Babylonian (CODEX Hammurabi, Mari letters) and Neo-Assyrian texts (Creation Poem, Gilgamesh Epic). [3]

CLAS 232. Akkadian. Continuation of 231. Introduction to the cuneiform script and to the grammar of Akkadian, the language of ancient Mesopotamia. Selected readings in Old Babylonian (CODEX Hammurabi, Mari letters) and Neo-Assyrian texts (Creation Poem, Gilgamesh Epic). [3]

CLAS 236. Culture of the Ancient Near East. A survey of highly sophisticated Near East cultures of the last three millennia before the common era (B.C.). Discussion of political histories, and the social, religious, and intellectual heritage of Mesopotamia, Egypt, and Anatolia through excavated artifacts and written documents. [3]

CLAS 238. The Amarna Age. The Amarna period from the sixteenth through the twelfth centuries B.C.E., as illuminated by excavations of palaces and temples in Egypt, Anatolia, Canaan, and Mesopotamia as well as the vast historical, legal, and literary documents of the period. Focus on the internationalism and theological speculation of the period as seen through the powerful personalities and accomplishments of leaders such as Thutmose III, Suppiluliumas, Ramses II, and the spiritually influential Akhnaten. [3]

CLAS 240. The Trojan War in History, Art, and Literature. Representations in Classical Greek art, literature, and archaeological evidence. The composition of the Homeric epics; the meaning of the Trojan War to later audiences. [3]

CLAS 243. Alexander the Great. Alexander’s rise to power and conquests in Europe, Asia, and Africa; the legacy of his introduction of Greek culture to the East; his significance to later audiences. Offered on a graded basis only. [3]

CLAS 245. The Archaeology of Greek Sanctuaries. Study of ancient Greek religious worship through an examination of temples, altars, cult images, votives, priests, and processions. Panhellenic sanctuaries and oracular and mystery cults. No credit for students who have earned credit for 241. [3]

CLAS 246. The Parthenon, the Akropolis, and Fifth Century Athens (Formerly 295). Ancient Athens in the fifth century B.C.E. Art, architecture, literature, history, and historical evidence for religious and political life in the city. No credit for students who have earned credit for 295 or 295W prior to fall 2014. [3]

CLAS 260. Roman Law. The relationship between law and society as illustrated by cases drawn from Roman legal and literary sources. The development of legal reasoning and the rise of an autonomous legal profession at Rome. [3]

CLAS 296W. Augustan Rome. Social, administrative, religious, and military reforms. Common themes in art, architecture, and literature; changes in national identity in the transition from Republic to Empire. Prerequisite:
Communication of Science and Technology

**CSET 201. Science Communication Tools and Techniques.** Translating technical research for a general readership. Benefits and limitations of different formats, texts, and media for telling stories about science. Repeat credit for students who completed 150 in fall 2011 or fall 2012. No credit for students who earned credit for CMST 237 before fall 2013. [3]

**HOD 3100. Community Inquiry.** Overview of issues and methods in community research. Epistemology, theory, research design, critical analysis, levels of inquiry, and the range of data collection and analysis methods available for community research. [3]

**HOD 3200. Ethics of Community Research and Action.** This course is intended to develop the ability to analyze situations encountered by action-researchers in community psychology, community development, prevention and community health/mental health, organizational change, community studies, and related community-based professional activities from the perspectives of (1) practice ethics, (2) research ethics, (3) policy ethics, and (4) the ethical/value issues entailed in conceptualizing the “ideal” community or society. [3]

**HOD 3450. Ethnographic Research Methods in Communities.** Through empirical data collection on human behavior in communities, ethnography and other qualitative research methods build hypotheses and theory grounded in the values, beliefs, and aspirations of different societies and cultures. This course introduces and explores the tools and techniques of ethnography and their uses in (1) research problem conceptualization, delineation of assumptions, and generation of culturally competent hypotheses and (2) identification and construction of data sets, field research to collect data, and theory building and practical application derived from data analysis. The course is explicitly interdisciplinary. [3]

**HOD 3460. Fieldschool in Intercultural Education.** This course takes place in a community other than one’s own either domestically or internationally over a 10-week period in the summer session. It provides training in community field research and analysis techniques directed to human, social, and civic development issues. [3]

**HOD 3470. Community Intervention and Change.** Introduction to applied community studies, including change theory, research, and intervention at multiple levels from community psychology, sociology and other disciplines. The course will help students develop a thesis, project, paper, or dissertation topic and proposal. Readings focus on meanings, types and significance of community; issues of diversity, difference, deviance, labeling, and stigma; ecological theory, research and environmental and setting/systems-level interventions; social movements; social capital and community and uses that to propose to the relevant authorities, a new policy, a policy experience designing and implementing a campaign aimed at changing health policy. Specifically, students will be asked to select a problem that has policy implications, and then develop a policy analysis and advocacy strategy around their chosen topic. [3]

**HOD 3600. Community Development and Urban Policy.** Provides the beginning graduate student with an introduction to theory, practice and research in community development (CD) and in urban social policy. It has a laboratory portion in which the student works on a CD project in the local community and uses that to propose to the relevant authorities, a new social policy to implement the findings of the CD project. [3]

**HOD 3601. Community Development Theory.** This course provides beginning graduate students an introduction to theories that shape or directly pertain to community development. Focus of the course is on theories that explain local, community and municipal-level processes. Students develop an understanding of the theoretical strands in current development issues and policies. [3]

**HOD 3610. Development Project Design and Evaluation.** Examines how development projects and programs intended to improve social, economic, health, energy, environmental, and other conditions in human communities are designed by development professionals and how they determine whether or not such interventions achieve their purposes and warrant similar investment in the future. Analytical work undertaken at several stages in the design and evaluation process, including social, financial, managerial, legal, environmental, and other analyses, as well as impact analysis, are carried out. The purpose is to understand the ways applied research underpins and influences development investment decisions. [3]

**HOD 3621. Theory and Application in Action Research.** This course is designed to provide students with both intellectual and practical exposure to action research and applied research methods-particularly in relation to working for social change. The course will focus on the issue of knowledge generation and the role of knowledge production in social power. Practical experience will be gained by conducting research on community projects and applying the concepts gained in course work. Prerequisite: one graduate statistics course. [3]

**HOD 3640. Global Dimensions of Community Development.** The globalization process induces new forms of human organization and transforms existing organizations at the community, national, and international levels. This course provides an understanding of the nature, functioning, and development of organizations affected by globalization in societies different from our own and as they relate to multilateral or global institutions.
that span different social and cultural settings. To do this, the course explores organizations from a comparative perspective, using the analytical framework of human ecology, in terms of differential access to economic and other productive assets, education and information, security and the rule of law, social capital and cultural identity. [3]

HOD 3650. Theories of Inequality, Diversity, and Social Justice. This course is designed to acquaint incoming Community Research in Action (CRA) students with the core theories and theoretical perspectives germane to the study of inequality broadly defined. The course includes readings that critically address structural, community, and individual levels of analysis. [3]

HOD 3665. High Poverty Youth: Improving Outcomes. (Also listed as SPED 3080) Youth from high-poverty backgrounds often are placed at risk for a host of unfavorable outcomes including academic failure, school dropout, drug abuse, unemployment, and incarceration. In this class, we will be working with schools and community agencies in Nashville to improve outcomes for youth living in high-poverty neighborhoods. We will have class meetings twice weekly as well as ongoing field-based experiences. Field work will include mentoring, tutoring, or providing job readiness training to youth in neighborhood community centers or in students’ high schools. [3]

HOD 3670. Community Organizing. This course provides graduate students an introduction to theories, processes and models for community organizing. Focus of the course is on post-Alinsky models, particularly congregation-based models in the US. Methods of civic engagement, leadership development, organizational processes and community change are addressed through readings and cases studies. Exposure to and analysis of local organizing efforts are part of this course. [3]

HOD 3690. Master's Thesis Research. Open to Graduate School students only. [3]

HOD 3700. Community Research in Action Proseminar. Their Proseminar course provides professional development and practical skills to help new Community Research in Action (CRA) students maximize the graduate school experience. Students are given foundational information, instruction, and skill-building exercises on subjects related to teaching, research, and service. [2]

HOD 3790. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

HOD 3800. Evaluation Research. This course is a doctoral-level introduction to evaluation research. It is designed for people who expect to work as university faculty members or principal investigators in research organizations with a commitment to using research to understand the contribution of social programs and social change efforts to ending social problems. The first half of the course will be devoted to understanding multiple approaches and types of evaluations and how they are embedded in social and political contexts. The second half will introduce design and analytic techniques particularly useful in large scale social experiments, and some of their limitations. [3]

HOD 3810. Practical Meta-Analysis. The topics covered in this seminar will include the major steps involved in conducting a meta-analysis, with particular emphasis on the technical issues and statistical analyses distinctive to this form of research. Specifically, the course will focus on providing students with the skills needed to be intelligent consumers of systematic reviews and meta-analyses; conduct a systematic, replicable search of the literature used to identify studies eligible for a meta-analysis; create and analyze meta-analytic databases using appropriate statistical techniques; and prepare written reports of meta-analytic findings. [3]

HOD 3870. Thesis Development Seminar. The purpose of course is to help students plan empirical theses. Students must register for both Fall and Sprin semesters in that order. Fall will be devoted to the identification of a tentative topic or area of study. Spring will be devoted to developing a draft thesis proposal, including a presentation of the problem, a critical literature review, research questions, a draft methods and approach to data analysis sections. [1-3]

HOD 3872. Practicum. This course provides an opportunity to integrate theory, knowledge, and skills by applying them to the solution of problems in practicum sites. Prerequisite: HOD 3000 and 3850, Pre-practicum. [1-6]

HOD 3930. Readings and Research. [1-6]

HOD 3960. Special Topics. May be repeated with a change in topic. [1-4]

HOD 3990. Ph.D. Dissertation Research. Variable credit [0-12]

HOD 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

Computer Science

CS 231. Computer Organization. The entire hierarchical structure of computer architecture, beginning at the lowest level with a simple machine model (e.g., a simple von Neumann machine). Processors, process handling, I/O handling, and assembler concepts. Graduate credit not given for computer science majors. Prerequisite: CS 201; corequisite: EECE 116/116L FALL, SPRING. [3]

CS 250. Algorithms. Advanced data structures, systematic study and analysis of important algorithms for searching; sorting; string processing; mathematical, geometrical, and graph algorithms, classes of P and NP, NP-complete and intractable problems. Prerequisite: CS 201, CS 212. FALL, SPRING. [3]

CS 251. Intermediate Software Design. High quality development and reuse of architectural patterns, design patterns, and software components. Theoretical and practical aspects of developing, documenting, testing, and applying reusable class libraries and object-oriented frameworks using object-oriented and component-based programming languages and tools. Prerequisite: CS 201, FALL, SPRING. [3]

CS 258. Introduction to Computer Graphics. Featuring 2D rendering and image-based techniques, 2D and 3D transformations, modeling, 3D rendering, graphics pipeline, ray-tracing, and texture-mapping. Prerequisite: MATH 194, 196, 204 or 205B; CS 251. FALL. [3]

CS 259. Project in Computer Animation Design and Technology. Introduction to the principles and techniques of computer animation. Students work in small groups on the design, modeling, animation, and rendering of a small computer animation project. Topics include storyboarding, camera control, skeletons, inverse kinematics, splines, keyframing, motion capture, dynamic simulation, particle systems, facial animation, and motion perception. Prerequisite: CS 201; one of MATH 194, 196, 204, or 205B. FALL. [3]

CS 265. Introduction to Database Management Systems. Logical and physical organization of databases. Data models and query languages, with emphasis on the relational model and its semantics. Concepts of data independence, security, integrity, concurrency. Prerequisite: CS 201. FALL. [3]

CS 269. Project in Artificial Intelligence. Students work in small groups on the specification, design, implementation, and testing of a sizeable AI software project. Projects (e.g., an “intelligent” game player) require that students address a variety of AI subject areas, notably heuristic search, uncertain reasoning, planning, knowledge representation, and learning. Class discussion highlights student progress, elaborates topics under investigation, and identifies other relevant topics (e.g., vision) that the project does not explore in depth. Prerequisite: CS 260. SPRING. [3]

CS 270. Programming Languages. General criteria for design, implementation, and evaluation of programming languages. Historical perspective. Syntactic and semantic specification, compilations, and interpretation processes. Comparative studies of data types and data control, procedures and parameters, sequence control, nesting, scope and storage management, run-time representations. Non-standard languages, problem-solving assignments in a laboratory environment. Prerequisite: CS 231. FALL. [3]
CS 274. Modeling and Simulation. General theory of modeling and simulation of a variety of systems: physical processes, computer systems, biological systems, and manufacturing processes. Principles of discrete-event, continuous, and hybrid system modeling, simulation algorithms for the different modeling paradigms, methodologies for constructing models of a number of realistic systems, and analysis of system behavior. Computational issues in modeling and analysis of systems. Stochastic simulations. Prerequisite: CS 201, junior standing. SPRING. [3]

CS 276. Compiler Construction. Review of programming language structures, translation, loading, execution, and storage allocation. Compilation of simple expressions and statements. Organization of a compiler including compile-time and run-time symbol tables, lexical, syntax, and semantic analysis, object code generation, error diagnostics, object code optimization techniques, and overall design. Use of a high-level language to write a complete compiler. Prerequisite: CS 251. FALL. [3]

CS 282. Principles of Operating Systems II. Projects involving modification of a current operating system. Lectures on memory management policies, including virtual memory. Protection and sharing of information, including general models for implementation of various degrees of sharing. Resource allocation in general, including deadlock detection and prevention strategies. Introduction to operating system performance measurement, for both efficiency and logical correctness. Two hours lecture and one hour laboratory. Prerequisite: CS 281. SPRING. [3]

CS 284. Computer Systems Analysis. Techniques for evaluating computer system performance with emphasis upon application. Topics include measurement and instrumentation techniques, benchmarking, simulation techniques, elementary queuing models, data analysis, operation analysis, performance criteria, case studies. Project involving a real computer system. Prerequisite: CS 281. SPRING. [3]

CS 291. Special Topics. [Variable credit: 1-3 each semester] (Offered on demand)

CS 292. Special Topics. [Variable credit: 1-3 each semester] (Offered on demand)

CS 311. Graph Algorithms. Algorithms for dealing with special classes of graphs. Particular emphasis is given to subclasses of perfect graphs and graphs that can be stored in a small amount of space. Interval, chordal, permutation, comparability, and circular-arc graphs; graph decomposition. Prerequisite: CS 310 or Math 275. [3]

CS 315. Automated Verification. Systems verification and validation, industrial case studies, propositional and predicate logic, syntax and semantics of computational tree and linear time logics, binary decision diagrams, timed automata model and real-time verification, hands on experience with model checking using the SMV, SPIN, and UPPAAL tools, and state reduction techniques. FALL. [3]

CS 320. Algorithms for Parallel Computing. Design and analysis of parallel algorithms for sorting, searching, matrix processing, FFT, optimization, and other problems. Existing and proposed parallel architectures, including SIMD machines, MIMD machines, and VLSI systolic arrays. Prerequisite: CS 310. [3]

CS 351. Advanced Animation. Current research issues and problems in computer animation, with special focus on motion capture, dynamic simulation, and key-framing. Cloth, deformable bodies, natural phenomena, geometric algorithms, procedural techniques, facial animation, hair, autonomous characters, flocking, empirical evaluation, and interfaces for animation. Prerequisite: CS 259. FALL. [3]

CS 352. Human-Computer Interaction. An overview of human-computer interaction and problems of current interest. Topics include: Human factors, GOMS, user interface design and evaluation, interaction modalities, distributed cognition, ubiquitous computing. A project involving design and evaluation will be performed. FALL. [3]

CS 358. Computer Vision. The fundamentals of computer vision and techniques for image understanding and high-level image processing. Includes image segmentation, geometric structures, relational structures, motion, matching, inference, and vision systems. Prerequisite: EECE 357. SPRING. [3]

CS 359. Medical Image Registration. Foundations of medical image registration. Mathematical methods and practical applications. Image-to-image registration, image-to-physical registration, applications to image-guided procedures and the most commonly used imaging modalities with an emphasis on tomographic images. FALL. [3]

CS 360. Advanced Artificial Intelligence. Discussion of state-of-the-art and current research issues in heuristic search, knowledge representation, deduction, and reasoning. Related application areas include: planning systems, qualitative reasoning, cognitive models of human memory, user modeling in ICAI, reasoning with uncertainty, knowledge-based system design, and language comprehension. Prerequisite: CS 260 or equivalent. FALL. [3]

CS 362. Machine Learning. An introduction to machine learning principles of artificial intelligence, stressing learning’s role in constraining search by augmenting and/or reorganizing memory. Topics include connectionist systems; concept learning from examples; operator, episode, and plan learning; problem-solving architectures that support learning; conceptual clustering; computer models of scientific discovery; explanation-based learning; and analogical reasoning. Psychological as well as computational interests in learning are encouraged. Prerequisite: CS 260, CS 360, or equivalent. SPRING. [3]

CS 364. Intelligent Learning Environments. Theories and concepts from computer science, artificial intelligence, cognitive science, and education that facilitate designing, building, and evaluating computer-based instructional systems. Development and substantiation of the concept, architecture, and implementation of intelligent learning environments. Multimedia and web-based technology in teaching, learning, collaboration, and assessment. Prerequisite: CS 260, CS 360, or equivalent. SPRING. [3]

CS 366. Distributed Artificial Intelligence. Principles and practice of multiple agent systems for distributed artificial intelligence. Game theory,
distributed negotiation and decision making, distributed problem solving, cooperation, coalition formation and distributed learning. Prerequisite: CS 260. SPRING. [3]

CS 376. Foundations of Hybrid and Embedded Systems. Modeling, analysis, and design of hybrid and embedded systems. Heterogeneous modeling and design of embedded systems using formal models of computation, modeling and simulation of hybrid systems, properties of hybrid systems, analysis methods based on abstractions, reachability, and verification of hybrid systems. FALL. [3]

CS 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit 0-12]

CS 381. Distributed Systems Principles. Techniques and mechanisms in distributed system design, such as logical clocks, distributed consensus, distributed mutual exclusion, consistency models, fault tolerance and paradigms of communication. Contemporary distributed system case studies and open challenges. Prerequisite: CS 281. [3]

CS 384. Performance Evaluation of Computer Systems. Techniques for computer systems modeling and analysis. Topics covered include analytical modeling with emphasis on queueing network models, efficient computational algorithms for exact and approximate solutions, parameter estimation and prediction, validation techniques, workload characterization, performance optimization, communication and distributed system modeling. Prerequisite: CS 281 or CS 381. SPRING. [3]

CS 385. Advanced Software Engineering. An intensive study of selected areas of software engineering. Topics may include CASE tools, formal methods, generative techniques, aspect-oriented programming, metrics, modeling, reuse, software architecture, testing, and open-source software. Prerequisite: CS 278. FALL. [3]

CS 386. System-Level Fault Diagnosis. An overview of the basic concepts of the theory of fault diagnosis and problems of current interest. Topics include the classical PMC and BGM models of fault diagnosis, hybrid (permanent and intermittent faults) models, diagnostic measures for one-step, sequential, and inexact diagnosis. Emphasis is on algorithmic techniques for solving the diagnosis and diagnosability problems in various models. Prerequisite: CS 381. SPRING. [3]

CS 387. Topics in Software Engineering. Topics may include empirical software engineering and open-source software engineering. Prerequisite: CS 278. SPRING. [3]

CS 388. Model-Integrated Computing. Model-Integrated Computing addresses the problems of designing, creating, and evolving information systems by providing rich, domain-specific modeling environments including model analysis and model-based program synthesis tools. Students are required to give a class presentation and prepare a project. FALL. [3]

CS 390. Individual Studies. Offered each term. [1-3]

CS 391. Seminar. [1-3 each semester]

CS 392. Seminar. [1-3 each semester]

CS 395. Special Topics. [3]

CS 396. Special Topics. [3]

Earth and Environmental Sciences

EES 201. Global Climate Change. Science and policy of global climate change: history and causes of climate change in Earth’s past, with emphasis on the last 2 million years; evidence of human impacts on climate since 1850; future climate change and its economic, social, and ecological consequences; economic, technological, and public policy responses. Prerequisite: 101 or 108. [3]

EES 202. Earth Systems through Time. Effects of feedbacks between the geologic cycles on the lithosphere, hydrosphere, biosphere, and atmosphere at diverse intervals in the Earth’s history. Present and future implications. Interpretations of evidence recorded in Earth materials. Three hours of lecture and one laboratory per week. Repeat credit for students who have completed 102. Prerequisite: 101 and 111. [4]

EES 220. Life Through Time. Ecology, classification, and evolution of important groups of fossils, emphasizing invertebrates. Change in marine ecosystems through geologic time. Causes and effects of rapid evolution events and mass extinctions. Three hours of lecture and one laboratory period per week. Prerequisite: 101, BSCI 100, or BSCI 110b. [4]

EES 225. Earth Materials. Solid materials that make up the earth; rock, soil, and sediment - with emphasis on the minerals that are their major constituents. Hand specimen, optical, and X-ray methods of description and identification. Physical and chemical processes that form and modify earth materials and the use of these materials in interpreting earth processes of the past and present. Field trips. Three lectures and one laboratory per week. Prerequisite: 101. [4]

EES 255. Transport Processes in Earth and Environmental Systems. Principles of conservation and constitutive transport laws; classic and emerging styles of modeling natural systems. Prior study of basic calculus (functions, derivatives, integrals) and physics (mechanics) is expected. Prerequisite: senior or graduate standing with a major in Earth and Environmental Sciences, Biological Sciences, Chemistry, Mathematics, Physics, or the School of Engineering. [3]

EES 260. Geochemistry. Application of chemistry to study the distribution and cycling of elements in the crust of the earth. Includes chemical bonding and crystallization, phase rules and phase diagrams, chemical equilibria, theories on the origin of elements, earth, ocean, atmosphere, and crust. Prerequisite: 225 and CHEM 102b. [3]

EES 268. Paleoecologies. Fluctuations in Earth’s climate with an emphasis on the past 700 million years. Forcings and feedback that influence climate and drive change. Techniques used to reconstruct past climate change using marine and terrestrial geologic deposits and geochronologic methods. Prerequisite: 101 and 202. [3]

EES 275. Sustainable Systems Science. A system dynamics approach to examining principles, problems, and solutions pertaining to the links among the environment, society, and economy. Components of sustainable systems. No credit for students who earned credit for 390 section 3 in spring 2010. Prerequisite: at least junior standing with a major in Earth and Environmental Sciences, Biological Sciences, Chemistry, Physics, or the School of Engineering. [3]
EES 282. Paleocological Methods. Tools used to interpret past environments and climates, including plant microfossils, pollen and phytooliths, vertebrate morphology, and dental microwear and mesowear. Geochemical tools such as stable isotopes and rare earth elements. Integrating methods for paleontological and anthropological studies, including the use of databases and meta-analyses. Readings from primary sources. Serves as repeat credit for students who completed 390 section 4 in spring 2010. Prerequisite: 101. [3]

EES 289a. Directed Study. Readings in related fields and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students or by consent of the department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 2 credits per semester of enrollment. [1-2]

EES 289b. Directed Study. Readings in related fields and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students or by consent of the department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 2 credits per semester of enrollment. [1-2]

EES 290. Special Topics. Topics vary. May be repeated for credit more than once by permission of the director of undergraduate studies. Students may enroll in more than one section of this course each semester. Prerequisite: 101. [3]

EES 291a. Independent Study. Readings with related field and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students. Other students must have consent of department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-2]

EES 291b. Independent Study. Readings with related field and/or laboratory research in pursuit of a scholarly project conceived and executed under the supervision of a faculty member. Open to senior majors and graduate students. Other students must have consent of department chair. Does not count toward minimum requirements for the major. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-2]

EES 310. Earth Fluids. Fluid dynamics in relation to natural Earth systems, including low and high Reynolds number flows. No credit for students who have earned credit for 390 section 1 in spring 2007, section 3 in fall 2009, section 1 in fall 2011, or section 1 in fall 2013. [3]

EES 311. Advanced Topics in Earth Materials. Selected topics in the structure, composition, properties of the materials that constitute the Earth, and the natural processes that control their stability and transformations. May be repeated for credit if there is no duplication in topic. [3]

EES 330. Isotopes and the Environment. Isotope systems, research techniques and applications used to trace, date, and understand environmental processes on Earth’s surface. Stable, radiogenic, and cosmogenic isotope systems. Radiometric dating of low temperature processes. No credit for students who earned credit for 390 section 1 in spring 2010. [3]

EES 335. Magmatic Processes and the Construction of Earth’s Crust. Generation of magma and its role in construction of Earth’s crust. Connection between magmatism and large-scale tectonics. Introduction to magmatic tracers: isotopes, trace elements, phase equilibria; geochronology; and the history of the crust. Hadean to present. No credit for students who completed 390 section 1 in fall 2012. [3]

EES 338. Sedimentary Systems: Source-to-Sink. Generation and distribution of sediment from mountain tops to deep-sea basins. Construction of depositional landscapes and stratigraphy. Sediment dispersal and interactions between source-to-sink components along transport pathways; feedbacks with climate, tectonics, the biosphere, and humans. Earth system interactions, energy budgets, and nutrient and geochemical cycling. No credit for students who earned credit for 390 section 1 in spring 2007, section 3 in spring 2011, or section 2 in spring 2013. [3]

EES 362. Macroeconomy and Biogeography. Integration of evolutionary biology, paleobiology, ecology, and biogeography to understand interactions between organisms and their environments over large spatial and temporal scales, including in ancient ecosystems. The discipline of macroecology; nature of species, niches, and communities; abundance and distribution of species; species diversity; composition and assembly of continental biotas; allometry and body size; evolutionary dynamics; methodological advances. [3]

EES 364. Topics in Macroevolution. Evolutionary processes that operate on geological time scales. Evolutionary theory; systematics; speciation and extinction; evolutionary benefits of sexual reproduction; co-evolution; convergence; biogeography; and relevance of evolution to modern ecology and conservation. Effects of abiotic processes on the evolution of terrestrial and marine organisms. [3]

EES 369. Master’s Thesis Research. [0-12]

EES 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

EES 390. Special Topics and Advanced Techniques in Geology. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-4]

Economics

ECON 251. Wages, Employment, and Labor Markets. Theories of wages and employment, dual labor markets, internal labor markets, and labor’s share of national income. Empirical studies of labor mobility, the effects of unions on relative wages and resource allocation, occupational and industrial wage differentials, and selected labor markets. Prerequisite: 231. [3]

ECON 259. Financial Instruments and Markets. Theoretical and empirical approaches to the analysis of monetary and other financial instruments. Portfolio analysis, interest rate risk, and financial futures and options markets. Prerequisite: 231 and 232. [3]

ECON 264. International Finance. Economics of international monetary, financial, and macroeconomic relationships. Effects of monetary and fiscal politics in open economies, balance of payments, exchange rate determination, and international monetary institutions. Prerequisite: 232. [3]

ECON 265. Macroeconomic Models for Policy Analysis. Mathematical models of overlapping generations, rational expectations, and open economies with price rigidities applied to social security, government debt, exchange rates, monetary policy, and time inconsistent optimal policy. Prerequisite: 232. [3]

ECON 268. Economics of Health. An examination of some of the economic aspects of the production, distribution, and organization of health care services, such as measuring output, structure of markets, demand for services, supply of services, pricing of services, cost of care, financing mechanisms, and their impact on the relevant markets. Prerequisite: 231. [3]

ECON 273. Game Theory with Economic Applications. Rational decision-making in non-cooperative, multi-person games. Single play and repeated games with complete and incomplete information. Economic applications of games, such as auctions, labor-management bargaining, pricing and output decisions in oligopoly, and common property resources. Prerequisite: 231. [3]

ECON 274. Industrial Organization. The structure of contemporary industry and the forces that have shaped it, including manufacturing, trade, and transportation. The role of the large corporation in modern industrial
organization. The relation of industrial structure to economic behavior and performance. Prerequisite: 231. [3]

ECON 279. Urban Economics. Urban growth, development of suburbs, location of firms, housing markets, transportation, property taxes, and local government services. Offered on a graded basis only. Prerequisite: 231. [3]

ECON 284. Topics in Econometrics. Emphasis on applications. May include generalized method of moments, empirical likelihood, resampling methods, and nonparametric techniques. Prerequisite: 253. [3]

ECON 300. Selected Topics in Mathematics for Economists. Mathematics used in the analysis of static and dynamic models. Prerequisite: Open to students of the Economics Ph.D., Law and Economics Ph.D., and Finance Ph.D. programs, or by consent of the instructor and Economics Director of Graduate Studies. [3]

ECON 301. Microeconomic Theory (M.A. Level). The price system in consumer demand and as a mechanism for organizing production, allocating resources, and distributing the national income. [3]

ECON 304a. Microeconomic Theory I. Analysis of resource allocation and relative prices. Behavior of individual economic units and markets. Topics include models of technology, cost and profit and the firm; consumer preferences, constraints and choice; expected utility theory and risk aversion; partial equilibrium under competition and monopoly; partial equilibrium welfare and surplus. Prerequisite: Open to Economics Ph.D., Law and Economics Ph.D., and Finance Ph.D. programs, or by consent of the instructor and the Economics Director of Graduate Studies. [3]

ECON 304b. Microeconomic Theory II. Noncooperative game theory, information economics, public goods. Topics include Nash equilibrium, sequential rationality, incomplete information; oligopoly; bargaining; adverse selection, signaling and screening; principal-agent models; externalities and public goods. Prerequisite: 304a or consent of the instructor and the Economics Director of Graduate Studies. [3]

ECON 304c. Microeconomic Theory III. General equilibrium, social choice, and welfare economics. General equilibrium, existence, stability, and uniqueness results; fundamental theorems of welfare; core and equilibrium; general equilibrium with time and uncertainty; social choice theory and mechanism design. Prerequisite: 304a and 304b, or consent of instructor and the Economics Director of Graduate Studies. [3]

ECON 305a. Macroeconomic Theory I. Keynesian and neoclassical models of the economy. Introduction to dynamic models. Prerequisite: Open to students of the Economics Ph.D., Law and Economics Ph.D., and Finance Ph.D. programs, or by consent of the instructor and Economics Director of Graduate Studies. [3]

ECON 305b. Macroeconomic Theory II. Neoclassical and new theories of economic growth. Overlapping generations models. Prerequisite: 305a or consent of the instructor and Economics Director of Graduate Studies. [3]

ECON 305c. Macroeconomic Theory III. Theories of consumption, investment, demand and supply of money, the labor market, monetary and fiscal policy, and New Keynesian economics. Prerequisite: 305a and 305b or consent of the instructor and Economics Director of Graduate Studies. [3]

ECON 306. Statistical Analysis (M.A. Level). Interpretation of statistical materials, the principles of statistical inference, the use of available statistics for problems of economic analysis, and the importance of statistics in economic policy and administration. [3]

ECON 309a. Econometrics I. Analysis of specification errors in single equation estimation of economic relations and introduction to the estimation and application of simultaneous equation models. Prerequisite: 307 or consent of instructor and Economics Director of Graduate Studies. [3]

ECON 309b. Econometrics II. Identification and estimation of simultaneous equation models. Small sample properties of estimators and Bayesian inference. Model building and testing of economic theory. Prerequisite: 309a or consent of instructor and Economics Director of Graduate Studies. [3]

ECON 312a. Health Economics. Conceptual and empirical analysis of demand for health, medical services, and insurance; decisions by physicians and hospitals about price, quantity, and quality of services; technological change; and structure and performance of the pharmaceutical industry. [3]

ECON 312b. Health Economics. Conceptual and empirical analysis of demand for health, medical services, and insurance; decisions by physicians and hospitals about price, quantity, and quality of services; technological change; and structure and performance of the pharmaceutical industry. [3]

ECON 316. International Trade Theory. Classical, neoclassical, and contemporary theories of international trade; empirical evidence for them. Commercial policy; tariffs, the terms of trade and income distribution, international factor movements: economic unions. Trade and growth. Trade and welfare. [3]

ECON 317. International Monetary Economics. The balance of payments and the foreign exchange market. Elasticities, absorption, and monetary approaches to the adjustment mechanism. Interest rates and capital flows. Optimal currency areas, internal and external balance. International reserves and liquidity. [3]

ECON 320a. Seminar in the Organization and Control of Industry. The structure of American industry; the origins and development of industrial concentration; the behavior and performance of oligopolistic and imperfectly competitive markets; the economics of public utilities. Public policy toward industrial structure and conduct, including antitrust policy, limitation of competition, and direct regulation. [3]

ECON 320b. Seminar in the Organization and Control of Industry. The structure of American industry; the origins and development of industrial concentration; the behavior and performance of oligopolistic and imperfectly competitive markets; the economics of public utilities. Public policy toward industrial structure and conduct, including antitrust policy, limitation of competition, and direct regulation. [3]

ECON 329a. Labor Economics. Static and dynamic models of labor demand and labor supply, and models of human capital development. Applications of the theory to selected topics including: migration, fertility, health, wage determination, education, unionism and industrial relations, employment policies, implicit contracting and layoffs, and discrimination. Examination of methodological problems related to the analysis of labor markets. [3]

ECON 329b. Labor Economics. Static and dynamic models of labor demand and labor supply, and models of human capital development. Applications of the theory to selected topics including: migration, fertility, health, wage determination, education, unionism and industrial relations, employment policies, implicit contracting and layoffs, and discrimination. Examination of methodological problems related to the analysis of labor markets. [3]

ECON 332a. Theory of Money and Finance I. Advanced topics in monetary and financial economics spanning theory and applications. Topics include recently developed dynamic theories of money and asset pricing; inflationary dynamics; money, welfare, and growth; money and business cycles; financial development and growth; credit market imperfections and financial crises. [3]

ECON 332b. Theory of Money and Finance II. Analyzes microeconomic foundations and general equilibrium models of money and financial markets. Explores such topics as the theory of payments structure, capital asset pricing, rational expectations, efficient markets, contingent claims markets, and others. Prerequisite: 259. [3]
ECON 333. Topics in Microeconomics. Advanced theory and applications. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ECON 349a. Reading Course. Designed to permit graduate students to do more intensive study in the area of their special interest than regular course offerings provide. Admission by consent of department chair and supervising professor. [Variable credit: 1-3 each semester]

ECON 349b. Reading Course. Designed to permit graduate students to do more intensive study in the area of their special interest than regular course offerings provide. Admission by consent of department chair and supervising professor. [1-3]

ECON 354a. Public Finance Theory. The social welfare foundations of public finance theory, theories of optimal taxes and public goods, taxing equity, efficiency, and incentive effects in partial- and general-equilibrium frameworks. Prerequisite: 254 or consent of instructor. [3]

ECON 354b. Public Finance Seminar. Special topics in applications of public finance theory, including some or all of the following: theories of fiscal federalism, fiscal policies, fiscal policy, externality and pollution, public pricing, social insurance, public income distribution, public debt, cost-benefit analysis, international aspects of public finance, general equilibrium theory of public policy, and issues in tax-expenditure reform. Prerequisite: 354a or consent of instructor. [3]

ECON 355a. Seminar in Research on Economic Development. How to select and define an economic problem, assemble relevant factual and statistical information, and analyze and interpret it. Students will write a research paper. May not be included in the 24 hours required for the M.A. degree. Completion of both 355a and 355b with an average grade of B counts in lieu of M.A. thesis. Open only to students in the Economic Development program. [3]

ECON 355b. Seminar in Research on Economic Development. How to select and define an economic problem, assemble relevant factual and statistical information, and analyze and interpret it. Students will write a research paper. May not be included in the 24 hours required for the M.A. degree. Completion of both 355a and 355b with an average grade of B counts in lieu of M.A. thesis. Open only to students in the Economic Development program. [3]

ECON 357. International Trade and Economic Development. Selected topics concerning the exchange and transfer of goods and resources between less-and more-developed countries. Possible topics include: the international monetary system, the SDR-aid link, dependence and imperialism, the role of trade in economic growth, foreign exchange strategies, and the structure of protection. Primarily designed for students in the Economic Development program. No credit for students who have completed 263. [3]

ECON 358a. Special Topics in Development Policies. Selected topics in the economic analysis of problems in developing countries. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ECON 358b. Special Topics in Development Policies. Selected topics in the economic analysis of problems in developing countries. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ECON 366a. Topics in Economic History: Microeconomic. This course will examine various microeconomic aspects of long-term development. Topics may include: the demographic transition, changes in labor force behavior, development of institutions, industrialization, migration, health, measurement of living standards and inequality. Students are expected to become familiar with various large-scale microeconomic databases containing historical information, such as the Integrated Public Use Micro-data Samples of the United States Census. [3]

ECON 366b. Topics in Economic History: Macroeconomic. This course will examine various macroeconomic aspects of long-term development. Topics may include: economic growth, the development of financial markets and the role of financial markets in economic development, the history and evolution of monetary and fiscal policy, capital market integration, and business cycles, including the Great Depression. Students are expected to become familiar with various macro-history databases (for example, the NBER database). [3]

ECON 369. Master's Thesis Research. [0-12]

ECON 371. An Introduction to Economic History. Economic history in terms of measurement and theory. Factors associated with modern economic growth and institutional change in a variety of countries and time periods. Relation between economic history and history of thought. [3]

ECON 374. Nonparametric and Semi-parametric Econometrics. Nonparametric and semi-parametric methods for the estimation and inference in econometric models. Methods include kernel, neural network, orthogonal series, and wavelets. Models include nonparametric models, the partially linear model, index models, and additive models. Prerequisite: 309b. [3]

ECON 375. Topics in Advanced Econometrics. Advanced theory and applications. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ECON 377. Topics in Macroeconomics. Advanced theory and applications. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

ECON 379. Non-candidate Research. [Variable credit: 0-12]

ECON 388a. Development and Growth. Contemporary theories and empirical studies of growth and development. Patterns and sources of growth, research and technology transfer, human capital and labor market performance, organization and institutions, inequality and redistributive policy, and welfare costs of inflation. Prerequisite: 304a, 304b, 305a, and 305b. [3]

ECON 388b. Development and Growth. Contemporary theories and empirical studies of growth and development. Patterns and sources of growth, research and technology transfer, human capital and labor market performance, organization and institutions, inequality and redistributive policy, and welfare costs of inflation. Prerequisite: 304a, 304b, 305a, and 305b. [3]

ECON 398. Workshop on Economics. Research seminar to aid advanced students in the selection of thesis topics and presentation of research papers. Topics covered depend on interests of students and faculty. [0-3]

ECON 399. Ph.D. Dissertation Research. [0-12]

ECON 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

Education of the Deaf

MDE 5207. American Sign Language I. This introductory course includes basic communication skills of American Sign Language and “contact” language (e.g., nonmanual markers, fingerspelling, numbers, basic vocabulary, classifiers), the sign system continuum, culture implications, and media resources available. Open to all Hearing and Speech students. Requires faculty approval. FALL only. [3]
MDE 5208. American Sign Language II. This is an intermediate course in American Sign Language that includes an in-depth look at the linguistics of ASL (e.g., morphology, syntax, phonology, and semantics) and current readings and research in the field. Prerequisite: one 3-credit, college level course in ASL. Requires faculty approval. SPRING only. [1-3]

MDE 5308. Language and Literacy in Children with Hearing Loss. This course presents an overview of normal language acquisition and the challenges imposed by a hearing loss. A variety of methods and materials to develop oral and written language and reading will be included. Practical methods of assessment, supportive strategy development, and curricular adaptations for children with hearing loss will be explored. SUMMER. [3]

MDE 5312. Psychology and Culture of the Deaf. Presentation and discussion of significant historical and current issues relating to the deaf population. Primary focus will be on psychological development, educational/methodological models, and deaf culture. Although the principal focus is on the psycho/social and cognitive/intellectual development of deaf individuals through the lifespan, a general survey of other areas of exceptionality is made with emphasis on the implications for the deaf child with additional disabilities and/or special needs. SPRING. [2]

MDE 5320. Introduction to Amplification for Infants and Children. Designed for deaf education and speech-language pathology students. Current issues and trends in conventional amplification for infants and children. Selection, fitting, verification, and validation of traditional amplification options will be addressed including directional vs. omnidirectional microphones, analogue vs. digital instruments, monaural vs. bilateral fittings, and real-ear measures vs. functional aided gain. Hearing aid retention, maintenance, and troubleshooting techniques are addressed. FALL. [2]

Electrical Engineering

EECE 218. Microcontrollers. Microprocessor and microcontroller architecture with emphasis on control applications. Usage of assembly language and interfacing with programs written in high-level languages. Interfacing and real-time I/O with 8-bit microprocessors, control algorithms, and networking with microcontrollers. Graduate credit only for non-majors. Prerequisite: EECE 116; CS 101 or CS 103. Corequisite: EECE 218L. SPRING. [3]

EECE 218L. Microcontrollers Laboratory. Laboratory for EECE 218. A small structured project is required. One three-hour laboratory per week. Graduate credit only for non-majors. Corequisite: EECE 218. SPRING. [1]

EECE 233. Electromagnetics. Introduction to electromagnetic field theory. Maxwell’s equations are developed from the historical approach. Electromagnetic waves are discussed with regard to various media and boundary conditions. Graduate credit only for non-majors. Prerequisite: Physics 116b. Corequisite: Math 196. FALL. [3]

EECE 235L. Electronics I Laboratory. Laboratory for EECE 235. One three-hour laboratory per week. Corequisite: EECE 235. FALL. [1]

EECE 252. Signal Processing and Communications. AM and FM modulation. Also, advanced topics in signal processing are treated. Prerequisite: EECE 214. SPRING. [3]

EECE 253. Image Processing. The theory of signals and systems is extended to two dimensions. Coverage includes filtering, 2-D FFTs, edge detection, and image enhancement. Three lectures and one laboratory period. FALL. [4]

EECE 256. Digital Signal Processing. Applications of Digital Signal Processing (DSP) chips to sampling, digital filtering, FFTs, etc. Three lectures and one laboratory period. Prerequisite: EECE 214. SPRING. [4]

EECE 258. Control Systems II. Modern control design. Discrete-time analysis. Analysis and design of digital control systems. Introduction to nonlinear systems and optimum control systems. Fuzzy control systems. Two lectures and one laboratory. Prerequisite: EECE 257. SPRING. [3]

EECE 261. Mobile and Wireless Networks. Design, development, and applications of mobile applications and services. Topics include wireless technologies, smart phone programming, cloud computing services. Prerequisite: CS 201 or equivalent programming experience. [3]

EECE 276L. Embedded Systems Laboratory. Laboratory for EECE 276. A team-oriented structured project is required. One three-hour laboratory per week. Corequisite: EECE 276. FALL. [1]

EECE 277. FPGA Design. Design and applications of field-programmable gate arrays, Electronic Design Automation (EDA) tools for design, placement, and routing. Hardware description languages. Implementation of designs on prototype FPGA board. Prerequisite: EECE 116. [3]

EECE 283. Principles and Models of Semiconductor Devices. Physical principles of operation of the p-n junction, MOS field-effect transistor, and bipolar transistor. Fundamentals of charge transport, charge storage, and generation-recombination; application to the operation of MOSFET and BJT. Device modeling with emphasis on features and constraints of integrated circuit technologies. Prerequisite: EECE 235. [3]

EECE 284. Integrated Circuit Technology and Fabrication. Introduction to monolithic integrated circuit technology. Understanding of basic semiconductor properties and processes that result in modern integrated circuit. Bipolar and MOSFET processes and structures. Elements of fabrication, design, layout, and applications as regards semiconductor microelectronic technologies. Prerequisite: EECE 235. SPRING. [3]

EECE 285. VLSI Design. Integrated circuit and fabrication techniques; CAD tools for design, layout, and verification; parasitic elements and their effects on circuit performance; system-level design experience is gained by completing design and layout phases of a project. Prerequisite: EECE 116, EECE 235. FALL. [3]

EECE 286. Audio Engineering. Engineering aspects of high fidelity sound reproduction, with emphasis on digital audio and loudspeakers. Analog-to-digital and digital-to-analog conversion, data storage, perceptual coding, loudspeaker design. Prerequisite: EECE 213, EECE 235. [3]

EECE 288. Optoelectronics. Fundamentals and applications of light generation, propagation, and modulation in passive and active optoelectronic components. Waveguides, lasers, electro-optic modulators, and emerging optoelectronic technology for optical communication, computing, and sensing applications. Prerequisite: EECE 233. SPRING. [3]

EECE 291. Special Topics. [Variable credit: 1-3 each semester]

EECE 292. Special Topics. [Variable credit: 1-3 each semester]

EECE 304. Radiation Effects and Reliability of Microelectronics. The space radiation environment and effects on electronics, including basic mechanisms of radiation effects and testing issues. Total dose, single-event, high-dose-rate, and displacement damage radiation effects. Effects of defects and impurities on MOS long-term reliability. [3]

EECE 305. Topics in Applied Magnetics. Selected topics in magnetism, magnetic properties of crystalline and non-crystalline materials; ferromagnetic materials for electronics and microwave applications, resonance phenomena. Prerequisite: EECE 302. [3]

EECE 306. Solid-State Effects and Devices I. The semiconductor equations are examined and utilized to explain basic principles of operation of various state-of-the-art semiconductor devices including bipolar and MOSFET devices. [3]

EECE 341. Advanced Analog Electronics. Analysis and design of analog electronic circuits with emphasis on integrated circuits. Topics include operational amplifiers, wideband amplifiers, multipliers, and phase-locked loops. FALL. [3]

EECE 342. Advanced Digital Electronics. Analysis and design of digital electronic circuits with emphasis on integrated circuits. Topics include logic families, semiconductor memories, and the analog digital interface. [3]

EECE 343. Digital Systems Architecture. Architectural descriptions of various CPU designs, storage systems, ISP systems, parallel and von Neumann processors and interconnection networks will be studied. [3]

EECE 354. Advanced Real-Time Systems. Fundamental problems in real-time systems, with focus on modeling, analysis, and design. Topics include: scheduling theory and techniques, time synchronization, time- and event-triggered systems, distributed architectures, advanced programming languages for real-time systems. Literature reviews and projects. [3]

EECE 356. Intelligent Systems and Robotics. Concepts of intelligent systems, AI robotics, and machine intelligence, using research books and papers. Emphasis on how AI, brain research, soft computing, and simulations are advancing robotics. Class projects. [3]

EECE 357. Advanced Image Processing. Techniques of image processing. Topics include image formation, digitization, linear shift-invariant processing, feature detection, and motion. Prerequisite: MATH 175; programming experience. FALL. [3]

EECE 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit 0-12]

EECE 389. Master of Engineering Project.

EECE 391. Seminar. [1]

EECE 392. Seminar. [1]

EECE 393. Advanced Seminar for Ph.D. Candidates. [1]

EECE 394. Advanced Seminar for Ph.D. Candidates. [1]

EECE 395. Special Topics. Based on research and current developments in electrical engineering of special interest to staff and students. [3]

EECE 396. Special Topics. Based on research and current developments in electrical engineering of special interest to staff and students. [3]

EECE 397. Independent Study. Readings and/or projects on advanced topics in electrical engineering under the supervision of the staff. Consent of instructor required. [Variable credit: 1-3 each semester]

Engineering Management

ENGM 242. Technology Marketing. Strategies for marketing technology-based products and services. Demand analysis, segmentation, distribution, and personal selling. Economic analysis from inception to end use. Prerequisite: ENGM 221, junior standing. FALL. [3]

ENGM 251. Finance and Accounting for Engineers. Time value of money, capital budgeting and financing, financial accounting and reporting, double entry bookkeeping, taxation, performance ratio measurements, and working capital management. Probabilistic models for expected net present value and rate of return, dividend pricing models for alternative growth scenarios, cost and market based models for average cost of capital, taxation algorithms, and regression analysis for individual firm betas. Prerequisite: Junior standing. FALL, SPRING, SUMMER. [3]

ENGM 253. Technology-Based Entrepreneurship. Identification and evaluation of opportunities: risks faced by entrepreneurs, market assessment, capital requirements, venture capital acquisition, SBIR/STTR funding, legal structures, tax implications, and liquidity events for technology-based enterprises. Prerequisite: Junior standing. FALL. [3]

ENGM 254. Operations and Supply Chain Management. Manufacturing and service strategies, supply chain design, and advanced operations topics. Logarithmic learning curve and break-even analysis, assembly line balancing, waiting line and queuing theory, statistical quality control including process capability, acceptance and work sampling, inventory control models, and performance measurements. Prerequisite: Junior standing. FALL. [3]

ENGM 272. Enterprise System Design. Design of complex enterprise systems and processes including enterprise requirements analysis, process mapping, modeling, performance measurement, benchmarking, solution development, and change management. Prerequisite: Junior standing. FALL, SPRING. [3]

ENGM 274. Program and Project Management. Scheduling, cost estimation/predictions, network analysis, optimization, resource/load leveling, risk/mitigation, quality/testing, international projects. Term project required. Provides validated preparation for the Project Management Institute CAPM certification for undergraduates or the PMP for graduate students. Credit
given for only one of ENGM 274, CE 286 or EECE 295. Prerequisite: Junior standing. FALL, SPRING, SUMMER. [3]

ENGM 275. Technology Assessment and Forecasting. Methods of forecasting technological advancements and assessing their potential intended and unintended consequences. Delphi method, trend exploration, environmental monitoring, and scenario development. Prerequisite: Junior standing. SPRING. [3]

ENGM 276. Product Development. Project-based course focused on the methods for designing the design, development, and commercialization of new products. Generating product concepts, developing a prototype strategy, modeling financial returns, securing intellectual property, designing retail packaging, and performing market testing to establish an optimal price. Teams include Engineering and MBA students. Prerequisite: ENGM 221; ENGM 274 or CE 286 or EECE 295; junior standing. SPRING. [4]

ENGM 291. Special Topics. [Variable credit 1-3 each semester]

ENGM 292. Special Topics. [Variable credit: 1-3 each semester]

English

ENGL 219. Anglo-Saxon Language and Literature (Formerly 296a). The study of the Old English language. Selected historical and literary prose. Short heroic poems. Serves as repeat credit for students who completed 296a before fall 2012. [3]

ENGL 247. Advanced Poetry. Formal analysis and close reading of major poems in the extended canon of British and American poetry. Related examples of historical, theoretical, and applied criticism. [3]

ENGL 259. New Media. History, theory, and design of digital media. Literature, video, film, online games, and other interactive narratives. [3]

ENGL 288a. America on Film: Art and Ideology. American culture and character through film, film theory, and literature. [3]

ENGL 288. Special Topics in English and American Literature. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ENGL 288W. Special Topics in English and American Literature. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

ENGL 291. Special Topics in Creative Writing. Advanced instruction in creative writing in emerging modes and hybrid genres. [3]

ENGL 301. Seminar in Middle English Literature. [4]

ENGL 303. Graduate Fiction Workshop. [May be repeated for credit with the program director’s approval] [4]

ENGL 304. Graduate Poetry Workshop. [May be repeated for credit with the program director’s approval] [4]

ENGL 305. Graduate Nonfiction Workshop. [May be repeated for credit with the program director’s approval] [4]

ENGL 307. Literature and the Craft of Writing. [May be repeated for credit with the program director’s approval] [4]

ENGL 325. Seminar in Modern British and American Literature. [4]

ENGL 326. Introduction to Literary Modernism. [4]

ENGL 337a. Introduction to Literary Theory. [4]

ENGL 337b. Introduction to Literary Theory. [4]

ENGL 350. Special Problems in English and American Literature. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 4 credits per semester of enrollment. [1-4]

ENGL 355. Special Topics in English and American Literature. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

ENGL 369. Master’s Thesis Research. [0]

ENGL 370. Master of Fine Arts Thesis Research. [1-8]

ENGL 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

ENGL 398. Non-Candidate Research. [0]

ENGL 399. Ph.D. Dissertation Research. [0-12]

ENGL 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

Environmental Engineering

ENVE 252. Physical Hydrology. Development of fundamental bases of hydrological processes. Land-atmosphere processes, surface-water flows, soil moisture dynamics, and groundwater flows. Exposition of physical principles, their embodiment in mathematical models, and their use in interpreting observations in the field and laboratory. Prerequisites: CE 203 or ME 224 or ChBE 230 or EES 255. FALL. [3]

ENVE 254. Energy and Water Resources. Scientific, technological, philosophical, and social issues surrounding approaches to carbon-based energy and alternative energy resources, management of carbon through sequestration, supplying and treating water for agriculture, communities, and industry, and changing climate impacts on regional distribution of water resources. SPRING. [3]

ENVE 260. Solid and Hazardous Waste Management. An introduction to solid municipal and hazardous waste management including generation, characterization, collection, treatment and disposal. Emphasis given to the legal requirements, risk assessment and management, costs and policy considerations including pollution prevention, recycling and substitution. SPRING. [3]

ENVE 262. Hydrology. The hydrologic cycle, study of precipitation, evapotranspiration, hydrometeorology, stream flow, flood flow, flood routing, storm sewer design, detention basin design, and water quality. Prerequisite: CE 203, CE 227. FALL. [3]

ENVE 264. Environmental Assessments. Design and conduct of environmental assessments to evaluate risks posed by infrastructure systems or environmental contamination. Impact analyses for sources, infrastructure modifications, due diligence environmental audits, and contaminated site remedial investigations. Prerequisite: Senior standing. FALL. [3]
ENVE 270. Environmental Thermodynamics, Kinetics, and Mass Transfer. Examination of fundamental environmental processes and phenomena that provide the analytical tools necessary to solve a broad range of environmental problems. These tools include equilibrium phenomena, process rate and mass transport phenomena. Prerequisite: CHEM 102A-B, MATH 198, CE 226, senior standing. SPRING. [3]

ENVE 271. Environmental Chemistry. Theoretical aspects of physical, organic, and inorganic chemistry applied to environmental engineering. Estimation of chemical parameters based on thermodynamic and structural activity relationships, kinetics of chemical reactions, equilibrium processes in the environment, including the carbonate system, metal complexation and precipitation. Prerequisite: CHEM 102A-B, senior standing. FALL. [3]

ENVE 272. Biological Unit Processes. Principles of biology and their application to wastewater treatment processes with emphasis on microbial ecology, bioenergetics, and the role of chemical structure in biodegradability. Utilization kinetics of inhibitory and non-inhibitory organic compounds. Biological process analysis and design (aerobic and anaerobic) for municipal and industrial wastewaters, using a mass balance approach. Prerequisite: Senior standing. SPRING. [3]

ENVE 273. Environmental Characterization and Analysis. Acquisition and interpretation of environmental data. Principles of chemical measurement, sample collection and sample program design; laboratory safety and good laboratory practices; analytical instrumentation and methods; quality assurance and quality control; and statistical interpretation of data. Hands-on experience through demonstrations featuring state-of-the-art analytical instrumentation. Prerequisite: Junior standing, CE 226, ENVE 271. SPRING. [3]

ENVE 274. Surface Water Quality Modeling. Analysis of physical, chemical, biological, and physiological contaminants in streams, lakes, and estuaries, and surface water/groundwater interfaces. Analytical and numerical modeling techniques, one- and two-dimension computer simulation of surface water quality. Prerequisite: ENVE 270. SPRING. [3]

ENVE 277. Physical/Chemical Unit Processes. Principles of mass transfer, chemistry, and chemical reactor technology applied to the design and operation of water and wastewater treatment processes. Unit processes such as coagulation/flocculation, sedimentation, filtration, carbon adsorption, ion exchange, air stripping, precipitation, chemical oxidation and chemical reduction as alternatives for the treatment of drinking water and industrial wastewaters. Prerequisite: CE 226, senior standing. SPRING. [3]

ENVE 285. Introduction to Nuclear Environmental Engineering. The nuclear fuel cycle and environmental and societal impacts associated with its traditional implementation. Technical and programmatic challenges associated with fuel production, and waste management including processing, storage, transportation, decontamination, decommissioning, and environmental restoration. Technologies and approaches for reducing impacts of the nuclear fuel cycle. Prerequisite: Senior or graduate standing. SPRING. [3]

ENVE 296. Enterprise Risk Management. Development of enterprise-wide program for effectively managing risks to human health, the economy, the environment, and society as a whole within public and private sector organizations. Focus on the management process and program implementation, risk assessments and reduction strategies, and influences on risk management decisions internally and externally. Studies of natural disasters, man-made accidents, and intentional acts. Prerequisite: Senior standing. SPRING. [3]

ENVE 312. Pollutant Transport in the Environment. An introduction to the mathematical foundations of fluid mechanics and transport of pollutants in the environment. Fundamental conservation of mass, momentum, and energy equations will be developed. Appropriate initial and boundary conditions and solution techniques will be discussed for a number of applications. Prerequisite: CE 203, Math 198. FALL. [3]

ENVE 325A. Individual Study. Literature review and analysis, or laboratory investigation of special problems under faculty supervision. FALL, SPRING, SUMMER. [Variable credit: 1-4 each semester]

ENVE 325B. Individual Study. Literature review and analysis, or laboratory investigation of special problems under faculty supervision. FALL, SPRING, SUMMER. [Variable credit: 1-4 each semester]

ENVE 325C. Individual Study. Literature review and analysis, or laboratory investigation of special problems under faculty supervision. FALL, SPRING, SUMMER. [Variable credit: 1-4 each semester]

ENVE 332. Storage, Treatment and Disposal of Radioactive Waste. Evolution of current domestic and international approaches, including waste forms, classification, storage and disposal locations, and environmental and safety assessments. FALL. [3]

ENVE 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

ENVE 389. Master of Engineering Project.

Epidemiology

EPID 301. Introduction to Statistical Computing and Programming Workshop. This course is designed for students who seek to develop skills in statistical computing. Students will learn how to use R and STATA for data management, database querying, reporting, data presentation, and data tabulation and summarization. Topics include: organization and documentation of data, input and output of data sets; methods of cleaning data; tabulation and graphing of data; programming capabilities; and an introduction to simulations and bootstrapping. Students will also be introduced to LATEX and SWEAVE for report writing. Students will also be briefly introduced to SAS. [2]

EPID 310. Causal Inference. This course will concentrate on conceptually grasping tools of logic and critical thinking as they apply to epidemiologic research. Our emphasis will be on rigorous definition of a causal effect and the minimal conditions necessary to consistently estimate such effects. In a small group format, we will examine case studies and anchor our discussions in readings from philosophy of science, logic, and probability. We will cover examples of valid and fallacious arguments, probability calculus, probabilistic fallacies, applications of Bayes theorem, the frequentist and Bayesian perspective, counterfactual logic, introduction of directed acyclic graphs (DAG), and interpretation of p-values and confidence intervals in epidemiologic research. [3]

EPID 311. Epidemiologic Theory and Methods I. This is the first of a two-course series on advanced epidemiologic concepts and methods that includes measures of disease frequency, measures of effect, descriptive epidemiology, study designs, bias, misclassification and effect measure modification, and ethics in epidemiologic research. A case-based approach will engage students in demonstrating concepts using actual research data and in critical appraisal of case studies and publications that feature strong and weak examples. [4]

EPID 312. Epidemiologic Theory and Methods II. This second in a two-course series provides an in-depth treatment of concepts and skills in epidemiologic research, including problem conceptualization, study design, data analysis and interpretation. Includes emphasis on how to design studies to best measure etiologic effects and includes advanced discussion of confounding, interaction, and missing data. A continued case-based approach will engage students in demonstrating concepts and methods using the students’ own data. Prerequisite: 311: Epidemiologic Theory and Methods I. [4]

EPID 315. Scientific Writing I. Scientific Writing I. Participatory course in which students develop skills in presenting research results in manuscripts, abstracts, and posters. Students work in small groups to write and critique published and unpublished manuscripts, with a focus on understanding
the essential components of a scientific manuscript or presentation, as well as the process of publishing in the peer-reviewed literature and managing reviewer and editor comments and requests. [1]

EPID 316. Research Planning Workshop Research Planning Workshop. This course is designed to guide students through the initial stage of formulating an epidemiologic research topic and plan, prior to the development of a full research proposal. [1]

EPID 317. Public Health Ethics. Public Health Ethics. Basic ethical rationales underlying concerns central to public health. These include: ethical reasoning; concepts of justice; the influences of religion; principles of interacting with communities; professional conduct; and research ethics. SUMMER [1]

EPID 322. Epidemiologic Methods: Design and Analysis with Time-to-Event Data. Epidemiologic Methods: Design and Analysis with Time-to-Event Data. Concepts and applications in survival analysis and analysis of incidence rates, including truncation and censoring, life tables, non-parametric approaches (e.g. Kaplan-Meier, log-rank), semi-parametric approaches (e.g. Cox models, proportional hazards regression), parametric approaches (e.g. Weibull, gamma regression) accommodating time-dependent exposures, Poisson regression, sensitivity analysis, bootstrapping, and multiple imputation. [4]

EPID 325. Scientific Writing II - Proposal Development in Epidemiology. Scientific Writing II - Proposal Development in Epidemiology. Participatory course in which each student develops a high quality, detailed research proposal suitable for submission to NIH or AHRQ that includes both a technical proposal and a draft budget justification. Includes lecture, in-class exercises and group processes. SPRING.

EPID 326. Field and Clinical Methods in Epidemiology. Field and Clinical Methods in Epidemiology. Practical research skills for clinical investigators, including instrument development, project management, data management, data analysis, and the communication of research results. SPRING. [1]

EPID 331. Seminar in Quantitative Methods and Measurement. Concepts and application of cross-cutting tools used for unique and/or specialized types of measurement and instrument development for areas such as physical activity, clinical laboratory tests, and imaging studies. May be repeated. [2]

EPID 332. Advanced Methods for Epidemiology. These methods electives will be taught in modular format, most often with three modules on related methods topics, which will vary annually. Students will explore methodological issues in epidemiology like measurement error, missing data, intermediate variables, complex study designs, meta-analysis, splines, propensity scores, simulation. Exercises with provided datasets and the student’s own data will be included. May be repeated. [1-3]

EPID 333. Analytic Techniques for Genetic Epidemiology. This course will take an example-based approach to provide students with the skills necessary to conduct statistical association analysis of genetic data from human populations for genetic epidemiology studies. Topics will include quality control, statistical methods for association testing, common study design issues, future directions of genetic epidemiology and advanced topics. HGEN 330, HGEN 340, MP&B 341 recommended.

EPID 340. Content Area Intensives. These intensives are offered on a rotating basis and taught by faculty with research expertise in the content area of focus. Areas of epidemiology may include cancer, cardiovascular disease, child health, chronic disease/diabetes, genetics, global health, health care, infectious disease, nutrition, pharmacoepidemiology, reproductive, and social. May be repeated. [1-3]

EPID 357. Decision Analysis and Cost Effectiveness. Decision Analysis and Cost Effectiveness. Overview and practice of conducting decision analysis, including cost effectiveness in epidemiologic research and to the translation and utility of epidemiologic data. FALL. [3]

EPID 358. Molecular Techniques for Public Health Records. Molecular Techniques for Public Health Records. This course presents an introduction to the principles of the molecular techniques used in epidemiologic investigations. Emphasis will be on the development of a general understanding of the techniques and vocabulary necessary to communicate with researcher and laboratory personnel involved in the study of disease both at the individual and population level. FALL. [3]

EPID 360. Advanced Predictive Modeling and Simulation. Advanced Predictive Modeling and Simulation. Exploration of the underlying philosophy and approach to predictive modeling. Includes practical experience in developing predictive models and simulations, including measures of fit, statistical approaches to building and comparing models, and approaches to best reporting the results and implications of such methods. SPRING. [3]

EPID 370. Current Topics in Research. Students attend weekly presentations selecting from the Vanderbilt Epidemiology Center Seminar Series, Biostatistics Clinic, clinical grand rounds on topics related to content area interests, and other relevant seminars. Students will convene with faculty to reflect on and critique components of research presentations relevant to the students’ interests and to the contemporaneous topics being covered in the core epidemiology curriculum. Course assignments will focus on critical appraisal of a methodologic challenge identified in a seminar setting that has immediate relevance to the student’s own research. May be repeated. [1]

EPID 371. Special Topics Seminar in Epidemiology. Faculty offer small groups of students a study course on a topic of mutual interest and concern in the faculty member’s area of expertise. May be repeated with topic change. [1-3]

EPID 372. Additional Readings in Epidemiology. Additional readings in specialized epidemiologic topics will be explored in depth under the guidance of a faculty member. May be repeated. [1-3]

EPID 373. Independent Study in Epidemiology. Designed to allow the student an opportunity to master advanced skills in epidemiology while pursuing special projects under individual members of the faculty in their areas of expertise. May be repeated. [1-3]

EPID 374. Advanced Readings in Epidemiologic Context, Thought, and History. Reading and discussion of seminal literature in the history of epidemiology as well as contemporary literature that provides social and cultural context for the development of the field, challenges to the application of epidemiologic findings, consideration of roles and history of public health advocacy, and exploration of topics like social justice and research ethics through the lens of fiction, nonfiction, and scientific literature. A core reading will be selected to launch each semester and students will work as a group to select the balance of the readings for the semester from a recommended source list. Discussions will be facilitated by faculty and students including guest lecturers. Minimum of masters training in quantitative discipline and research experience in epidemiology or related field is required; other graduate students with permission of the instructor. May be repeated. [1-3]

EPID 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

European Studies

EUS 220. Religion and Politics in Modern Europe, 1648-Present. Toleration in the Enlightenment; the French Revolution; antisemitism; genocide; secularism and political Islam. [3]

Financial Economics

French

FREN 289. Independent Study. Content varies according to the needs of the individual student. Primarily designed to cover pertinent material not otherwise available in the regular curriculum. May be repeated for a total of 12 credits over a four-semester period, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for four semesters of FREN 289]

FREN 300. Introduction to Research. Materials and methods of scholarly research, with attention to their relation to theories of literature. [4]

FREN 310. Foreign Language Learning and Teaching. (Also listed as German 310, Portuguese 310, and Spanish 310) Principles and practices of teaching a second language, with concentration on recent interactive and communicative models of foreign language instruction. Goals of the course are 1) to introduce principles of Second Language Acquisition and learning, 2) to critically read relevant literature in the area(s), and 3) to develop FL instructor’s awareness through reflective and critical thinking. Classroom observations, journal writing, development of materials, and a small action-research project are expected. Required of all entering teaching assistants. [4]

FREN 332. Seminar in Medieval French Literature. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

FREN 338. Seminar in Sixteenth-Century French Literature. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

FREN 342. Seminar in Seventeenth-Century French Literature. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

FREN 353. Seminar in Eighteenth-Century French Literature. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

FREN 357. Seminar in French Film. Theory and practice of French-language film, often in comparative context, for example in a side-by-side study of French and Italian New Wave. No credit for students who completed 390 section 1 in fall 2009. [4]

FREN 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

FREN 380. French Literary Theory. Literary theory as it has been shaped by and shapes the French tradition. [4]

FREN 388. Seminar in Francophone Literature. Literature of the French-speaking world (‘La Francophonie’). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

FREN 394. Special Topics in French Studies. Problems, themes, or issues in literature, language, or culture approached in ways that transcend traditional chronological distinctions. [4]

FREN 397. Apprenticeship in Undergraduate Teaching. Supervised experience and instruction of pedagogical practices in foreign language and literature courses. May be repeated once for credit. Consent of supervisor and Director of Graduate Studies required. [2]

FREN 399. Ph.D. Dissertation Research. [0-12]

FREN 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

German

GER 213. Conversation and Composition: Current Events. Advanced German language course focusing on oral and writing proficiency. Topics on current events and societal developments. Prerequisite: 104. [3]

GER 214. Conversation and Composition: Contemporary Culture. Advanced German language course focusing on oral and writing proficiency. Topics on contemporary media and culture. Prerequisite: 104. [3]

GER 216. Business German. The culture of the German business community; differences that hinder communication between German-speakers and non-German-speakers in the business setting; development of aural/oral and written skills. Business practices, policies, and laws in German-speaking countries; advertising and marketing strategies, letters, vita, phone calls, and personal interviews. [3]

GER 220. Advanced Grammar. Study of word formation and sentence structure in modern German, supplemented by contemporary readings, with discussion. Not open to students who have participated in the Regensburg exchange program. [3]

GER 221. German Culture and Literature. Introduction to major periods and genres of German cultural production from the Middle Ages to the present; overview of major social and political developments. Literary, philosophical, and other texts. Readings and discussions in German. [3]

GER 222. German Culture and Literature. Continuation of 221. Introduction to major periods and genres of German cultural production from the Middle Ages to the present; overview of major social and political developments. Literary, philosophical, and other texts. Readings and discussions in German. [3]

GER 235. German Romanticism. The contributions of Schlegel, Tieck, Novalis, Eichendorff, and others to literature, philosophy, and theory. Intellectual, social, and political currents. [3]

GER 237. Women and Modernity. Women in German literature from the eighteenth century to the present, focusing on questions of sexuality, political emancipation, artistic identity. No knowledge of German required. [3]

GER 243. The Aesthetics of Violence: Terror, Crime, and Dread in German Literature. The “dark” side of imagination in twentieth-century German literature including history and theory of modern art, emphasis on literary representation, mutual influences between aesthetic reflection and political action. No knowledge of German required. [3]
GER 244. German Fairy Tales: From Brothers Grimm to Walt Disney. The German fairy tale tradition and its role in American culture. Taught in English. [3]

GER 248. German Lyric Poetry-Form and Function. Lyric forms as a reaction to personal trauma, collective desire, scientific and technological advances, and social change since the Thirty Years’ War. Love, loss, liberation. Students compose poems in imitation of classic examples of the folk song, ballad, sonnet. [3]

GER 263. The Age of Goethe-Weimar 1775 to 1805. Rational pragmatism, aesthetic innovation in response to Kant and French Revolution. Readings drawn from Goethe’s Iphigenia, Hermann und Dorothea, Schiller’s Maria Stuart and Wallenstein, and Wieland’s Oberon. [3]

GER 264. Pleasures and Perils in Nineteenth-Century Theatre. The German drama and dramatic theory from Romanticism up to Naturalism with emphasis on selected works by Kleist, Büchner, Grillparzer, and Hebbel. [3]

GER 265. Revolutionizing Twentieth-Century Theatre. German drama and dramatic theory from Naturalism to the present. Emphasis on Brecht and post-Brechtian drama. [3]

GER 266. Nineteenth-Century Prose. A study of representative works of the main literary trends from Romanticism to Naturalism. [3]

GER 267. The German Novel from Kafka to Grass. A study and interpretation of the main literary trends and major figures in twentieth-century narrative. [3]

GER 270. German Cinema: Vampires, Victims, and Vamps. An analysis of representative German film with special emphasis on its sociocultural and historical context. Discussion will include pertinent theories of cinematography and cinematic narration. Taught in English. [3]

GER 271. Women at the Margins: German-Jewish Women Writers. Examination of themes, forms, and sociocultural issues shaping the work of German-Jewish women writers from the Enlightenment to the present. Readings and discussions in English. [3]

GER 274. Who Am I? German Autobiographies. Canonical and non-canonical texts from the nineteenth and twentieth centuries constructing cultural, religious, and gender identities. Taught in English. [3]

GER 275. Art and Rebellion: Literary Experiment in the 1960s and 1970s. German literature under the conditions of protest and rebellion. Experiments in poetry, prose, and theatre; new directions in art and media theory; historical influences. Taught in English. [3]

GER 278. Dreams in Literature. The difference between sleeping and being awake. Literary and philosophical texts. Novels, short stories, diaries, poems, and drama written within the last two hundred years. Taught in English. [3]

GER 289a. Independent Readings. Designed for majors and qualified undergraduates. Projects are carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 6 credits over a four-semester period in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for four semesters of GER 289a and 289b]

GER 289b. Independent Readings. Designed for majors and qualified undergraduates. Projects are carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 6 credits over a four-semester period in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for four semesters of GER 289a and 289b]

GER 294a. Selected Topics. May be repeated for a total of 12 credits in 294a and 294b combined if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3; maximum of 12 credits total for all semesters of GER 294a and 294b]

GER 294b. Selected Topics. May be repeated for a total of 12 credits in 294a and 294b combined if there is no duplication in topic. Students may enroll in more than one section of this course per semester. [3; maximum of 12 credits total for all semesters of GER 294a and 294b]

GER 310. Foreign Language Learning and Teaching. (Also listed as French 310, Portuguese 310, and Spanish 310) Principles and practices of teaching a second language, with concentration on recent interactive and communicative models of foreign language instruction. Goals of the course are 1) to introduce principles of Second Language Acquisition and learning, 2) to critically read relevant literature in the area(s), and 3) to develop FL instructor’s awareness through reflective and critical thinking. Classroom observations, journal writing, development of materials, and a small action-research project are expected. Required of all entering teaching assistants. [3]

GER 312. Foreign Language Curriculum Development and Evaluation. (Also listed as French 312, Portuguese 312, and Spanish 312) Focus on planning, development, implementation, and evaluation phases of language teaching from a systematic curriculum development perspective. Students are expected to become conversant with the research literature in the area and work on curricular projects according to their interests. An important part of the course will be dedicated to program evaluation, including training in recognized instruments and procedures to analyze and interpret data. They are expected to produce a research-based curricular project. [3]

GER 314. Bibliography and Methods. An introduction to German studies in the U.S., to the resources and practice of literary history and criticism. [3]

GER 316. Literary Theory and Criticism. Selected problems of literary theory, history, and interpretation. [3]

GER 329a. Teaching Program Option: Internship in Advanced Language and Literature Courses. Graduate interns participate in the teaching of advanced language or literature courses and receive training in the writing of syllabi, text selection, testing, the development of supplementary materials, the selection of visual aids. May be repeated for a total of 6 credits, but students may earn only up to 2 credits per semester of enrollment. [1-2; maximum of 6 credits for all semesters of GER 329a]

GER 330. Expressionism. The chief intellectual movement in Germany and Austria from 1910 to 1925. Topics include all genres of literature with frequent references to other disciplines including politics, the pictorial arts, and film. In German. [3]

GER 335. Enlightenment and Its Literary Connections. (Also listed as English 330) Philosophy and literature in the age of reason; emphasis on aesthetic innovation and rise of the modern individual; authors include Locke, Kant, Richardson, and Lessing. [3]

GER 340. Beyond Good and Evil. [3]

GER 350. Graduate Tutorials. Graduate Tutorials. Supervised reading in special areas of German language and literature according to a fixed syllabus. Number, content, and schedule of meetings with the instructor are pre-determined, as are reading assignments, tests, term papers, and grading procedure. Units are related to the content and method of period seminars and other graduate courses and allow students to deepen their knowledge of subjects not covered in depth in formal courses offered by the department. Students may not take more than one unit per semester. [3]

GER 351. Philosophical Backgrounds of German Literature. Survey of German philosophical thinking from Leibnitz to Nietzsche and its importance for German literature from Goethe to Hesse. [3]

GER 369. Master’s Thesis Research. [0]
**GER 379. Non-candidate Research.** Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

**GER 385a. Problems in Germanic Languages and Literatures.** [3]

**GER 385b. Problems in Germanic Languages and Literatures.** [3]

**GER 387. Seminar: Studies in Medieval Literature.** [3]

**GER 388. Seminar: Studies in Literature 1400-1680.** [3]

**GER 389. Seminar: Eighteenth-Century German Literature.** [3]

**GER 390. Seminar: Nineteenth-Century German Literature.** [3]

**GER 391. Seminar: Twentieth-Century German Literature.** [3]

**GER 392. Seminar: Problems of Theory in German Studies.** Author, Archive, Work. [3]

**GER 393. Seminar: Intellectual Constellations.** [3]

**GER 394. Seminar: Society and Ethics.** [3]

**GER 395. The Racial Imagination.** The complex and contradictory history of the idea of “race” as a scientific category. Study of medical, scientific, philosophical, anthropological, and literary texts. No knowledge of German is required. [3]

**GER 399. Ph.D. Dissertation Research.** [0-12]

**GER 3995. Half-time Ph.D. Dissertation Research.** For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

### Greek

**GRK 201. Beginning Greek I.** Elements of classical Greek. Reading of simplified texts from authors of the fifth and fourth centuries B.C. No credit for students who have earned credit for a more advanced Greek language course. [4]

**GRK 202. Beginning Greek II.** Continuation of 201. Completion of the elements of classical Greek through readings from classical authors. Introduction to Homeric and Hellenistic Greek. No credit for students who have earned credit for a more advanced Greek language course. [3]

**GRK 203. Intermediate Greek I: Classical and Koiné Greek.** Review of Greek grammar, and reading from classical and biblical texts. Prerequisite: 202. No credit for students who have earned credit for a more advanced Greek language course. [3]

**GRK 204. Intermediate Greek II: Homer’s Iliad.** Selected reading and interpretation; history and literary characteristics of the Homeric epic; practice in reading of meter. Prerequisite: 203. No credit for students who have earned credit for a more advanced Greek language course. [3]

**GRK 210. The Greek Orators.** Classical Athenian orators, with a focus on Lysias and Demosthenes. Historical context, rhetorical technique, and prose style. Prerequisite: 204. [3]

**GRK 212. The Greek Historians.** Selections from the major Greek historians, especially Herodotus and Thucydides, and study of their philosophy of history; investigation of the development of historical prose writing. Prerequisite: 203. [3]

**GRK 215. The Greek Tragedians.** Selections from the plays of Aeschylus, Sophocles, and Euripides. Survey of the development of tragedy. May be repeated for credit with change of subject matter. Prerequisite: 204. [3]

**GRK 216. Readings in Plato and Aristotle.** Selected readings from the dialogues of Plato and from the ethical writings of Aristotle. Corollary readings and discussions of the pre-Socratic philosophers and the post-Aristotelian schools. Prerequisite: 204. [3]

**GRK 218. Greek Lyric Poetry.** The Greek melic, elegiac, and iambic traditions, with an introduction to the Greek dialects and special emphasis on Archilochus, Tyrtaeus, Alcaeus, and Sappho. Prerequisite: 204. [3]

**GRK 240. Early Christian Writers.** Writings of Greek Christians, from the New Testament to critical works and letters by the Cappadocian fathers. Historical and intellectual context. Rhetoric and style. The Roman East. Prerequisite: 204. [3]

**GRK 289. Independent Study.** Designed for majors wanting to familiarize themselves with works and authors not covered in the regular curriculum. Prerequisite: 6 hours above 204. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of GRK 289]

**GRK 294. Special Topics in Greek Literature.** May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

### Hearing and Speech Sciences

**HRSP 206. Anatomy and Physiology of Speech and Hearing Mechanisms.** The basic processes of speech production, acoustics, and perception. Neuroanatomy, anatomy, physiology, acoustics, and acoustic correlates of sound features. Intended for undergraduates and graduate students outside the Department of Hearing and Speech Sciences. SPRING. [3] Ohde. (Also listed as SLP 5206)

**HRSP 217. Hearing Disorders and Assessment.** An introduction to the major pathologies of the peripheral and central auditory system as well as the medical/surgical treatment of those pathologies, followed by an introduction to the equipment and procedures used to assess auditory function in patients of all ages. FALL. [3] Hornsby.

**HRSP 300. Neurology of Speech and Language.** The structure and function of the nervous system, with emphasis on the neural mechanisms of speech and language. Neurological conditions producing speech and language disorders are surveyed. FALL. [3] Webb. (Also listed as SLP 5300)

**HRSP 304. Child Language Acquisition.** The components and processes of normal language development. Relation to social and cognitive aspects of child development. Survey of developmental psycholinguistic research. FALL. [3] Schueler. (Also listed as SLP 5304)

**HRSP 308. Language and Literacy in Children with Hearing Loss.** This course presents an overview of normal language acquisition and the challenges imposed by a hearing loss. A variety of methods and materials to develop oral and written language and reading will be included. Practical methods of assessment, supportive strategy development, and curricular adaptations for children with hearing loss will be explored. SUMMER. [3] Hayes. (Also listed as MDE 5308)

**HRSP 309. Practicum: Language and Literacy in Children with Hearing Loss.** This practicum provides opportunities for graduate students to incorporate information acquired from HRSP 308 into daily practice to acquire teaching skills and techniques upon which effective learning depends. Corequisite: HRSP 308, SUMMER. [1] Hayes. (Also listed as MDE 5309)

**HRSP 311. Stuttering.** Significant research in the field of stuttering, with emphasis on etiology and therapy. The management of fluency disturbances. SPRING. [3] Conture. (Also listed as SLP 5311)

**HRSP 312. Psychology and Culture of the Deaf.** Presentation and discussion of significant historical and current issues relating to the Deaf population. Primary focus will be on psychological development, educational/methodological models, and Deaf culture. Although the principal focus is on the psycho/social and cognitive/intellectual development of deaf individuals through the lifespan, a general survey of other areas of exceptionality is made with emphasis on the implications for the deaf child with additional disabilities and/or special needs. SUMMER. [2] Hayes. (Also listed as MDE 5312)
HRSP 315. Introduction to Autism Spectrum Disorders. This class will provide an overview of normal social, play, linguistic, and cognitive develop- ment compared to the features and behavioral characteristics of autism spectrum disorders (ASD) and will introduce the student to causative fac- tors and management approaches with ASD. SPRING. [3] Wallace.

HRSP 317. Traumatic Brain Injury. Pathophysiology of traumatic brain injury in children and adults; unique and common sequelae, the evaluation and treatment of cognitive/communicative deficits and special problems of the population. Prerequisite: 300 or 331 or consent of instructor. SUMMER. [3] de Riesthal. (Also listed as SLP 5317)

HRSP 318. Educational Audiology and Aural Habilitation for Chil- dren. A survey of approaches to aural rehabilitation for children. Specific focus will be on intervention for children with hearing loss in educational and other habilitative settings. SPRING. [3] Therpe. (Also listed as AUD 5318)

HRSP 324. Feeding and Swallowing Disorders in Children. This course focuses on the assessment, diagnosis, and management of dys- phagia in children including the role of the speech-language pathologist and multidisciplinary and family-centered, family-supported management. Prerequisite: 319. SPRING. [2] Ashford, Golper. (Also listed as SLP 5324)

HRSP 327. Hearing Loss and Speech Understanding. This course examines various factors that may affect the speech understanding of per- sons with hearing loss. The contribution to the unaided and aided speech understanding of persons with hearing loss of 1) subject factors, such as degree of hearing loss, and deficits in frequency and temporal resolution, and 2) environmental factors, such as, the level and type of background noise, reverberation and talker characteristics, will be examined. Methods for predicting speech understanding will also be discussed. SPRING. [3] Hornsby. (Also listed as AUD 5327)

HRSP 331. Aphasia. The study of aphasia in adults, including the neuro- nanatomical basis, etiologies, symptomatology, assessment, differential di- agnosis, and treatment. SPRING. [3] de Riesthal. (Also listed as SLP 5331)

HRSP 334. Seminar in Neurogenic Communication Disorders. Re- search literature on the relationship between brain and speech-language performance, emphasizing current methodology for studying neurological speech and language disorders. Prerequisite: 300 or 331 or consent of instructor. FALL. [2]

HRSP 336. Voice Disorders. Theories of voice production, with empha- sis upon underlying mechanisms that cause vocal defects. Procedures for group and individual management. SUMMER. [3] Jacobson. (Also listed as SLP 5336)

HRSP 340. Amplification I. Background and development of the design of hearing aids, earmold acoustics, electroacoustic characteristics, per- formance standards and measurement techniques, clinical selection and evaluation procedures. SPRING. [3] Dickinson. (Also listed as AUD 5340)

HRSP 341. Seminar in Audiology. Significant literature in the field of audiol- ogy. Directed study in assigned subject areas. FALL, SPRING, SUMMER. [2]
in Hearing and Speech Sciences. Prerequisite: 318. SPRING, [2-3] Ricketts. (Also Listed as AUD 5354)

HRSP 357. Professional Issues in Communication Disorders. Examines various professional issues within the fields of speech-language pathology and audiology. For example, ethics, malpractice, quality improvement, marketing, reimbursement, multicultural sensitivity, and federal legislation. SPRING. [1] Hale, Webb. (Also listed as SLP 5357)

HRSP 363. Hearing and Aging. A survey of major concepts in gerontology, including demographics, psychosocial aspects of aging, biology of aging, and clinical conditions of the older adult. Physiological changes within the aging auditory system, and clinical issues in audiological assessment and intervention with older hearing-impaired patients. FALL. [3] Rosenfeld. (Also listed as AUD 5363)

HRSP 371A. Research Design and Statistical Analysis. Covers topics in research design and statistics for students preparing for research careers in hearing science, speech science, and communication disorders. Reviews mathematical bases for probability theory and statistical inference. Covers fundamental parametric and nonparametric statistical tests, with extensive discussion of research design in the context of analysis of variance. Presents statistical properties of psychophysical methods and signal detection theory. FALL, SPRING. [3-3] Ashmead. (Also listed as AUD 5371)

HRSP 373. Signals and Systems for Hearing and Speech Sciences. A hands-on laboratory course that concentrates on applications for communications science. The course covers: (1) the fundamentals of analog signals, including the Fourier transform and representation of signals in the time and frequency domains; (2) the fundamentals of analog systems (filters), including representation in the time and frequency domains and the analysis of signals that pass through systems; (3) an introduction to digital signals and digital systems, including digital filter design; and (4) an introduction to MATLAB, a powerful tool for understanding and implementing signals and systems. SUMMER of odd-numbered years. [3] Grantham.

HRSP 375. Seminar in Medical Audiology. Advanced study at the doctoral level of the medical aspects of audiology and the relationship of audiology to otology and neuro-otology. May be repeated for credit. Prerequisite: consent of instructor. [Variable credit: 1-3] (Not currently offered)

HRSP 376. Language Research Methods. This doctoral-level seminar provides an in-depth analysis of research methods to study language development in children of all ages. Methods used within various fields (e.g., linguistics, communication sciences and disorders, developmental psychology) are reviewed. Critical analysis of research articles with typical and atypical language learners.

HRSP 377. Seminar in Speech Perception. The study of the processes and models underlying the perception of speech features. Relevant acoustic correlates for speech perception will be evaluated, and these properties will be emphasized through the generation of synthetic speech. The course will cover the contributions of speech perception research to our understanding of speech development, and language and hearing disorders. SPRING. [3] Ohde.

HRSP 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

HRSP 380. Advanced Seminar in Speech Language Pathology. A doctoral-level course focusing on special topics of interest to faculty and students and based on recent research developments in speech pathology. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING, SUMMER. [3]

HRSP 381. Advanced Seminar in Language. A doctoral-level course focusing on special topics of interest to faculty and students and based on recent research developments in language. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING, SUMMER. [3]

HRSP 382A. Seminar: Research in Audiology. An advanced study of research for the second-year doctoral student. Directed individual research culminating in oral presentation and a manuscript. Prerequisite: consent of instructor. [2-2] (Offered on demand)

HRSP 382B. Seminar: Research in Audiology. An advanced study of research for the second-year doctoral student. Directed individual research culminating in oral presentation and a manuscript. Prerequisite: consent of instructor. [2-2] (Offered on demand)

HRSP 383. Seminar in Auditory and Vestibular Neuroscience. The course is a full semester course that combines a small amount of didactic teaching with seminar discussions to introduce students to the neuroscience of the auditory and vestibular systems. For each topic, the short didactic component introduces/refamiliarizes the students with the basic knowledge required for that particular topic; the seminar component following the didactic material involves a presentation of both classic papers as well as recent papers that represent the state of art in the field. The seminar component will train students to critically read primary literature, to present scientific information in clear and concise fashion, and provide a theoretical foundation for understanding sensory coding and its relationship with perception using the auditory brain as a model system. The group discussion will also explore the impact of the findings in the papers on various aspects of the field. NOTE: For Ph.D. students, completion of an introductory neuroscience course, or advisor approval required. For other students, permission of instructor required. FALL, [3] Ramachandran, Hackett, Wallace.

HRSP 384. Advanced Seminar in Audiology. A doctoral-level course focusing on special topics of interest to faculty and students based on recent research developments in audiology. May be repeated for credit. Prerequisite: consent of instructor. FALL, SPRING, SUMMER, [3] Staff.

HRSP 385. Instrumentation for Hearing and Speech Sciences: Stimulus Generation, Measurement, and Calibration. A hands-on introduction to the principles and techniques of setting up equipment for hearing and speech perception experiments. Students are exposed to analog generators (noise generators, function generators, oscillators, computer-controlled digital-to-analog converters) processing devices (attenuators, filters, mixers, amplifiers), terminating devices (earphones, loudspeakers, analog-to-digital converters), and measurement devices (oscilloscope, voltmeter, spectrum analyzer). Students will learn to design and implement circuits involving these various devices, and to measure and calibrate various kinds of acoustic stimuli. FALL of odd-numbered years. [3] Grantham.

HRSP 386. Instrumentation for Hearing and Speech Sciences: Matlab Programming with Real-Time Applications. An introduction to the standard MATLAB computing language in a Windows environment. Basic programming concepts including data types and storage, data input and output, conditional execution, iterative programming, and the use of functions. The goal is for the student to become sufficiently comfortable with MATLAB (and with the concept of programming languages in general) to develop programs to solve specific computational problems too tedious to solve by calculator. The last third of the course will be devoted to the application of MATLAB programming to real-time laboratory problems. Prerequisite: 385. SPRING of even-numbered years. [3] Grantham.

HRSP 387. Spatial Hearing. An advanced treatment of the perception by humans of auditory objects in space, including laboratory demonstrations. Topics include (1) binaural processing (lateralization, binaural detection); (2) localization and spatial resolution in the free-field; (3) auditory distance perception; (4) the precedence effect: localization in reverberant spaces; and (5) the central auditory nervous system: binaural pathways. FALL of even-numbered years. [3] Grantham.

HRSP 388. Independent Study and Readings in Speech Pathology. FALL, SPRING, SUMMER. [1-3]
HRSP 389. Independent Study and Readings in Audiology. FALL, SPRING, SUMMER. [1-3]

HRSP 398. Preliminary Doctoral Research. [0]

HRSP 3995. Half-Time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

Hebrew

HEBR 201. Advanced Hebrew Grammar. Emphasis on syntax and grammar supplemented by listening, speaking, and reading. No credit for students who have earned credit for a more advanced Hebrew language course. Prerequisite: 113b. [3]

HEBR 202W. Advanced Hebrew Composition. Development of writing skills through the study of short stories, poems, articles, television, and web materials. Prerequisite: 201. [3]

History

HIST 205. Play and Pleasure in Early Modern Japan. Cultural history of Tokugawa Japan (1603-1868), with emphasis on daily life and popular entertainment in the capital of the warrior government, Edo (present-day Tokyo). Woodblock prints, pleasure quarters, kabuki theatre, commoner carnivals, and popular literature. [3]

HIST 206. Post-WWII Japan. Japanese culture and society from the end of WWII to the present. The impact of war experiences on postwar Japan. The political nature of cultural production. [3]

HIST 210. Russia: The U.S.S.R. and Afterward. Russian history since the 1917 Revolution, Overview of the old regime; revolution and civil war; the Soviet "Roaring '20s"; Stalinism and the totalitarianized society; World War II. Postwar Soviet society and culture; de-Stalinization and the sixties generation; Gorbachev, perestroika, and disintegration; contemporary history. [3]

HIST 212a. India and the Indian Ocean. Cultures along the Indian Ocean coastline from Roman times to 1800, especially South Asia. Coastal societies and politics, Islam, pilgrimage and trade, economic zones, and cultural ties. Pirates, seafarers and merchants; diasporas and genealogies. The entry of European trading companies and debates on trade and empire. [3]

HIST 213. Muhammad and Early Islam. Early Arabian society, Judaism and Christianity in Arabia; Muhammad and the birth of Islam, the conquests, Islamicization, Arabization; Jewish influences in early Islam, the medieval Islamic world. [3]

HIST 216. Medicine in Islam. Emergence of medicine in the Islamic world. Links with other traditions. Doctors and society; conventional medical practice in hospitals; prophetic medicine; Jewish and Christian doctors in Islam; pharmacology; developments in the nineteenth-century. No credit for students who have earned credit for 115F section 21. [3]

HIST 217. Islam and the Crusades. Ideology; successes and failures; history and character of Crusader enterprises in the Holy Land and elsewhere. Muslim religious, political, ideological, and social reactions. Islamic culture and the West; relations among Crusaders, Muslims, and Jews. [3]

HIST 219. Last Empire of Islam. The Ottoman "long nineteenth century," 1789 to 1923. The Reforms (Tanzimat), state patriotism, intercommunal relations, national "awakenings," and the emergence of a public sphere. Historiographical issues, such as perceptions of the empire as the "Sick Man of Europe" and debates over its decline. [3]

HIST 222. Medieval and Renaissance Italy, 1000-1700. Transformation of Italy from "medieval" society to the "Renaissance." Cultural, economic, and social developments, especially connections among wealth, status, and patronage. Meaning and applicability of the term "Renaissance." [3]

HIST 223. Medieval Europe, 1000-1350. Economic expansion and the formation of national states; the medieval Church and the revival of learning in the twelfth and thirteenth centuries. [3]

HIST 225. Reformation Europe. The political, intellectual, and social conditions underlying the Protestant revolt. The Reformation of Luther, Calvin, Zwingli, Loyola, and other religious reformers considered within the context of the general developments of sixteenth-century history. [3]

HIST 226. Revolutionary Europe, 1789-1815. Political, cultural, and economic upheavals in the late eighteenth and early nineteenth centuries; the French Revolution and Napoleon, romanticism, and early industrialization. Emphasis on Britain, France, and Germany. [3]

HIST 227. Nineteenth-Century Europe. Major political, social, economic, and cultural developments from 1815 to 1914. [3]

HIST 228. Europe, 1900-1945. Political, socioeconomic, cultural, and colonial history of Europe from 1914 to the fall of Hitler. [3]

HIST 229. Europe since 1945. Origins of the Cold War; political and social transformations, East and West; the breakup of colonial empires; ideological and military tensions; intellectual and cultural trends. [3]

HIST 230. Twentieth-Century Germany. The turbulent history of Germany, as it went from authoritarian state to volatile democracy, to National Socialist dictatorship, to divided country, and to reunification. Special emphasis placed on the Nazi dictatorship, its origins and legacy. [3]

HIST 234. Modern France. The fall of Napoleon in 1815 to the present. Emphasis on politics. Major economic, social, cultural, and intellectual developments. [3]

HIST 238. Shakespeare's Histories and History. Readings from a variety of plays by Shakespeare and his contemporaries. Significant political and cultural issues from the 1590s in early English history. No credit for students who earned credit for 294 section 2 in fall 2008. [3]

HIST 239a. The Real Tudors. Marital, dynastic history of the Tudors in relation to religious and political change through and after the English Reformation. Court politics, ideological conflict, and the rise of an increasingly confessionalized international politics. Offered on a graded basis only. [3]

HIST 243W. The English Atlantic World, 1500-1688. English overseas expansion, including conquest of Ireland, exploration and conquest of the New World. Formation of imperial and American cultures and of racism, the slave trade, Indian relations, and migration from the British Isles. [3]

HIST 245. Reform, Crisis, and Independence in Latin America, 1700-1820. Reorganization of the Spanish and Portuguese empires; maturation of transatlantic societies; and revolutions for independence. [3]

HIST 246. Colonial Mexico. The cultural history of major pre-Columbian groups; the conquest and settlement by the Spaniards; colonial society through independence in 1821. [3]

HIST 247. Modern Mexico. From independence in 1821 to the present. Political instability of the nineteenth century; the Porfrian dictatorship and the revolution of 1910; evolution and modernization of Mexico. [3]
HIST 248. Central America. Iberian and Amerindian background, colonial society; independence; growth of the plantation economy; the U.S. presence; political and social revolutions in the twentieth century. [3]

HIST 249. Brazilian Civilization. From pre-Columbian times to the present. Clash and fusion of Portuguese, Amerindian, and African cultures; sugar and slavery; coffee and industrialization; race relations; dictatorship and democracy in the twentieth century. [3]

HIST 251. Reform and Revolution in Latin America. Comparative analysis of revolutions and reform movements in twentieth-century Latin America focusing on land tenure, social classes, political culture, economic structures, and foreign influences. [3]

HIST 253. African Religions in the Americas. An interdisciplinary study of Islam, Christianity, and Animist religions in pre-colonial Africa; their transformation and practice in the Americas. Case studies of Brazil, Cuba, and the American South. Material culture studies and visits to local museum exhibits. [3]

HIST 253a. Latin America and the United States. The complicated relationship between Latin America and the United States from the early nineteenth century to the present. Role of ideology, national security, economic interests, and cultural factors in shaping inter-American affairs. [3]

HIST 254a. Race and Nation in Latin America. Late nineteenth century to the present. Social, political, and cultural constructions of belonging. Citizenship and state building. Immigration, education, urbanization, civil and international wars, and gender and sexuality. Case studies draw from the Andes, Spanish Caribbean, Southern cone, and Brazil. Serves as repeat credit for students who completed 254 section 2 in fall 2010 or section 1 in fall 2009. [3]

HIST 258. American Indian History before 1850. Indian nations’ interaction with each other and with European colonies. Resistance and adaptation to colonialism. Early development of United States Indian policy. [3]

HIST 259. American Indian History since 1850. American Indians in the United States and Canada. Their responses to government policies and other forces. Cultural, socioeconomic, and political change among Indian communities. [3]

HIST 261. The Founding Generation. American history from the 1760s to the 1820s. The Revolutionary War, the Constitution, formation of national government. Political conflict, national culture, commerce, diplomacy, and race and gender in an age of revolution. Primarily for Juniors and Seniors. [3]

HIST 262. The Old South. The South’s origins in European expansion; the rise of the plantation economy and society, and its identification with slavery; the differing experiences of whites and blacks, planters and non-planters; the relationship of the region to the larger United States; the Confederate attempt at independence and the collapse of the slave regime. [3]

HIST 263. The New South. The aftermath of war and emancipation and the era of Reconstruction; social change and dislocation in the late nineteenth century; the Populist Revolt; the origins of segregation and one-party politics. Twentieth-century efforts to modernize the region; the economic, political, and Civil Rights revolutions of the mid-twentieth century; the South in modern American society and politics. [3]

HIST 264. Appalachia. The region from first European intrusions to the present. Frontier-era white-indigenous contact, antebellum society and economy, relations with the slave South, the Civil War and postwar politics, increasing social strainings, industrialization and labor conflict, poverty and outmigration. Examination of mountain culture, tourism, and the construction of the “hillbilly” image. [3]

HIST 270. The U.S. and the World. From the winning of independence to the Great Depression. Relationships among foreign policy, ideology, domestic politics, and social and economic change. [3]

HIST 271. The U.S. as a World Power. From the origins of World War II, through the Cold War, to the present day. Relationships among foreign policy ideology, domestic politics, and social economic change. [3]

HIST 272a. Globalizing American History, 1877-1929. Immigration; Diaspora; social movements; transnational social reform campaigns; military, colonial, and corporate empire-building; the expansion of missionary activity; and America’s participation in a world war. [3]

HIST 280. Modern Medicine. Scientific, social, and cultural factors influencing the rise of modern medicine. Europe and the U.S., 1750 to the present. [3]

HIST 281. Women, Health, and Sexuality. Women as patients and healers in the U.S. from 1750 to the present. Topics include women’s diseases and treatments; medical constructions of gender, sexuality; childbirth, birth control, abortion; midwives, nurses, and doctors. [3]

HIST 283. Medicine, Culture, and the Body. Also listed as Anthropology 283. Concepts of the human body from historical and cross-cultural perspectives. Exploration of experiences, representations, and medical theories of the body in birth, death, health, and illness in Western and non-Western societies. Comparison of methodologies of anthropology and history. Repeat credit for students who have completed ANTH 283. [3]

HIST 287c. Cities of Europe and the Middle East. Cities of “East” and “West” in the modern period; distinguishing characteristics and shared patterns of urban modernity across different geographies. Conceptions of the European, Middle Eastern, and Islamic metropolises. [3]

HIST 289d. Religion and the Occult in Early Modern Europe. Popular and learned ideas about religion and the supernatural within the context of the religious reforms of the sixteenth century. Alchemical and astrological practices to ghosts, werewolves, fairies, and other supernatural beings. The witch craze phenomenon of 1560-1650. Offered on a graded basis only. No credit for students who earned credit for 295 section 1 in fall 2011. [3]

HIST 300a. Introduction to Historical Methods and Research. [4]

HIST 300b. Introduction to Historical Methods and Research. [4]

HIST 301. The Art and Craft of Teaching History. Readings on pedagogical theory and current research on college-level teaching and learning. Hands-on exercises in course design, preparing and grading tests and assignments, lecturing, leading discussion, cooperative and service learning, and use of technology to enhance teaching. Normally limited to graduate students in History. [4]

HIST 305. Studies in Comparative History. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 307. Studies in the History of Medicine, Science, and Technology (Formerly 347). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 308. Studies in the History of the Human Sciences (Formerly 350). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 309. Studies in Environmental History. Approaches to writing about human interactions with the natural world and the role of the environment in human history. Methods and preoccupations characteristic of work in environmental history. Comparisons to works in intellectual and cultural history, social history, history of science, and animal studies. [3]

HIST 315. Studies in Early Modern European History. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 320. Studies in European History, 1815-1914. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 321. Studies in European History. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 324. Studies in Recent European History. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 330. Studies in German History. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 344. Studies in Modern England (Formerly 344a). May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 359. Atlantic World History, Fifteenth to the Nineteenth Century. Interdisciplinary readings examining disparate colonizations and the creation of an Atlantic world system. Major themes include the consequences of Atlantic expansion on indigenous societies, the African slave trade, and the rise of Atlantic economics, the circulation of peoples, ideas, and material culture throughout the Atlantic and how imperial competition, political ideologies, and subaltern resistance shaped the Atlantic revolutions. Optional instruction in early modern paleography. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 361. Studies in Latin American History. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 365. Research Seminar in Latin American History. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 371. Studies in Early American History to 1783. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 372. Studies in the Middle Period of American History, 1783-1861. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 373. Studies in U.S. History, 1861-1900. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 374. Studies in Recent American History. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 375. Research Seminar in Recent American History. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

HIST 381. Studies in American History. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 382. Studies in U.S. International History (Formerly 380). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 384. Research Seminar in U.S. International History (Formerly 382). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [4]

HIST 390a. Independent Study. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

HIST 390b. Independent Study. May be repeated for credit once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

HIST 398. Dissertation Seminar. May be repeated for credit once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Provided on a pass/fail basis only. [0-4]

HIST 399. Ph.D. Dissertation Research. [0-12]

HIST 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

History of Art

HART 208. Art and Empire from Constantine to Justinian. An interdisciplinary study of Roman social, political, religious, and art historical developments in the fourth through sixth centuries CE. [3]

HART 214. Fifteenth-Century Northern European Art. Painting, sculpture, prints, and court art in the Low Countries, France, and Germany. Historical, social, economic, religious, and technical analysis. Jan van Eyck, Rogier van der Weyden, and Hieronymus Bosch. No credit for students who have earned credit for 212. [3]

HART 218. Italian Art to 1500. Early development of art and architecture primarily in central Italy from the late thirteenth through the fifteenth centuries. The works of Giotto, Duccio, Donatello, Masaccio, and Botticelli. The age of the Medici in Florence. No credit for students who have earned credit for 217 or 217W. [3]
HART 220. Michelangelo's Life and Works. Sculpture, painting, architecture, and graphic works. Poetry and letters. Cultural, historical, religious, and political climate of his day. Influence upon artists. Critical reception. Repeat credit for students who have completed 220W. [3]

HART 220W. Michelangelo's Life and Works. Sculpture, painting, architecture, and graphic works. Poetry and letters. Cultural, historical, religious, and political climate of his day. Influence upon artists. Critical reception. Repeat credit for students who have completed 220. [3]

HART 239. African American Art. Colonial Era to the present. Artwork and artists in their political, cultural, social, historical, and aesthetic contexts. Relationship between race and representation. [3]

HART 241. Early American Modernism, 1865-1945. Painting in the U.S. from Civil War to close of WWI. Homer, Cassatt, Duchamp, O’Keeffe, and Hopper. Influence of European art, including Impressionism, Cubism, and Futurism. Response to industrialization and urbanization through figurative and abstract art. Cultural and historical context. Gender, race, and class. [3]

HART 242. Art since 1945. A survey of art produced in the United States and Europe since 1945 with an emphasis upon theory and the social and intellectual factors. [3]

HART 243. History of Sound Art. From twentieth century to present. Use of sound as artistic medium. Experimental practices; the relationship of art and technology; sound art’s position between music, performance and installation art. Cage, Cardiff, Paik, Rosenfeld, and Trimpin. [3]

HART 245W. Art of Buddhist Relic and Reliquary. From second century BCE to present. Relic veneration and construction of reliquaries from a visual perspective. Beautification, ritualization, use and abuse, and bodily issues spanning India, China, Korea, Japan, and Southeast Asia. [3]

HART 247. Himalayan Art: Art of the Divine Abode. Art of Nepal and Tibet from its inception to the present. Religious and cultural contexts. Initial western responses; Hindu and Buddhist art and architecture in Nepal; Tibetan Buddhist Art; artistic productions in the Tibetan diaspora; and souvenirs art in Nepal. [3]

HART 248. The South Asian Temple. From its inception to the present. Morphological and stylistic analysis. Anthropological and ethnographic approach to temples as living communal entities. [3]

HART 249. The Arts of China during the Liao-Song Period. Art and architecture of China during the Liao-Song period from C.E. 907 to C.E. 1279. Political, religious, and aesthetic contexts. Influence of coastal trade and pilgrimage in transformations of painting, sculpture, ceramics, and architecture. [3]

HART 262W. Gender and Sexuality in Greek Art. Iconography of vase-painting and sculpture, from the Archaic through the Hellenistic periods. Visual constructions of bodies, poses, gestures, and dress, reflecting cultural attitudes towards courtship, marriage, rape, prostitution, and homosexuality. Emphasis on methodological approaches and comparisons with modern societies. Offered on a graded basis only. [3]

HART 264. Greek Sculpture. Style, materials, and techniques ca. 900-31 B.C. Sculptors’ craft and their reasons for the creation of both free-standing and architectural sculpture. Serves as repeat credit for students who have completed CLAS 216. [3]

HART 265. Greek Vases and Society. Ancient Greek vases as social documents. Interdisciplinary approaches, including historiographic, stylistic, semiotic, contextual, and scientific. Production, trade, and the functions of vases in funerary and ritual contexts, particularly the symposium. The development of black- and red-figure vase painting and iconography. [3]

HART 266. Cities of the Roman East. Provincial centers, sanctuaries, and monuments from Greece to Arabia. Major centers and case studies of public and private commissions. Architectural reflections of Romanization and resistance; local and imperial patronage; patrimony and memory; borderland architecture. [3]

HART 268. Art and Architecture of Ancient Egypt. Art, architecture, and culture of Egypt from the fourth millennium through the Old, Middle, and New Kingdoms. Sculpture, wall painting, architecture, and material culture. Serves as repeat credit for students who have completed CLAS 217. [3]

HART 270. History of Western Urbanism. Urban form and planning from antiquity to the present. The integration of architecture and landscape. Diachronic surveys. Case studies, including Nashville. [3]

HART 280W. Exhibiting Historical Art. Research and exhibition of art in the permanent collection of the Vanderbilt University Fine Arts Gallery. Research methods and principles of object organization and display, illustrated via selected objects that vary annually. [3]

HART 301. The Methods of Art History. Comparative analysis of art historical methods including social history, post-structuralism, feminism, gender studies, stylistic analysis, and iconography. Assessment of methods in action through critiques and exercised in independent application. [3]

HART 320. Seminar in British Art and Culture. [3]

Human Genetics

HGEN 320. Human Genetics. Research/techniques in human genetics. Human Genetics students only, by arrangement. [Variable credit]

HGEN 330. Special Topics in Human Genetics. This course will provide students with an introduction to special topics in human genetics research, with emphasis on unanswered questions in the field. An introductory module will give students a basic understanding of human genetic principles. This will be followed by discussion of current special topics. Potential topics include: What do we know about the human genome and what do we have to learn? Is there a gene for everything? Is personalized medicine feasible? SPRING. [3]

HGEN 335A. Genetics Interest Group Seminar Part 1. The class meets weekly and is a seminar course that involves four revolving formats; journal club presentations, clinical and ethics talks, directed discussion on current topics of interest in human genetics, and student research in progress presentations. For Human Genetics students only. FALL and SPRING. [1]

HGEN 335B. Genetics Interest Group Seminar Part 2. The class meets weekly and is a seminar course that involves four revolving formats; journal club presentations, clinical and ethics talks, directed discussion on current topics of interest in human genetics, and student research in progress presentations. For Human Genetics students only. FALL and SPRING. [1]
HGEN 340. Human Genetics I. (Also listed as Molecular Physiology and Biophysics 340) Designed to cover background and latest advances in human molecular genetics. Topics will include an overview and in-depth look at molecular genetics including DNA, RNA, and chromosome basics. Gene structure and transcriptional processing. Mutational mechanisms, biochemical genetics (gene defects in biochemical pathways). Topics will be discussed with use of real-world examples and relevance to human research. FALL. [3]

HGEN 341. Human Genetics II. (Also listed as Molecular Physiology and Biophysics 341) This course will cover the statistical, population, and analytical aspects of modern human genetics research. Topics to be covered include human population genetics, quantitative genetics, disease gene discovery (emphasizing design, statistical and molecular techniques), linkage and association analyses, computational genetics, and evolution and genetics. Clinical examples, subject ascertainment, and study design will also be emphasized. Students must have a strong understanding of Mendelian genetics and basic biostatistics. Prerequisite: consent of instructor. SPRING. [3]

HGEN 349. Genetics of Model Organisms. (Also listed as Cell and Developmental Biology 349, Molecular Physiology and Biophysics 349) Basic genetic principles across a broad range of organisms (yeast, C. elegans, Drosophila melanogaster, plants, mouse, zebrafish) that are used in genetic analyses to investigate molecular pathways of interest for human disease will be presented. This course will provide students with in-depth terminology and understanding of the advantages, applications, and approaches specific to each organism. Genomic and bioinformatics tools that facilitate genetic analysis in each species will be emphasized. Specific examples of how each model organism has successfully contributed to elucidation of a human disease gene, pathway, or genetic principle will be presented. Course combines faculty lectures with student presentation and discussion of original articles to emphasize the uniqueness of each model system. Prerequisite: one statistics course at the upper undergraduate level or higher and Fundamentals of Genetic Analysis (MPB 385), or permission of instructor. Offered every other year. SPRING. [3]

HGEN 350. Directed Study in Human Genetics. Introduction to current research through readings of the genetics literature. Given on an individual basis by arrangement. May be taken more than once, but not for more than 4 hours credit with a single advisor, nor for more than 5 hours total. Prerequisite: consent of instructor and DGS. FALL, SPRING, SUMMER. [Variable credit: 1-4]

HGEN 370. Tutorials in Human Genetics. A weekly seminar critically evaluating current and past scientific literature from many areas of genetic research. The focus will be on study methods and analysis. FALL. [1]

HGEN 371. Tutorial in Statistical and Population Genetics. The class meets once weekly. Graduate students critically evaluate research publications in areas statistical methods in human genetic analysis and in the area of human population genetics. Also, there are faculty presentations on ancillary science skills, such as oral and poster presentations, and grant and proposal writing. SPRING. [1]

HGEN 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

HGEN 381. Molecular Foundations of Medicine. Molecular Foundations of Medicine is designed to familiarize students with the cellular structures, biomolecules, and processes that constitute life, human health, and disease at the molecular level. The course employs an integrated approach to teach underlying principles of biochemistry, cell and tissue biology, and genetics with an emphasis on human systems and medical conditions. The inclusion of clinical correlation sessions, small groups, and laboratory sessions will further integrate and broaden course material and relate molecular processes to the study of human disease. Prerequisite: MSTP students only. FALL. [Variable credit: 1-6]

HGEN 382. Structure, Function, and Development. Structure, Function, and Development is designed to provide students with the means to develop an effective understanding of the normal micro and macroscopic structure, function, and development of the human body. The course employs a coordinated, integrated approach to the presentation and learning of the disciplines of human gross anatomy, cell and tissue biology (histology), human development (embryology), and physiology in a context of clinical application. Prerequisite: MSTP students only. SPRING. [Variable credit: 1-3]

HGEN 384. The Brain and Behavior. Brain and Behavior provides a basic understanding of the human central nervous system and human behavior. The format includes lectures, lab exercises, small group discussions, and patient and case presentations. Brain and Behavior integrates three areas of medical science: (1) neuroanatomy, physiology, and biochemistry; (2) psychopathology and systems neuroscience; and (3) pathology, pharmacology, and radiology. Prerequisite: MSTP students only. SPRING. [1]

HGEN 385. Fundamentals of Genetic Analysis. This course is designed to accomplish three goals: (1) introduce students to critical topics of genetic research, (2) introduce students to important areas of genetic research not covered in first-year course work, and (3) promote an understanding of classical genetic analysis by learning genetics using the original literature. Emphasis will be placed on research problems that utilize the full power of genetic analysis.

HGEN 390. Human Genetic Epidemiology. This course will cover in detail the study design and methods of modern genetic epidemiology. This will include concepts of familial aggregation, linkage analyses, population genetics as it is applied to studies of human traits, and association studies, both candidate genes and genome-wide association. The concept of linkage disequilibrium and its use in disease-gene studies will be extensively discussed. The underlying principles of each approach will be developed and current methods and software programs used to perform these will be discussed. Emphasis will be placed on the advantages and disadvantages of each approach and how to best design a genetic epidemiology study. [3]

Interdisciplinary Materials Science

MSE 310. Atomic Arrangements in Solids. A basic understanding of the atomic arrangements observed in metals, ceramics, semiconductors, glasses, and polymers. Lattice geometry and crystal symmetry are discussed in detail and these concepts are used to describe important crystal structures. Nanocrystalline materials are also covered. An introduction to scattering theory and diffraction phenomena provides insight into the analytical methods used by materials scientists for structural characterization. FALL. [3]

MSE 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

MSE 391. Special Topics. Based on faculty research projects and highly specialized areas of concentration. FALL, SPRING. [Variable credit: 1-3 each semester]

MSE 392. Special Topics. Based on faculty research projects and highly specialized areas of concentration. FALL, SPRING. [Variable credit: 1-3 each semester]

MSE 397. Seminar. A required noncredit course for all graduate students in the program. Topics of special interest consolidating the teachings of
previous courses by considering topics which do not fit simply into a single course category. FALL, SPRING. [0] Staff.

MSE 398. Seminar. A required noncredit course for all graduate students in the program. Topics of special interest consolidating the teachings of previous courses by considering topics which do not fit simply into a single course category. FALL, SPRING. [0] Staff.

Interdisciplinary Social and Political Thought

INDS 270A. Global Citizenship and Service. This course is offered by the Vanderbilt Initiative for Scholarship and Engagement (VISAGE). Graduate students may take this course for graduate credit. A service-learning course introducing students to themes and interpretations of global citizenship. Intended to be followed by 270b. [3]

INDS 270B. Global Community Service. This course is offered by the Vanderbilt Initiative for Scholarship and Engagement (VISAGE). Graduate students may take this course for graduate credit. Students will design and conduct research projects in collaboration with faculty mentors. Prerequisite: 270a. [1-3]

INDS 270C. Seminar in Global Citizenship and Service. This course is offered by the Vanderbilt Initiative for Scholarship and Engagement (VISAGE). Graduate students may take this course for graduate credit. Project- and research-based seminar drawing on student experiences and learning in 270a and 270b. Prerequisite: 270b. [3]

INTE 301. Public Discourse Analysis.

INTE 320A. Foundations of Social and Political Thought. Interdisciplinary study of a theme in social and political thought as reflected in the disciplines of communication studies, comparative literature, English, history, philosophy, political science, religion, and sociology. The first semester focuses on how the theme, currently “equality,” is treated conceptually within these disciplines; the second, on how the study of the theme is treated within these disciplines. [3-3]

INTE 320B. Foundations of Social and Political Thought. Interdisciplinary study of a theme in social and political thought as reflected in the disciplines of communication studies, comparative literature, English, history, philosophy, political science, religion, and sociology. The first semester focuses on how the theme, currently “equality,” is treated conceptually within these disciplines; the second, on how the study of the theme is treated within these disciplines. [3-3]

INTE 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

JAPAN 212. Intermediate Japanese II. Two hours of lecture and three hours of drill per week. No credit for students who have earned credit for a more advanced Japanese language course. Prerequisite: 211. [5]

JAPAN 241. Advanced Japanese I. Reading and writing in contemporary Japanese texts. Conversation, discussion, and development of pragmatic competence. No credit for students who have earned credit for a more advanced Japanese language course. Prerequisite: 212. [3]

JAPAN 242. Advanced Japanese II. No credit for students who have earned credit for a more advanced Japanese language course. Prerequisite: 241. [3]

JAPAN 251. Special Topics in Advanced Japanese. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite: 242. [3]

JAPAN 289a. Independent Study. A reading course which may be repeated with variable content according to the needs of the individual student. Primarily designed to cover materials not otherwise available in the regular curriculum. May be repeated for a total of 12 credits in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for all semesters of JAPAN 289a and 289b]

JAPAN 289b. Independent Study. A reading course which may be repeated with variable content according to the needs of the individual student. Primarily designed to cover materials not otherwise available in the regular curriculum. May be repeated for a total of 12 credits in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 12 credits total for all semesters of JAPAN 289a and 289b]

Jewish Studies

JS 219. The New Testament in Its Jewish Contexts. Documents of the origin of Christianity and the social, literary, ideological, and theological contexts in which they emerged and which they reflect. Various critical methodologies employed in interpreting them. [3]

JS 230. Jews and Greeks. From the seventh century BCE to ca. 1500 CE. Sites of interaction, languages, cultural ties, religious tensions, political conflicts, and competing philosophies. Works by Elephantine, Alexander the Great, the Maccabees, the Septuagint, Aristeas, Josephus, Philo, the rabbis, the New Testament, Ezekiel the Tragedian, Byantarn. Serve as repeat credit for students who completed 257 section 1 in fall 2010. [3]

JS 233. Issues in Rabbinic Literature. History of Rabbinic thought from its origins to the Middle Ages through the reading of central Rabbinic texts. Capital punishment, women in Rabbinic culture, sectarianism, and the power structures of Roman Palestine and Sassanian Babylonia. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [3]

JS 234. Reading Across Boundaries: Jewish and Non-Jewish Texts. Jewish and non-Jewish literary and historical texts studied in parallel so as to discover the differences between them. The course will consider texts from the ancient world to the early modern period and ask what constitutes Jewish writing and how it has been defined through time and geography. All readings will be in English. [3]

JS 237. Coming of Age in Jewish Literature and Film. The transition of young Jewish protagonists into adulthood as portrayed in literary works and films from Europe, Africa, and the Americas. Repeat credit for students who have completed 237W. [3]
JS 237W. Coming of Age in Jewish Literature and Film. The transition of young Jewish protagonists into adulthood as portrayed in literary works and films from Europe, Africa, and the Americas. Repeat credit for students who have completed 237. [3]

JS 238. Jewish Language and Paleography. Advanced study in a language of the Jewish people with a particular focus on the linguistic and paleographic features that define its cultural context. Each section focuses on one of the following languages: Aramaic, Ladino, Judeo-Arabic, Rabbinic Hebrew, or Yiddish. May be repeated for credit up to two times when the language studied differs. Consent of instructor required. [3]

JS 244. Freud and Jewish Identity. Analysis of rhetoric and themes in selected writings of Sigmund Freud and his times, development of assimilation and of anti-Semitic repudiation. [3]

JS 248. Jewish Storytelling. Twentieth-century short fiction and narrative traditions. The transition from religious to secular cultural forms. Immigration and ethnic literary forms. All works are in English or English translation from Yiddish, Hebrew, and Russian. Repeat credit for students who have completed 248W. [3]

JS 248W. Jewish Storytelling. Twentieth-century short fiction and narrative traditions. The transition from religious to secular cultural forms. Immigration and ethnic literary forms. All works are in English or English translation from Yiddish, Hebrew, and Russian. Repeat credit for students who have completed 248. [3]

JS 249. Jewish Philosophy after Auschwitz. Critical responses to social and political institutions and the corresponding modes of thought that made Auschwitz possible and continue to sustain the barbarism that many leading philosophers have identified at the heart of culture. [3]

JS 252. Social Movements in Modern Jewish Life. How social movements shape contemporary American Jewish culture and politics. Explores movements internal to Judaism and those bringing religion into the public sphere. [3]

JS 255. Zionism: Politics, Religion, and Ethnicity. Tensions among religion, nationalism, and political activism. Translations of Messianism into a secular program. Criticism from within and without the movement. [3]

JS 257. Topics in Ancient and Medieval Jewish History. From antiquity to 1492. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

JS 258. Topics in Modern Jewish History. From 1492 to the present. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

JS 284. Special Topics. Topics as announced. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

Latin

LAT 201. Catullus. Reading and interpretation of Catullus’ poems; aesthetic, political, and rhetorical contexts; fundamentals of Latin meter. Prerequisite: 104. [3]

LAT 202. Ovid. Reading and interpretation of selections from the Metamorphoses or other works of Ovid. Prerequisite: 104. [3]

LAT 203. The Lyric Poetry of Horace. Reading and interpretation of Horace’s Epodes and Odes; relation to the Greco-Roman lyric tradition and to Augustan politics. Prerequisite: 104. [3]

LAT 204. Latin Elegy. Authors who created a new type of love poetry during the rule of emperor Augustus: Tibullus, Propertius, Ovid, and Sulpicia. Construction and contestation of gender roles; political contexts; development of the elegiac couplet; modern responses. Prerequisite: 104. [3]

LAT 205. Latin Letters. The literary letters of Seneca and Pliny, with a brief introduction to the personal correspondence of Cicero and the letters discovered at Vindolanda. Prerequisite: 104. [3]

LAT 206. Cicero and the Humanistic Tradition. Study of Cicero’s career and thought, and of his contribution to the development of the concept of humanitas. Readings from his letters, speeches, or philosophical works. Prerequisite: 104. [3]

LAT 212. Roman Comedy. Reading of selected comedies of Plautus and Terence: study of the form of Roman comedy and its relation to the Greek New Comedy. Prerequisite: 104. [3]

LAT 215. The Roman Historians. Selections from Sallust, Livy, and Tacitus, with attention to their objectives and methods; analysis of Roman historiography and its relation to Greek and early Christian historiography. Prerequisite: 104. [3]

LAT 216. Tacitus. Selections from the works of one of Rome’s most important historians, read in the context of historiographical tradition and political and social background. Prerequisite: 104. [3]

LAT 217. Suetonius. Selections from the works of one of Rome’s most important biographers, read in the context of the Latin biographical tradition as well as the political and social background. Prerequisite: 104. [3]

LAT 218. The Writings of Caesar. Selections from The Civil War and The Gallic War. Literary style and historical context. Prerequisite: 104. [3]

LAT 260. Early Christian Writers. Selections from the writings of Latin Christians, from the account of Perpetua’s martyrdom to the Confessions of Augustine. Prerequisite: 104. [3]

LAT 264. Roman Satire. The satires of Horace and Juvenal; the origins of Roman satire; history and conventions of the genre; background reading in other Roman satirists. Prerequisite: 104. [3]

LAT 267. Neronian Writers. Selections from authors in the literary renaissance during the reign of the artistic Emperor Nero, including Seneca, Lucan, Persius, and Petronius. Stylistic innovations, literary merits, and cultural contexts. Prerequisite: 104. [3]

LAT 268. Lucretius: De Rerum Natura. Lucretius’ poem studied both in the tradition of Epicurean philosophy and as a landmark in the development of the Latin didactic epic; background material in the fragments of Epicurus and some treatment of the Epicurean movement in Italy and especially in Rome. Prerequisite: 104. [3]

LAT 289. Independent Study. Designed for majors wanting to familiarize themselves with works or authors not covered in the regular curriculum. Prerequisite: 6 hours above 104. May be repeated for a total of 6 credits if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for all semesters of LAT 289]

LAT 294. Special Topics in Latin Literature. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]
Latin American Studies

LAS 201. Introduction to Latin America. A multidisciplinary survey of Latin America from pre-Columbian times to the present emphasizing culture, economic and political patterns, social issues, literature, and the arts in a historical perspective. [3]

LAS 260. Latin America, Latinos, and the United States. Immigration of Latin American and Caribbean peoples to the United States and their experiences in this country. Required service work and a research project in the Nashville Latino community. [3]

LAS 290. Interdisciplinary Research Methods. Principal research methods and sources necessary for the study of Latin America in the social sciences and humanities. [3]

LAS 294a. Special Topics in Latin American Studies. Selected special topics suitable for interdisciplinary examination from the perspective of the social sciences and humanities. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

LAS 331. Music, Spirituality, and Performance. How religious events invoke music and dance to bond temporal humanity with spiritual eternity. Ways in which music reconstructs understandings of physical and metaphysical being and creates sacred identities and communities. [3]

LAS 369. Master's Thesis Research. [0]

LAS 370. Fieldschool in Intercultural Education. Provides training in field research directed to human, social, and community development issues. Student research sponsored and supervised by an interdisciplinary team from Vanderbilt University and the Latin American faculty of social sciences (FLACSO). Fluency in Spanish required. [3]

LAS 390a. Independent Study. A program of independent readings and research in a minimum of two disciplines, to be selected in consultation with the center’s graduate adviser. [3]

LAS 390b. Independent Study. A program of independent readings and research in a minimum of two disciplines, to be selected in consultation with the center’s graduate adviser. [3]

Law and Economics

LWEC 349A. Reading Course. Designed to permit graduate students to do more intensive study in the area of their special interest than regular course offerings provide. Admission by consent of director of graduate studies and supervising professor. [Variable credit]

LWEC 349B. Reading Course. Designed to permit graduate students to do more intensive study in the area of their special interest than regular course offerings provide. Admission by consent of director of graduate studies and supervising professor. [Variable credit]

LWEC 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

LWEC 390. Ph.D. Dissertation Proposal Development. Prerequisite: permission of director of graduate studies. [Variable credit]

LWEC 401. Law and Economics Theory I. Principles of economic analysis as applied to legal issues. Topics include, among others, torts, property, litigation, and government regulation. Pre- or corequisite: ECON 304a. [3]

LWEC 402. Law and Economics Theory II. Economic analysis of the law with applications from civil and criminal procedure, law enforcement, property, torts, decision making by courts, settlement negotiation, contracts, and antitrust. Prerequisite: LWEC 401; pre- or corequisite: ECON 304b. [3]

LWEC 403. Behavioral Law and Economics I. Economic principles underlying behavioral law and economics research. Analyses of the rationality of individual choices will be undertaken, including research that involves the interaction of economics, psychology, and decision sciences. Applications of behavioral law and economics methods will be applied to the analysis of jury behavior. Pre- or corequisite: ECON 304a. [3]

LWEC 404. Behavioral Law and Economics II. Research contributions at the frontier of behavioral law and economics research. Each student will structure a controlled experiment to test the rationality of jury behavior, the effect of alternative jury instructions, or a similar kind of scientifically controlled study of behavior relating to the performance of the legal system. Students will administer and analyze the survey results and will prepare an original research paper on their chosen topic. Prerequisite: LWEC 403. [3]

LWEC 405. Econometrics for Legal Research. Analysis and critique of empirical legal research using advanced econometric techniques. Topics will be drawn from the program’s core fields. Students will perform independent empirical research using primary data sources. Pre- or corequisite: ECON 307, ECON 309, LWEC 401. [3]

LWEC 406. Research in Law and Economics. Students will develop and complete an original research paper. The paper may pose an original research question or may be a replication of an existing empirical result. [3]

LWEC 420. Labor Markets and Human Resources I. Economic, econometric, and legal analysis of the labor market. Topics include analysis of the economic impact of employment laws with a particular focus on antidiscrimination laws, use of labor market studies to estimate the value of statistical life, and behavioral labor economics and economic models of fairness in the employment relationship. Prerequisite: ECON 304a, ECON 307, ECON 309. [3]

LWEC 421. Labor Markets and Human Resources II. Application of economic and legal analysis to labor market and demographic transformations, including changes in the gender composition of labor market participants, aging of the workforce, immigration, education, poverty, inequality, and provision of health services. Prerequisites ECON 304A, ECON 307, ECON 309. [3]

LWEC 430. Risk and Environmental Regulation I. Analysis of the sources of market failure that create a rationale for risk and environmental regulation. Methodologies pertaining to appropriate valuation and enforcement of these regulatory policies. Applications include procedures for estimating the value of statistical life, perception of risk, the role of hazard warnings, risk analysis by government agencies, and the enforcement of regulatory programs. Prerequisite: ECON 304a, ECON 307, ECON 309. [3]

LWEC 431. Risk and Environmental Regulation II. Risk and Environmental Regulation II. Analysis of the sources of market failure that create a rationale for risk and environmental regulation. Methodologies pertaining to appropriate valuation and enforcement of these regulatory policies. This course will focus on theoretical economic models of risk and environmental regulation. Among the topics included will be the economics of risk and uncertainty, discounting, and benefit-cost analysis. Prerequisite: ECON 304a, ECON 307, ECON 309. [3]

LWEC 490. Ph.D. Law and Economics Workshop. Research workshop on the presentation and interpretation of research and literature on law and economics. Topics vary with student and faculty interest. [3]

Leadership and Policy Studies

Education Policy

EDP 350. Special Topics in Education Policy. Explores special issues or topics related to education. May be repeated with change of topic. [1-6]

EDP 3710. Independent Study in Education Policy. Semi-independent study on selected topics in education policy. May be repeated. [1-3]
Educational Leadership and Policy

ELP 3150. Leadership for School Improvement. Examines issues of school improvement and instructional leadership from the perspective of effective schools literature. [3]

ELP 3210. Resource Allocation and Deployment. This course covers resource allocation issues for lower and higher education, public and private education, and United States and overseas education. “Resource,” in this context principally, but not exclusively, refers to financial resource. The purpose of this course is to introduce participants to the means by which answers can be framed for questions such as: Who pays for education? Who goes to school, and who benefits from schooling? How much does education cost? How can resources be used to influence the trajectory of an organization? and how can resources for education be spent more efficiently? Additionally, the course is intended to enable participants to gain and enhance analytic and information gathering skills related to education finance and resource allocation. [3]

ELP 3240. K-12 Education Law. Study of the general structure, theory, and background of the law as it applies to schools. Attention given to constitutional issues, negotiation problems, procedures, court decisions, and how to read a case. [3]

Higher Education Administration

HEA 3100. College and University Management. The purpose of this course is to prepare students to understand how colleges and universities are organized, governed, and managed. Particular attention will be paid to the utility of the literature for the management of higher education institutions. Students will have the opportunity to expand their understanding of the complex environment in which administrators operate. [3]

HEA 3120. Student Affairs Administration and Practice. Explores the history, philosophy, objectives, and organization of student affairs administration and practice. The course will also provide students with an overview of different functional areas within student affairs administration including residential life, new student orientation, student activities, career services, health and wellness, service learning, and civic engagement. International student services, women’s centers, LGBTQ centers, multicultural centers, etc. [3]

HEA 3121. The College Student. Study of the college student in contemporary society with focus on characteristics of students admitted and retained, impact of the college on the student, student values, and peer group influence. [3]

HEA 3122. Theories of College Student Development. Students will explore various theories of college student development and will discuss their strengths and limitations. Through the course, participants will develop an understanding and the ability to apply these theories as practicing student affairs professionals. Course activities include discussion, classroom presentations, group activities, and lecture. [3]

HEA 3150. Post Secondary Access. This seminar will explore how demographic change, public policy, and law promote and/or impede accessibility to U.S. higher education. Students will be exposed to a variety of literature that is both multidisciplinary and multilevel in regard to governance (institutional, local, state, and federal policies). Since the primary theme of the seminar is access to post secondary institutions, course materials will focus on groups historically and currently underrepresented in U.S. higher education. These include students who are low income, race and ethnic minorities, and/or immigrant students. In addition, the course will explore the effects of educational intervention programs designed to increase college access as well as the role of state and federal legislation on higher education access rates. Upon completion of the seminar, students will have learned relevant policy analysis skills that include synthesis of research, clear and concise presentation of relevant facts to stakeholders, and strategies for making responsible policy recommendations. [3]

HEA 3151. College and University Finance. Current issues in financing higher education, sources of revenue, and methods of justifying requests for funds. Includes budgeting procedures, allocation systems, budget controls, and the relation of planning to budgeting. Course is for the generalist faculty member or general administrator, not for fiscal specialists. [3]

HEA 3152. State and Federal Government and Higher Education. This course is a seminar for advanced graduate students which focuses on the intersection of institutions, actors, and processes that result in the formation of public policy for higher education at both the state and federal levels of American government. It pursues this focus by examining the fluid political environment in which government operates, the fundamental conflicts governments act to mediate, the governmental process by which policies are formulated, and the outcomes of policies that are enacted. The course emphasizes both the varied theoretical perspectives on the formation of higher education policy and the numerous contemporary policy challenges confronting campus and state officials. [3]

HEA 3410. Diversity and Equity in Higher Education. This course addresses critical issues related to areas of diversity, equity, and social justice in higher education. Drawing from historical, contemporary, theoretical and research based literature, this course introduces students to information, concepts, policies, and controversies related to racial, ethnic, gender, and sexual identity, socio-economic, ability, and religious differences among students, faculty, administrators, and other constituencies in higher education. [3]

HEA 3420. Law and Higher Education. Explores the constantly growing relationship between basic law and higher education. Seeks to acquaint the student with benchmark laws and court decisions and the resulting implications for higher education. [3]

HEA 3430. Institutional Advancement Proseminar. Focuses on alumni relations, government relations, public relations, publications and use of direct mail in colleges and universities, and the nature and function of philanthropy. Students will perform a number of class and group projects, and speakers will address the class. [3]

HEA 3431. Strategic Marketing and Planning in Higher Education. Comprehensive review of marketing and planning for higher education, consumer behavior, market research planning, target marketing, segmentation and strategic planning, and the relationship of marketing and planning to higher education. Course uses case studies. [3]

HEA 3440. Service-Learning in Higher Education. This class engages students in the analysis and application of the theory of service-learning, i.e., the integration of community service and related academic study. Students will assist a service-learning program in higher education (or K-12, if appropriate) with planning, implementation, or evaluation, and integrate this experience with study of current theory and research. [3]

HEA 3500. Special Topics in Higher Education Administration. Explores special issues or topics related to higher education. May be repeated with change of topic. [1-6]

HEA 3730. Research in Higher Education Administration. Individual programs of research in various education fields. Consent of faculty supervisor required. May be repeated. [1-6]

Higher Education Leadership and Policy

HLP 3150. The Academic Profession: Structure and Roles. This course focuses on the structure of the American academic profession with particular attention concentrating on institutional and disciplinary differences among college and university faculty. The teaching and research role performance of college and university faculty as well as the various psychological, sociological, and organizational forces that shape the performance of these professional roles are also examined. Additional topics include the assessment of teaching and research activities of college and university faculty members. [5]

International Leadership and Policy Management

IEPM 3120. International Innovations in K-12 Policy Reform. Schooling is now compulsory throughout the world, but rarely are the resources sufficient to fund it adequately. Schooling in democracies takes on similar characteristics in the effort to respond to the public’s open demands. This course reviews the policy changes of school systems in meeting these two
Graduate School / Courses

challenges. The course concentrates on Western Europe, but expands to Asia, Africa, Latin America, the Middle East and North Africa, and Eastern Europe and Central Asia depending on student interest. [3]

IEPM 3130. Comparative Issues in Higher Education. Examines higher education from an international/comparative perspective. The intent of the course is to provide students the framework for examining and evaluating contemporary higher education issues comparatively. [3]

IEPM 3140. Education and Economic Development. This course reviews the history and application of human capital theory. It provides students with examples of its application in economic development policy and gives practice in applying common statistical models. It exposes students to current debates in education policy in the World Bank and other international organizations which result from those models. [3]

IEPM 3500. Special Topics in International Education Policy and Management. Explores special issues or topics related to international education policy and management. May be repeated with change of topic. [1-6]

IEPM 3700. Practicum in International Education Policy and Management. Individual or group practicum in a school or other social institution. Consent of faculty supervisor required. May be repeated. [1-6]

IEPM 3710. Independent Study in International Education Policy and Management. Semi-independent study on selected topics in international education policy and management. May be repeated for credit. Consent of instructor required. [1-3]

Leadership and Organizational Performance

LPO 3270. Leading Globally Diverse Organizations. The goal of this course is to enable students to improve an organization’s ability to work effectively across potential barriers imposed by culture, race, gender, and other dimensions of diversity. Students will explore the political, financial, and organization-specific issues with a focus on developing strategies to enhance inclusivity. [3]

Leadership, Policy, and Organizations

LPO 3460. Special Topics in Leadership and Policy Studies. Explores special issues or topics related to leadership and policy studies. May be repeated with change of topic. [1-6]

LPO 3470. Individual Study. Semi-independent study on selected topics in education. May be repeated. Consent of instructor required. [1-3]

LPO 3530. Economics of Education. This course focuses on problems of the American educational system. Most attention will be paid to primary and secondary education (grades K-12), although some issues in higher education will also be examined. The goal of the course is not merely to study what economists have said about the problems of American education, but also to understand (and use) economic tools of analysis. These tools are of wide applicability and illuminate educational policies and practices (and much else) in all nations and societies. Although the focus is on the U.S., the course will be valuable to students whose principal interest is in international issues and educational systems abroad. Ph.D. students only. [3]

LPO 3540. Governance and Politics in Education. This course deals with a central question in political science and public policy—how can public institutions be redesigned to improve accountability? This question is examined with particular attention to governance and politics in public school systems. Specifically, students will examine three sets of issues: (1) What is the role of politics in allocating resources in public schools? (2) What are key political challenges in the governance of urban school systems? (3) What is the politics of school choice? Ph.D. only) [3]

LPO 3600. Social Context of Education. Explores contemporary social, philosophical, and political dimensions of education and their relationship to leadership, including issues related to social class and culture, democracy and diversity, and equality and choice. Ph.D. students only. [3]

LPO 3621. Ph.D. Seminar in K-12 Education Leadership and Policy. This required course for Ph.D. students in the K-12 Leadership and Policy Program focuses on research and policy issues that are studied in depth by LPO faculty. The content of the course changes each year, based on the research interests and focus of the faculty member teaching it. Rotating topics have included Measurement and Assessment; Instructional Leadership: Urban School Reform; and Teacher Policy. [3]

LPO 3622. Ph.D. Seminar in Higher Education Leadership and Policy. This required course for Ph.D. students in the Higher Education Leadership and Policy Program focuses on research and policy issues that are studied in depth by LPO higher education faculty. The content of the course changes each year, based on the research interests and focus of the faculty members teaching it. Rotating topics have included History of American Higher Education; Organization and Governance of Higher Education; The Academic Profession: Structure and Roles; The College Student: Structure, Processes, and Effects; and Comparative Issues in Higher Education Policy Reform. [3]

LPO 3680. International Issues in Education Policy. This course covers education outside the United States, including primary, secondary, and higher education. Depending on student demand, it can cover any country in any region. It is designed for those who intend to enter the field of education policy or administration and who need to be able to bring knowledge and experience with education in diverse global contexts to bear on issues of policy and practice. Ph.D. students only. [3]

LPO 3690. Master's Thesis Research. Master’s Thesis Research for Graduate School Ph.D. masters in passing students only [0-6]

LPO 3790. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. Ph.D. students only. [Variable credit: 0-12]

LPO 3910. Modeling Context Effects in Educational Organizations. This seminar explores the methodological challenges and substantive implications of studying schools as complex organizations. Substantively, this course covers the literature on school effects, moving from early input-output studies to current research that examines the organizational context of schools, particularly the impact of within- and between-school stratification on student outcomes. Methodologically, this course provides an introduction to hierarchical linear modeling, interpreting HLM output, and presenting results. Ph.D. students only. [3]

LPO 3912. Research Design and Methods of Education Policy. The purpose of this course is to provide an introduction to the practice of research and a survey of various research designs used in the study of education policy. The course develops understandings of the principles, processes and techniques used in educational research. The course is based on the premise that final published research develops and evolves through an iterative process. This research process requires decisions and judgments and careful consideration of alternatives. The goal for this course is for students to learn the formal principles of research design and to begin to understand how to conduct research by identifying and evaluating advantages and disadvantages and trade-offs of various research designs and data collection strategies. Ph.D. students only. [3]

LPO 3916. Regression Analysis I. Regression analysis is a widely used technique that allows us to 1) to describe average patterns of association among multiple variables observed in a sample and 2) to make inferences about the patterns of association among these variables in a population. The goal of this course is to develop an understanding of the basic methods, including their limitations, and to develop skill in using regression analysis to analyze non-experimental data. As an important part of any analysis is communicating the results to an audience, we will also place considerable emphasis on learning to present (in writing, tables, and figures) the results. [3]

LPO 3918. Regression II. This is a practical, Hands-on course in statistical research methods. The focus is on drawing casual inferences from observational (i.e., non-experimental) data, with particular emphasis on instrumental variables and longitudinal (panel) data estimators. Additional topics include binary and categorical dependent variables models and methods for dealing with missing data, including multiple imputation. [3]
Learning, Teaching, and Diversity

Education

EDUC 3040. Teaching as a Social Practice. This course provides an investigation into teaching as situated in the social context of the school and school district. Classroom observation in tandem with a series of readings are the basis of the course. Assignments are intended to provide students opportunities to coordinate important aspects of the readings with observations of practice. For doctoral students or by permission of instructor. [3]

EDUC 3050. Advanced Social and Philosophical Aspects of Education. Exploration of the interaction between contemporary social problems and various philosophies in relation to educational theory, policy, and practice. [3]

EDUC 3070. Inquiry into Education. An introduction to the function and means of various practices of educational research. Promotes understanding of the language of educational inquiry, aims and uses of research, various ways of framing research questions and designing studies, and procedures for obtaining, analyzing, and interpreting qualitative and quantitative data. Presents issues of procedure or design and related issues of validity: construct definition and data generation, instrumentation and data collection; and data quality, meaning, appropriateness, credibility, and inferences made based on data. For doctoral students or by permission of instructor. [3]

EDUC 3080. Diversity and Equity in Education. Provides an introduction to the structural, systemic, and institutional dimensions and complexities of diversity that often emerge in education across multiple contexts. Central constructs of the course include race, culture, SES, gender, language, achievement, policy, epistemology, and learning. For doctoral students or by permission of instructor. [3]

EDUC 3110. Psychological Foundations of Education. (Also listed as PSY 334P) Emphasis on theories of human learning as they relate to design of instruction, educational practice, and human development at all age levels. [3]

EDUC 3120. Learning and Instruction. Introduces theories of learning and explores their utility for the design of learning environments. Contrasts socio-cultural and cognitive approaches toward concepts and categories, problem solving, and model-based reasoning. For doctoral students or by permission of instructor. [3]

EDUC 3160. Scientific Writing. Students who have completed substantial reading in an area of their research interest participate in a lecture/workshop setting to conceptualize, draft, and revise a scientific manuscript. Most students who take the course will be in the process of completing a major area paper for the Department of Teaching and Learning. These papers take the form of a literature review (typically 50-100 pages), but other writing projects are welcome, as well. [3]

EDUC 3170. Analysis of Teaching. Use of objective and unobtrusive evaluation procedures and methodologies in a variety of educational settings. Emphasis on theoretical base for qualitative and quantitative evaluation and methodologies. Experience given in collecting, processing, summarizing, and reporting data. [3]

EDUC 3200. Foundations in Learning and Development. Provides a foundation in relevant developmental milestones related to children's academic behaviors from pre-kindergarten through high school. Children's development and learning is viewed in the context of school expectations with an emphasis on the diversity among learners. [3]

EDUC 3220. Parents, the School, and the Community. Focuses on parent participation, parent education, and community involvement in school programs. Laboratory experiences in school settings will examine ecological influences and environmental transactions among the home, school, and community. [3]

EDUC 3370. Literacy Assessment and Professional Development. Study of literacy assessment research and practices, multiple opportunities for collecting and analyzing data using multiple assessment tools, and methods for implementing diagnostic findings in PreK-12 settings, emphasizing corrective instruction. Attention is given to professional development of teachers and para-professionals in areas of literacy development and methods for communicating the use of assessment information to guide instructional decisions. [3]

EDUC 3390. Literacy Development. Survey of theories and approaches to developing reading and writing in school-based settings. In-depth development of theory and research related to literacy development, with an emphasis on reading/writing processes and instruction. [3]

EDUC 3420. Literacy for Diverse and Special Needs Learners. Emphasis on theories, research, philosophies, principles, and procedures associated with approaches to literacy instruction for students experiencing problems with literacy development. Analysis of multiple factors and handicapping conditions contributing to literacy difficulties and how these affect diagnostic and instructional outcomes. Focus on methodologies for accommodating literacy problems in regular classrooms and special settings, and communicating with professionals, parents, and para-professionals. [3]

EDUC 3440. Issues and Trends in Literacy Instruction. A survey of issues and trends in literacy, including topics such as reading in a pluralistic society, early reading, intervention strategies, appraisal, and measurement. [3]

EDUC 3460. Teaching and Learning the Language Arts: Theory and Research. Provides in-depth study of theory and research on teaching and learning the language arts (reading, writing, speaking, and listening) and related literacies (e.g., art, drama). Special emphasis is given to writing development and the teaching of writing in the preschool and elementary years. [3]

EDUC 3470. Language, Education and Diversity. This class examines environmental factors that affect language and literacy development with special attention to the impact of cultural and linguistic diversity on development. The course surveys development from birth through early adolescence and examines promising interventions that foster acquisition of language competencies that are associated with literacy. The interventions examined are selected by students with guidance from the professor. Readings are primary source articles and chapters; discussions address research methodology, theoretical implications and practical applications. [3]

EDUC 3480. Sociocognitive Perspectives of Literacy Theory and Practice. This seminar critically examines literacy research from a sociocognitive perspective. Critical reading of seminal and new works on theoretical models is complemented by research on effective literacy instruction an emerging promising practices in print and digital contexts. Particular attention is paid to reading comprehension, digital literacies and new media, design of scaffolded learning environments, and students who experience learning difficulties. [3]
EDUC 3490. Sociocultural Theories of Literacy. A doctoral readings seminar on social and cultural theories in their relation to literacy and literacy learning. [3]

EDUC 3500. Foundations of Education. An introduction to schools, classrooms, teaching, and the nature of students and learning. Intended for master’s degree students who are in the early stages of preparing for licensure as early childhood, elementary, or secondary school teachers. [3]

EDUC 3510. Advanced Teaching in Secondary Schools. Exploration of teacher decision-making regarding creating conditions for learning, developing standards-based lessons, designing appropriate assessments, and balancing the personal and professional life of a teacher. [3]

EDUC 3520. Principles of ELL Education. This course, specifically designed for non-ELL majors, examines theoretically and empirically supported practices to support the education of students from culturally and linguistically diverse backgrounds in grades PreK-12. Topics include: the role of second language acquisition in academic achievement, instructional strategies used in a variety of program settings, appropriate assessment of ELLs in the classroom, the importance of ELLs home language and culture, and ESL research and history relating to policies and programs affecting ELLs. Consideration of how to attain more equitable outcomes for ELLs through schooling is a major focus of this course. [3]

EDUC 3530. Foundations for ELL Education. This course focuses on understanding the processes of second language acquisition, learning, development, and individual, cognitive, and social factors that influence second language learning in North America (particularly in the United States). In addition, it examines the theoretical, historical, political, legal, and research bases for the education of students from linguistically and culturally diverse populations. Program models and the theoretical bases for these models are covered in this course. National policies and current issues relevant to the learning of English language learners are emphasized. Corequisite: 1 hr EDUC 3571 [3]

EDUC 3540. Methods and Materials for ELL Education. This course focuses on bilingual (native language and ESL) curriculum development and instruction for students (PreK-12) in a variety of language and program settings. Second-language instructional theory and practice, materials selection and development for LEP children, and bilingual and ESL literacy and content area instruction (mathematics, science, social studies, English education) are covered. Frameworks for evaluating curriculum materials and their instructional recommendations for ELL students are provided. Corequisite: 1 hour EDUC 3572 [3]

EDUC 3550. Educational Linguistics and Second Language Acquisition. This course focuses on the applying of theories of linguistics and second language acquisition to the teaching of English language learners. Topics covered include the structure of the English language, English as a system, language acquisition and development, language variation, and theories of second language acquisition. [3]

EDUC 3560. Assessment of ELL Students. This course focuses on the theoretical and practical aspects of language testing for second-language learners. Instruments used by educators to assess the language proficiency and academic achievement of linguistically diverse students are presented and demonstrated. The course examines the purposes and types of language tests in relation to theories of language use and language teaching goals; discusses testing practices and procedures related to language teaching and language research; and includes the planning, writing, and administration of tests, basic descriptive statistics, and test analysis. Rubrics for relating assessment information to instruction and program planning are developed within this course. Corequisite: 1 hr EDUC 3573 [3]

EDUC 3571. Practicum for ELL Education. The purpose of this course is to help students develop necessary dispositions, knowledge, and skills for teaching English language learners through situated learning experiences. Students will participate in a field-based practicum working with students who are English language learners. Their experience will include use of either students’ native languages and/or ESL instructional components. Identification of factors that facilitate and/or impede ELL student learning within specific contexts is a required outcome of the practicum. Students involved in the practicum will meet with a university faculty member on a bi-weekly basis to assess their progress in the field. Co-requisite with EDUC 3530. [1]

EDUC 3572. Practicum for ELL Education II. The purpose of this course is to help students develop necessary dispositions, knowledge, and skills for teaching English language learners through situated learning experiences. Students will participate in a field-based practicum working with students who are English language learners. Their experience will include use of either students’ native languages and/or ESL instructional components. Identification of factors that facilitate and/or impede ELL student learning within specific contexts is a required outcome of the practicum. Students involved in the practicum will meet with a university faculty member on a bi-weekly basis to assess their progress in the field. Co-requisite with EDUC 3540. [1]

EDUC 3573. Practicum for ELL Education III. The purpose of this course is to help students develop necessary dispositions, knowledge, and skills for teaching English language learners through situated learning experiences. Students will participate in a field-based practicum working with students who are English language learners. Their experience will include use of either students’ native languages and/or ESL instructional components. Identification of factors that facilitate and/or impede ELL student learning within specific contexts is a required outcome of the practicum. Students involved in the practicum will meet with a university faculty member on a bi-weekly basis to assess their progress in the field. Co-requisite with EDUC 3540. [1]

EDUC 3580. Teaching Second Language Literacy. The focus of the class will be to identify the differences between first and second language literacy, as well as how to plan instruction, how to recognize and make use of different types of curriculum, how to identify the various components of literacy, and how to teach these effectively to second language learners. Specific instructional approaches designed for second language learners will also be presented. [3]

EDUC 3590. Issues in ELL Education Research: Research, Policy, and Instruction. Critically evaluates the most recent developments in research, policy, and instruction dealing with the second language learning and academic achievement of English language learners (ELLs). Research includes program evaluation studies, literature reviews focused on the learning of ELLs in specific content areas (math, science, social studies, and literature), and influential works by leading theorists and researchers. Policy focuses on citizen-sponsored ballot initiatives that directly impact ELLs, influential judicial decisions, and legislation designed to address the unique needs of these students. Instructional issues will be addressed partially by the reviews of the research and will be supplemented with a discussion of dominant instructional approaches and frameworks. [3]

EDUC 3630. Learning, Diversity, and Urban Studies, Seminar I. The Learning, Diversity, and Urban Studies Seminar I is designed to serve as a foundation for the master’s program, Learning, Diversity, and Urban Studies (LDUS). Students in the LDUS program enroll in a yearlong seminar (Seminar I and II) that has been designed to build programmatic synergy and coherence among the central strands of the program (learning, diversity, and urban studies). To build programmatic coherence, students in the LDUS Seminar I will address some of the pertinent matters regarding in-school and out-of-school teaching and learning. Essential topics of the course include race and equity in urban and diverse contexts, poverty, social class and stratification, teacher and student identity development, teachers and teaching in urban contexts, learning in urban contexts, curriculum development, and classroom management. [3]

EDUC 3640. Learning, Diversity, and Urban Studies, Seminar II. The Learning, Diversity, and Urban Studies Seminar II is a continuation of Seminar I and is designed to deepen students’ knowledge related to learning, diversity, and urban studies. Students in the LDUS program have been exposed to a range of important matters related to learning, diversity and urban studies, and the goals of this second seminar are to assist students in expanding their knowledge and understanding related to some of the
micro- and macro-level structures and systems that shape urban and highly diverse contexts. The seminar will expose students to the interplay between and among discourses related to policy, geography/social context, reform, and “achievement”. While Seminar I was designed to assist students in understanding some broad, yet essential and fundamental, issues and perspectives related to diversity and urban studies, Seminar II is designed to help students deepen their knowledge and to situate and position themselves in ways that will allow them to reenter educational institutions and systems prepared to participate and transform them based on what they have come to know. [3]

**EDUC 3690.** Master's Thesis Research.

**EDUC 3700.** Research Groups. Examination of a research issue of mutual interest in a year-long study. Multiple topics will be offered. May be repeated. [0, 3]

**EDUC 3720.** Development in Context: The Effects of Poverty. This graduate class is to acquaint students with the strong evidence that poverty experienced in childhood in the United States has consequences on development, health and well being both immediately and long term into adulthood. The course will focus on the outcomes as well as understanding the process by which poverty exerts its effects. [3]

**EDUC 3790.** Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

**EDUC 3810.** Discourse Analysis in Education. This course provides a rigorous introduction to the analysis of discourse in educational contexts. The course draws on critical discourse analysis, sociocultural approaches, and other traditions to consider relations of learning, identity, and power in educational texts and communicative activity. The course provides experience and instruction through processes of data collection, transcription, and analysis.

**EDUC 3890.** Individual Study in Education. Semi-independent study on selected topics in education. May be repeated. Consent of instructor required. [1-3]

**EDUC 3900.** Special Topics in Education. Explores special issues or topics related to education. May be repeated with change of topic. [1-6]

**EDUC 3912.** Methods of Educational Research: Qualitative. Covers issues and strategies involved in collection and analysis of qualitative data. Foci ses on the assumptions and related research techniques of qualitative research, framed by the post-positivist paradigm (i.e., naturalistic inquiry, ethnography). [3] Recommended for advanced doctoral students

**EDUC 3930.** Research in Education. Individual programs of research in various education fields. Consent of faculty supervisor required. May be repeated. [1-6]

**EDUC 3931.** Research in ELL Education. Individual programs of research in various education fields. Consent of faculty supervisor required. May be repeated. [1-6]

**EDUC 3932.** Research in Learning and Instruction. Individual programs of research in various education fields. Consent of faculty supervisor required. May be repeated. [1-6]

**EDUC 3933.** Research in Learning, Diversity and Urban Studies. Individual programs of research in various education fields. Consent of faculty supervisor required. May be repeated. [1-6]

**EDUC 3934.** Research in Reading Education. Individual programs of research in various education fields. Consent of faculty supervisor required. May be repeated. [1-6]

**EDUC 3935.** Research in Teaching and Learning in Urban Schools. Individual programs of research in various education fields. Consent of faculty supervisor required. May be repeated. [1-6]

**EDUC 3990.** Ph.D. Dissertation Research.

**EDUC 3995.** Half-Time Dissertation Research.

**English Education**

**ENED 3000.** Teaching Literature in Elementary Classrooms. Introduces students to the study of the field of children’s literature and the principles of teaching literature in school settings. [3]

**ENED 3040.** Perspectives on the English Language. Examines English linguistics and language history, explores multiple methods of teaching the grammar of Standard Written English, and of teaching vocabulary and spelling. For teachers and prospective teachers of English/language arts classes of grades five through twelve. [3]

**ENED 3380.** Teaching Writing and Multimedia Composition. Explores contemporary composition as an activity that draws on a diverse palette of media resources, while also being deeply connected to practices associated with traditional print. Emphasizes how teaching composition in print and new media, in parallel, can support student literacy development. [3]

**ENED 3440.** Reading and Learning with Print and New Media. Studies print and technology-based approaches to improving reading and content area learning in grades 6–12 with a special emphasis on diverse learners and struggling readers. Drawing on research-based practice, students learn to design, enact, and assess effective reading and literacy instruction. [3]

**ENED 3500.** Advanced Study of Literature for Children and Adolescents. Designed to provide students who already have introductory experiences in children’s and adolescent literature advanced study in the field. A variety of current topics relevant to the field of study will be explored. Prerequisite: prior coursework or experience in the field of children’s literature required. [3]

**ENED 3890.** Individual Study in English Education. Semi-independent study of selected topics in English education. Consent of supervising instructor required. May be repeated. [1-3]

**ENED 3900.** Special Topics in English Education. Exploration of special topics related to English education. May be repeated with change of topic. [1-3]

**ENED 3920.** Literature, Popular Culture, and New Media. Examines a wide range of multigenre, multimodal, and digital texts appropriate for readers of middle school and high school age. Considers the influence of popular culture and digital technologies on young adult literature. Includes materials and texts for readers of various ability levels. [3]

**ENED 3930.** Research in English Education. Individual program of research in English education. Consent of supervising instructor required. May be repeated. [1-6]

**ENED 3960.** Internship in English Education. Supervised on-site experience in a professional role. Interns serve as teachers, research associates, aides, or other members of professional teams. Consent of major professor required. [1-12]

**Mathematics Education**

**MTED 3890.** Individual Study in Mathematics Education. Semi-independent study on selected topics in mathematics education. May be repeated. Consent of supervising instructor required. [1-3]

**MTED 3900.** Special Topics in Mathematics Education. Seminars, conferences, workshops, or field activities focused on current issues in mathematics education. May be repeated with change of topic. [1-6]

**MTED 3930.** Research in Mathematics Education. Individual program of research in mathematics education. Consent of supervising instructor required. May be repeated. [1-6]

**Science Education**

**SCED 3300.** Investigations and Trends in Science Education. Survey of trends in science teaching and science curricula at the middle school and senior high school level. Emphasis on philosophies, teaching strategies, materials, and research associated with current curriculum practices. [3]

**SCED 3370.** Advanced Teaching of Science in Secondary Schools. A study of theory, research, issues, curriculum approaches, trends, and
modern approaches to teaching science in secondary schools. Competencies that reflect effective science teaching practices will also be developed. Corequisite: SCED 3360. [3]

SCED 3890. Individual Study in Science Education. Semi-independent study on selected topics in science education. May be repeated. Consent of supervising instructor required. [1-3]

SCED 3900. Special Topics in Science Education. Exploration of a special topic related to science education. May be repeated with change of topic. [1-6]

SCED 3930. Research in Science Education. Individual program of research in science education. Consent of supervising instructor required. May be repeated. [1-6]

Social Studies Education

SSED 3890. Individual Study in Social Studies Education. Semi-independent study on selected topics in social studies education. May be repeated. Consent of supervising instructor required. [1-3]

SSED 3900. Special Topics in Social Studies Education. Explores special topics related to social studies education. May be repeated with change of topic. [1-6]

Liberal Arts and Science

MLAS 310. Selected Topics in Humanities. Selected Topics in Humanities [3]

MLAS 320. Selected Topics in Social Science. Selected Topics in Social Science [3]

MLAS 330. Selected Topics in Natural Sciences. Selected Topics in Natural Sciences. [3]

MLAS 340. Interdisciplinary Selected Topics. Interdisciplinary Selected Topics. [3]

Management

MGT 311. Introduction to Financial Accounting. Studies the basic concepts and limitations of financial accounting. This course covers the financial reporting process and the development, interpretation, and analysis of financial statements for external users, such as investors and creditors. [2] Instructor: Chinney. (Limited to first year MBA students only)

MGT 312. Introduction to Managerial Accounting. Focuses on internally available, generally proprietary, accounting information, which is not required for disclosure in the external financial statements. Users of this internal information include managers, directors, investment bankers, consultants, internal and external auditors, and others. This course is divided into two parts: decision making and performance evaluation. We begin the course with a discussion of the basic vocabulary and mechanics of managerial accounting systems. For the remainder of the course, we focus on identifying and extracting relevant information from managerial accounting systems as an input to decision making and performance evaluation. Course objectives are reinforced through the course readings, case write-ups and discussions, problem solving, and exams. Prerequisite: MGT 311. [2] (Limited to first year MBA students only) Instructor: Willis.

MGT 321. Business in the World Economy. Addresses the impact of national and global economic developments on the business environment. The determinants of national income, inflation, interest rates, unemployment rates, business cycles, exchange rates, and foreign investment are discussed, with particular attention to the increasingly important linkages among the world’s economies as well as some key institutional differences across countries. Supplementary case studies and debates provide opportunities to integrate theory with decision analysis. [2] (Limited to first year MBA students only) Instructor: Parsley.

MGT 322. Managerial Economics. Teaches students to solve problems by (i) identifying profitable decisions using benefit-cost analysis, and (ii) ensuring that employees have enough information to make profitable decisions, and the incentive to do so. Specific topics include: investments, pricing, scale and scope economics, long-run strategy, price discrimination, bargaining, auctions, supply and demand, adverse selection, moral hazard, principal-agent relationships, and organizational design. [2] Instructor: Froeb.

MGT 331. Managerial Finance. This class provides the framework for analyzing the various components needed to value real assets, as well as an introduction to the valuation of financial assets. Topics include the time value of money, capital budgeting, measuring risk in financial markets, market efficiency and an introduction to options. [2] Instructor: Van Wesep. (Limited to first year MBA and MAcc students only).

MGT 361. Marketing Management. Designed to introduce students to basic marketing principles and concepts. Marketing is the business function that manages customer value. Successful organizations integrate the objectives and resources of the organization with the needs and opportunities in the marketplace to create customer value and (thereby) create value for the firm. Effective implementation of marketing concepts requires knowledge of key relationships between internal (company) and external (competitors and customers) environments and how they are influenced by the marketing mix (product management, pricing, distribution channels and promotion strategy). Students are challenged to apply the principles they learn in class to current, “real world” marketing situations. [2] Instructor: Hoeffler. (Limited to first year MBA students only)

MGT 371. Operations Management. An overview of operations management in both service and manufacturing organizations with an emphasis on international operations. Topics include operations strategy, process analysis, quality control, queuing, enterprise planning systems, lean manufacturing, and supply chain management. [2] Instructors: Kurtulus and Alan. (Limited to first year MBA students only)

MGT 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

MGT 381. Managerial Statistics. This course provides an introduction to how statistical methods provide a direct way of dealing with a wide range of managerial problems. It focuses on exploratory data analysis, hypothesis testing, and regression analysis, and uses these methods to study the most important types of business models, and to develop even better ones. Students have the opportunity to use business data of their choice to construct models for estimation and prediction, that solve problems in which they have a particular interest. [2] Instructor: Cool.

MGT 411B. Financial Reporting. This is the second part of the financial reporting course. This two-credit course provides students with refined tools to prepare, understand, and analyze financial statements. The fundamentals of assets, liabilities, and equities covered in MGT 311 will be reviewed, and the more complex issues surrounding these elements will be unpacked, analyzed, and interpreted. In addition, students will be exposed to the link between the economics of corporate transactions and how those transactions are accumulated, summarized, and reported in the financials of firms. The course considers the financial reporting framework that has been established by International Financial Reporting Standards but will primarily focus on the financial reporting standards established by the Financial Accounting Standards Board (FASB). By the completion of this course, students will be comfortable with the preparation of financial statements and the accompanying notes, as well as the economic implications of transactions that are included therein. Students will improve their familiarity with how accounting information is used to evaluate economic conditions and make organizational decisions. Prerequisite: MGT 311. [2] Instructor: Stuart.

MGT 412. Taxation of Business and Investment Transactions. This course focuses on the fundamental concepts of federal income taxation
that apply to business and financial transactions typical of most taxpayers, such as choice of business entity; measurement of taxable income (loss) from operations; acquisitions and dispositions of property; nontaxable exchanges; cost recovery; compensation and retirement planning; and investment and personal financial planning. The objectives of the course are to educate students about the role taxes play in financial and managerial decision-making; provide them with a working knowledge of those principles of tax law that are of wide application and importance; develop their intuition about the likely tax consequences of business and investment transactions; begin developing in them an appreciation of tax planning as a process for maximizing wealth; and give them a good foundation for increasing their tax knowledge through advanced courses, self-education, or on-the-job training. To help students understand and become conversant with the fundamental concepts of federal income taxation, the instructor uses a problem-oriented approach that requires students to apply the more important principles of tax law to discrete factual situations. Prerequisite: Mgt. 311 or consent of the instructor. [2] Jones.

MGT 413. Advanced Management Accounting. This course builds on the tools learned in Mgt 312, Introduction to Managerial Accounting. The course has more of a marketing focus than a manufacturing one and develops skills managers need to make profit enhancing decisions. It uses case studies to explore in depth the actual application of managerial accounting techniques to real world management problems. The cases relate to companies whose managers have developed innovative ways of using financial data to run their companies. Students studying Marketing or Operations would find this course very useful. Prerequisite: MGT 311. [2] Instructor: Boer.

MGT 417. Accounting Information Systems. The development and implementation of integrated organizational computer-based information systems has had a significant impact on the field of accounting. Accounting information systems must meet the multiple accounting needs of transaction processing, internal controls and audit, and financial statement preparation and simultaneously support the needs of decision makers in finance, operations, marketing, human resources, and strategic management. The Sarbanes-Oxley Act makes corporate executives explicitly responsible for establishing, evaluating, and monitoring the effectiveness of internal control over financial reporting. For most organizations, the role of IT will be crucial to achieving these objectives. This course presents system and control concepts necessary for the design, implementation, control, and audit of accounting information systems with an emphasis on the accounting cycle, database design requirements, information system controls, financial reporting, and management responsibilities for compliance. The course includes a significant hands-on component using an accounting information system and relational database implemented using Microsoft Access. [2] Instructor: March.

MGT 423. Corporate Strategies for Environmental, Social & Governance Issues. Explores this growing trend and its implications for business in today’s world and beyond. Environmental management, corporate social responsibility, transparency, and corporate governance have traditionally been viewed as necessary evils that add to the cost structure of business. In this old model, government regulations, threats of consumer boycotts, and other forms of coercive activities were the driving force behind compliance and socially responsible behavior. Many firms have begun to shed this old view of environmental, social and governance (ESG) issues and are embracing ESG as a competitive strategy. We will explore what leading companies are doing in areas such as fair wages, privacy concerns, affirmative action, sexual harassment, employee rights, worker safety, consumer safety, animal testing, human rights, governance, and environmental considerations. Particular attention is paid to understanding whether or not these activities provide firms with a competitive advantage in the marketplace. [2] Instructor: Cohen.

MGT 425. Game Theory and Business Strategy. Game theory is a discipline that offers a systematic way of analyzing problems of strategic behavior in interactive situations. This course develops basic concepts from game theory and applies them to business strategy. Some of the concepts to be considered include (1) decision tree analysis; (2) looking forward and reasoning backward; (3) anticipating the moves of the rival; (4) inducing cooperation; (5) strategic use of commitments, threats, promises, and credibility; (6) pre-emptive moves and deterrence; and (7) creating and using one’s reputation strategically. The strategic significance of these concepts will be demonstrated through business case studies. Prerequisite: MGT 321. [2] Instructor: Thomas.

MGT 431. Investments. Studies solutions to fundamental problems faced by individual and institutional investors. First, we cover a number of topics in fixed income markets including the different ways of computing bond yields, forecasts of interest rates using the yield curve, and duration and convexity as measures of bond risk. Second, we solve the asset allocation problem to determine an optimal portfolio mix. We review the relevant theory, use an advanced spreadsheet to find an answer, and discuss issues faced by portfolio managers. Third, we use two methods to value options, the Black-Scholes formula and the binomial tree, and show how investors can use options to customize their risk-reward profile. This course is equivalent to MGT 403B so it is not available for MSF students. Prerequisite: MGT 331. [2] Instructor: Boll.
rate payments, and managing currency risk exposures. Whenever possible, current derivatives market-related issues are integrated into classroom dis-

MGT 440. Strategic Alignment of Human Capital. The course is de-
dsigned to help managers and entrepreneurs improve business results by
making better decisions about the management of human capital. Focus
will be on mapping business models, identifying “pivot points” where hu-
man capital investments have the highest marginal value, and designing
programs that align employees’ skills and efforts with the achievement of
organizational strategies. While students anticipating a career in human re-
source management and organizational development will benefit from this
class, it is explicitly designed to give general managers the knowledge and
skills they need to develop frameworks to diagnose problems, propose
solutions, and make effective resource allocation decisions. Prerequisites:

MGT 441. Organizational Learning and Effectiveness. Examines the
effects of organization design on organizational learning and performance.
Traditional as well as innovative designs for organizational structures and
processes will be explored. Topics include the impact of environment,
technology, culture, and power and politics on organizational design, and
the emergence of new organizational designs. Prerequisite: MGT 342 [2]
Instructor: Ramanujam.

MGT 442. Talent Management. The study of the process by which firms
project their human resource needs and the policies and practices they use
to meet these needs. Firms must identify, acquire, develop, and allocate
scarce and difficult-to-re-tain talent to ensure the achievement of business
objectives. Topics include employment branding, lateral hiring, talent short-
ages, career paths, internal development, and managing non-traditional
sources of labor. This class will allow current and future entrepreneurs,
general managers, and human resource professionals to design and imple-
ment effective, cutting-edge talent management systems. [2] Offered every
other year] Instructor: Payne.

MGT 444. Leadership: Theory and Practice. Focuses on leadership
theory and its application to students’ careers. Leadership concepts in-
clude traits, situations, communication, power, vision, integrity, emo-
tional intelligence, and courage. Students develop a fundamental understanding
of theory and research, and acquire skills and self-insight to become effect-

MGT 445. Talent Sourcing and Acquisition. Talent sourcing and ac-
quision is the process by which organizations identify, recruit, evaluate,
engage, and deploy talent. Students will develop a practical understand-
ing of employment law, job and competency analysis, labor market seg-
mentation, employment branding, internal and external recruitment, talent
assessment methods (biographical data, personality testing, performance testing,
structured interviews, and assessment centers), and utility analysis. Em-
phasis will be placed on developing talent sourcing and acquisition systems
that are reliable, valid, legal, and useful. Pre-requisite: MGT 342. [2]

MGT 446. Compensation Decision-Making. Analysis of approaches to
the motivation of human performance through reward systems, particularly
compensation systems. Theoretical models from economics, psychology,
and sociology are integrated in analyses of issues of wage structuring, the
design of incentives, and wage level. Practical exercises in the design of
compensation systems are employed. Prerequisite: MGT 342. [2] Instruc-
tor: Park.

MGT 447. Labor and Employee Relations. This course has two parts.
The first half covers the basics of labor relations, including organizing,
collective bargaining, and the grievance process. It also covers the decline
of unions and some of the issues that have developed as a result of that
decline. The second half covers the broader area of “employee relations”
including arbitration, mediation, employee layoffs, performance appraisal,
managing diversity, implied contracts, and statutory rights. The course
uses cases, but also is highly experiential, including simulations for griev-
ance handling, arbitration, and performance appraisal. Labor and Employ-
ee Relations (LER) is useful for HR students, but also for operations stu-
dents (since many factories deal with the issues we cover in this class) and
those who expect to be managing large groups of employees (including
those who may become corporate managers, or expect to manage their
own companies). For all students who are enrolled in the Human Capital
Career Specialization, LER is a required course. Prerequisite: MGT 342. [2]
Instructor: Floyd.

MGT 448. Negotiation. Designed to provide students from all functional
backgrounds with skills needed to approach negotiations with confidence.
This includes a framework for analysis, knowledge about one’s own ten-
dencies in negotiation, and a chance to experiment with negotiating
methods in various contexts. Topics include integrative and distributive
negotiations, individual differences in bargaining styles, coalitions, team
negotiations, negotiating through agents, and ethical issues in negotiation.
The course uses readings and cases, with considerable emphasis placed

MGT 456. Ethics in Business. Considers management practice and
business leadership from a personal ethical perspective. We explore how
ethical concerns color, change, detract, and/or add to one’s approach
to life in work and other organizations, as both leader and member. The
issues raised and discussed create opportunities to inquire into our own
ethics and to gain insights into our own approaches to leadership and col-
laborative work. We consider a range of approaches people in businesses
use to assure (and fail to assure) ethical business practice. Circumstances
drawn from case studies and contemporary events, as well as experiences
of members of the class, are used as springboards for discussions. [2]
Instructors: Victor, Barry.

MGT 460. Marketing Communications: Advertising. This course cov-
ers the overall communications strategy with prime emphasis on the role
of advertising and theories of how advertising works. Typical topics covered
include targeting, creative strategy, media strategy, including an emphasis
on social media, budgeting, setting communications objectives, and
advertising agency management. Complements MGT 464, Sales Promotion.
Assignments include readings, cases, written case reports, and advertising

MGT 461A. Qualitative Marketing Research. This course is designed
to provide an overview of qualitative marketing research and its use in
making effective marketing decisions. Because MBA students are not typi-

cally training for careers in market research, the course emphasizes two
things that are very relevant for a marketing manager: (1) how to evalu-
ate the design of research studies to assess whether the results are valid
and meaningful, and (2) how to analyze and interpret market research
data for marketing decision making. We examine a variety of qualitative
research techniques including focus groups, observation, in-depth inter-
views, ZMET, and projective techniques. This course provides students
with “hands-on” experiences conducting actual research relevant to real

MGT 461B. Survey Design and Analysis. This course is designed to
provide an overview of survey research and its use in making effective
marketing decisions. Because MBA students are not typically training for
careers in market research, the course emphasizes the analysis and inter-
pretation of market research data for marketing decision making, and the
design of research studies so that the results are both meaningful and valid.
The course focuses on descriptive research, primarily survey research, as
well as touching briefly on causal research (e.g., experimentation and test
marketing). The best way to learn the material in this course (even for a mar-

tering who may not actually engage in data analysis in the future) is
through a “hands on” experience. Towards this end, students will design
and implement a questionnaire, collect data, and analyze the data using
statistical software. The course will apply many of the statistical techniques
learned thus far in the Owen MBA program, such as t-tests, ANOVA,
regression, and correlation. Additionally, we will discuss data reduction (e.g.,
factor analysis), scale reliability (e.g., Cronbach alpha) and more advanced
marketing data analysis techniques, such as conjoint analysis, perceptual
mapping, and cluster analysis. The emphasis in this course will be on the
interpretation and proper use of marketing research techniques, with
the goal of training knowledgeable marketing managers who can evaluate
the quality of marketing research conducted by others and use the information
effectively in making strategic marketing decisions. [2]

MGT 461C. Marketing Models. Marketing decisions are primarily the
puriﬁcation of CEOs, CMOs, consultants, and marketing managers, but, in-
creasingly, marketing has permeated throughout companies such that all
managers must consider their customers. Marketing decisions are optimal when they are fact-based, and marketing models are informed by both data and judgment. Models will be studied, created, and tested for all elements of marketing: clustering customers into segments, forecasting market sizes, customer relationship management database systems, diffusion rates for new products, advertising budgeting, pricing models, etc. Prerequisite: MGT 461b. [2] Instructor: Iacobucci.

MGT 462. Consumer Analysis. At its basic premise, marketing is an attempt to influence consumers toward a purchasing act (and oftentimes a non-act). This course seeks to provide insights into consumer pedagogies (e.g., psychology, sociology, social psychology) used in developing effective marketing strategies. In addition to learning how a deeper appreciation of consumer behavior analysis can inform the design of effective marketing, you will also gain a better understanding of yourself as a participant in marketing influence. Assignments include readings, cases, written case reports, and group projects. Prerequisite: MGT 361. [2] Escalas, Hoffler, Posavac, Iacobucci.

MGT 464. Sales Promotion and Personal Selling. This course equips students with the tools necessary to craft an effective integrated strategy for the promotion of goods and services. Students will learn about the variety of consumer- and trade-oriented sales promotions available to marketers and how to design such promotions for maximum sales as well as branding impact. The course will also consider how business success can be facilitated by a strong sales effort. To this end, the course will cover the role of selling in the broader marketing plan, as well as principles of successful selling. Sales promotion and selling are the two main foci of the course, but other integrated marketing communications tools will be covered including public relations, direct marketing, sponsorships, and merchandising. Although the principles of effective advertising are exclusively covered in MGT 460, this course will cover optimal strategies for the integration of sales promotion and advertising, with particular focus on the life cycle of the brand. The course serves as a complement to MGT 460—neither course serves as prerequisite for the other. Prerequisite: MGT 361. [2] Instructor: Posavac.

MGT 467. New Product Development. The new product development process is examined from idea to launch, covering elements such as idea generation and screening to market scoping and testing. As part of the course, students will collaborate in teams to work on a new product development project for an actual company. Multiple techniques will be applied, including concept testing, conjoint analysis, forecasting, new product diffusion structures and rates, etc. Prerequisite: MGT 361. [2] Ratchford.

MGT 468. Brand Management. A business thrives or withers as a function of the health and success of its brands. This course will give students the tools to develop and execute effective brand strategies in the aim of building and maintaining strong brands that endure over time, and that can withstand competitive threats. Emphasis will be given to category management, and students will learn how to develop and position product lines, when (and when not) to pursue brand extensions, and the principles of creating, preserving, and leveraging brand equity. Prerequisite: MGT 361. [2] Instructor: Posavac.

MGT 472. Supply Chain Management and Information. An introductory course on managing material and information flows throughout the supply chain, including aspects of product design and configuration, inventory planning, network configuration, and channel management. Topics include managing products with short life cycles, strategic alliances and information sharing, supplier development, and electronic supply hubs. Prerequisite: MGT 371. [2] Instructor: Kurtulus.

MGT 479. Management of Service Operations. The service sector has become the dominant sector in the global economy, yet productivity growth in the service sector has consistently lagged that of the manufacturing sector. Consequently, there is a big opportunity for service firms to better manage their operations. Service operations differ fundamentally from manufacturing operations. For example, customers are often present and can participate in the delivery of a service. The course focuses on three aspects of managing service operations: design of service delivery systems, management of service capacity and demand, and service quality and growth. The course uses a mix of lectures, cases, and simulations. The course covers a wide variety of service settings. Grades are based on class participation, a simulation, two case write-ups (done in groups), and a group project. Prerequisite: MGT 371. [2] Instructor: Lapré.

MGT 480. Business Forecasting. Forecasting is an integral part of managerial planning and decision making. Effective management decision making is dependent upon understanding what data are necessary to the business context and how that data must be transformed to yield useful information. This course is designed to provide the conceptual framework and practical experience that will enable the student to effectively use business data to make predictions and forecasts. It will introduce those forecasting methods that have proven to be the most useful in practice: smoothing methods, multi-regression, time series regression, and Box-Jenkins (ARIMA) models. Mintab will be used to make these techniques accessible. Major topics include: (1) concepts of forecasting models, (2) how to enable the "best model" methods for forecasting model performance, and (4) inferential procedures that gauge the accuracy of predictions and the effects of predictors. Prerequisite: MGT 381. [2] March.

MGT 492. Data Management and Business Intelligence. Introduces the principles of database management system development and use including an overview of different data models, and methods for conceptual, logical, and physical design of databases. Issues in database administration and maintenance, database technologies (including distributed databases, knowledge base systems, heterogeneous databases) are also addressed. [2] Instructor: March.

MGT 511. Advanced Financial Reporting and Analysis. Examination of the nature and financial reporting aspects of various business transactions including corporate acquisitions, mergers, the formation of other strategic alliances, and accounting for governmental entities. Topics include accounting for business combinations and consolidations, joint ventures, and foreign currency translation, variable interest entities, derivatives and hedge accounting, and financial reporting under Governmental Accounting Standards. Prerequisite: MGT 411. [2] Instructor: Chaney; Willis.

MGT 512. Federal Taxation of Business Entities. This course focuses on the fundamental concepts of federal income taxation that apply to corporations and shareholders. A "cradle to grave" organizational approach is used, emphasizing organization and capital structure of the corporation, dividends and other distributions, stock redemptions, corporate divisions, taxable and tax-free mergers and acquisitions, and liquidation of the corporation. The objectives of the course are not to make students "tax experts," but to sensitize them to the tax implications of transactions involving corporations and shareholders so that, as business managers, entrepreneurs, or advisers, they can spot the tax concerns or opportunities, identify the major tax issues, ask good questions of the "tax experts," and understand the answers received as a critical step in making business and financial decisions that maximize wealth. To help students understand and become conversant with the fundamental concepts of federal income taxation, the instructor uses a problem-oriented approach that requires students to apply the more important principles of tax law to discrete factual situations. Prerequisite: MGT 311 or consent of the instructor. MGT 412 is highly recommended. [2] Instructor: Jones.

MGT 513. Financial Statement Analysis. Accounting addresses the measurement, aggregation, and evaluation of economic information useful for decision making. In Financial Statement Analysis, we will focus on a subset of this construct, which is labeled general purpose external financial accounting and reporting. General purpose statements are those provided to individuals who do not have the authority to compel management to provide information they desire. These individuals differ from taxing authorities or others who have not only specialized needs, but also the authority to compel enterprises to furnish the information they desire. General purpose statements are those viewed as suitable for investors, creditors, and other resource providers. External statements are those available to individuals outside of the firm. Managers, directors, and others may have access to additional internal (and often proprietary) information. This course provides a broad framework for using financial statements and other SEC-required regulatory disclosures in business analyses. Emphasis is placed on developing a critical, general manager’s perspective for interpreting required financial disclosures, understanding the types of financial information available in the public domain and their purposes, developing an appreciation of (some of) the inherent ethical conflicts that may color managers’ and
sell-side analysts’ disclosures, and formulating an approach to evaluating an enterprise’s overall financial reporting and the implications of that analysis from the perspective of a potential shareholder or creditor. The course objectives are reinforced through the course reading materials, assigned problems, in-class problem solving, and class discussions. This course is useful for individuals planning careers in investment banking, portfolio management, corporate finance, management consulting, and security analysis. Prerequisite: MGT 411 (can be taken concurrently). [2]

MGT 518. Accounting and Finance for Entrepreneurs. Covers the accounting and financial issues faced by rapidly growing start-up firms. It deals with accounting systems, cash planning systems, and financial issues managers must handle for the firm as it grows its annual sales from zero to 20 million. Students learn how to dissect a term sheet that investors may offer, how to locate sources of startup funds, and how to select the right investor. This course does not count for credit toward a Finance concentration. Prerequisite: MGT 311. [2] Instructor: Boer.

MGT 524. Seminar in Monetary and Fiscal Policy. Focuses on current fiscal and monetary policies and policies related to the functioning of and for the outlook for the economy in which business operates. The approach is pragmatic and institutional but also involves the basics of how our monetary and fiscal systems operate and the theoretical concepts as they apply to current problems and policies. Distinguished speakers, including top-level Federal Reserve and Treasury officials and leading representatives of private research and financial organizations participate in seminar presentations and discussions. This is a two mod course with 524A. [1] Instructor: Daane.

MGT 526. Corporate Strategy. Focuses on the challenges of formulating corporate-level strategies and their implementation. In contrast to business-strategy level, which addresses competitive advantage in a single market or industry, we analyze how competitive advantage can be created through the configuration and coordination of activities across multiple markets and industries. As part of the course, distinctive challenges that face multinational corporations are also discussed. Students will gain experience in discovering, diagnosing, and solving corporate-level problems including corporate diversification, strategic alliances, multi-market interaction, and global strategies. Prerequisite: MGT 355. [2] Instructor: Daane.

MGT 530. Mergers and Acquisitions. Covers some of the major corporate finance activities of investment banks including: mergers and acquisitions, and takeovers and takeover defenses, as well as private financing, asset restructuring, capital restructuring, leveraged buyouts, management buyouts, and leveraged recapitalizations. This course is meant to familiarize students with institutional details and to present a variety of case situations in which corporate valuation, industry and financial analysis, strategic decision making, and financial contracting and design are practiced. Casework represents an integral part of this course and is used to challenge students to structure their own analysis of how corporate finance can be used to create value for shareholders. Prerequisite: MGT 432a. [2] Instructor: Crain.

MGT 531. Private Equity and Leveraged Buyouts. This course examines the financial, economic, and legal strategies that underlie private equity transactions in the United States and other countries. The course begins by examining how private equity firms raise money from institutional and individual investors and structure private equity funds. We will discuss the legal, financial, and economic motivation for the different types of private equity fund structures. The course then turns to how private equity funds select, invest, and manage their portfolio companies. We will discuss how venture capital firms, a particular [and very important] type of private equity investor, provide capital to start-up firms, and how other private equity firms provide capital to help more established companies, both public and private, grow and restructure. One common theme that runs throughout this course is how financial instruments and legal contracts between the parties involved in private equity transactions address predictable conflicts of interest. The course will center on the study of cases that highlight important concepts and issues in private equity transactions using actual historical situations. Students are expected to do fundamental analysis of the companies and transactions presented in the cases as well as to discuss how the legal environment at the time of the case affects their recommendations. Prerequisite: MGT 432a. [1 - short course] Instructor: Seward.

MGT 532. Risk Management. Considers techniques for risk management of financial institutions. Topics include value at risk systems for managing risk, the application of portfolio theory to risk management, forecasting risk and correlations, regulatory approaches to risk control, and regulatory capital requirements. Prerequisite: MGT 435b, 435c. [2] Instructor: Ball.

MGT 534. Financial Data Analysis. Introduces students to the many databases used in empirical research in finance, including CRSP, Compustat, TAQ (NYSE, Amex, and Nasdaq-NMS transaction data) and NASTRAQ (Nasdaq trades, inside quotes, and individual dealer and ECN quotes). The course will use the SAS programming language to access these databases and to analyze the data. The course is intended for MSF students and MBAs who are interested in more analytically oriented finance positions. [2] Instructor: Schenzer.

MGT 535A. Derivative Securities Valuation. Examines the pricing of derivative securities. Topics on futures, options, and exotic securities. A number of valuation techniques are examined which include numerical approaches. Prerequisite: MGT 435c. [2] Instructor: Schlag.

MGT 536. Active Portfolio Analysis and Trading. Takes the perspective of a quantitatively oriented equities portfolio manager. It examines portfolio theory, portfolio selection models, equilibrium asset pricing models such as the CAPM and the APT, earnings estimation, and the evaluation of portfolio performance. The course is designed for very quantitatively oriented students. [2] Instructor: Rick Cooper.

MGT 539F. Special Topics in Accounting: Federal Income Taxation of Mergers and Acquisitions. This course is designed primarily for the student who wants a general understanding of the basic principles and concepts of federal income taxation that apply to corporate mergers, acquisitions and LBOs. Topics include taxable and tax-free stock and asset acquisitions, incorporation transactions, non-acquisitive reorganizations, current and liquidating distributions to shareholders, stock redemptions, and survival of net operating losses and other tax attributes. To help students understand and become conversant with the fundamental concepts of federal income taxation, the instructor uses a problem-oriented approach that requires students to apply the more important principles of tax law to discrete factual situations. Prerequisite: Mgt. 311 or consent of the instructor. [2] Instructor: Jones.

MGT 540. Leading Change. Examines all aspects of dealing with the people aspects of organizational change from the perspective of a change leader or consultant. This course is practical and hands on with an audit of an organizational change, a corporate turnaround simulation, videos, speakers, case incidents, and personal feedback assessments. Topics covered include personal change, models and frameworks for change, new methods for changing corporate culture and mindsets, approaches for strategy execution, and techniques for implementing new organization designs and technologies. Prerequisite: MGT 342 or permission of instructor. [2] Instructor: Friedman.

MGT 544. Controversies/Debates in Business, Management, and Society. This course is a vehicle for analysis and debate on current, controversial issues related to business, management, economics, and society. Course objectives blend skills and substance. With respect to skills, there will be material on the nature of argument and analysis, with a goal of creating meaningful improvement in students’ ability to develop and deploy goal-directed persuasive arguments. With respect to substance, an objective of the course is to expand students’ in-depth knowledge of key issues of the day related to business, economics, and management practice. Prerequisite: MGT 342. [2] Instructor: Barry.

MGT 554B. Creating a Business Plan. A hands-on course in which students work in teams to develop a business idea. The course uses a structured approach that students follow to build a business plan, and students give frequent presentations of their ideas to their classmates, investors, and experienced entrepreneurs for critical feedback that accelerates the development of their business idea. At the end of the course students present their plans to a panel of entrepreneurs and investors. [2] Instructor: Boer.

MGT 560. Marketing Strategy. Builds on the strategic groundwork laid in core marketing and offers students an opportunity to apply their marketing strategy skills. Students will compete in an elaborate, multi-period marketing
simulation (StratSimMarketing). As in the real market, there will be winners and losers, and students’ grades will be based partially on how well they perform against competitors in this simulation. In addition, the course will introduce research on special topics such as competitive conjectures and responses, channel management, and multi-firm collaboration. Prerequisite: MGT 361. [2] Ratchford.

MGT 562. Customer Relationship Management. Provides an introduction to the study of customer satisfaction and customer relationship management. Topics addressed included satisfaction measurement, linking satisfaction to firm performance, customer profitability and lifetime value, and predictive analytics for database marketing. This course is taught from a quantitative perspective, with particular emphasis placed upon measuring (and ultimately optimizing) the behavioral and financial impact of customer satisfaction and loyalty programs. To this end, a variety of data analysis techniques will be utilized throughout the term, including logistic regression, simulation, and optimization. Measurement (survey) methods and issues are also an integral focus of the course. Prerequisite: MGT 460 or 462 or consent of instructor. [2]

MGT 565. Internet Marketing Strategy. This covers the fundamentals of Internet Marketing, Search Engine Marketing, E-Mail Marketing, E-Commerce Promotions and Online Merchandising. We’ll cover topics such as working with interactive agencies, structuring Internet business development deals, creating online promotional campaigns, tracking and reporting online marketing initiatives, budgeting and forecasting for online customer acquisition efforts, user interface and design strategies, and understanding key drivers of success for affiliate marketing, search engine marketing, e-mail marketing, and new and upcoming forms of online marketing within virtual worlds, online gaming, and social media. Prerequisite: 361. [1] Short course. Instructor: Cleek.

MGT 566. Pricing Strategies. Considers the theory and practice of setting prices. We will bring together economic frameworks and models of consumer behavior to analyze different pricing frameworks (e.g., value pricing, cost-plus) and tactics (segmentation, bundling). Pricing examples from various industries and legal aspects of pricing will also be discussed. Prerequisite: MGT 355, 361. [2] Instructor: Haws.

MGT 577. Managing and Improving Processes. Processes are the fundamental way in which work gets done in organizations. This course is all about processes--how to analyze, control, and improve them. Students learn to map a process, analyze it for waste and value-added content, and apply essential principles of lean work systems to bring about improvement. The course introduces the improvement model and also covers statistical process control--a foundational tool in Six Sigma programs. Students learn how to construct, analyze and use statistical process control charts in both manufacturing and service settings. The course includes opportunities for experiential learning: students engage in a hands-on team-based process improvement simulation and complete a field assignment in which they analyze a process in an organization. Prerequisite: MGT 371. [2] Instructor: Hyer.

MGT 615. Independent Study in Accounting. Prerequisite: Consent of instructor. [Variable credit] Staff.

MGT 635. TVA Investment Challenge. MGT 635, TVA Investment Challenge. Students manage an Investment Portfolio for the Tennessee Valley Authority in competition with other Universities in Tennessee. Prerequisite: permission of instructor. [2 credits in total over 4 mods, beginning in January and ending in December]. Instructor: Christie.

MGT 645. Independent Study. Independent Study HOP

Mathematics

MATH 204. Linear Algebra. Algebra of matrices, real and complex vector spaces, linear transformations, and systems of linear equations. Eigenvalues, eigenvectors, Cayley-Hamilton theorem; inner product spaces, and orthonormal bases. Hermitian matrices. Designed primarily for mathematics majors. No credit for students who have earned credit for 194 or 205b. Students who have earned credit for 205a will earn only two credits for this course. Prerequisite or corequisite: 175, [3]

MATH 208. Ordinary Differential Equations. First- and second-order differential equations, applications. Matrix methods for linear systems; stability theory of autonomous systems; existence and uniqueness theory. Intended for mathematics and advanced science majors. No credit for students who have earned credit for 196 or 198. Prerequisite: concurrent enrollment in 205b or prior credit for either 205b or both 175 and either 194 or 204. [3]

MATH 215. Discrete Mathematics. Elementary combinatorics including permutations and combinations, the principle of inclusion and exclusion, and recurrence relations. Graph theory including Eulerian and Hamiltonian graphs, trees, planarity, coloring, connectivity, network flows, some algorithms and their complexity. Selected topics from computer science and operations research. Prerequisite: 194, 204, or 205b. [3]

MATH 218. Introduction to Probability and Mathematical Statistics. Discrete and continuous probability models, mathematical expectation, joint densities. Laws of large numbers, point estimation, confidence intervals. Hypothesis testing, nonparametric techniques, applications. Students taking 218 are encouraged to take 218L concurrently. No credit for students who have earned credit for 216. Prerequisite: 175 or 205b. [3]

MATH 219. Introduction to Applied Statistics. A brief review of basic applied statistics followed by a development of the analysis of variance as a technique for interpreting experimental data. The generalized likelihood ratio principle, completely randomized designs, nested designs, orthogonal contrasts, multiple comparisons, randomized block designs, Latin squares, factorial designs, 2n designs, fractional factorials, confounding, introduction to response surface methodology. Applications will be emphasized. Prerequisite: 216 or 218. [3]

MATH 223. Abstract Algebra. Fundamental properties of integers and polynomials. Elementary properties of groups, rings, integral domains, fields, and lattices. Prerequisite: 194, 204, or 205b. [3]

MATH 226. Introduction to Numerical Mathematics. Numerical solution of linear and nonlinear equations, interpolation and polynomial approximation, non-numerical differentiation and integration. Least-squares curve fitting and approximation theory, numerical solution of differential equations, errors and floating point arithmetic. Application of the theory to problems in science, engineering, and economics. Student use of the computer is emphasized. Familiarity with computer programming is expected. Prerequisite: Either 194, 204, or 205b, and either 196, 198, or 208. [3]

MATH 234. Introduction to Partial Differential Equations. Initial- and boundary-value problems for partial differential equations using separation of variables in conjunction with Fourier series and integrals. Explicit solutions of problems involving the heat equation, the wave equation, and Laplace’s equation. Prerequisite: Either 194, 204, or 205b, and either 196, 198, or 208. [3]

MATH 240. Transformation Geometry. Transformations of the plane, groups of transformations, reflections, glide reflections, classification of the isometries of the plane, frieze groups, analysis of frieze patterns, wall paper groups, and analysis of wall paper patterns. Especially recommended for prospective teachers of mathematics. Prerequisite: 194, 204, or 205b. [3]

MATH 243. Differentiable Manifolds. Manifolds in n-dimensional Euclidean space, smooth maps; inverse and implicit function theorems. Regular value theorem, immersions and submersions, Sard’s theorem, and transversality. Degree of a map; winding numbers and the Fundamental Theorem of Algebra; intersection theory modulo 2. Prerequisite: 205b or both 175 and either 194 or 204. [3]
MATH 247. Probability. Combinatorics, probability models (binomial, Poisson, normal, gamma, etc.) Stochastic independence, generating functions, limit theorems and types of convergence, bivariate distributions, transformations of variables. Markov processes, applications. Except for students with extremely strong backgrounds, 218 should be taken prior to 247. Prerequisite: 205b or both 175 and either 194 or 204. [3]

MATH 248. Mathematical Statistics. Distribution theory, order statistics, theory of point estimation and hypothesis testing, normal univariate inference, Bayesian methods, sequential procedures, regression, nonparametric methods. Students interested in applications may take 218L. Prerequisite: 247. [3]

MATH 249a. Financial Stochastic Processes. The theory of stochas-tic processes and applications to financial economics. Brownian motion; martingales; Itô’s Lemma; stochastic integration. Monte Carlo simulations with variance reduction techniques. Applications include discrete-time option pricing and delta hedging. Prerequisite: 246a and either 216, 218, or 247. [3]

MATH 250. Introduction to Mathematical Logic. Development of the first order predicate calculus and fundamental metamathematical notions. Prerequisite: 194, 204, or 205b. [3]

MATH 252. History of Mathematics. Major developments in mathe-matics from ancient times to the early twentieth century. Emphasis both on the historical perspective and the mathematics; assignments include many exercises and theorems. Highly recommended for teacher candidates. Prerequisite: 205b or both 175 and either 194 or 204. [3]

MATH 253. Error-Correcting Codes and Cryptography. Applications of algebra to reliability and secrecy of information transmission. Error-correcting codes, including linear, Hamming, and cyclic codes, and possibly BCH or Reed-Solomon codes. Cryptography, including symmetric-key, DES and RSA encryption. Prerequisite: 194, 204, or 205b. [3]

MATH 260. Introduction to Analysis. Properties of real numbers, com-pactness and completeness. Limits, sequences and series, uniform con-vergence, and power series. Basic properties of functions on the real line, and the elementary theory of differentiation and integration. Emphasis on methods of proof used in advanced mathematics courses. Prerequisite: 205b or both 175 and either 194 or 204. [3]

MATH 261. Complex Variables. Complex numbers, analytic and elemen-tary functions, transformations of regions. Complex integrals, Cauchy’s in-tegral theorem and formula, Taylor and Laurent series. The calculus of residues with applications, conformal mappings. Prerequisite: 175 or 205b. [3]

MATH 262. Mathematical Modeling in Biology and Medicine. Basic mathematical modeling tools, such as interpolation, least-squares regression, difference equations, and ordinary and partial differential equations. Statistical analysis of data, support vector machines, and computer simulation. Familiarity with computer programming is expected. Prerequisite: Either 194, 204, or 205b, and either 196, 198, or 208. [3]

MATH 263. Fourier Analysis. Fourier series topics including convolution, Poisson kernels, Dirichlet kernels, and pointwise and mean-square convergence. Integral transforms including one-dimensional and multidimensional Fourier integrals, Fourier inversion formula and Plancherel theorem, Pois-son summation formula, Radon transform, and X-ray transform. Fourier analysis on Abelian groups including finite Fourier analysis and fast Fourier transform. Applications to signal processing, Shannon sampling theory, and/or compressed sensing. Repeat credit for students who completed 287 section 1 in spring 2011 or spring 2013. No credit for graduate stu-dents in Mathematics. Prerequisite: Either 205b or both 175 and either 194 or 204. [3]

MATH 274. Combinatorial. Elements of enumerative analysis including permutations, combinations, generating functions, recurrence relations, the principle of inclusion and exclusion, and Polya’s theorem. Some spe-cial combinatorial problems will be treated as class interest and background indicate (e.g., Galois fields, theory of codes, and block designs). Students unfamiliar with permutations, combinations, and basic counting techniques should take 215 prior to 274. Prerequisite: 194, 204, or 205b. [3]

MATH 280. Set Theory. The basic operations on sets. Cardinal and or-di-nal numbers. The axiom of choice, Zorn’s lemma, and the well-ordering principle. Introduction to the topology of metric spaces, including the con-cepts of continuity, compactness, connectivity, completeness, and separabil-ity. Product spaces. Applications to Euclidean spaces. Strongly recom-mended for beginning graduate students and for undergraduates who plan to do graduate work in mathematics. Prerequisite: 205b or both 175 and either 194 or 204. [3]

MATH 283a. Modern Algebra. Group theory through Sylow theorems and fundamental theorem of finitely generated abelian groups. Prerequisite: 223. [3]

MATH 283b. Modern Algebra. Introductory theory of commutative rings and fields, and additional topics such as Galois theory, modules over a principal ideal domain and finite dimensional algebras. Prerequisite: 283a. [3]

MATH 284. Lattice Theory and the Theory of Ordered Sets. An intro-duction to basic concepts and theorems in lattice theory and the theory of ordered sets with connections to universal algebra and computer science. Boolean algebras, modular and distributive lattices, ordered topological spaces, algebraic lattices and domains, fixed point theorems, coasts, free lattices. Prerequisite: 223. [3]

MATH 287. Nonlinear Optimization. Mathematical modeling of optimiza-tion problems. Theory of unconstrained and constrained optimization, in-cluding convexity and the Karush-Kuhn-Tucker conditions. Derivative- and non-derivative-based methods. Familiarity with computer programming is expected. Prerequisite: 205b or both 175 and either 194 or 204. [3]

MATH 288. Linear Optimization. An introduction to linear programming and its applications. Formulation of linear programs. The simplex method, duality, complementary slackness, dual simplex method and sensitivity analy-sis. The ellipsoid method. Interior point methods. Possible additional top-ics include the primal-dual algorithm, cutting planes, or branch-and-bound. Applications to networks, management, engineering, and physical sciences. Prerequisite: either 194, 204, or 205b, and either CS 101 or 103. [3]

MATH 292. Methods of Mathematical Physics. Linear operators on vector spaces, matrix theory, and Hilbert spaces. Functions of a complex variable and calculus of residues. Ordinary and partial differential equations of mathematical physics, boundary value problems, special functions. Prerequisite: Either 194, 204, or 205b, and either 196, 198, or 208. [3]
MATH 294. Partial Differential Equations. Classification of equations: equations of elliptic, parabolic, and hyperbolic type. Separation of variables, orthonormal series, solutions of homogeneous and nonhomogeneous boundary value problems in one-, two-, and three-dimensional space. Possible additional topics include subharmonic functions and the Perron existence theorem for the Laplace equation of Sturm-Liouville theory. Prerequisite: Either 194, 204, or 205b, and either 196, 198, or 208. [3]

MATH 298. Independent Study. Reading and independent study in mathematics under the supervision of an adviser. Designed primarily for honors candidates, but open to others with approval by department chair. [Variable credit: 1-3 each semester, not to exceed 6 without departmental permission]

MATH 310. Lie Groups and Lie Algebras. Continuous groups; classical groups; real and complex Lie algebras; applications to physics, geometry, and mechanics. Prerequisite: 223 or 283a. [3]

MATH 312. Algebraic Topology. Homology, cohomology, homotopy theory. Prerequisite: 272b. [3]

MATH 313. Riemannian Geometry. Vector fields, brackets; Riemannian metrics; Riemannian connections; geodesic flow; curvature; sectional curvature, Ricci curvature, scalar curvature; Jacobi fields; Hopf-Rinow Theorem; Hadamard Theorem. Complex manifolds, Hermitian metrics, Kahler metrics, complex projective space, first Chern class of a line bundle. Prerequisite: 270. [3]

MATH 322. Universal Algebra. Theory of general algebraic systems. Concepts discussed will include subalgebras, congruences, automorphism groups, direct and subdirect products, ultraproducts, free algebras, varieties and quasi-varieties, with applications to groups, rings fields, lattices, Boolean algebras, semilattices, and semi-groups. Connections with model theory and category theory will be included as time permits. Prerequisite: 283a. [3]

MATH 324a. Combinatorial and Geometric Group Theory. Generators and defining relations of groups; Cayley graphs and Van Kampen diagrams; subgroups and automorphisms of free groups; graphs of groups; fundamental groups of topological spaces; Magnus embedding; homology of groups; residual properties of groups; hyperbolic groups; small cancellation groups; 1-relator groups; algorithmic problems in groups. Prerequisite: 283a. [3]

MATH 324b. Combinatorial and Geometric Group Theory. Continuation of 324a. Generators and defining relations of groups; Cayley graphs and Van Kampen diagrams; subgroups and automorphisms of free groups; graphs of groups; fundamental groups of topological spaces; Magnus embedding; homology of groups; residual properties of groups; hyperbolic groups; small cancellation groups; 1-relator groups; algorithmic problems in groups. Prerequisite: 324a. [3]

MATH 325. Approximation Theory. Best approximation in metric and normed vector spaces; Tchebycheff approximation, Weierstrass-type theorems, rational approximation, orthogonal polynomials, trigonometric approximation, moduli of continuity, spline approximation; expansions and bases in function spaces. Prerequisite: 261 and 330a. [3]

MATH 330a. Theory of Functions of a Real Variable. The real number system, transfinte numbers, spaces, point sets in metric spaces, sequences and series of functions, measure. Lebesgue integration, convergence theory, inversion of derivatives. Prerequisite: 260. [3]

MATH 331a. Theory of Functions of a Complex Variable. Complex integration, calculus of residues, harmonic functions, entire and meromorphic functions, conformal mapping, normal families, analytic continuation, Riemann surfaces, analytic functions of several complex variables. Prerequisite: 261. [3]

MATH 331b. Theory of Functions of a Complex Variable. Continuation of 331a. Complex integration, calculus of residues, harmonic functions, entire and meromorphic functions, conformal mapping, normal families, analytic continuation, Riemann surfaces, analytic functions of several complex variables. Prerequisite: 331a. [3]

MATH 355. Advanced Topics in Approximation Theory. Topics depend on the instructor but will typically include abstract approximation, classical approximation, multi-dimensional spline theory, and other advanced topics. Prerequisite: 330a. [3]

MATH 360. Harmonic Analysis. Fourier series; Wiener’s Lemma; Fourier integral; Plancherel Theorem; Haar measure on an LCA group G, dual group and the Fourier integral; Hausdorff-Young inequality; Hilbert transform; Hardy-Littlewood maximal functions; Marcinkiewicz interpolation theorem; Singular integrals and the Calderon-Zygmund decomposition; multiresolution approximations; special topics from harmonic analysis, such as wavelets, frames, abstract harmonic analysis, symmetric spaces. Prerequisite: 330b. [3]

MATH 367. Selected Advanced Topics. Topics of special interest at a level suitable for graduate students in mathematics. [Variable credit: 1-3]

MATH 368. Advanced Independent Study. Reading and independent study in an advanced area of mathematics under the supervision of an adviser. Requires approval of director of graduate studies. [Variable credit: 1-3]

MATH 369. Master’s Thesis Research. [0]

MATH 370. Differential Topology. Manifolds; submanifolds; tangent and vector bundles. Vector fields and flows, Lie brackets, distributions, and the Frobenius theorem. Sard’s theorem; transversality and intersection theory; degree theory and applications. Tensors and differential forms; the exterior derivative; Stokes’ theorem and integration; de Rham cohomology. No credit for students who have earned credit for 270. Prerequisite: either 194, 204, or 205b, and either 242, 243, or 272a. [3]

MATH 372a. Seminar in Topology. Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH 372b. Seminar in Topology. Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH 375A. Seminar in Discrete Mathematics. Recent topics. May be repeated for credit more than once if there is no duplication in topic. [Variable credit: 1-3 each semester, not to exceed 6 without departmental permission]

MATH 375B. Seminar in Discrete Mathematics. Recent topics. May be repeated for credit more than once if there is no duplication in topic. [Variable credit: 1-3 each semester, not to exceed 6 without departmental permission]

MATH 375C. Seminar in Topology. Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MATH 375D. Seminar in Discrete Mathematics. Recent topics. May be repeated for credit more than once if there is no duplication in topic. [Variable credit: 1-3 each semester, not to exceed 6 without departmental permission]

MATH 375E. Seminar in Topology. Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]
Students may enroll in more than one section of this course each semester. [1-3]

**MATH 379. Non-candidate Research.** Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

**MATH 381a. Seminar in Number Theory.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 381b. Seminar in Number Theory.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 383a. Seminar in Algebra.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 383b. Seminar in Algebra.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 385a. Seminar in Approximation Theory.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 385b. Seminar in Approximation Theory.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 386. Seminar in Computational Mathematics.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 390a. Seminar in Analysis.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 390b. Seminar in Analysis.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 394A. Seminar in Applied Mathematics.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 394B. Seminar in Applied Mathematics.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 395a. Seminar in Mathematical Biology.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 395b. Seminar in Mathematical Biology.** Recent topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

**MATH 398. Directed Study.** A reading course designed to give graduate students more background. [Variable credit: 1-3 each semester]

**MATH 399. Ph.D. Dissertation Research.** [0-12]

**Mechanical Engineering**

**ME 258. Engineering Acoustics.** The wave equation and its solutions; acoustic sources; reflection and transmission of sound; propagation in pipes, cavities, and waveguides; noise standards and effects of noise on people; principles of noise and vibration control; signal processing in acoustics; environmental noise measurement and control; and various contemporary examples. Prerequisite: MATH 196 or 198. [3]

**ME 259. Engineering Vibrations.** Theory of vibrating systems and application to problems related to mechanical design. Topics include single degree of freedom systems subject to free, forced, and transient vibrations; systems with several degrees of freedom, methods of vibration suppression and isolation, and critical speed phenomena. Prerequisite: ME 190, MATH 198. [3]

**ME 260. Energy Conversion.** Energy resources, use, and conservation are studied. The fundamentals of positive displacement machinery, turbo-machinery, and reactive mixture are introduced and used to examine various forms of power-producing systems. Prerequisite: ME 220, ME 224, [3]

**ME 261. Basic Airplane Aerodynamics.** Study of the atmosphere; analysis of incompressible and compressible flows, shock waves, boundary layer and skin friction drag, lift and drag forces over airfoils and wings, and flight performance; aircraft stability and control, wing icing, and parachute-based recovery; history of flight and aerodynamics. Corequisite: ME 224. [3]

**ME 262. Environmental Control.** A study of heating and cooling systems, energy conservation techniques, use of solar energy and heat pumps. Prerequisite: ME 220. Corequisite: ME 248. [3]

**ME 263. Computational Fluid Dynamics and Multiphysics Modeling.** Computational modeling of viscous fluid flows and thermal-fluid-structure interaction. Computational techniques including finite-difference, finite-volume, and finite-element methods; accuracy, convergence, and stability of numerical methods; turbulence modeling; rotating machinery; multiphase flows; and multiphysics modeling. Prerequisite: ME 224. SPRING. [3]

**ME 264. Internal Combustion Engines.** A study of the thermodynamics of spark ignition and compression ignition engines; gas turbines and jet propulsion. Prerequisite: ME 220. [3]

**ME 265. Direct Energy Conversion.** The principles and devices involved in converting other forms of energy to electrical energy. Conversion devices: electro-mechanical, thermoelectric, thermionic, fluid dynamic, and fuel cell. Prerequisite: ME 220. [3]

**ME 271. Introduction to Robotics.** History and application of robots. Robot configurations including mobile robots. Spatial descriptions and transformations of objects in three-dimensional space. Forward and inverse manipulator kinematics. Task and trajectory planning, simulation and off-line programming. Prerequisite: MATH 194. [3]

**ME 275. Introduction to Finite Element Analysis.** Development and solution of finite element equations for solid mechanics and heat transfer problems. Introduction to commercial finite element and pre- and post-processing software. Two lectures and one three-hour laboratory each week. Prerequisite: CE 182, MATH 198. [3]

**ME 280. Advanced Dynamics of Mechanical Systems.** Development of methods for formulating differential equations to model mechanical systems, including formalisms of Newton-Euler, Lagrange, and virtual work methods to two- and three-dimensional systems. Prerequisite: ME 190, MATH 198. [3]

**ME 320. Statistical Thermodynamics.** Old and modern quantum theory, including H atom, rigid rotor, and harmonic oscillator. Atomic and molecular
structure and spectra. Maxwell-Boltzmann statistical model for ideal, chemically reacting, electron, or photon gas. Introduction to Gibbs method. Prerequisite: ME 220. [3]

**ME 326. Gas Dynamics.** Study of compressible fluid flow from subsonic to supersonic regimes in confined regions and past bodies of revolutions. Includes heat transfer, frictional effects, and real gas behavior. Prerequisite: ME 224. [3]

**ME 327. Energy Conversion Systems.** An advanced study of energy conversion systems that include turbomachinery, positive displacement machinery, solar energy collection and combustion, with consideration for optimizing the systems. [3]

**ME 331. Robot Manipulators.** Dynamics and control of robot manipulators. Includes material on Jacobian matrix relating velocities and static forces, linear and angular acceleration relationships, manipulator dynamics, manipulator mechanism design, linear and nonlinear control, and force control manipulators. Prerequisite: ME 271. [3]

**ME 333. Topics in Stress Analysis.** An investigation of thermal stress, transient stress, and temperatures in idealized structures; consideration of plasticity at elevated temperatures; and some aspects of vibratory stresses. [3]

**ME 336. Linear Control Theory.** Classical and modern approaches to the analysis and design of single-input/single-output (SISO) and multiple-input/multiple-output (MIMO) linear time invariant control systems. Classical (frequency-domain) and modern (state-space) approaches to SISO and MIMO control, including optimal control methods. Credit is given for only one of ME 236 or ME 336. Prerequisite: ME 234. [3]

**ME 340. Wireless Mechatronics.** Design of mechatronic devices with emphasis on miniaturization and wireless transmission of data. Programming of wireless microcontrollers with data acquisition and transmission from sensors and to actuators. Group design project to simulate, fabricate, and test a miniaturized wireless robot. [3]

**ME 348. Convection Heat Transfer.** A wide range of topics in free and forced convection is discussed. Solutions are carried out using analytical, integral, and numerical methods. Internal and external flows are considered for both laminar and turbulent flow cases. Convection in high speed flow is also studied. Prerequisite: ME 248. [3]

**ME 352. Non-linear Control Theory.** Introduction to the concepts of nonlinear control theory. Topics include phase plane analysis, nonlinear transformations, Lyapunov stability, and controllability/observability calculations. A multidimensional geometric approach to these problems is emphasized. Prerequisite: MATH 194. [3]

**ME 353. Design of Electromechanical Systems.** Analog electronic design for purposes of controlling electromechanical systems, including electromechanical sensors and actuators, analog electronic design of filters, state-space and classical controllers, and transistor-based servoamplifiers and high voltage amplifiers. Significant laboratory component with design and fabrication circuits to control electromechanical systems. Implementation of digital controllers. Prerequisite: ME 234. [3]

**ME 359. Advanced Engineering Vibrations.** The development and application of Lagrange’s equations to the theory of vibrations. Nonlinear systems and variable spring characteristics are analyzed by classical methods and by digital computer techniques. Applications to the design of high speed machines are emphasized. Prerequisite: ME 259; MATH 234, MATH 294. [3]

**ME 363. Conduction and Radiation Heat Transfer.** A comparative study of available methods for solution of single and multidimensional conduction heat transfer problems. Both steady and transient problems are considered. Mathematical and numerical methods are stressed. Radiant exchange between surfaces separated by non-participating media is studied. Numerical methods are developed and discussed for non-isothermal surfaces and combined radiation and conduction problems are solved. Prerequisite: ME 248. [3]

**ME 365. Micro/Nano Energy Transport.** Theoretical examination of energy transport by electrons and phonons and modeling of transport phenomena in crystalline solids at reduced length scales. Particle transport models and solution methods for energy carriers in the context of semiconductor electronics, direct energy conversion devices and nanotechnology. [3]

**ME 366. Combustion.** Introduction to combustion processes. Topics include combustion thermodynamics, chemical kinetics, premixed flame theory, diffusion flame theory, ignition and detonation. Prerequisite: ME 221, ME 224. [3]

**ME 369. Master’s Thesis Research.**

**ME 379. Non-Candidate Research.** Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

**ME 389. Master of Engineering Project.**

**ME 391. Special Topics.** A course based on faculty research projects and highly specialized areas of concentration. [Variable credit: 1-3 each semester]

**ME 393. Independent Study.** Readings and/or projects on advanced topics in mechanical engineering under the supervision of the faculty. Consent of instructor required. [Variable credit: 1-3 each semester]

**ME 397. Seminar.**

**ME 399. Ph.D. Dissertation Research.**

**Medical Scientist Training Program**

**MSTP 310. MSTP Seminar Series.** The MSTP Seminar Series is a student-driven course in research guided by faculty preceptors. Formal objectives are to: (1) foster development of critical-thinking skills by appraisal of contemporary scientific literature; (2) enhance scientific creativity through discussion of experimental approaches and techniques; and (3) develop oral presentation skills. The seminar series is interdisciplinary in scope with topics drawn from all areas of biomedical research. The primary focus is on cutting-edge, discovery-based, and hypothesis-driven science. Students in the MSTP have primary responsibility for choosing the manuscripts to be presented as centerpieces of the seminars. More advanced students are expected to play a key role in mentoring before, during, and after junior student presentations. Prerequisites: None. MSTP students only. Other students with specific permission of the Course Director. Formerly IGP 310.

**MSTP 311A. Responsible Conduct of Research Training, Phase I.** The MSTP RCR Training Phase I course is offered at the end of June to coincide with the arrival of the entering class of MSTP students and immediately prior to the first laboratory rotation. The course consists of four two-hour sessions. The topics covered include: (1) Mentor/Trainee Responsibilities; (2) Research Misconduct, (3) Publication Practices, Responsible Authorship, and Peer Review; and (4) Data Acquisition, Management, Sharing, and Ownership. Each session consists of didactic presentations, followed by small-group case-based discussions focusing on the issues presented. The course is P/F. Prerequisites: None. For MSTP students only. Others with permission of the course director.

**MSTP 311B. MSTP Responsible Conduct of Research, Phase II.** The MSTP RCR Phase II course is offered at the beginning of the first year of graduate research. This component of the RCR curriculum is offered in a single four-hour session, which begins with a brief review of the RCR Phase I course. The topics covered in this session include: (1) Ethics of Human Research; (2) Ethics of Animal Welfare and Use of Animals in Research; (3) Conflict of Interest; and (4) Collaborative Science. Similar to the format for the RCR Phase I course, topics in the Phase II course are presented first in didactic form, followed by small-group case-based discussions for analysis and debate. All nine topics in the NIH RCR guidelines are covered during the two courses. The course is P/F. Prerequisites: None, but MSTP RCR Phase I normally completed first. For MSTP students only. Others with permission of the course director.

**MSTP 312. Leadership Workshop.** The MSTP Leadership Workshop provides formal training in leadership for MSTP students. The main objectives are to offer students an opportunity to assess their individual
leadership styles, discuss cases in research and clinical leadership, and receive didactic instruction in core leadership competencies. Competencies featured in the workshop include motivation, leadership styles, group dynamics, feedback/coaching, and conflict resolution. The main content is delivered by discussion of three cases with accompanying didactic presentations. Attendees participate in leadership and teamwork activities and complete individual development plans for acquisition of core leadership skills. The course is P/F. Prerequisites: None. For MSTP students only. Others with permission of the course director.

**MSTP 314. MSTP Clinical Preceptorship Program.** The MSTP Clinical Preceptorship Program (CPP) provides MSTP students with exposure to clinical medicine during the period of research training. CPP course objectives are to: (1) provide exposure to clinical medicine for MSTP students during research training; (2) retain competency in history-taking and physical-examination skills; and (3) facilitate the transition from Graduate School to the clinical years of Medical School. The program is a required component of the MSTP curriculum for all students initiating graduate studies following completion of the second year of Medical School. Each class is assigned two clinical mentors, an internist and a pediatrician, who work with the class for the duration of their graduate training. One-half of each class works with the internist in the fall semester, and the other works with the pediatrician. The classes switch mentors for the spring semester. Students meet with mentors monthly during the academic year. Students are provided with written feedback by the clinical mentors following each semester. The course is P/F. Prerequisites: None. For MSTP students only.

**MSTP 379. Non-candidate Research.** Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0–12]

**Medicine, Health, and Society**

**MHS 206. Economic Demography and Global Health.** Economic consequences of demographic change in developing and developed countries. Links between socioeconomic status and health; relationship between health and economic growth; determinants of fertility, mortality, and migration. [3]

**MHS 212. War and the Body.** Impact of war on the human body. Anthropology of the body and theories of bodily experience. Production, representation, and experience of war and of military and medical technologies on a bodily level. Acceptable and unacceptable types of harm. No credit for students who earned credit for 290 section 2 in fall 2012. [3]

**MHS 216. Afrofuturism and Cultural Criticisms of Medicine.** Exploration of Afrofuturism as a literary genre and its critique of the impact of techno-science and medicine on black health, life, and futurity. Multidisciplinary approach in understanding novels, memoirs, and secondary texts. No credit for students who earned credit for 290 section 3 in fall 2013. [3]

**MHS 225. Death and Dying in America.** Interdisciplinary introduction to thanatology; changes in medicine and attitudes towards dying as they reshape the American way of death in a multicultural landscape. [3]

**MHS 232. Masculinity and Men's Health.** Interdisciplinary approach to men's health issues and to perceptions of masculinity. The history of men's diseases. Men in clinical settings. Social policies that affect men's health behaviors. No credit for students who earned credit for 290 section 5 in fall 2012. [3]

**MHS 234. Men's Health Research.** Concepts and theories of men's health. Global and domestic issues. Effect of men's social and economic advantages on health outcomes. Strategies to improve men's health; relationships between cultural values and health policy; and cultural explanations that shape men's health campaigns. No credit for students who earned credit for 290 section 14 in spring 2013. [3]

**MHS 235. Community Health Research.** Conceptual and methodological challenges. Focus on descriptive studies and intervention research to address health disparities in chronic diseases and psychiatric disorders. [3]

**MHS 236. HIV/AIDS in the Global Community.** Medical, social, political, economic, and public policy dimensions of HIV/AIDS. Prevention and treatment strategies, social stigma, and discrimination. Repeat credit for students who completed 290 section 2 in fall 2009 and for students who completed 290 section 5 in fall 2008. [3]

**MHS 242. Bionic Bodies, Cyborg Cultures.** Historical and cultural evolution of prosthetics, artificial limbs, and other assistive technologies. Shifts in social views resulting from war, economics, and art and design. Critical texts, films, art practices, and technological advancements. [3]

**MHS 245. Medicine, Technology, and Society.** Tensions between art and science in medicine. The effect of science and technology on the doctor-patient relationship. Social and ethical issues raised by new biomedical developments. Repeat credit for students who completed 295 section 1 in fall 2009. [3]

**MHS 252. Psychiatry, Culture, and Globalization.** Cross-cultural analysis of mental illness; the emergence of cultural psychiatry; and the globalization of biopsychiatry and neuroscience. No credit for students who earned credit for 295 section 2 in fall 2012. [3]

**MHS 254. Perspectives on Trauma.** Trauma as a framework for understanding individual and collective suffering. Trauma in the context of medicine, war, and politics, and of racial, sexual, and gender inequalities. Alternative ways of conceptualizing feeling, memory and loss. No credit for students who earned credit for 295 section 02 in spring 2013. [3]

**MHS 300. Graduate Colloquium.** Introduction to graduate-level interdisciplinary work in medicine, health, and society, drawing on the perspectives of anthropology, economics, history, philosophy, political science and policy studies, psychology, religious studies, and sociology. [3]

**MHS 302. Research Workshop.** Research presentations by faculty members, visiting scholars, and graduate students. Assists students in the selection of research topics and in the presentation of research. May be repeated for credit. [1]

**MHS 305. Foundations in Global Health.** Determinants of health and interventions used to better health, particularly in low-resource settings. Core research and evaluation methodologies used in the field. [3]

**MHS 306. Foundational Skills in Global Health.** Core field tools, needs assessment, implementation techniques, and methodologies in global health program implementation. Management and leadership of global health programs and organizations in complex and challenging environments. Underpinnings of health systems, data collection and analysis, program design, and management. [3]

**MHS 308. Ethics, Law, and Medicine.** Explores intersection of ethical, legal, and medical concerns in the modern world of health care. Case-based and discussion format. Serves as repeat credit for students who have completed DV 3452, MED 504-5240, or LAW 450 -909 [3]

**MHS 310. Interdisciplinary Research Methods.** Key methods in the analysis of health and medicine from epidemiology, anthropology, sociology, history, and philosophy. No credit for students who earned credit 295 section 1 in fall 2013. [3]

**MHS 311. Ethics in Global Health.** Overview of ethical issues and standards in global health, particularly ethics in international research. Serves as repeat credit for students who have completed VIGH 5242 or IGHM 5244. [1]

**MHS 312. Informatics for Global Health Professionals.** Medical informatics with emphasis on a global health care setting. As global health bridges both patient care and public health, so informatics. Patient-based information systems and public health information systems. Serves as repeat credit for students who have completed VIGH 5242 or IGHM 5242. [1]

**MHS 313. Introduction to Medical Anthropology.** The study of illness, suffering, and healing in cultures around the world. Medical anthropology topics, theoretical approaches, and research techniques. Case studies on chronic illness, sorcery and traditional healing, modern pandemics, and
treatment/illness expectations. Serves as repeat credit for students who have completed VIGH 5248 or IGHM 5248. [1]

MHS 314. Global Health Politics and Policy. Global health problems facing the world’s populations today and efforts taken to improve health at a global level. Political movements of global health issues in the US and among the G8 nations from 2000-2011. Serves as repeat credit for students who have completed VIGH 5250 or IGHM 5250. [1]

MHS 315. Leadership and Development in Global Health. Leadership theory and practice in the area of global health. Serves as repeat credit for students who have completed VIGH 5246 or IGHM 5246. [1]

MHS 316. Case Studies in Tropical Diseases. Tropical diseases and parasitology in a clinical case study format. Serves as repeat credit for students who have completed VIGH 5249 or IGHM 5249. [1]

MHS 317. Introduction to Quality Improvement. Concept and methodology of Quality Improvement (QI) science as it applies to health care delivery in the U.S. and in the developing world. Serves as repeat credit for students who have completed VIGH 5252 or IGHM 5252. [1]

MHS 319. Laboratory Technologies in Low Resource Settings. Core laboratory principles, technologies, and applications used in the delivery of care and the performance of clinical research in resource-limited settings. Strengths, limitations, and appropriate use of laboratory technologies in the changing landscape of international research and clinical care. [3]

MHS 320. Special Topics in the Social Foundations of Health. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [1-3]

MHS 369. Master’s Thesis Research. [0-12]

MHS 390A. Independent Study. Readings and research in a minimum of two disciplines, to be selected in consultation with a faculty adviser and subject to the approval of the program director. [1-3]

MHS 390B. Independent Study. Readings and research in a minimum of two disciplines, to be selected in consultation with a faculty adviser and subject to the approval of the program director. [1-3]

MHS 393a. Internship Training. Must be taken concurrently with 393b and/or 393c.

MHS 393B. Internship Research. Students will write a substantial research paper under the supervision of a faculty member. [1-3]

MHS 393C. Internship Readings. Readings and a substantial interpretive essay on topics related to the internship training, under the supervision of a faculty member. [1-3]

MHS 394a. Graduate Service Learning. Must be taken concurrently with 394b and/or 394c. After completing the experience, all students must write a thorough report. [1-3]

MHS 394B. Service Learning Research. Students will write a substantial research paper under the supervision of a faculty member, on a topic related to their service learning experience. [1-3]

MHS 394C. Service Learning Readings. Readings and a substantial interpretive essay on topics related to the service learning experience, under the supervision of a faculty member. [1-3]

Microbiology and Immunology

M&IM 327. Experimental Methods in Microbiology. Laboratory work concerned with (a) regulation of gene transcription; (b) signal transducing molecules and pathways; (c) entry and replication of mammalian viruses; (d) techniques in nucleic acid and peptide chemistry, rapid methods of DNA sequencing, gene knock-out in transgenic animals, design of probes, antigens, and synthetic vaccines; and (e) structure-function analysis of ligands, receptors, toxins, and transcription factors. Available only to M&IM students. Admission to course, hours, and credit by arrangement. FALL, SPRING, SUMMER. [2-4].

M&IM 3282. Molecular Virology. The interaction of animal viruses with their host cells, discussed at the molecular and cellular level as model systems. Special emphasis is placed on current literature and methodology. Prerequisite: IGP 300 or an undergraduate course in biochemistry or microbiology. FALL. [3]

M&IM 3283. Molecular and Cellular Immunology. The cellular and molecular foundations of the immune response system and the humoral and cellular reactions that result from immunologic interactions. Two lectures per week and seminars presented by students. Prerequisite: IGP 300 or any microbiology course. FALL. [3]

M&IM 3284. Focal Topics in Microbiology and Immunology. The objective of this course is to guide students through “real life” cases illustrating dynamic features (entry, colonization, spread, injury, immune response) of the pathogen-host relationship. Small discussion groups led by a faculty preceptor will focus on seven topics contained in booklets designed for self-directed study. The element of critical thinking in analysis of questions, concepts, and required literature will be introduced. Moreover, graduate students will gain “clinical perspective” to the molecular pathogenesis of microbial and immune diseases important for future research proposals and grant applications. Prerequisite: IGP 300a, 300b, 301, or equivalent. Note: Interested students must discuss their qualifications with the course director prior to enrolling. SPRING. [2]

M&IM 332. Foundations in Microbiology and Immunology I. The objectives of this course are to alert students to important original research articles in microbial genetics and pathogenesis, to apply methods of scientific logic for critical analysis of the knowledge presented in the articles, and to help students present complex data and conclusions to an audience. SUMMER. [2]

M&IM 333. Foundations in Microbiology and Immunology II. Second semester of required course work. Original research articles focus on virology. FALL. [2]

M&IM 334. Foundations in Microbiology and Immunology III. Third semester of required course work. Original research articles focus on immunology. SPRING. [2]

M&IM 335. Research Proposals: Preparation and Critical Review. An essential skill for scientists in an academic setting is the ability to obtain extramural research funding through peer reviewed grant applications. This course will offer didactic sessions in which the process of preparing and reviewing grant applications is discussed. Each student will write a grant application using the NRSA format for postdoctoral fellowships. The student should propose research in one of the four major emphasis areas of the department: microbial genetics, virology, immunology, or microbial pathogenesis. The initial grant submission will be reviewed by the faculty thesis mentor and a course instructor. The student will amend the application according to the reviewer’s comments and submit a final version. Procedures for reviewing grant applications will then be discussed. A student and a faculty member will provide a written review for each of the final grants. The course will conclude with a mock NIH study section in which grants are reviewed orally and scored. SPRING. [2]

M&IM 350. Cellular Microbiology of the Pathogen-Host Interaction. This course will emphasize bacterial pathogenesis. As an interdisciplinary course, it is designed to train students at the interface of molecular microbiology and cell biology. The course will focus on the molecular mechanisms by which bacterial pathogens cause disease. Prerequisite: A solid background at the graduate or undergraduate level in natural science curriculum such as molecular cell biology, microbiology and immunology. All students must receive course director approval prior to registration.

M&IM 351. Functional Genomics and Proteomics: Applications to Immunobiology. Biological applications of functional genomics and proteomics in immunology. Topics include: 1) proteomic analysis of blood cells, vascular endothelial cells, and smooth muscle cells involved in immunity and inflammation, 2) functional genomics of immunobiology using genome-wide mutagenesis, 3) gene expression profiling of immune-inflammatory responses based on DNA microarray technology, 4) peptide/protein transduction and its applications to cell-based proteomics and intracellular protein therapy, 5) proteomic analysis of MHC antigens, 6) genomics and proteomic analysis of host-pathogen interactions, 7) genomic
and proteomic analysis of immunological diseases, and 8) development and application of new genomic and proteomic strategies in immunology. SPRING. [2]

M&IM 352. Special Topics in HIV/AIDS Research. This advanced course reviews recent progress in AIDS research as a platform for discussions of current research frontiers, with an emphasis on molecular interactions of the virus with host cells. Prerequisite: graduate-level course in virology or immunology. SPRING. [3]

M&IM 353. Microbial Diseases. Microbial Diseases is a 1 credit lecture based course that will survey the infectious diseases that are of the greatest importance to global public health. Infections diseases are responsible for tremendous morbidity and mortality, and the diseases covered in this course are the most common causes of lethal infection in the world. Microbial Diseases is open to all graduate students and postdoctoral fellows and there are no prerequisites for this course. The course will survey the leading causes of infection with a focus on incidence, route of infection, symptoms, and treatment. Upon completion of this course, students will have a strong understanding of the infectious diseases of global medical significance.

M&IM 377. Critical Issues in Cancer Biology. This seminar/tutorial will examine primary research papers to develop critical thinking skills on current topics in cancer research, including: cell growth control, signal transduction, regulation of gene expression, programmed cell death. The discussions will focus on disputed and controversial areas as well as cutting edge studies. Students can write a paper for additional credit. This course is offered to graduate students only. Post doctoral fellows may audit if space permits by permission of the instructor. Prerequisite: IGP 300a, 300b, and 301, or equivalent. SUMMER. [2-3]

M&IM 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

Molecular Physiology and Biophysics

MP&B 322. Physiological Techniques and Preparations. Students sign up for this course number for research credits prior to admission to candidacy for Ph.D. degree. FALL, SPRING, SUMMER. Hours and credit by arrangement. Cone and Staff.

MP&B 323. Advanced Neurophysiology. (Also listed as Pharmacology 323 and Neuroscience 324) This class is a tutorial in methods for recording electrical signals in neurons. We will begin with a crash course on ion channels and transporters, spending a significant proportion of class time on discussion of recent primary research papers. In the latter part of the semester, we will move on to live demonstrations and personal training in the details of electrophysiological recording methods in several preparations. By the end of the course, students will be prepared to perform electrophysiological experiments as part of their dissertation research.

MP&B 324. Tutorials in Physiology. The class meets once weekly. In the fall semester, graduate students critically evaluate research publications in areas of active research in the department (e.g., gene transcription, molecular biology, electrophysiology, membrane transport, intercellular signaling, beta cell biology, and regulation of intermediary metabolism). Also, there are faculty presentations on ancillary science skills, such as oral and poster presentations, and grant and proposal writing. In the spring semester, each student presents and defends a short research proposal based on their current research area in preparation for their Candidacy Examination. FALL, SPRING. [1] Hasty, Kenworthy, Colbran, Stein, and Staff.

MP&B 325. Physical Measurements on Biological Systems. (Also listed as Physics 325 and Biomedical Engineering 325) A survey of the state of the art in quantitative physical measurement techniques applied to cellular or molecular physiology. Topics include the basis for generation, measurement, and control of the transmembrane potential: electrochemical instrumentation; optical spectroscopy and imaging; X-ray diffraction for determination of macromolecular structure; magnetic resonance spectroscopy and imaging. One lecture and one recitation. Prerequisite: modern physics course or consent of instructor. FALL, odd-numbered years. [3] Hutson.

MP&B 326. Exercise Physiology. The responses of different physiological systems to exercise. The effect and role of exercise under special conditions such as diabetes, reproduction, heart disease, and orthopedics and rehabilitation. Invited speakers will discuss the clinical and scientific aspects of the above topics. Prerequisite: consent of instructor. SPRING, even-numbered years. [1] Wasserman.

MP&B 327. Molecular Endocrinology. A survey of the molecular biology of hormone action from the target cell surface to the nucleus. Special emphasis on (i) diabetes and obesity, (ii) how receptors and intracellular messengers mediate hormone action, and (iii) how hormones regulate gene expression. Discussion of the use of genetic, molecular biology, and biochemical techniques to study hormone action. The faculty encourage an interactive atmosphere in the class through the discussion of seminal papers. FALL. [2] Colbran, Cone, O'Brien, Hasty, Niswender.

MP&B 328. Metabolic Regulation In Vivo. The hormonal regulation of fuel metabolism in the whole animal. Techniques which are used to study carbohydrate, lipid, and protein metabolism in vivo are discussed, as well as metabolic regulation in the normal and stressed state. Conditions such as fasting, exercise, infection, and hypoglycemia are also examined. A basic knowledge of physiology and biochemistry is required. Prerequisite: 321 or consent of instructor. FALL. [2] Shiota and Staff.

MP&B 329. Experimental Statistics Short Course. The goal of this course is to insure basic proficiency in statistical concepts, methods for analysis of experimental data, and enhance statistical communication skills. Core concepts to be discussed are: (1) Sources of data variation, data types that lead to different analyses (e.g. parametric vs nonparametric); (2) Variation in samples and populations, real world vs theoretical data distributions; (3) Importance and use of confidence intervals, effect size, power related to experimental design; (4) Meaning of statistical vs functional significance; and (5) Aspects of data analysis pitfalls (e.g., outliers, multiple tests, clustered data). Prerequisite: Permission of faculty. [1] Sumner.

MP&B 330. Human Physiology and Molecular Medicine. Lectures and research correlations on advanced aspects of human physiology, with emphasis on communication between and control of the major tissue types and organ systems. Recent biochemical and molecular biology research findings will be incorporated into the study of normal physiology and pathophysiology. This course is required of all graduate students majoring in Molecular Physiology and Biophysics. Prerequisite: consent of instructor. FALL. [3] Cobb.

MP&B 332. Scientific Reasoning and Logic in Gene Regulation. (Also listed as Cell and Developmental Biology CBIO-GS 332) Objective: To gain a detailed understanding of rigorous approaches to experimental design, strategies, and data interpretation using one of the most developed fields in modern biology - gene regulation - as a contextual backdrop. Drawing on over 40 years of primary research papers in gene control, this course will dissect how important problems are identified, how questions are framed to give rigorous answers, and how data are interpreted and new hypotheses generated. The topics to be covered include eukaryotic RNA polymerase and basal factor structure and function, chromatin and nucleosome structure, DNA and nucleosome modification and the effects of these components and factors on transcription, cell- and tissue-specific transcription factors and molecular mechanisms of gene control. As these topics are discussed, particular emphasis will be placed upon accessing the appropriateness of controls, techniques, data interpretation, and formulation of future experimentation in these areas. Class meetings are fully interactive, and require extensive input and critical evaluation from students. All class meetings revolve around the detailed discussion of assigned reading materials and require students to perform extensive reading of the original research literature. Prerequisite: IGP Bioregulation I. SPRING. [2] Stein, Tansey, Well.

MP&B 333. The Molecular Endocrinology of Obesity and Diabetes. This course is designed to introduce first-year IGP students to some of the major areas of interest in the fields of obesity and diabetes research. In the first part of the course the lecturers will discuss the characteristics of diabetes and obesity in terms of whole-body metabolism. The use of mouse
models, a major tool to study metabolism, will be emphasized. The second part of the course will focus on the insulin-producing cells of the pancreas: how they develop, how insulin secretion is regulated, and how insulin gene transcription is controlled. The third part of the course will focus on the mechanism of insulin action at the molecular level. The final part of the course will focus on the regulation of lipid metabolism and the latest theories on the molecular causes of insulin resistance and obesity. Each lecture will be presented by faculty followed by a discussion of a research paper on a related topic led by a current IGP student. The NIH-funded Molecular Endocrinology Training Program (METP) provides support for eight IGP students in the second and third years of their graduate studies. The METP strongly encourages students who wish to be considered for METP funding to take this Spring Elective. JANUARY-FEBRUARY. [2] O’Brien and Staff.

**Strongly encourages students who wish to be considered for METP funding to take this Spring Elective.**

**MP&B 335. Assessment of Metabolism In Vivo: A Laboratory Course.** The objective of the course is to give students the tools needed to assess whether an experimental intervention (pharmacologic, genetic, dietary, or environmental) alters macronutrient metabolism, energy balance, cardiovascular homeostasis, or animal behavior. Students will learn how to measure whole body and tissue specific kinetics, the principles of which can be applied to the kinetics of drugs, substrates, and hormones. To accomplish this, we will use a combination of lectures, hands-on laboratories, demonstrations, and data-problem sessions.

**MP&B 340. Human Genetics I.** (Also listed as Human Genetics 340) Designed to cover background and latest advances in human molecular genetics. Topics will include an overview and in-depth look at molecular genetics including DNA, RNA, and chromosome basics. Gene structure and transcriptional processing. Mutational mechanisms, biochemical genetics (gene defects in biochemical pathways). Topics will be discussed with use of real-world examples and relevance to human research. FALL. [3] Summar, Mortlock, and Staff.

**MP&B 341. Human Genetics II.** (Also listed as Human Genetics 341) This course will cover the statistical, population, and analytical aspects of modern human genetics research. Topics to be covered include human population genetics, quantitative genetics, disease gene discovery (emphasizing design, statistical and molecular techniques), linkage and association analyses, computational genetics, and evolutionary genetics. Clinical examples, subject ascertainment, and study design will also be emphasized. Students must have a strong understanding of Mendelian genetics and basic biostatistics. Prerequisite: consent of instructor. SPRING. [3] Haines and Staff.

**MP&B 345. Cellular and Molecular Neuroscience.** (Also listed as Cell Biology 345, Neuroscience 345, Pharmacology 345) This course is a required entry-level course for students in the Cell and Molecular Track of the Neuroscience Graduate Program at Vanderbilt that should be taken in the first graduate school year. It also serves as an elective for medical students and graduate students in a number of other programs. Its goal is to expose students to fundamental concepts and techniques in molecular and cellular neuroscience and provide a theoretical context for experimental analysis of brain function and disease. The course is divided into three modules. Module I: Neural Anatomy and Development provides an overview of the anatomy of the nervous system and neurotransmitters and examines concepts in neural pattern formation, neuronal migration, axon guidance, and synapse formation. Module II: Signaling, Plasticity, and Modulation reviews biophysical and molecular concepts relating to neuronal membrane excitability, secretion, and plasticity. Module III: Neural Diseases and Disease Models focuses on specific brain disorders such as epilepsy, pain disorders, Alzheimer’s disease, depression, and schizophrenia and current models used to investigate their origin and/or treatment. This course combines faculty lecture with discussion of original articles, with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Faculty and assistants guide students through important research paradigms with a critical analysis of the primary literature in the topic area. Prerequisite: Bioregulation I (IGP 300A) or consent of instructor. Course directors may consider undergraduate course work in cell biology or biochemistry to meet this requirement. SPRING. [4] Cume, Carter, and Staff.

**MP&B 349. Genetics of Model Organisms.** (Also listed as Cell and Developmental Biology 349, Human Genetics 349) Basic genetic principles across a broad range of organisms (yeast, C. elegans, Drosophila melanogaster, plants, mouse, zebrafish) that are used in genetic analyses to investigate molecular pathways of interest for human disease will be presented. This course will provide students with in-depth terminology and understanding of the advantages, applications, and approaches specific to each organism. Genomic and bioinformatics tools that facilitate genetic analysis in each species will be emphasized. Specific examples of how each model organism has successfully contributed to elucidation of a human disease gene, pathway, or genetic principle will be presented. Course combines faculty lectures with student presentation and discussion of original articles to emphasize the uniqueness of each model system. Prerequisite: one statistics course at the upper undergraduate level or higher and Fundamentals of Genetic Analysis (MP&B 385), or permission of instructor. Offered every other year. SPRING. [3] Southard-Smith and Staff.

**MP&B 350. Independent Study.** Independent Study may be repeated.

**MP&B 359. Master's Thesis Research.**

**MP&B 369. Tutorials in Human Genetics.** A weekly seminar critically evaluating current and past scientific literature focusing on study design and molecular genetics. The focus will be on study methods and analysis. FALL. [1] Cantier and Kearney.

**MP&B 371. Tutorial in Statistical and Population Genetics.** The class meets once weekly. Graduate students critically evaluate research publications in areas of statistical methods in human genetic analysis and in the area of human population genetics. Also, there are faculty presentations on ancillary science skills, such as oral and poster presentations, and grant and proposal writing. SPRING. [1] Li, Crawford.

**MP&B 379. Non-Candidate Research.** Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

**MP&B 381. Molecular Foundations of Medicine.** Molecular Foundations of Medicine is designed to familiarize students with the cellular structures, biomolecules, and processes that constitute life, human health, and disease at the molecular level. The course employs an integrated approach to teach underlying principles of biochemistry, cell and tissue biology, and genetics with an emphasis on human systems and medical conditions. The inclusion of clinical correlation sessions, small groups, and laboratory sessions will further integrate and broaden course material and relate molecular processes to the study of human disease. Prerequisite: MSTP students only. FALL. [Variable credit: 1-5] Osheroff, George, Pettepher.

**MP&B 382. Structure, Function, and Development.** Structure, Function, and Development is designed to provide students with the means to develop an effective understanding of the normal micro and macroscopic structure, function, and development of the human body. The course employs a coordinated, integrated approach to the presentation and learning of the disciplines of human gross anatomy, cell and tissue biology (histology), human development (embryology), and physiology in a context of clinical application. Prerequisite: MSTP students only. SPRING. [Variable credit: 1-4] Dalley, Strom, Pettepher.

**MP&B 384. The Brain and Behavior.** Brain and Behavior provides a basic understanding of the human central nervous system and human behavior. The format includes lectures, lab exercises, small group discussions, and patient and case presentations. Brain and Behavior integrates three areas of medical science: (1) neuroanatomy, physiology, and biochemistry; (2) psychopathology and systems neuroscience; and (3) pathology, pharmacology, and radiology. Prerequisite: MSTP students only. SPRING. [Variable credit: 1-2] Norden, Heckers.

**MP&B 385. Fundamentals of Genetic Analysis.** This course is designed to accomplish three goals: (1) introduce students to critical topics of genetic research, (2) introduce students to important areas of genetic research not covered in first-year course work, and (3) promote an understanding of classic genetic analysis by learning genetics using the original literature. The approach will be to use classic literature that defined significant problems in genetic research. Specific topics will include: genetic analysis (segregation, independent assortment and locus mapping), human pedigree analysis and disease gene mapping, and population/quantitative genetics. FALL. [4] Williams and Staff.

**MP&B 399. Ph.D. Dissertation Research.** This course is used for research following entry into Ph.D. candidacy (following successful completion of the Candidacy Examination).
Music

MUSC 341A. Intensive Musicianship I. Intensive immersive musical instruction modeled on language acquisition process, designed to provide musicians with practical skills in real-time aural processing, including interval identification, reading and notating pitch and rhythm, facility in each of the diatonic modes, aural tracking of multiple simultaneous parts. Open by instructor approval. SUMMER. [1] Poger.

MUSC 341B. Intensive Musicianship II. Intensive immersive musical instruction modeled on language acquisition process, designed to provide musicians with practical skills in real-time aural processing, including interval identification, reading and notating pitch and rhythm, facility in each of the diatonic modes, aural tracking of multiple simultaneous parts. Open by instructor approval. SUMMER. [1] Poger.

Teacher Education

MUST 317. Advanced Studies for the Wind Band Conductor. Knowledge of concert band repertoire as applicable to band programs from intermediate to advanced levels. Score preparation, rehearsal strategies, and expansion of conducting skills to include longer and more complex musical structures. Specific emphasis on developing historical and pedagogical context for repertoire evaluation and selection. Repertoire to encompass a broad range of genres, styles, and levels of difficulty. FALL. [2] Verrier.

Neuroscience (NSC)

NSC 201. Neuroscience. Physiology of nerve cells, sensory and motor systems, sleep, speech, and sexual behavior. Clinical topics include the chemical basis of psychosis, diseases of the brain, and repair mechanisms after brain injury. [3]

NSC 235. Biological Basis of Mental Disorders. Cellular and molecular neuropathology of cortical dysfunction resulting from affective disorders, drug addiction, neurodegenerative disease, and stroke. Prerequisite: 201 and permission of instructor. [3]

NSC 269. Developmental Neuroscience. Normal and abnormal brain development. Cell division, migration, and death; synapse formation and plasticity; and clinical syndromes. Prerequisite: 201. [3]

NSC 270. Computational Neuroscience. Theoretical, mathematical, and simulation models of neurons, neural networks, or brain systems. Computational approaches to analyzing and understanding data such as neurophysiological, electrophysiological, or brain imaging. Demonstrations simulating neural models. Prerequisite: 201, either CS 101 or 103, and either MATH 150a or 155a. [3]

Neuroscience (NURO)

NURO 302. Techniques and Preparations. Laboratory rotations undertaken by Integrative Track students that culminate in the selection of a thesis adviser. FALL, SPRING. [0-6]

NURO 320. Neuroscience Research Forum. Required of all students, and second-year students are required to take this course for credit. Students make oral presentations and are evaluated based on the clarity of the presentation and visual aids, as well as the ability of the presenter to answer questions. The course meets every other week for one hour with two students presenting at each session. FALL, SPRING. [0]

NURO 323. The Nervous System.

NURO 324. Advanced Neurophysiology. (Also listed as Molecular Physiology and Biophysics 323 and Pharmacology 323) This class is a tutorial in methods for recording electrical signals in neurons. We will begin with a crash course on ion channels and transporters, spending a significant proportion of class time on discussion of recent primary research papers. In the latter part of the semester, we will move on to live demonstrations and personal training in the details of electrophysiological recording methods in several preparations. By the end of the course, students will be prepared to perform electrophysiological experiments as part of their dissertation research. SPRING. [3] Galli.

NURO 325. Neuroscience Discussions. This two-semester course provides discussions on a broad range of neuroscience topics, ranging from reviews of historical concepts and individuals in neuroscience to science journalism. Other topics include scientific ethics, science policy, good grantsmanship, and communication skills. FALL, SPRING. [1-1] Konradi, Corbett.

NURO 327. Graduate Neuroanatomy. An intensive course on the structure and function of the brain designed specifically for neuroscience graduate students. The course is centered around a large lab portion supplemented by lectures. The course is geared towards hands-on experience and is intended to foster the ability to identify and characterize important structures and subdivisions of the rodent and primate brain using gross, histological and histochemical methods. Histological identification of specific brain structures using different types of stains, markers, and connectivity methodologies will be covered. The emphasis will range from macroscopic analyses of brain structures and pathways to the cellular composition and molecular characteristics of specific brains regions, and will employ a number of modern neuroanatomical techniques. In addition, neuropathological materials will be used. The course will equip students with practical knowledge of neuroanatomy as well as modern neuroanatomical methods an approaches, which will be useful in their professional career in the neurosciences.

NURO 330. Cognitive Neuroscience. This course provides a broad understanding of the state of our knowledge in cognitive neuroscience. The emphasis is on the findings and concepts in the major branches of cognitive neuroscience, rather than techniques (although these will be discussed). The level of analysis will focus on human and non-human primate systems. Prerequisite: an introductory-level undergraduate course in neuroscience or physiological psychology. Basic knowledge of experimental cognitive psychology is desirable but not necessary. FALL. [3] Marois.

NURO 331. Mammalian Developmental Neurobiology. This seminar course emphasizes classic and cutting-edge research in mammalian brain development, with a particular emphasis on the forebrain. It is also intended to introduce the students to modern techniques used to examine the generation of proper brain architecture and connectivity. Prerequisite: NURO 345.

NURO 332. Experimental Statistics Short Course. The goal of this course is to insure basic proficiency in statistical concepts, methods for analysis of experimental data, and enhance statistical communication skills. Core concepts to be discussed are: (1) Sources of data variation, data types that lead to different analyses (e.g. parametric vs nonparametric); (2) Variation in samples and populations, real world vs theoretical data distributions; (3) Importance and use of confidence intervals, effect size, power related to experimental design; (4) Meaning of statistical vs functional significance; and (5) Aspects of data analysis pitfalls (e.g., outliers, multiple tests, clustered data). Prerequisite: Permission of faculty. [1] Summer.

NURO 335. Special Topics in Neuroscience. (Also listed as Cell and Developmental Biology 335 and Psychology 335) Explores basic issues in neuroscience. Possible topics include neural development, neural plasticity, regeneration, organization and function of cortex, sensory systems, motor systems, and research methodology in neuroscience. A new topic is considered each semester. Prerequisite: Neuroscience 323 or equivalent course. FALL. [2] Casagrande.

NURO 340. Fundamentals of Neuroscience II. This is the second part of a 2-semester course required for all Neuroscience graduate students. Parts I and II can be taken individually as electives for medical students
graduate students in other programs. The goal is for students to learn the
general organization of the nervous system and its circuitry and understand
the fundamental molecular and cellular bases underlying its development and
function in normal and pathological conditions. In addition, the stu-
dents learn how the cellular systems in the brain relate to the major branch-
eses of cognitive neuroscience. There are 3 themes that will be woven into
the course to provide a continuum from molecules to cognition and disease:
sensory systems, motor systems and memory. This course combines fac-
culty lecture with discussion of original articles with an emphasis on funda-
mental concepts and the elucidation of important research paradigms in
the discipline. Part I (NURO 345) will emphasize the cellular and molecular
aspects of neuroscience. Part II (NURO 340) will emphasize systems in the
brain and principles of cognition. FALL, SPRING. [4]. Casagrande, Wallace and staff.

NURO 342. Seminar in the Neurobiology of Hearing and Multisensory
Processes. (Also listed as Hearing and Speech Sciences 342) Study at
the doctoral level of the neural processes underlying auditory and multisensory
perception. The course will focus on critical readings of recently pub-
lished findings that emphasize the connection between plasticity, neural
systems, and behavior. May be repeated for credit. Prerequisite: consent of

NURO 345. Fundamentals of Neuroscience I. This is the first part of a
2-semester course required for all Neuroscience graduate students. Parts I
and II can be taken individually as electives for medical students and gradu-
ate students in other programs. The goal is for students to learn the general
organization of the nervous system and its circuitry and understand
the fundamental molecular and cellular bases underlying its development and
function in normal and pathological conditions. In addition, the students
learn how the cellular systems in the brain relate to the major branches
of cognitive neuroscience. There are 3 themes that will be woven into
the course to provide a continuum from molecules to cognition and disease:
sensory systems, motor systems and memory. This course combines fac-
culty lecture with discussion of original articles with an emphasis on funda-
mental concepts and the elucidation of important research paradigms in
the discipline. Part I (NURO 345) will emphasize the cellular and molecular
aspects of neuroscience. Part II (NURO 340) will emphasize systems in the
brain and principles of cognition. Prerequisite: Undergraduate course
work in cell biology or biochemistry or permission of the course directors.
SPRING [4]. Currie, Carter and staff.

NURO 346. Advanced Molecular Neurobiology. (Also listed as Phar-
macology 346) This course examines molecular components and interac-
tions that regulate neuronal development, signaling, and disease. Topics
include: development of neuronal identity, axonal transport, growth factors
and cell death, axon guidance and synapse formation, electrical and chemi-
ical transmission, regulation of neuronal excitability and genetic analysis of
signaling and neural disorders. Didactic and literature discussions provide
students with a sound foundation for understanding the molecular bases
underlying the development and function of the nervous system. Prereq-
usite: Neuroscience 345 or Pharmacology 320, or consent of instructor.

NURO 347. The Visual System. (Also listed as Cell and Developmental
Biology 347, Psychology 336) An interdisciplinary approach to how hu-
mans see and interpret their visual environment. Topics include the struc-
ture of the eye and brain (including optics), the physiology of individual
cells and groups of cells, machine vision and models of visual function, visual at-
tention, and mechanisms of complex visual perception. Lectures by faculty
from Psychology and Cell and Developmental Biology. Graduate students
attend one hour discussion section per week in addition to lecture, and turn

NURO 350. Independent Study. Qualified students work with individual
faculty members in areas not covered in available courses. Prerequisite: ap-
proval by individual faculty member and program director. FALL, SPRING,
SUMMER. [Variable credit: 1-3, with total credit limited to 3]

NURO 352. Seminar in Neuroscience I & II. This course focuses on
critical analysis of primary literature, both current and classic publications,
in faculty-led “journal club” discussion format. The topics will parallel the
material presented in the Fundamentals of Neuroscience I (345) and II (340)
courses, but can be taken independently. FALL and SPRING. [1]

NURO 365. Neurobiology of Disease. The goal of this course is to pre-
pare students for intensive collaborations along the basic-translational-clin-
cal continuum. The course is divided into five brain disease areas of focus
(modules). In each module, clinical and pathological features, status of clini-
cal research, animal models, and postulated cellular/molecular bases for
the disease will be covered. Each module closes with a review of the clinical
findings, and patient interviews with an emphasis on the health disparities
of the disease, whether biological, social, or both. Five one-hour modules
can be taken in any combination and sequence. This course, an elective
for Neuroscience majors, is co-taught by Vanderbilt and Meharry faculty.
Prerequisite: introductory neuroscience course and consent of instructor.

NURO 366. Molecular Basis of Neural Disease. This advanced course
covers current concepts and models for neuropsychiatric disorders, includ-
ing schizophrenia, depression, and autism, as well as Parkinson’s Disease,
trinucleotide repeat disorders, and stroke. Didactic presentations will focus
on the molecular and genetic bases of these disorders, and will be comple-
mented by presentations of new papers as well as patient interviews when possible.
Prerequisite: 345 or consent of instructor. SPRING. [2] Deutch.

NURO 376. Neurogenetics. This advanced course covers Mendelian
genetics including relationships between mutational mechanisms and
inheritance patterns. Topics highlighting genetics of neurological phe-
notypes will be discussed. Prerequisite: 345 or consent of instructor.

NURO 379. Non-Candidate Research. Research prior to entry into can-
didacy (completion of qualifying examination) and for special non-degree
students. [Variable credit: 0-12]

NURO 384. The Brain and Behavior. Brain and Behavior provides a ba-
sic understanding of the human central nervous system and human behav-
ior. The format includes lectures, lab exercises, small group discussions,
and patient and case presentations. Brain and Behavior integrates three
areas of medical science: (1) neuroanatomy, physiology, and biochemis-
try; (2) psychopathology and systems neuroscience; and (3) pathology,
pharmacology, and radiology. Prerequisite: MSTP students only. SPRING. [Variable credit: 1-5] Norden, Heckers.

Nursing Science

NRSC 302. Advanced Doctoral Seminar I. This course consists of a se-
ries of seminars focusing on issues related to qualifying examinations, the
dissertation, and continued development of a program of research. The
topics are selected by course faculty and the students who plan to take the
comprehensive examinations within the next 9-12 months. Topics and
experiences may include proposal development, grant applications, mock
proposal reviews, qualifying examination situations, and dissemination of re-
search findings. The seminar is required for two consecutive semesters. Pre-
requisite: Core Ph.D. course completion consistent with ability to complete the qualifying examination within 9-12 months after registration. [1] SPRING.

NRSC 303. Advanced Doctoral Seminar II. This is the second semi-
nar course in the series. Prerequisite: completion of NRSC 302: Advanced
Doctoral Seminar I. [1] SUMMER.

NRSC 304. Ethical and Legal Issues in Research. This course provides an
overview of issues related to the responsible conduct of research, in-
cluding data management, vulnerable populations, authorship and publica-
tion, conflicts of interest and collaboration, Federal and institutional guide-
lines are included. Prerequisite: enrollment in the Ph.D. program or consent of
faculty. [1] SPRING.

NRSC 305. Informatics and Scholarly Inquiry. This course provides an
overview of informatics, the transformation of data into information, knowl-
edge, decisions, and actions to improve outcomes. To take advantage of
electronic data mines, scholars of the future will need to understand the
basics of databases and the structure of nursing vocabularies. Knowl-
edge management to support evidence-based practice in nursing will be a
critical skill. In addition, this course prepares the student to use available
Graduate School / Courses

NRSC 306. Research Design and Statistics I. This course focuses on understanding and applying the basic concepts of descriptive and relational research design and statistics. Students will be introduced to the full range of designs available to address research aims, moving from descriptive to experimental and quasi-experimental. After examining the relationship of research aims to research design, the nature of measurement, and causal inference, relevant statistical methods for visualizing, describing, and making inferences from data will be introduced. The focus will be on univariate and bivariate descriptive methods. Statistical computing packages will be used. Published research will be used to develop the student’s ability to evaluate the design and statistical methods used to describe health care phenomena as well as relationships among them. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] FALL.

NRSC 307. Research Design and Statistics II. The course expands the concepts and applications of RD&S I including an introduction to longitudinal and randomized control design issues. Topics related to internal validity, experimental designs, and issues in comparing individuals and groups cross-sectionally and longitudinally will be detailed. Students will be introduced to issues in external validity and the relationships between internal and external validities. Parametric and non-parametric univariate comparative statistical methods used to analyze data resulting from cross-sectional and randomized controlled designs will be included. Students will be expected to generate and interpret results from statistical software and present relevant information in figures, tables, and text. Concepts will be studied within the context of evaluating published research. Prerequisite: completion of Research Design and Statistics I or consent of faculty. [3] SPRING.

NRSC 308. Research Design and Statistics III. This course is focused on advanced designs and multivariate statistical techniques. Design topics include advanced issues in external validity, field experimentation versus laboratory experiments, quasi-experimental and blended designs as well as special considerations for nested and complex longitudinal designs. Related statistical topics include advanced multiple linear regression methods (e.g. path and structural equation modeling), log-linear models and advanced techniques in survival and longitudinal data analysis. These methods and concepts will be discussed and evaluated through educational resources and published research using them. Students will have the opportunity to develop advanced skills in statistical applications most commonly used in their respective areas of interest. Prerequisite: completion of Research Design and Statistics II or consent of faculty. [3] SUMMER.

NRSC 309. Special Topics in Quantitative Methods. This course provides an overview of varied and timely topics in the field of quantitative methods. Exemplar topics may include issues in data collection methods such as using online or other resources, an examination of how quantitative data collection methods influences data management and analytic approaches, collection methods for physiological or psycho-social outcomes, and the benefits and drawbacks of using public data sets, conventional and new analytic techniques, as well as broader issues in the evolution of quantitative methods. Prerequisites: NRSC 308, NRSC 313; NRSC 352 or NRSC 382; or with permission from instructor(s). [2] FALL.

NRSC 310. Health, Health Care, Research, and Public Policy. This course explores and critically analyzes theoretical and empirical approaches to understanding dynamic synergies between research, nursing practice, health care organization, and public policy and their impact on health. Strategies for dissemination, translation, and evaluation of evidence-based research findings to support health care practices and public policies to measurably improve health outcomes for selected populations and the student’s phenomenon of interest will be discussed. Local, national, and global implications will be explored. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] SPRING.

NRSC 311. Role of Scientist in Academe, Community, and World. This seminar course assists the student to develop a personal framework for behavior within academe, the scientific community, and the world beyond. Through readings and discussions, the student will explore a variety of viewpoints about the duties and responsibilities of an educated citizen scientist in an interdependent world. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [1] SPRING.

NRSC 312. Programs of Research and Grantsmanship. This course provides the foundational information necessary for developing a program of research. Focus is placed on acquiring practical skills necessary to develop a program of research, narrowing the focus of student’s area of research, and for basic grantsmanship. Focus is placed upon developing the knowledge and practical skills necessary to investigate an area of research interest and draft a research proposal appropriate to current level of career development needs and/or phenomenon of interest. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] FALL.

NRSC 313. Theories of Science. This course provides students with an introduction to the central theoretical and philosophical issues concerning the nature of science, the patterns of knowing and knowledge development, criteria for evaluating knowledge claims, and philosophy of science. The course will enable students to become knowledgeable about the forces affecting the development of knowledge and critical analyses of theories commonly used in nursing research. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] FALL.

NRSC 350. Conceptual Foundations for Clinical Research. Critical analysis of theories, concepts, and research related to the promotion, protection, and restoration of health across the lifespan at individual, family, and community levels. Emphasis will be on the individual level. Students conduct a critical analysis of existing and emerging scientific knowledge in a chosen field of study. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] SUMMER.

NRSC 352. Measurement in Clinical Research. This course examines the principles of measurement, sources of measurement error, and procedures used for critical evaluation of the psychometric properties of clinical measures including techniques for assessing validity and reliability. Selected measures, commonly used in clinical research and specific to student research interests, will be evaluated for psychometric properties and fit with a proposed focus of study. Prerequisite: enrollment in the Ph.D. program and completion of NRSC 307 and NRSC 350; or consent of faculty. [3] FALL.

NRSC 353. Designing and Testing Clinical Interventions. Analysis of methodological, ethical, and practical issues related to the design and implementation of theory-based intervention studies. Students conduct a critical analysis of existing and emerging interventions related to their chosen field of study. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] FALL.

NRSC 366. Curriculum Strategies for Health Professional Education. This course introduces the student to the foundations of learning theory and learning styles. The impact of technology on learning practices and the appropriate use of technology to facilitate learning is emphasized. Students will create electronic elements for effective learning and use a course management system. Copyright and fair use issues are discussed. Overall curriculum strategies that integrate content, organization, informatics, and sequencing of courses are discussed. Students will design a learning program that integrates learning styles, technology use, and a course management system. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] SPRING.

NRSC 367. Educational Evaluation for Learning in the Health Professions. This course is designed to facilitate expertise in the application of fundamental educational concepts, principles, and theories to techniques of educational measurement and evaluation. The underlying premise for the value of such knowledge is that evaluation provides evidence for sound decision-making in programs of higher education. Moreover, students will acquire competence in the planning and development of classroom and clinical performance evaluation tools, as well as analyzing and interpreting test results within the context of current ethical, legal, and social educational guidelines. Prerequisite: Consent of faculty. [3] SUMMER.

NRSC 368. Contextual Nature of Health and Health Behaviors. This course explores and critically analyzes theoretical and empirical approaches to understanding the interaction of health and environment in affecting health by examining contextual factors that impact health and health behaviors of
various system levels. Examines disparity (e.g., social and economic) as a determinant of health among individuals and sub-populations. Critique selected models of health, health behavior, community organization, and health care delivery and their usefulness to understand and impact selected health phenomena and various ethno-cultural populations and communities. Students critically analyze and synthesize the literature related to a selected phenomenon of interest. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [2] FALL.

NRSC 371. Advanced Concepts in Nursing Education. This course is designed to facilitate expertise in the application of advanced educational concepts, principles, and theories related to nursing education in the academic setting. The underlying premise for the value of such knowledge is that nurse educators encounter situations and issues that warrant systematic investigation, and reflection. Moreover, students will acquire competence in facilitating learning development and role socialization, review accreditation parameters for nursing programs, and explore various aspects and topics such as legal, ethical and socio-cultural factors related to the role of the nurse educator. Prerequisites: 366, 367 [3] FALL.

NRSC 377. Special Topics in Nursing Science. Students will discuss research and current developments of special interest to faculty and students (may be repeated for credit). Prerequisites: enrollment in the Ph.D. program or consent of faculty. [Variable credit: 0-6]

NRSC 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [Variable credit: 1-3]

NRSC 380. Knowledge Synthesis in Nursing Science. This course provides a critical appraisal of the theoretical and empirical basis of nursing science. Theories and research generated to study phenomena related to nursing are evaluated and synthesized. Strategies for synthesizing extant knowledge in nursing are discussed. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] SPRING.

NRSC 381. Current Topics in Health Services Research. This course is designed to assist the student to develop expertise concerning the objectives, support mechanisms, limitations, and controversies of current HSR research initiatives and HSR organizations. Examples of initiatives include (but are not limited to) those of the IOM, governmental and private safety studies, QA/QI consortia, JCAHO, IHI, and other projects. The student will be expected to assess the relative place of her/his research interest in the current HSR environment and to begin to function within the professional role of a health services researcher. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] SPRING.

NRSC 382. Measuring Outcomes: Issues in Health Service Research Designs. In this course, the student will develop expertise in the design, measurement, and analysis of studies employing the five generic outcomes of greatest interest in outcomes studies: satisfaction, cost-effectiveness, mortality, health-related quality of life, and morbidity. The student will also be expected to develop an overview including measurement and analysis plans for a condition-specific outcome. The impact of the researcher’s decisions regarding conceptual models, treatment definition, risk adjustment strategies, and the application of statistical techniques will be explored. At least one controversy attendant to each of the five generic outcomes will be debated in class. Prerequisite: completion of Research Design and Statistics I and II. [3] SUMMER.

NRSC 383. Issues in Health Services Research Intervention Studies. The student will develop expertise in the design and execution of intervention studies in health services research. Emphasis will be placed on the selection of interventions and the valid and reliable execution of the interventions through examination of issues such as treatment fidelity, intervention duration, location and interventionist expertise. The intervention categories studied include: labor, capital and processes (e.g., working conditions and work design.) Strategies of attending to the execution and analysis of multi-level, multi-organizational studies will be addressed. [3] FALL.

NRSC 390. Independent Study in Nursing Science. Individualized study and reading in areas of mutual interest to the student and faculty member. Prerequisite: consent of instructor. [Variable credit: 1-3]

NRSC 394. Qualitative Research Methods. This course introduces and explores qualitative research methods, including their theoretical and methodological foundations, and practical applications. Course participants will explore and pilot test one method in the context of their topic of interest. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [3] SUMMER.

NRSC 395. Research Practicum. This course provides students with exposure to and involvement in the research process. Learning activities are based on student need and interest and determined according to best fit with available faculty research programs. Prerequisite: enrollment in the Ph.D. program or consent of faculty. [Variable credit: 0-6]

Pharmacology

PHAR-GS 320. Targets, Systems, and Drug Action. Introduction to human physiology is integrated with the pathophysiology, pathological manifestations, and therapeutic interventions. Lectures and laboratories emphasize the molecular and cellular underpinnings of normal organ function and disease. Mechanisms of drug action are discussed in a systemic fashion and supported by guided readings on drug discovery and design. Paradigm shifting experiments will be discussed to illustrate clarity of thinking, how focused experimental strategies lead to discovery, and potential difficulties in interpretation of experimental results. FALL, SPRING. [1-10] Barnett, Brash.

PHAR-GS 320B. Pharmacological Targets and Mechanisms, Part 2. Introduction to human physiology is integrated with the pathophysiology, pathological manifestations, and therapeutic interventions. Lectures and laboratories emphasize the molecular and cellular underpinnings of normal organ function and disease. Mechanisms of drug action are discussed in a systemic fashion and supported by guided readings on drug discovery and design. Paradigm shifting experiments will be discussed to illustrate clarity of thinking, how focused experimental strategies lead to discovery, and potential difficulties in interpretation of experimental results. SPRING. [1-6] Barnett, Brash.

PHAR-GS 322A. Scientific Communication Skills. Techniques in effective oral communication of scientific research as well as practical experience in research and literature presentation and in the preparation of grant proposals. FALL. [1] Davies, Schneider, Stanwood.

PHAR-GS 322B. Scientific Communication Skills II. This course will leverage the writing assignments of the fall Scientific Communications course (PHAR 322A) to accelerate preparation of a draft NRSA fellowship (or equivalent such as AHA application). During the fall course, a draft Specific Aims page is written and critiqued. In this spring course, students will write the next two sections of their application and have it peer-reviewed. These writing assignments are intended to be self-guided with significant support by the student’s mentor. The applications will subsequently be submitted for funding to the proper agency. SPRING. [1] Davies, Schneider, Stanwood.

PHAR-GS 323. Advanced Neurophysiology. (Also listed as Molecular Physiology and Biophysics 323 and Neuroscience 324) This class is a tutorial in methods for recording electrical signals in neurons. We will begin with a crash course on ion channels and transporters, spending a significant proportion of class time on discussion of recent primary research papers. In the latter part of the semester, we will move on to live demonstrations and personal training in the details of electrophysiological recording methods in several preparations. By the end of the course, students will be prepared to perform electrophysiological experiments as part of their dissertation research. SPRING. [3] Galli.

PHAR-GS 324. Receptor Theory and Signal Transduction. Structure and function of cell-surface receptors and the molecular bases by which they activate cellular function. Topics include receptor identification; quantitation of simple and complex binding phenomena; molecular bases for receptor coupling to GTP-binding proteins; the structure and function of ligand-operated ion channels, receptor-tyrosine kinases and receptor-induced signal transduction cascades receptors as oncogenes and proto-oncogenes. SUMMER. [1-3] Shieh, Currie.
PHAR-GS 327. Modern Drug Discovery. The course will provide an introduction and overview to the drug discovery process. Focus will be on target selection, target validation, and the process of discovery early drug leads and optimization of those leads into compounds suitable for clinical development. This will include approaches used to transition from discovery to the early clinical development phase of a program as well as medical and market considerations that impact launching and progress of a drug discovery program. FALL. [2] Jones.

PHAR-GS 332. Experimental Statistics Short Course. The goal of this course is to insure basic proficiency in statistical concepts, methods for analysis of experimental data, and enhance statistical communication skills. Core concepts to be discussed are: (1) Sources of data variation, data types that lead to different analyses (e.g. parametric vs. nonparametric); (2) Variation in samples and populations, real world vs. theoretical data distributions; (3) Importance and use of confidence intervals, effect size, power related to experimental design; (4) Meaning of statistical vs. functional significance; and (5) Aspects of data analysis pitfalls (e.g., outliers, multiple tests, clustered data). Prerequisite: Permission of faculty. [1] SUMMER.

PHAR-GS 345. Cellular and Molecular Neuroscience. (Also listed as Cell and Developmental Biology 345; Molecular Physiology and Biophysics 345, Neuroscience 345) This course is a required entry-level course for students in the Cell and Molecular Track of the Neuroscience Graduate Program at Vanderbilt that should be taken in the first graduate school year. It also serves as an elective for medical students and graduate students in a number of other programs. Its goal is to expose students to fundamental concepts and techniques in molecular and cellular neuroscience and provide a theoretical context for experimental analysis of brain function and disease. The course is divided into three modules. Module I: Neural Anatomy and Development provides an overview of the anatomy of the nervous system and neurotransmitters and examines concepts in neural pattern formation, neuronal migration, axon guidance, and synapse formation. Module II: Signaling, Plasticity, and Modulation reviews biophysical and molecular concepts relating to neuronal membrane excitability, secretion, and plasticity. Module III: Neural Diseases and Disease Models focuses on specific brain disorders such as epilepsy, pain disorders, Alzheimer’s disease, depression, and schizophrenia and current models used to investigate their origin and/or treatment. This course combines faculty lecture with discussion of original articles, with an emphasis on fundamental concepts and the elucidation of important research paradigms in the discipline. Faculty and assistants guide students through important research paradigms with a critical analysis of the primary literature in the topic area. Prerequisite: Bioregulation I (IGP 300A) or consent of instructor. Course directors may consider undergraduate course work in cell biology or biochemistry to meet this requirement. SPRING. [4] Currie, Carter, and Staff.

PHAR-GS 346. Advanced Molecular Neurobiology. (Also listed as Neuroscience 346) This course examines molecular components and interactions that regulate neuronal development, signaling, and disease. Topics include development of neuronal identity, axonal transport, growth factors and cell death, axon guidance and synapse formation, electrical and chemical transmission, regulation of neuronal excitability and genetic analysis of signaling and neural disorders. Didactic and literature discussions provide students with a sound foundation for understanding the molecular bases underlying the development and function of the nervous system. Prerequisite: Neuroscience 345 or Pharmacology 320, or consent of instructor. SPRING. [3] Emeson and Staff.

PHAR-GS 350. Independent Study. Qualified students work with individual staff members in areas not covered in other available courses. Prerequisite: approval of staff member and department chair. FALL, SPRING, SUMMER. [Variable credit: 1-2, with total credit limited to 2 hours] Staff.

PHAR-GS 379. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

Philosophy

PHIL 202. Formal Logic and Its Applications. A self-contained course designed to convey an understanding of the concepts of formal logic, to develop convenient techniques of formal reasoning, and to make some applications of them in one or more of the following: psychology, linguistics, structuralist studies, information and computer sciences, and the foundations of mathematics. Philosophy 102 is not required. [3]

PHIL 210. Ancient Philosophy. An examination of the major Greek and Roman philosophers with emphasis on the works of Plato and Aristotle. [3]

PHIL 211. Medieval Philosophy. Comparative study of key figures in Islamic, Jewish, and Christian philosophy as they struggle with the philosophy of logic, metaphysics, language, culture, politics, ethics, and nature. [3]

PHIL 212. Modern Philosophy. An examination of the major philosophers of modern Europe from Descartes and Spinoza through Locke, Berkeley, Hume, and Kant. [3]

PHIL 213. Contemporary Philosophy. An examination of selected problems treated in recent philosophical literature such as meaning, perception, knowledge, truth, and freedom. Readings from the Anglo American analytical and the phenomenological traditions. [3]

PHIL 217. Metaphysics. Selected problems in metaphysics such as ultimate explanation, meaning of existence, time and eternity, freedom and determinism, and science and religion. [3]

PHIL 218. Hellenistic and Late Ancient Philosophy. Philosophical ideas of Stoics, Cynics, Epicureans, skeptics, Peripateticians, Neoplatonists, and early monotheist thinkers such as Philo, Origen, and Philoponus. [3]

PHIL 220. Immanuel Kant. Kant’s revolutionary critique of the foundations of human knowledge, moral obligation, and religious faith, with readings from his three Critiques and lesser works. [3]

PHIL 222. American Philosophy. A study of the works of selected American philosophers from the colonial period to the present. [3]

PHIL 224. Existential Philosophy. A study of two or three existential philosophers and selected problems that arise in relation to their thought. [3]

PHIL 226. Phenomenology. Selected readings from such thinkers as Husserl, Sartre, and Merleau-Ponty on the structures of experience, the sources and limits of knowledge, mind, and body, interpersonal relations, and the meaning of freedom. [3]

PHIL 231. Philosophy of History. Focus on alternative conceptions of time and history in Aristotle, Augustine, Kant, Hegel, Heidegger, and Benjamin. [3]

PHIL 232. Critical Theory. The Frankfurt School; mass culture, ideology, and modernism in the arts; the disenchantment of reason; alienation and fascism; the prospects for experience and political critique. Readings include Adorno, Horkheimer, Marcuse, Benjamin, and Habermas. [2]
PHIL 233W. Writing as Political Resistance. Writings from the political margins from authors under house arrest, in exile, or in prison. Expressions of active resistance to oppressive, and occasionally violent, political institutions. [3]

PHIL 238. Contemporary Ethical Theory. A study of theories about the cognitive foundations of ethical discourses. Prerequisite: 105. [3]

PHIL 239. Moral Problems. A discussion of specific moral problems such as the justification of abortion and euthanasia. Moral theories such as utilitarianism will be discussed, but the emphasis will be on their relevance to the solution of moral problems. Repeat credit for students who have completed 239W. Prerequisite: 105. [3]

PHIL 239W. Moral Problems. A discussion of specific moral problems such as the justification of abortion and euthanasia. Moral theories such as utilitarianism will be discussed, but the emphasis will be on their relevance to the solution of moral problems. Repeat credit for students who have completed 239. Prerequisite: 105. [3]

PHIL 241. Modernistic Aesthetics. Abstraction, nontraditional media, mixed media, new media, changes in artistic institutions, and the death of art. [3]

PHIL 242. Philosophy of Religion. A study of various problems concerning religious experiences; ideas about religion and divinity. [3]

PHIL 243. Philosophy of Film. Challenges posed by film forms to traditional aesthetics and the novel philosophical approaches created to deal with them. Topics include the nature of the film image, film and experiential time, cinematic genres, the problem of mass art, and feminist critiques of spectatorship. Weekly screenings. [3]

PHIL 244. Philosophy and the Natural Sciences. Philosophical issues in the methodology, conceptual structure, patterns of explanation, historical development, and cultural impact of the natural sciences. Metaphysical and ethical implications. [3]

PHIL 245. Humanity, Evolution, and God. The impact of the idea of evolution on our conception of personhood. Theistic and non-theistic approaches to philosophical anthropology, ethics and society, the theory of knowledge, the mind-body problem, and relations with the environment and other species. [3]

PHIL 246. Philosophy of Language. Philosophical problems in the methodology of linguistics, relations between thought and language, theories of meaning and symbolism, the nature of metaphor, the philosophical implications of theories of language acquisition. [3]

PHIL 247. Kierkegaard and Nietzsche. A study of selected works. [3]

PHIL 248. Philosophy and Literature. Philosophical topics in novels or poetry. Examples include: meaning of life, linguistic meaning, good and evil, aesthetic value, and human freedom. Repeat credit for students who have completed 248W. [3]

PHIL 248W. Philosophy and Literature. Philosophical topics in novels or poetry. Examples include: meaning of life, linguistic meaning, good and evil, aesthetic value, and human freedom. Repeat credit for students who have completed 248. [3]

PHIL 249. Philosophy of Music. Music and meaning, language, emotion, expression, interpretation, performance, the body, and politics. No musical background is required. [3]

PHIL 254. Modern Philosophies of Law. Contemporary theories of legal validity, legal liability (criminal and civil), and contractual obligation with special attention to the controversy between legal positivism and “natural law” theories and the assessment of contemporary economic analyses of legal rights. [3]

PHIL 256. Philosophy of Mind. Selected problems in the philosophy of mind. Relation between mind and body, the nature of consciousness, the problem of other minds, the status of self-knowledge, and the possibility of machine and other intelligence. Connections with empirical investigations in related cognitive disciplines. [3]

PHIL 257. Early Modern Political Philosophy. A study of competing accounts of the best form of political association, which differ from Locke, through the works of Machiavelli, Hobbes, Spinoza, and Rousseau. [3]

PHIL 258. Contemporary Political Philosophy. A focused and extended examination of selected topics in contemporary political theory, such as justice, liberty, rights, tolerance, and autonomy. Content varies depending on instructor. [3]

PHIL 261. Jewish Philosophy. Introduction to Jewish philosophy and the philosophical achievement of such major figures as Philo, Saadiah, Maimonides, Levinas, and selected contemporary thinkers. [3]

PHIL 262. Islamic Philosophy. Introduction to the major figures of Islamic philosophy including Kindi, Razi, Farabi, Avicenna, and Ibn Khaldun. [3]

PHIL 263. French Feminism. Introduction to the tradition of French feminist philosophy, including relevant works by Beauvoir, Cixous, Irigaray, Kristeva, LeDoeuff, Kofmann, and others. [3]

PHIL 271. Ethics and Business. Moral problems in the business world including irresponsible marketing, conflict between profit and social conscience, resource use, public regulation of business, and the value of competition. Prerequisite: 105. [3]

PHIL 272. Ethics and Law. Moral problems in the practice of law including conflicts of interest, confidentiality, limits of advocacy, and the obligations of lawyers to clients, courts, and the public. Repeat credit for students who have completed 272W. Prerequisite: 105. [3]

PHIL 272W. Ethics and Law. Moral problems in the practice of law including conflicts of interest, confidentiality, limits of advocacy, and the obligations of lawyers to clients, courts, and the public. Repeat credit for students who have completed 272. Prerequisite: 105. [3]

PHIL 273. Environmental Philosophy. Environmental ethics (animal rights, respect for nature, the land ethic), science and the natural world, the aesthetics of nature, global justice, and sustainability. [3]

PHIL 294a. Selected Topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL 294b. Selected Topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL 301. Teaching and Research Methods. Survey of methods of research in philosophy and examination and discussion of teaching methods. Required of all first-year graduate students. [2]

PHIL 302. Philosophical Readings in French. Selected major philosophical works or a selected bibliography about a major philosophical problem, read in French. A translation examination and appropriate reports. Prerequisite: department approval. [3]

PHIL 303. Philosophical Readings in German. Selected major philosophical works or a selected bibliography on a major philosophical problem. A translation examination and appropriate reports. Prerequisite: department approval. [3]
PHIL 304. Philosophical Readings in Classical Languages (Latin or Greek). Reading in Latin or Greek of selected major philosophical works or a selected bibliography on a major philosophical problem. A translation examination and appropriate reports. Prerequisite: department approval. [3]

PHIL 350. Readings in Philosophy. Selected major philosophical works or a selected bibliography about a major philosophical problem. Appropriate reports and examination. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL 351. History of Philosophy. Survey of figures and/or topics in history of philosophy. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL 352. Topics in Philosophy. Survey of topics in philosophy. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL 353. Figures in Philosophy. Survey of figures in the history of philosophy. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PHIL 369. Master's Thesis Research. [0]

PHIL 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PHIL 399. Ph.D. Dissertation Research. [0-12]

Physics

PHYS 221. Classical and Modern Optics. Geometrical optics, including reflection, refraction, ray tracing, aberrations, and interference. Physical optics, including wave theory, absorption, dispersion, diffraction, and polarization. Properties of light from lasers and synchrotron sources. Photodetectors and optical technology. Prerequisite: either 113b or 116b or 121b; and either MATH 150b or 155b. [3]

PHYS 223. Thermal and Statistical Physics. Temperature, work, heat, and the first law of thermodynamics. Entropy and the second law of thermodynamics. Kinetic theory of gases with applications to ideal gases and electromagnetic radiation. Prerequisite or corequisite: 227a. Serves as repeat credit for students who have completed 223c. [3]

PHYS 225. Concepts and Applications of Quantum Physics. Atomic and molecular structure, interaction of light with atoms and molecules, and spectroscopy. One three-hour laboratory per week. Repeat credit for students who have completed 225W. Prerequisite: either 113b or 116b or 121b. Prerequisite or corequisite: MATH 175 or 205b. [4]

PHYS 225W. Concepts and Applications of Quantum Physics. Atomic and molecular structure, interaction of light with atoms and molecules, and spectroscopy. One three-hour laboratory per week. Repeat credit for students who have completed 225. Prerequisite: either 113b or 116b or 121b. Prerequisite or corequisite: MATH 175 or 205b. [4]

PHYS 226. Modern Physics. Condensed-matter physics, biophysics, special theory of relativity, and nuclear and particle physics. One three-hour laboratory per week. Repeat credit for students who have completed 226. Prerequisite: either 113b or 116b or 121b. Prerequisite or corequisite: MATH 175 or 205b. [4]

PHYS 226W. Modern Physics. Condensed-matter physics, biophysics, special theory of relativity, and nuclear and particle physics. One three-hour laboratory per week. Repeat credit for students who have completed 226. Prerequisite: either 113b or 116b or 121b. Prerequisite or corequisite: MATH 175 or 205b. [4]

PHYS 227a. Classical Mechanics I. Vector algebra and coordinate transformations. Gravity and potential energy. Free, forced, damped, and nonlinear harmonic oscillations. Chaos in simple mechanical systems. Lagrangian and Hamiltonian dynamics. The calculus of variations. Prerequisite: either 113b or 116b or 121b; and either MATH 150b or 155b. [3]

PHYS 227b. Classical Mechanics II. Continuation of 227a. Orbital and rotational angular momentum and gravitational and Coulomb central-force problems, motion in non-inertial reference frames; coupled oscillators and normal modes; rigid-body motion; continuous systems and the wave equation; special relativity. Prerequisite: 227a. [3]

PHYS 228. Foundations of Medical Imaging. Physics and engineering of image formation for medical applications. Mathematical concepts of image formation and analysis. Techniques for recording images using ionizing radiation, including CT, ultrasound, magnetic resonance; and nuclear, including SPECT and PET. Methods of evaluating image quality. No credit for students who have earned credit for BME 258. Prerequisite: 113b, 116b, or 121b; and Mathematics: MATH 196; or one of (MATH 194, 204, 205b) and one of (MATH 198, 208). [3]

PHYS 229a. Electricity, Magnetism, and Electrodynamics I. Electrostatic fields and potentials. Gauss’s law. Electrical properties of insulators, semiconductors, and metals. The Lorentz force. Magnetic fields and forces. Electromagnetic induction, Maxwell’s equations, and electromagnetic waves. Prerequisite: either 113b or 116b or 121b; and either MATH 155b or 170. [3]

PHYS 229b. Electricity, Magnetism, and Electrodynamics II. Continuation of 229a. Electromagnetic waves in dielectrics and conductors. Electromagnetic radiation in waveguide structures. Relativistic electrodynamics. Magnetism as a relativistic phenomenon. Prerequisite: 229a and either MATH 196, 198, or 208. [3]

PHYS 240. Selected Topics. Prerequisite or corequisite: either 222 or 225W and either 226 or 226W. [1-3]

PHYS 243. Health Physics. Theory and instrumentation in health physics and radiological physics. Radiation shielding design, methods of external and internal dosimetry, and radiation regulatory issues. Prerequisite: Either 225 or 225W and either Math 150b or 155b. [3]

PHYS 251a. Advanced Quantum Mechanics I. Wave-particle duality, indeterminacy, superposition, the Schrödinger equation, angular momentum, the hydrogen atom, and spin and indistinguishability. Prerequisite: Either 225 or 225W; either 226 or 226W; and Mathematics: MATH 196; or one of (MATH 194, 204, 205b) and one of (MATH 198, 208). [3]

PHYS 251b. Advanced Quantum Mechanics II. Time-independent and time-dependent perturbation theory, matrix theory, scattering, applications to atomic physics, condensed matter physics, and astrophysics. Prerequisite: 229a and 251a. [3]

PHYS 255. Introduction to Particle Physics. Weak, strong, and electromagnetic forces as evidenced by the interactions of elementary particles. Classification of particles and experimental techniques. Prerequisite or corequisite: either 225 or 225W and either 226 or 226W. [3]

PHYS 257. Computational Physics. Topics in modern physics analyzed exclusively with computer programs. Three-body solar system orbits, Random walk diffusion and entropy growth, Magnetism in the second order using model, non-equilibrium molecular dynamics. Solutions to the Schrödinger equation with numerical methods. Prerequisite: either 113b or 116b or 121b; and either MATH 150b or 155b. [3]

PHYS 285. Radiation Detectors and Measurements. Basic physics principles and applications of radiation detecting instruments, with laboratory exercises. Techniques and instrumentation for nuclear radiation detection and measurements as they relate to health physics (radiation safety) and nuclear physics. [4]
PHYS 300. Seminar. [1]

PHYS 302. Learning to Teach, Teaching to Learn. Directed readings and discussion of topics in the teaching of science and engineering. Practical application of best teaching practices will be emphasized. Intended primarily for first-time teaching assistants and first-year graduate students. [1]

PHYS 303. Experimental Nuclear Physics. Interactions of charged particles and photons in matter, coordinate transformations, statistics of nuclear processes, radiation detectors and analyzers, and selected topics in the design and application to experiments of particle accelerators and instrumentation used in nuclear and high energy physics. Recommended concomitant: 225b. [3]

PHYS 305. Particle and Continuum Mechanics. Least action principle, Lagrange formalism, conservation laws, two-body problem, small-amplitude vibrations, non-inertial reference frames, canonical formalism, rigid body motion, continuous media, and field theory. Includes programming on scientific work stations. Prerequisite or corequisite: 308. [3]

PHYS 306. Biomolecular Physics. Physical principles applied to the structure and dynamics of biological molecules on the nanometer scale. Emphasis on the random Brownian motion that dominates at all length scales, and how biomolecular structures move, function, and interact amid chaotic thermal fluctuations. Selected measurement techniques. [3]

PHYS 307. Radiation Dose Assessment. Advanced physics of radiation interactions, shielding, and dosimetry. Gamma ray and neutron shielding; internal and external dosimetry methods and models; radiation protection regulations; environmental monitoring for radioactive materials; and response to radiation accidents and emergencies. Use of specialized computer programs. Prerequisite: 243. [3]

PHYS 308. Mathematical Methods for Physicists. Linear spaces and operators; matrix algebra; differential equations; Green’s function; and complex analysis. May include variational calculus; perturbation methods; group theory. [3]

PHYS 325. Physical Measurements on Biological Systems. (Also listed as Biomedical Engineering 325) A survey of the state of the art in quantitative physical measurement techniques applied to cellular or molecular physiology. Topics include the basis for generation, measurement, and control of the transmembrane potential; electrochemical instrumentation; optical spectroscopy and imaging; X-ray diffraction for determination of macromolecular structure; magnetic resonance spectroscopy and imaging. One lecture and one recitation. [3]

PHYS 326. Theoretical and Experimental Systems Biology. An introduction to systems biology from the perspective of the emergence of complexity in toy models. Examination of simple biological subsystems, their reductionist and equivalent models, and the measurements required to specify model architecture and parameters. Serves as repeat credit for students who completed 352a section 1 or 240 section 1 in fall 2010 or fall 2011. [3]

PHYS 329a. Advanced Electrodynamics. Electrostatics, potentials, boundary value problems, multipole moments, polarization, magnetostatics, Maxwell’s equations, electromagnetic wave propagation, dissipative and conductive media. Prerequisite or corequisite: 308. [3]

PHYS 330a. Quantum Mechanics. Wave and matrix forms of the theory, transformation theory, theory of angular momentum, systems of indistinguishable particles, approximate methods of solution, energy levels and scattering processes, and introduction to relativistic quantum mechanics. Prerequisite or corequisite: 308. [3]

PHYS 340a. Nuclear and Heavy-Ion Theory. Basic experimental facts and phenomenological models (shell model and collective model). Nucleon-nucleon interaction, mean-fields theories of nuclear structure (Hartree-Fock, BSC pairing, HFB, RPA, and QRPA); Ab-initio calculations for light nuclei. Time-dependent Hartree-Fock calculations of heavy-ion reactions. Prerequisite: 330a. [3]

PHYS 340b. Nuclear and Heavy-Ion Theory. Basic experimental facts and phenomenological models of ultra-relativistic heavy-ion collisions. Quark-gluon plasma formation, signatures, and properties. Thermodynamics and hydrodynamical evolution of nuclear matter in extreme conditions. Prerequisite or corequisite: 330a and 341. [3]

PHYS 341. Statistical Mechanics. Phase space, entropy and reversibility; ensemble theory; Fermi and Bose Statistics; systems of interacting particles; equation of state, critical phenomena, and phase transitions; pairing and superfluidity. [3]

PHYS 350. Selected Topics in Theoretical Physics. Topics such as Lie groups and symmetry principles in quantum mechanics, quantum electrodynamics of strong field, phenomenological modes of nuclear structure. Prerequisite: consent of instructor. [3]

PHYS 352a. Special Topics in Experimental Physics. Current topics in experimental physics relevant to research areas in the department, such as biological, condensed matter, elementary-particle, nuclear, and optical physics, astronomy, astrophysics and cosmology. [Variable credit: 1-3]

PHYS 354. Condensed Matter Theory. Free-electron theory of metals; elementary band theory of solids; quantum theory of the harmonic crystal; elementary excitations; optical properties of materials; electronic basis of magnetic interactions; density-functional theory; relativistic band structure; electronic localization and amorphous solids; two-dimensional phase transitions and superfluidics. Prerequisite: Physics 330a. [3]

PHYS 356. Biophysical Electrodynamics. The physics of bioelectric phenomena: the mechanisms that lead to the transmembrane resting and action potentials in neurons and muscle cells, the differential equations describing propagation of the nerve action potential, and the relationship between the transmembrane and extracellular potentials in nerve and cardiac muscle. [3]

PHYS 360a. General Relativity and Cosmology. Einstein’s geometric theory of gravity in terms of tensor analysis and differential geometry. Einstein’s field equations are derived and solutions are discussed. Applications of general relativity are explored, including those to very strong gravitational fields, gravitational collapse, neutron stars, black holes, and quantum gravity. Topics in cosmology will include red shifts and cosmic distance relations, big bang cosmology, primordial nucleosynthesis, the very early universe and inflationary cosmologies. Prerequisite: consent of instructor. [3]

PHYS 360b. General Relativity and Cosmology. Continuation of 360a. Einstein’s geometric theory of gravity in terms of tensor analysis and differential geometry. Einstein’s field equations are derived and solutions are discussed. General relativistic applications are explored, including those to very strong gravitational fields, gravitational collapse, neutron stars, black holes, and quantum gravity. Topics in cosmology will include red shifts and
cosmic distance relations, big bang cosmology, primordial nucleosynthesis, the very early universe and inflationary cosmologies. Prerequisite: consent of instructor. [3]

PHYS 362. Interactions of Photons with Atoms, Molecules, and Solids. Quantum mechanical description of optical excitation, radiative and non-radiative relaxation, and dephasing in the two level approximation. Born-Oppenheimer approximation in molecular systems; interband and intraband transitions; and Maxwell-Bloch equations. Excitons, phonons, plasmons, and polaritons. Prerequisite: 330a or CHEM 330. [3]

PHYS 365. Many-Particle Quantum Theory. Nonrelativistic theory of atoms, solids, and nuclei; operators in second quantization, fermions and bosons, pair correlation function, interacting electron gas (metal), propagators, Wick's theorem and Feynman diagrams, Hartree-Fock theory, shell model, pairing forces in nuclei, and superconductivity. Prerequisite: 330b. [3]

PHYS 369. Master's Thesis Research. [0-3]

PHYS 370a. Quantum Field Theory. Relativistic quantum mechanics, canonical and path-integral field quantization, relativistic scattering theory, perturbation expansions; Feynman diagrams and radiative corrections, renormalization and regularization, with applications to quantum electrodynamics and non Abelian gauge theories. Prerequisite: 305, 330, and 320a. Corequisite: 329b. [3]

PHYS 370b. Quantum Field Theory. Relativistic quantum mechanics, canonical and path-integral field quantization, relativistic scattering theory, perturbation expansions; Feynman diagrams and radiative corrections, renormalization and regularization, with applications to quantum electrodynamics and non Abelian gauge theories. Prerequisite: 370a. [3]

PHYS 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PHYS 390a. Independent Study. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3]

PHYS 390b. Independent Study. May be repeated for credit more than once, but students may earn only up to 3 credits per semester of enrollment. [1-3]

PHYS 399. Ph.D. Dissertation Research. [0-12]

PHYS 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

Political Science

PSCI 203. History of Modern Political Philosophy. Intensive analysis of the principal political philosophers in the modern tradition. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 205. Contemporary Political Theory. Debates in contemporary political thought. Justice, democracy, freedom, identity, and individualism. Includes emerging contemporary theories. Serves as repeat credit for students who completed 201 before fall 2010. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 207. Liberalism and Its Critics. The liberal tradition in political theory and its major challengers. Critical debates surrounding the relationship between individuals and political community, rights, freedom and equality. Repeat credit for students who have completed 207W. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 207W. Liberalism and Its Critics. The liberal tradition in political theory and its major challengers. Critical debates surrounding the relationship between individuals and political community, rights, freedom and equality. Repeat credit for students who have completed 207. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 208. Law, Politics, and Justice. Contemporary and classical theories of law and society; rights theories, gender and the law; law and transitions to democracy; law between nations. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 209. Issues in Political Theory. Topics vary from semester to semester. May be repeated once if there is no overlap with previous offerings. Prerequisite: 202, 203, or 205. [3]

PSCI 210. West European Politics. Analysis of political development, social forces, institutions, and public policy in Great Britain, France, Germany, Italy, and Sweden. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 211. The European Union. Political and economic integration. Origins, institutions, decision processes, policies, achievements, and prospects of the European integration movement. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 213. Democratization and Political Development. Comparative study of political development, with a focus on institutions. The effect of political choices about voting systems, executive and legislative powers, cabinet formation, and other institutions on political competition, parties and government stability. Cases from established democracies and countries undergoing democratization. No credit for students who have taken 317. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 215. Change in Developing Countries. Comparative study of political and economic change in developing countries. Social implications of ethnicity, economic dependency, and environmental degradation. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 216. The Chinese Political System. Governmental institutions and political processes in the People's Republic of China with emphasis upon the interaction of traditional and revolutionary elements. Some attention to Taiwan since 1950 and to the overseas Chinese as parts of the Chinese political universe. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 217. Latin American Politics. Cross-national analysis of political institutions, cultures, and processes of change in Latin America. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 219. Politics of Mexico. A survey of contemporary Mexican politics from a comparative perspective. Interaction of economic, social, and political forces that led to the demise of one of the world's most durable one-party political regimes and the prolonged transition to democracy. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 220. Crisis Diplomacy. Foreign policy decision making and strategy, emphasis on differences between crises that lead to war and those that do not. Foreign relations of Britain, France, Germany, Russia, and Japan. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 221. Causes of War. Scientific study of the onset of expansion and consequences of war, conditions of peace, emphasizing alliances, arms races, and crisis escalation. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 222. American Foreign Policy. Critical analysis of major international and domestic factors shaping U.S. foreign relations as reflected in selected twentieth- and twenty-first-century experiences. No credit for students who have taken 115F, Section 1. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 225. International Political Economy. Survey of major issues involving the interaction of political and economic forces at the global level. Particular attention to theories of interdependence and imperialism, the position of developing countries in the international system, multinational...
corporations, and the economic origins of war. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 226. International Law and Organization. The role of international law and international organizations in the contemporary global political system. Focus on the evolution and impact of international law, the United Nations, the International Monetary Fund (IMF), and selected regional organizations. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 228. International Politics of Latin America. Examination of Latin America's role in the international and inter-American system. Special attention to the international response to revolutionary change in the area, and to the region's major actors and their changing relationship with the United States, with other major powers, and with other actors such as multinational corporations and international financial institutions. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 229. Strategy and International Politics. Strategic behavior and strategic choices arising from interactive decision making within the context of international politics. General principles of strategy. In-class experiments and game playing. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 238. Comparative Political Parties. Political parties and their role in the democratic process of modern liberal democracies, focusing on party systems and party organizations. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 240. Political Parties. Theories of party formation, organization, and behavior. Historical development of party systems. Criteria for the comparative evaluation of party systems. Parties as instruments of citizen control. Implications for electoral outcomes, coalition formation, legislative decision making, and public policy. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 243. Political Campaigns and the Electoral Process. Theories of representation and democratic accountability; electoral strategies and tactics, including political polling and analysis. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [2]

PSCI 244. The Legislative Process. Legislative organization and processes in the U.S. Congress. Attention to parties, elections, institutional structure, interest groups, and other branches of government as they relate to the legislative process. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 245. The American Presidency. Constitutional, historical, and political aspects. Attention to electing and nominating president, presidential leadership and personality, governing, and relations with Congress and the public. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 247. American Political Culture. Content, historical development, and political consequences of the American public's deeply rooted values concerning how the political system ought to work and the ends it ought to serve. Attention to regional variation. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 253. Ethics and Public Policy. Political and moral values in assessing policy-making, public policies and processes, and policy impacts. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 255. Public Policy Problems. Specific problems of public policies and their relations to political and institutional structures. Particular policy problems vary from semester to semester. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 259. Political Strategy and Game Theory. Campaigns and elections, legislative politics, political bargaining, and political organization. Applications of decision and game theory. Models of complete and perfect information, and games of incomplete information. No credit for students who have earned credit for 359. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 260. Introduction to American Law. Law as a component of public policy and the political system; the elements and rationale of private law. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 262. The Judicial Process. Functioning of the judiciary in the American political process; operation and powers of the courts; non-legal aspects of the judicial process; political role and effects of judicial decisions. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 263. Religion and Politics. Religion in democratic societies. Abortion, gay marriage, faith-based initiatives, and the Pledge of Allegiance. Historical works and contemporary contributions to debates. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 265. Constitutional Law: Powers and Structures of Government. U.S. constitutional system and fundamental principles of constitutional interpretation. Judicial development of principles of distribution and scope of governmental powers. Case method. No credit for students who have earned credit for 261. Repeat credit for students who completed 261a prior to fall 2009. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 266. Constitutional Law: Civil Liberties and Rights. Supreme Court's interpretation of the Bill of Rights and the Fourteenth Amendment. Case method. No credit for students who have earned credit for 261. Repeat credit for students who earned credit for 261b prior to fall 2009. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 267. Voting and Political Representation in America. The history of voting rights and the efficacy of representation in the American political system. Political participation, voting rights, felony disenfranchisement, redistricting, and alternative electoral systems. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 269. Conducting Political Research. Research sources, designs, and methods used by political scientists. Locating and accessing data, the logic of causal inferences, and basic data presentation and analysis. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 281. Topics in Contemporary Politics. Survey of important literature and concepts in the field of comparative politics. No credit for students who have earned credit for 261. Repeat credit for students who completed 261a prior to fall 2009. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]

PSCI 283. Religion and Politics. Religion in democratic societies. Abortion, gay marriage, faith-based initiatives, and the Pledge of Allegiance. Historical works and contemporary contributions to debates. Prerequisite or corequisite: 100, 101, 102, 103, or 150. [3]
PSCI 314. Comparative Political Parties. Origin of political parties, party organizations and ideologies, party systems, democratic representation. [3]

PSCI 315. Research in Latin American Politics. Recurring and novel topics in Latin American politics, such as the relation between economic growth and political regimes, the role of the Church, human rights, and U.S. foreign policy. Particular issues vary from semester to semester. [3]

PSCI 317. The Political Economy of Development. The causes of international and national inequalities in the distribution of wealth. Factors related to economic development and tied to domestic and international income distribution, such as geography, natural resources, culture, democracy, and dependency. Examples from throughout the world, especially Asia and Latin America. [3]

PSCI 319. Research in Comparative Analysis. Supervised individual research and reading on selected topics in comparative politics. [3]

PSCI 320. International Politics. Basic course in international politics. Surveys major subfields, focusing on concepts and theories that orient research - e.g., balance of power, interdependence, imperialism, decision-making, crisis-behavior. [3]

PSCI 328. Ideas and International Security. Role of collectively-held meanings and shared ideas (identity, norms, beliefs, values) in national security and political behavior. Texts from political science, economics, philosophy, military strategy and history, and sociology. Real world applications include perceptions of war and war outcomes, security strategy formulation, and impact of identity on international relations. [3]

PSCI 329. Research in International Politics. Supervised individual research and reading on selected topics in international politics. [3]

PSCI 332. Electoral Behavior and Public Opinion. Theories of voting and behavior of candidates in American elections; models of electoral change; the development and dynamics of public opinion. Effects of elections and public opinion on policy and governmental action. [3]

PSCI 337. Attitudes and Measurement. Conceptualization, design, and testing of attitudinal measures. Language, logic, and implementation of psychometric models in political science research. [3]

PSCI 338. Comparative Representations and Accountability. Political representation and democratic accountability in advanced industrial societies and in developing democracies. [3]

PSCI 339. Research in American Politics. Supervised individual research and reading on selected topics in American politics. [3]

PSCI 355. Research Design. Introduction to Analysis of Tables, Measures of Association, OLS regression. Coverage of research design. Experimental design, survey research, elite interviewing, in-depth interviewing, aggregate data, field research, content analysis, case studies, and small-n analysis. Emphasis on concept formation and measurement. [3]

PSCI 356. Statistics for Political Research I. Introduction to statistical analysis with applications in political science, statistical distributions, statistical inference, bivariate and multiple regression, logit, and probit. [3]

PSCI 357. Statistics for Political Research II. Advanced topics in statistical analysis with research applications in maximum likelihood estimation, logit and probit analysis, simultaneous equation models, generalized least squares, and introductory time series concepts. [3]

PSCI 358. Topics in Political Methodology. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSCI 360. Topics in Formal Theory and Modeling. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSCI 369. Master’s Thesis Research. [0]

PSCI 370. Topics in Political Science. An inquiry into selected topics. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSCI 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PSCI 390a. Independent Study. [Variable credit: 1-3 each semester]

PSCI 390b. Independent Study. [Variable credit: 1-3 each semester]

PSCI 399. Ph.D. Dissertation Research. [0-12]

Portuguese

PORT 200. Intermediate Portuguese. Review of Portuguese grammar with emphasis on conversation, composition, and reading of modern Portuguese literary texts. No credit for students who have earned credit for a higher level Portuguese language course. Prerequisite: 102. [3]

PORT 201. Portuguese Composition and Conversation. Expository writing and development of speaking skills. Emphasis on pronunciation, vocabulary, and grammar. No credit for students who have earned credit for 202. Prerequisite: 200. [3]

PORT 203. Brazilian Pop Culture. Development of written and oral communication skills through the study of Brazilian popular culture. Movies, music, television, and magazines. Prerequisite: 200. [3]

PORT 205. Introduction to Luso-Brazilian Literature. Critical readings and methods of literary analysis. Masterpieces from Portugal and Brazil from all genres in several periods. Conversation and writing. Prerequisite: 201 or 203. [3]

PORT 225. Brazilian Culture through Native Material. Differences between spoken and written Portuguese in Brazil. Modern culture, including popular music, film, politics, family life, and sports. Prerequisite: 201 or 203. [3]

PORT 232. Brazilian Literature through the Nineteenth Century. Main literary trends, principal writers and works of Brazilian literature, from colonial beginnings through the nineteenth century. Study of the works of Gregório de Matos, Gonçalves Dias, Alencar, Machado de Assis, and Euclides da Cunha. Prerequisite: 205. [3]

PORT 233. Modern Brazilian Literature. Brazilian literature from the Semana de Arte Moderna to the present. Modernist and neo-Modernist movements. Prerequisite: 205. [3]

PORT 289. Independent Study. A reading course, the content of which varies according to the needs of the individual student. Primarily designed to cover pertinent material not otherwise available to the student in the regular courses of the curriculum. [Variable credit: 1-3 hours, not to exceed 12 over a four-semester period]

PORT 294. Special Topics in Portuguese Language, Literature, or Civilization. May be repeated for credit more than once if there is no
PORT 301. Literary Analysis and Theory. (Also listed as Spanish 301) Methods of literary analysis for the teaching of literature. The systematic application of contemporary theories - structuralist and poststructuralist - in the analysis of poetry and narrative. [3]

PORT 302. Ibero-Romance Philology. (Also listed as Spanish 302) Study of the evolution of the languages and dialects of the Iberian Peninsula. Analysis of selected linguistic developments and readings from medieval texts. [3]

PORT 303. Methods of Literary Analysis for the Teaching of Literature. The systematic application of contemporary theories - structuralist and poststructuralist - in the analysis of recent interactive and communicative models of foreign language instruction. Classroom observations, journal writing, development of materials, and a small action research project are expected. Required of all entering teaching assistants. [3]

PORT 314. Introduction to Latin American Colonial Studies. (Also listed as Spanish 314) Provides a panoramic introduction to the canonical works of the colonial period from “discovery” to “independence,” as well as an overview of the theoretical debates in colonial studies within the Latin American context. Topics include the construction and reshaping of identities and otherness through various stages of Latin American cultural history, the emergence of what has been called the American consciousness during the “New World Baroque,” and the discourses of “independence” and early nation building. [3]

PORT 338. Seminar: Studies in Colonial Literature. (Also listed as Spanish 338) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT 340. Seminar: Hispanic American Essay. (Also listed as Spanish 340) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT 341. Spanish American and Brazilian Literature I. (Also listed as Spanish 341) Literature in a comparative perspective: from the conquests to the end of the nineteenth century. Authors may include Sor Juana, Matos, Alencar, Assis, and Caruquina. [3]

PORT 342. Spanish American and Brazilian Literature II. Literature in a comparative perspective: twentieth century to the present. Texts may include: Os Sertões, La Guerra del Fin del Mundo, Ficciones, Porto do Coração Salvagem, and A Agua Viva. [3]

PORT 351. Comparative Methodology. (Also listed as Spanish 351) Comparative methodology of the literatures of the Spanish and Portuguese speaking world; emphasis on issues of theme, genre, period and movement, translation, and the relationship of literary scholarship to other humanistic endeavors, such as music, film, philosophy, painting, and the plastic arts. [3]

PORT 374. Seminar: Studies in Inter-American Literature. (Also listed as Spanish 374) Comparative approaches to literary texts from such New World cultures as Brazil, Spanish America, the United States, the Caribbean, and Canada (both its French and English traditions). Fluency in Spanish and/or Portuguese required; reading competency in English and French. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PORT 385. Seminar: Studies in Contemporary Literature of the Portuguese-Speaking World. Variable topics to be announced. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PORT 398. Special Studies in Brazilian Literature. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

PORT 399. Ph.D. Dissertation Research. [0-12]

PORT 3995. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

Psychology (A&S)

PSY 300a. Research Seminar. [Variable credit: 1-4]

PSY 301a. Advanced General Psychology. Physiological psychology, perception and sensation, learning, complex processes, developmental, personality, social psychology, and psychopathology. Participation in various sections determined by each student’s background and career interests. [3]

PSY 303. Models of Human Memory. Survey of contemporary models of human memory, especially formal models. Methods of fitting models to data will be discussed. [3]

PSY 304b. Quantitative Methods and Experimental Design. Principles and methods for the design and analysis of experiments and for the investigation of individual differences. Principles of experimental design and descriptive and inferential statistics. [3-3]

PSY 305. Linear and Nonlinear Mixed Effects Models. The analysis of data from hierarchical and multilevel designs. Theory and computational methods, specification and testing of fixed effects, random effects and residuals, assessment of fit, graphical examination, applications to repeated measures data, and missing data models. Prerequisite: 304b or equivalent. [3]

PSY 310. Research Methods in Clinical Psychology. Major methodological and quantitative issues in clinical psychology, including statistical significance testing and its alternatives; threats to internal and external validity; psychometric theory; quantitative approaches to classification; behavioral, genetic, and psychophysiological methods; animal models; analysis of change, mediation, and moderation. [3]

PSY 312. Psychological Assessment. Major techniques of psychological assessment, with an emphasis on the rationale, administration, and interpretation of measures assessing personality and psychopathology. [3]

PSY 315. Theories of Psychotherapy. Advanced study on the major principles, concepts, techniques, and issues relevant to the theory and practice of psychotherapy. Experience in supervised clinical settings or observation of clinical sessions is provided to further understanding of psychotherapeutic processes. [3]

PSY 316. Brain Imaging Methods. Principles and methods used in human neuroimaging, with emphasis on functional magnetic resonance imaging (fMRI). [3]

PSY 318. Computational Modeling. Developing and testing computational models of human cognition and brain function. How to implement models, recognize good modeling, fit models to data, evaluate models, contrast competing models, develop and test new models. Discussion of Monte Carlo simulations, statistical numeric methods, and high-performance computing. [3]

PSY 319. Scientific Computing for Psychological and Brain Science. Computer programming, numerical and computational methods, and high performance computing applied to psychological and brain sciences, such as experimental control, automated data analysis, and model simulation. Prerequisite: one semester of introductory computer programming. [3]

PSY 323. Practicum in Psychological Assessment. [Variable credit: 1-5 each semester]

PSY 324. Practicum in Psychotherapy. [Variable credit: 1-5 each semester]

PSY 325. Advanced Standing in Psychological Assessment. [Variable credit: 1-5 each semester]
PSY 326. Advanced Standing in Psychotherapy. [Variable credit: 1-5 each semester]

PSY 331a. Advanced Investigational Techniques. A non-thesis research project. [0-6]

PSY 331b. Advanced Investigational Techniques. A non-thesis research project. [0-6]

PSY 335. Special Topics in Neuroscience. (Also listed as Cell and Developmental Biology 335 and Neuroscience 335) Basic issues in neuroscience. Possible topics include neural development, neural plasticity, regeneration, organization and function of cortex, sensory systems, motor systems, and research methodology in neuroscience. A new topic is considered each semester. [0-6] 

PSY 336. The Visual System. (Also listed as Cell and Developmental Biology 347, Electrical Engineering 351, Neuroscience 347) An interdisciplinary approach to how humans see and interpret their visual environment. Topics include the structure of the eye and brain (including optics), the physiology of individual cells and groups of cells, machine vision and models of visual function, visual attention, and mechanisms of complex visual perception. Lectures by faculty from Psychology, Engineering, and Cell and Developmental Biology. Graduate students attend one hour discussion section per week, in addition to lecture, and turn in a more extensive paper than undergraduates. [3]

PSY 342. Seminar: Social. In-depth investigation of a specialized topic in Social Psychology. The topic might cover any and all aspects of social psychology, emphasize intra-personal and/or extra-personal perspectives, and focus on theoretical and/or experimental approaches. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY 343. Seminar: Perception. In-depth discussion and exploration of a specialized topic in Perception. The topic can cover any and all aspects of perception, from the molecular neurobiology of retinal processing to the phenomenology of consciousness, and can emphasize particular methodological approaches (e.g., single-cell recording, neuroimaging). May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY 344. Seminar: Neuroscience. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY 351. Seminar: Cognitive Psychology. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY 352. Seminar: Clinical Psychology. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

PSY 355. Diversity and Differentness. Theory, issues, and practical application of cultural sensitivity and competency in research and clinical settings. Not available on a P/F basis. [1-3]

PSY 357. Seminar in Cognitive Science. Integration of the subareas of cognitive science. May be repeated for credit more than once if there is no duplication in topic. Students may earn only up to 2 credits per semester of enrollment. [0-2]

PSY 358. Seminar in Neuroscience. Integration of the subareas of neuroscience. May be repeated for credit more than once if there is no duplication in topic. Students may earn only up to 2 credits per semester of enrollment. [0-2]

PSY 360. Seminar in Clinical Science. Integration of the subareas of clinical science. Includes history and systems of psychology as related to clinical science, ethical issues, and problems encountered in professional psychology. May be repeated for credit more than once if there is no duplication in topic. Students may earn only up to 2 credits per semester of enrollment. [0-2]

PSY 365. Second-Year Research. Second-year research project in psychological sciences. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 12 credits per semester of enrollment. [0-12]

PSY 366. Third-Year Research. Research project in psychological sciences leading to the dissertation proposal. May be repeated for credit. [0-12]

PSY 369. Master's Thesis Research. [0-12]

PSY 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

PSY 398. Internship. [0]

PSY 399. Ph.D. Dissertation Research. [0-12]

Psychology and Human Development (Peabody)

PSY-GS 300. Quantitative Methods Forum. The Forum serves as a venue for delivering and hosting methodological research presentations by graduate students and faculty within the Quantitative Methods program, as well as researchers from other departments. Periodically, the Forum will also provide workshops on methodological topics, feature panels on professional development topics, and host invited talks by visiting scholars. May be repeated for credit. [0-1]

PSY-GS 301. Methods of Psychological Research. Methods for collecting and analyzing empirical information about behavior. Serves as a base upon which to build research competence through more advanced courses and research apprenticeships. [3]

PSY-GS 309. Introduction to Statistical Inference. Introduction to statistical methods for graduate students in education and psychology with minimal undergraduate statistical background. The course will present descriptive and inferential methods for assessing distributional shape, central tendency, variability, and association. An introduction to statistical computing with popular general purpose statistical computer programs will be provided. [3]

PSY-GS 310. Statistical Inference. Introductory course designed to familiarize doctoral students with the principles and procedures of statistical inference and to prepare them for more advanced work in research design and analysis. [3]

PSY-GS 311. Experimental Design. Application of statistical concepts and inferential techniques to the design and analysis of experiments in the behavioral sciences. Advanced procedures for analysis of variance and analysis of covariance. Prerequisite: 310P or equivalent. [3]

PSY-GS 312. Multivariate Statistics. Psychological measurement theory, along with correlational and regression analysis techniques essential to the development of that theory. Prerequisite: 310P or equivalent. [3]

PSY-GS 313. Correlation and Regression. Fundamental concepts in bivariate and multiple regression and correlation techniques. Emphasizes the theory and assumptions underlying OLS and logistic regression, computational procedures, and interpretation of results. Specific applications include: (1) coverage of the full range of correlation indices; (2) a range of regression
strategies (e.g., reduced-form regression, path analysis, ordered and unordered step-wise inclusion); (3) statistical power; (4) regression diagnostics; (5) nonlinear regression and linearizing transformations; (6) testing interactions; and (7) conditions for causality and analysis of change. [3]

PSY-GS 314. Structural Equation Modeling. This course introduces the basic principles of path analysis, confirmatory factor analysis, and latent variable structural modeling, which constitute a powerful set of statistical tools for examining correlational, observational, and even experimental data in the social sciences. Computer techniques for conducting these analyses will also be taught: the LISREL program in particular, but AMOS will also be introduced. [3]

PSY-GS 315. Program Evaluation. The evaluation of social programs. The design of evaluations to produce both theoretically meaningful and practical information about the program and its effectiveness. Such topics as needs assessment, monitoring, impact assessment, and cost-effectiveness evaluations. Covers programs in education, health, and human services. [3]

PSY-GS 317. Psychological Measurement. Fundamental concepts, methods, and principles of psychological measurement. Particular attention will be devoted to reliability and validity issues underlying psychometric theory, and how psychometric theory relates to the assessment of individual differences or human variation more generally. Topics will include multiple regression, factor analysis, and item response theory. [3]

PSY-GS 318. Individual Differences. Focuses on traditional concepts and findings in the area of individual differences broadly defined. The psychological content will primarily involve abilities, interests, and personality; methodological issues encountered in assessing these attributes will be stressed throughout; and particular attention will be devoted to how these concepts can enhance research programs in both applied and theoretical areas. The specific variables discussed within each domain will be restricted to those that have empirically “panned out” (viz., variables that are reliable and related to meaningful behaviors and outcomes that psychologists are interested in predicting and better understanding), rather than theoretical constructs and measures whose external validity is unknown. [3]

PSY-GS 319. Advanced Seminar in Measurement, Statistics, and Evaluation. Special topics in measurement, statistics, and program evaluation. May be repeated with change of topic. Prerequisite: consent of instructor. [3]

PSY-GS 320. Factor Analysis. This course covers primarily Exploratory Factor Analysis (EFA), which is extensively used in psychology, education, medicine, and management. The course covers the theory behind factor analysis, hands-on application to data, exposure to uses of factor analysis in the applied literature, and instruction in popular EFA software. Key topics include model specification, fit and evaluation, rotation methods, questionnaire development, sample size and power issues, and extensions to confirmatory factor models. [3]

PSY-GS 321. Multilevel Modeling. This course covers multilevel (or hierarchical linear) modeling, which is used extensively used in psychology, education, sociology, and medical research. The course covers the theory behind multilevel modeling, hands-on application to data, exposure to uses of multilevel modeling in the applied literature, and instruction in popular multilevel modeling software. Key topics include random effects ANOVA, random slopes, cross-level interactions, multivariate and multi-group models, centring, growth models, discrete outcomes, and dealing with cross-classified data. [3]

PSY-GS 322. Growth Curve Modeling. The analysis of longitudinal data (repeated measurements on the same people over time) is central for evaluating many theories in social science and educational research. This applied course will focus on one flexible and powerful approach for analyzing within-individual change over time, and between-individual differences in change: the latent growth curve model. Emphasis will be placed on attaining a solid understanding of the statistical model, applications to real data, and interpretation of results. [3]

PSY-GS 323. Applied Latent Class and Mixture Modeling. Often social science and educational researchers hypothesize that there are unobserved groups— or latent classes—of persons who show different behavioral patterns, or different patterns of change over time. This course covers mixture modeling, a statistical approach that allows assessment of the number and size of classes, as well as class homogeneity or heterogeneity. Longitudinal mixture models are also covered, which allow classes to transition between states at different rates and/or have different functional forms of change. [3]

PSY-GS 325. Proseminar in Intellectual Disabilities. (Also listed as Special Education 3250) Variable topics. May be repeated with change in topic. [2]

PSY-GS 326. Introduction to Item Response Theory. In this course, students are introduced to the basic concepts of educational and psychological measurement, classical test theory (CTT), and item response theory (IRT). These concepts will be taught with the practice by illustrating the construction of instruments using the “Four Building Blocks” approach (Wilson, 2005) and investigating their measurement properties (e.g., validity and reliability). This class will present both the “how to” and the “why of” IRT. The primary objective of the course is to sharpen the skill, sophistication, and intuition of the student in the interpretation of educational and psychological test data, and in the construction and use of tests as instruments of educational and psychological theory and as tools in the practical problems of selection, evaluation, and guidance in the light of IRT. [3]

PSY-GS 327. Item Response Theory II. Item Response Theory (IRT) II covers IRT models commonly used in education and psychology and their parameter estimation techniques using currently available software. This course will focus on developing a conceptual understanding of the mathematical concepts underlying the IRT models in so far as this is necessary for appropriate use of IRT models. In addition, the class covers topics in applications of IRT including equating/linking (as preliminary procedures for complex IRT models) and differential item functioning (DIF) analysis. [3]

PSY-GS 334. Psychological Foundations of Education. (Also listed as Education 3110) Psychological theories and research as related to the design and practice of education. Specific consideration of the developmental bases of teaching, learning, and student performance (early childhood through adult); individual differences in education with particular reference to socioeconomic status, disabling conditions, learning style, and gender; evaluation of learning; classroom and organizational influences on school effectiveness; family-school relations. [3]

PSY-GS 336. Behavioral Pediatrics and Child Health Psychology. Behavioral pediatrics and child health psychology for advanced predoctoral and postdoctoral trainees. Topics include the scope and definition of behavioral pediatrics, measurement of child behavior, children’s health beliefs and understanding of illness, theories of psychosomatic illness, immunologic and endocrinologic aspects of stress, compliance, psychological effects of physical illness, families’ responses to stress, and psychological intervention strategies. [3]

PSY-GS 338. Family Therapy. Techniques of family and marital therapy, integrating cognitive-behavioral, systemic, and structural approaches. [3]

PSY-GS 339. Advanced Seminar in Educational Psychology. May be repeated with change of topic. [Variable credit: 1-3]

PSY-GS 340. Psychopathology. Focuses on descriptive, epidemiological, and casual psychopathology research, with an emphasis on developmental and cultural influences. The course goal is to increase students’ ability to think creatively and critically about psychopathology research and to conduct their own psychopathology-related research. Prerequisite: Consent of instructor. [3]

PSY-GS 343. Psychological Assessment. A general introduction to clinical assessment, with a particular emphasis on children. The major purpose is to familiarize students with the theoretical issues and psychometric properties of several different methods of assessment including objective and projective personality measures, behavior checklists, behavioral observation, and clinical interviews. Required before taking practica. Prerequisite: Consent of instructor. [3]

PSY-GS 349. Advanced Seminar in Clinical Psychology. May be repeated with change of topic. [3]

PSY-GS 354. Language and Text Processing. Fundamental survey course in language, required for students in the cognitive studies Ph.D. program. Focuses on the psychological and linguistic aspects of sentence and discourse processing, with some attention to computer simulations. Class sessions are generally a combination of lecture material and student presentation. [3]

PSY-GS 357. Seminar in Behavioral Biology. Selected topics in behavioral biology—e.g., ethology. Content varies according to student needs and interests. May be repeated. [3]

PSY-GS 362. Cognitive Science to the Classroom. This course focuses on the interplay between basic research in cognitive science and educational innovation. There is a major push to design learning environments that are based on cognitive science research and theory and to rigorously evaluate these environments. How do we go about doing this? We will use a case study approach of successful educational innovations, the basic research behind them, and their impact on basic research in turn. This will allow us to develop a framework for developing and evaluating educational innovations. [3]

PSY-GS 367. Educational Neuroscience. Seminar that examines the interdisciplinary intersection between cognitive neuroscience investigations of the development of brain structure and function and studies of cognitive development relevant to education. Topics including the emerging theoretical and empirical contribution of neuroscience approaches to understanding the typical and atypical development of domain specific academic skills such as reading and mathematics, as well as the neural basis of domain general processes crucial for educational success such as working memory, motivation, attention, and social cognition. [3]

PSY-GS 368. Advanced Seminar in Developmental Psychology. May be repeated with a change of topic. [3]

PSY-GS 378. Current Research in Social Psychology. A seminar on the current state of the field of social psychology as explored through critical analysis of recent journal articles. May be repeated. [3]

PSY-GS 381. Cognitive Theories of Mathematical Learning. (Also listed as MTED 3810.) Examines the research literature on mathematical learning at the elementary and secondary levels. Considers both the epistemological assumptions and implications of information-processing theories, situated cognition theories, activity theory, and constructivism. [3]

PSY-GS 382. Assessment of Personality. Assessment of children and adolescents in varied contexts using personality tests in practical settings, with emphasis on projective testing and the clinical method. Interpretation and report writing. Prerequisite: consent of instructor. [3]

PSY-GS 386. Psychological Intervention with Children. Various intervention approaches with children, including parent training, behavior therapy, group therapy, psychopharmacological intervention, individual psychotherapy, cognitive behavioral intervention, psychoanalytic play therapy, and residential treatment. [3]

PSY-GS 390. Clinical Applications and Practicum I. This two-semester sequence is required for doctoral students in clinical psychology. The sequence involves applications of theoretical principles of behavior change in clinical settings. Didactic meetings will integrate the empirical and theoretical literatures with problems in clinical application. Students will participate in clinical practice (assessment and intervention) under program faculty supervision. Prerequisite: psychopathology, clinical assessment, and intervention, as well as consent of instructor. [1-3]

PSY-GS 391. Clinical Applications and Practicum II. This two-semester sequence is required for doctoral students in clinical psychology. The sequence involves advanced application of theoretical principles of behavior change in clinical settings. Students will participate in clinical practice (assessment and intervention) under the joint supervision of program faculty and adjunct faculty in community settings. Prerequisite: 390. [1-3]

PSY-GS 392. Clinical Psychology Internship. Required of all Ph.D. students in the clinical program. Specialty rotations, generalized training, didactic instruction, and supervised research are offered during one full year of clinical experience in an academic clinical setting or similar internship facility accredited by the American Psychological Association (APA). Credit hours: students register for zero hours to reflect full-time involvement in supervised clinical psychology internship. Grading is on a Pass/Fail basis. [0]

PSY-GS 396. Special Topics in Psychology. May be repeated with change of topic. [Variable credit: 1-4]

PSY-GS 397. Readings and Research in Psychology. Individual programs of reading or empirical research in psychology. Prerequisite: consent of faculty supervisor. May be repeated. [Variable credit: 1-3]

Religion

REL 2001. Theology and Practice Colloquy. The colloquy provides a social space for deliberation about the goods of theological education. Driven by student presentations, the colloquy considers especially questions of vocation, teaching, and research. Enrolment is limited to fellows in the Program in Theology and Practice. Enrollment is required to enroll in the colloquy in each semester of their first three years of doctoral study. Pass/Fail. [1, awarded at the end of each full year]

REL 2211. Introductory Arabic II. A continuation of Arabic I, with a greater emphasis on everyday conversation, grammar, reading, writing. Prerequisite: Arabic I or equivalent credit by examination. [5] Hamad.

REL 2500. Elementary Biblical Hebrew I. This is the first course in a two-semester sequence leading to a reading knowledge of the Hebrew Bible; concentration is on the basic elements and grammatical study of the language, leading students to begin reading from the original texts. [3] Staff.

REL 2501. Elementary Biblical Hebrew II. This is the second course in a two-semester sequence leading to a reading knowledge of the Hebrew Bible; concentration is on the basic elements and grammatical study of the language, leading students to begin reading from the original texts. [3] Staff.

REL 2502. Aspects of World Religiosity. An introduction to the diverse modes and manners of world religiosity and to their study. Explores some of the primary forms of human religious practice through encounters with a variety of primary and secondary sources drawn from around the world. The student will come to appreciate the variety and complexity by which homor religiosus (the human defined by religiosity) makes it through the day (and night). [3] Geller.

REL 2503. The Hebrew Bible. The life and thought of ancient Israel, with emphasis on the community’s understanding of itself and of its role in history, are addressed in this course; concentration is upon both the problems of historical and literary interpretations and the Israelites’ religious practices and faith. Not available for Ph.D. credit in biblical studies. [3]

REL 2505. Religious Autobiography. Considers the genre of autobiography and the roles of memory and belief in constructing narrative; students
will read from the classics of Christian, Jewish, and Native American autobiographies, as well as from other religious traditions, to determine how race, class, gender, and sexuality affect the portrayal of religious experiences. [3] D. Sasson.

REL 2513. Literary Analysis of the Hebrew Bible. This course focuses on narrative criticism of the Hebrew Bible, comparing it to similar methodologies (poetics, rhetorical criticism, etc.) and contrasting it with other forms of exegesis (historical criticism, deconstruction, etc.). Students will study key literary terms and discuss the elements that work together to form a story. The class will consider the narrator's voice in relation to the text and the reader, examining narrative omniscience, key type scenes, and themes in the Hebrew Bible and ancient Near Eastern literature.

REL 2516. Early Women. This course explores the roles and authority of women in early Christian communities. Beginning with the New Testament writings, there is conflicting evidence regarding the participation of women. Some language suggests a prohibition of women as leaders and teachers; other texts provide evidence of women who performed these roles. A variety of texts from the first four centuries of Christianity, from Asia Minor to Egypt, show a similar discrepancy. The course will focus on laying out the evidence for women's participation and then assessing the implications of that evidence. [3]

REL 2550. Pastoral Theology and Care. This course introduces students to basic theories and methods of pastoral care, especially in the ecclesial context. This course assumes that care is mediated through acts of pastoral leadership, liturgy, preaching, and the forming of congregational life and programming as well as through specific individual conversations. Special attention is paid to the person of the pastor as caregiver and leader of a community of faith and care. [3]

REL 2563. Shakerm in America Religion. This seminar will focus on the Society of Believers in Christ’s Second Appearing, better known as the Shakerm. The Shakerm offer a case study in the development of a religion, from charismatic beginnings to institutional formation and decline. Shakermism will be a lens through which to explore topics in American religious history such as: revivalism and the Second Great Awakening, utopian communal societies, experiments in sexual equality and the restructuring of family relationships, spiritualism, and religious expression in ritual, music, and material culture.

REL 2564. Martin Luther King, Jr. King’s role as a religious leader and as an agent of social change, with some attention to the intellectual sources of his thought and social activism. His views concerning the social roles of religion are seen against the background of classical Christian views, late eighteenth-century dissenting traditions, the early eighteenth-century American Social Gospel Movement, and the more radical ideas of Malcolm X and Albert B. Cleage, Jr., during the 1960s. Critical evaluations of King are also made in terms of classical Christian views (e.g., Aquinas, Luther, Calvin, Wesley). [3]

REL 2566. Songwriting from a Theological Perspective. This is a studio class where students concentrate on the production of songs in a theologically reflective environment. The course aims to meet the needs of students who come to VDS each year with an interest in communicating and educating through music.

REL 2567. Music and Religion. An investigation into the many ways in which religion and music contribute to community formation throughout the world. Topics include music’s interdependent relationship with religious texts, religious performance, trance, sacrifice, and folk origins. [3] Barz.

REL 2569. Beginning Koiné Greek I. This is the first course in a two-semester sequence of study leading to a knowledge of the New Testament. [3] Staff.

REL 2570. Beginning Koiné Greek II. This is the second course in a two-semester sequence of study leading to a knowledge of the New Testament. [3] Staff.

REL 2571. The Formation of the Christian Tradition. The expansion of Christianity, the development of doctrine, relationships with the Roman Empire, development of church institutions, and changing modes of Christian life from the second century into the Middle Ages, with emphasis on the periods and themes that are formative of the classical doctrines and institutional patterns. Major purpose of the course is to establish the background for the division of the Western church and the subsequent development of the Roman Catholic and Protestant churches. [3] Michelson.

REL 2572. Christianity in the Reformation Era. The setting of the Reformation (c. 1500-1648) and its development. The significant ecclesiastical, theological, and historical issues of the period. Backgrounds and case studies, examination of major individuals and ecclesiastical patterns. An understanding and interpretation of the events. Major theological documents and questions of continuing historical interest that have come out of the Reformation. [3]

REL 2573. Modern European Christianity. Institutional and intellectual developments in European Christianity between the mid-seventeenth and the twentieth centuries. Major personalities and movements of this period. Political, social, cultural, and philosophical developments that influenced Christian existence during this time. [3]

REL 2574. The History of Christian Liturgy. As an introduction to the origins and development of Christian worship and rituals from 100 to 1600 C.E., the course will encourage students to explore the underlying structures of different worship practices as well as the function of rituals in various times and places. [3] Jensen.
REL 2707. Mary, Mary Magdalene, and Eve in Christian Art, Text, and Tradition. Christian art historically has depicted the Madonna and her “sisters”, Eve and Mary Magdalene, in diverse ways that largely reflected their distinct but related roles in Christian theology and devotional practice. Recently, fiction writers, art historians, theologians, feminists, and even archaeologists have focused renewed attention on all three figures. This course will consider the many variations and intersections of their stories along with the visual and material culture associated with them. It also will consider contemporary assessments of their place in visual art and Christian tradition, addressing questions about the ways their images have been deployed as archetypes of feminine purity, sensuality, independence, and penitence. [3] Jensen.

REL 2708. Sacred Time/Christian Liturgy. The course examines the construction of the Christian calendar (daily hours, weekly patterns, seasons, and special occasions) with attention devoted to comparative sacred cycles in other ancient religions. Students will explore the structure as well as the theory of consecrated time and its role in structuring and enacting religious practices as well as sacred story. The differences among various Christian groups will be examined, as well as the theological, social, and cultural distinctions that may explain, in part, such distinctions. [3] Jensen.

REL 2713. Art and Empire from Constantine to Justinian. Participants in this course will engage in an interdisciplinary study of Roman social, political, religious, and art historical developments in the fourth through sixth centuries. [3] Jensen.

REL 2714. Gods, Rulers, and Saints: Portraits in Roman and Christian Art. A study of the social, political, and religious function of portraits from the first century through the sixth century C.E., this course considers various problems of representing physical appearance, including the construction of identity, social status, and mediation of presence through image. Other issues that will be addressed include portraits as memorials, as objects of veneration, and as idealized models. The course will conclude with a brief discussion of the ways in which ancient portraits continue to influence or guide the visual construction of likeness. [3] Ms. Jensen.

REL 2758. Ethics in Theological Perspectives. This class will examine the central themes of morality, moral agency, deliberation, and moral discernment that define ethics as a discipline; students investigate the moral arguments from teleological, deontological, and utilitarian perspectives and study the philosophical and theological figures and different theological ethics that have had a sustaining influence on Christian ethics in the West. [3] Snarr.

REL 2759. Theology of Proclamation. Reflection on the phenomena of public worship and forms of speaking the gospel. Theological issues in Christian worship; theological issues in the sacraments; the hermeneutic problem as a problem for preaching; theological understandings of proclamation. [3]

REL 2801. Introduction to Homiletics. The course is an examination of the theologies and methods of preparing sermons from Biblical texts and an exploration of hermeneutical approaches, oral/aural skills, rhetorical strategies, narrative and connective logic; students are responsible for developing a working theology of the Word, reviewing major homiletic theories, completing exegetical assignments, skill-building exercises, sermon sketches, and sermon manuscripts; in-class preaching is required. [3]

REL 2802. History of Preaching. This course will function on two levels by offering a substantive historical survey of preaching and by examining some writings in the philosophy of history to explore its role in homiletics and practical theology; class sessions will address both sanctioned and unsanctioned preaching by women and men from multiple regions, racial and ethnic groups, social classes, and religious traditions.

REL 2803. Preaching, Worship, and Technology. As an exercise in cultural criticism of church practices, this course will incorporate writings from ethics and social theory (Adorno, Arendt, Borgen, Foucault, and Haraway) together with concrete questions in contemporary preaching and worship (PowerPoint, video, pulpit design, and cyborg preachers). [3] Smith.

REL 2813. Ethics for Human Development Professionals.

REL 2814. Religion and Society. Examination of religion as a social phenomenon. Explores the writings of classical sociologists (especially Marx, Weber, and Durkheim), Readings on the role of social structure in constituting collective consciousness. Sociology of religion. Focus on the use of sociological insights toward understanding the relation between religion and Western social life. [3]

REL 2815. Religion and Social Movements. This course focuses upon the roles of religious organizations, persons, and resources in social-political movements for change. Students will be engaged in the interdisciplinary conversations on the contributions and constraints that religious groups provide for social movements. Among the questions students will investigate are: What makes an activist? In what ways do religions provide resources-materially, ideationally, and culturally for the emergence and maintenance of social movements? In what ways are religious groups transformed by their interaction with the political process?

REL 2816. Early Christian Political Thought. What are the roots of contemporary Christian understandings of the state and political life? How were early justifications of the divine right of kings maintained and challenged by Christian writers? Can the origins of democracy and human rights be traced back to early and medieval Christian thinkers? In what ways are our views of political violence formed by early traditions? Through a careful examination of some of the widely read (e.g. Augustine, Aquinas, Luther, Calvin) and lesser known (e.g. John of Salisbury, Grotius) Christian political thinkers, we will trace the development of Christian political thought from the patristic to reformation periods. [3] Jensen.

REL 2817. Modern Christian Political Thought. Surveying Christian Political Thought from the late nineteenth century to contemporary debates, we will analyze theo-ethical understandings of the relation of Christianity to political life. Some questions the course will focus on are: Is there a necessary and important relationship between Christianity and democracy? What is the role of the public theo-ethicist in political debates? In what ways do various ecclesial and theological assumptions impact the political engagement of the church? Social gospel, Christian Realist, Anabaptist, Liberal, Catholic Social Thought, Feminist, and Fundamentalist approaches will receive particular attention. A theory-practice option for those who want to study the concurrent U.S. campaign season is available. [3] Snarr.

REL 2864. Religions of the African Diaspora. This course is a survey of the religious traditions of people of African descent by exploring the historic and phenomenological connections among diverse religious beliefs, values, rituals, institutions, and worldviews throughout the African Diaspora. Using several methodological and theoretical approaches, the course will explore various forms of experiences and practices that provide a deep understanding and appreciation of the sacred meaning of human existence (myth, doctrine, prayers, rituals, institutions, and symbols) drawn from African-derived faith communities dispersed across the Atlantic World such as indigenous African religions, Christianity, Judaism, Islam, Vodoun, Santería, alternative religious movements, and humanism amongst others.

REL 2866. Race, Religion, and Protest Music. This course examines how music and other related forms of art emerge from a particular social location in order to: help define pressing social issues; galvanize mass social movements; and function as symbols of protest. Using several methodological and theoretical approaches, the course will explore a wide variety of musical genres such as the spirituals, the blues, gospel, jazz, rhythm and blues, rock and roll, folk music, soul music, punk rock, reggae, Afrobeat, and hip hop in order to determine how racial identity and religious themes
through readings, seminar discussions, sermons, and worship planning, social transformation. The course takes as its starting point the "broken- eschatological texts, addressing of social issues. [3] Religions' sermons. Hermeneutic approach to Hebrew scripture, preaching of selected homiletic problems are addressed through an analysis of stu-
dents' sermons. McClure. In liberationist homiletics, students will preach sermons that make use of sensational and collaborative homiletics, and the ethic or risk and solidarity of these theoretical and theological approaches. [3] Mr. McClure.

REL 3002. Worship Across Traditions and Cultures. Working to expand our familiarity with preaching and worship across denominational and cultural patterns and across faith traditions, this course will study preaching and wor-
ship practices and formation that embrace the ever-increasing experience of multiculturalism or pluralism within and between faith communities. [3] 

REL 3005. Popular Music and Religious Identity. What religious themes are prevalent in popular music today? How does popular music shape religious identity? How does faith shape popular music? What religious and spiritual experiences shape how music is heard, performed, consumed, or otherwise experienced? How is the music industry shaped by, and a shaper of, religious truth and identity today? These are among the questions this course will seek to address. [3] McClure.

REL 3007. Oratory and Rhetoric for Proclamation. This course studies the formulaic oratory structures of folk traditions among oral cultures and rhetorical structures of public discourse among classical and contemporary traditions for homiletics and the preaching event. [3] Andrews.

REL 3009. Modern Homiletic Theory. Homiletic theory and practice have undergone tremendous changes in the past century. This course traces developments from the deductive and propositional homiletics of the late nineteenth century, through the liberal topical and "project" method of the early twentieth century, new-orthodox and Barthian emphases, inductive homiletics, narrative homiletics, structuralist and phenomenological models, and more recent postmodern construals of homiletic theory. Students will read and analyze sermons using these theories, and opportunity will be given to construct sermons using these methods as well. [3] McClure.

REL 3010. Homiletic Analysis. Students will learn criterion and skills for analyzing, evaluating, and providing feedback on sermons. The course will focus on establishing essential criteria for sermon evaluation, learning methods for offering sermon feedback in small groups, and developing skills for individual sermon supervision.

REL 3011. Preaching in the African American Tradition. The theology and styles of black preaching. Sermons of the most effective black preachers of today and yesterday. Methodologies for effective outlining, manuscript development, and use of illustrations are discussed. [3] 

REL 3012. Ethical Approaches to Preaching. This course investigates four ethical approaches to preaching: the social gospel and activist ethic within the preaching of the civil rights movement, the countercultural ethic within post-liberal homiletics, the communicative ethic within conversational and collaborative homiletics, and the ethic or risk and solidarity in liberationist homiletics. Students will preach sermons that make use of these theoretical and theological approaches. [3] Mr. McClure.

REL 3014. Advanced Homiletic Problems. Advanced seminar in which selected homiletic problems are addressed through an analysis of stu-
dents' sermons. Hermeneutic approach to Hebrew scripture, preaching of eschatological texts, addressing of social issues. [3] 

REL 3025. Preaching and Social Justice. This seminar and preaching practicum explores the impact of preaching and worship on personal and social transformation. The course takes as its starting point the "broken-
ness" (i.e., suffering and injustice) that affects individuals and communities. Through readings, seminar discussions, sermons, and worship planning, students will receive resources for constructing a more effective ministry of healing and social transformation. [3] 

REL 3032. Preaching Theology. In-depth exploration of the ways that theology comes to play in sermon preparation and preaching. Particular attention is given to the presence in preaching of theological methods, au-
thorities (scripture, reason, experience, and tradition), theistic worldviews, theodicies, models of church and culture, ideas of atonement, the relation-
ship between religions, and personal and historical eschatologies. Gradu-
ate students will be expected to do sermon analyses and/or preach twice for the class. [3] McClure.

REL 3035. Paul and Politics. Paul formed his gospel in the cauldron of an apocalyptic theology that mingled religion and politics. This volatile mix-
ture produced a provocative counter-claim to Roman imperial culture. This seminar will explore Paul's responses to pressing religious and political is-
ues of his time such as Roman imperialism, slavery, the role of women, ethnic reconciliation, and sexual identity. Additionally, the seminar will ex-
amine the enduring role of Paul's letters in contemporary conversations around cultural and political issues. [3] 

REL 3038. Preaching in the Postmodern Context. Students will con-
sider what it means to preach in a context in which the authority of the preacher and the authorities for preaching (scripture, reason, experience, tradition) become de-centered. The class will investigate the nature of cul-

REL 3040. Practical Theology and the Public Church. This course studies practical theology topics and methods/methodology for the church's role in society/public arena, dealing with public theology and a range of social, cultural, economic, and political issues.

REL 3042. Liturgy and Preaching. An exploration of the historical roots of liturgical preaching, preaching and sacraments, preaching the Church Year and other calendars, lectionary preaching, preaching inclusivity and worship, preaching performance and worship arts, and occasional ser-
mons in liturgical context.

REL 3043. Language, Communication, and Practical Theology. Most works in the field of practical theology contain normative assumptions about the nature of language and communication. These assumptions inform the analysis of situations, persons, or contexts, and influence the theology shaped in light of those analyses. This course will look especially at the ways in which poets (theories of myth, symbol, and metaphor), speech act theory, semiotics, rhetoric, narrative theory, communicative action theory, cultural hermeneutics, and ritual theory inform a range of texts in practical theology. Scholars of language and communication under consideration are Suzanne Langer, Kenneth Burke, Claude Levi-Strauss, James Carey, J. L. Austin, Paul Ricoeur, Catherine Bell, Northrop Frye, Gregory Bateson, Ferdinand de Saussure, Alfred Schutz, Jean Piaget, C.S. Pierce, Ian Barbour, and Victor Turner. Practical theologians under consid-
eration include James Fowler, James Hopewell, Denham Grierson, Robert Shreiter, Alex Garcia-Rivera, Don Browning, Elaine Ramshaw, Herbert an-
derson and Edward Foley, James Loder, Mary Fulksor, Johannes A. Van der Ven, Gerrit Immink, and Gerben Heltink.

REL 3045. Narrative, Communication, and Religious Identity. Within the religious imagination, mythical, historical, traditional, communal, ritual, homiletical, and personal narratives work together to shape communal and personal identities. This course investigates the ways in which narrative functions, especially in local religious communities, to shape, subvert, and transform human identities. [3] J. McClure.

REL 3052. Self and Social Context. Pastoral theology and practices of care are aided and directed by operative understandings of the self. What is the self? Is it real? Is it universal? How does it come into being? How does it develop, and how does it relate to the divine? These are fundamen-
tal questions in pastoral theology. Responding to the insights of feminists, social theorists, and philosophers, contemporary pastoral theologians have been revising their theological anthropologies to include an understanding of the self that takes more seriously its social dimensions. What does atten-
dition to the situated self tell us about effective pastoral care, the meaning of
healing/salvation, and the nature of God? In this course we will read social scientific, philosophical, and theological accounts of a self formed within its social, institutional, and cultural contexts. We will also explore the implications of this theological anthropology for a variety of practices. [3]

REL 3053. Contemporary Psychotherapy and Pastoral Counseling. Recent trends in psychotherapy. Theories of personality and personality change, as do strategies for psychotherapy. Students will assess critically the implications of these theories for pastoral counseling.

REL 3056. Pastoral Method in Ministry. Critical examination of pastoral method in the ministry of care and counseling. Close attention given to the place of the social sciences in pastoral method. Considers issues in the use of quantitative and qualitative research methods. [3]

REL 3057. Theology and Personality. This seminar from the pastoral theology and counseling discipline explores variable topics.

REL 3058. Multicultural Pastoral Care and Counseling. Multicultural pastoral care and counseling through a consideration of the biases of traditional western approaches to counseling and the issues for a pluralistic world. [3]

REL 3059. Shame and Guilt. Students enrolled in this seminar will examine the dynamics of shame and guilt in social and personal life from theological, psychological, and pastoral perspectives. [3] Flesberg.

REL 3060. Freudian Theories and Religion. An intense reading and discussion of fundamental texts in psychoanalysis and their relationship to Freud’s critique of religion. The basic requirements and texts are introductory; more advanced students can use supplementary texts and approaches. [3] Gay.

REL 3061. Post-Freudian Theories and Religion. An examination of the Object Relations school of contemporary psychoanalysis (M. Klein, D. Winnicott, W. R. D. Fairbairn, Otto Kernberg, Heinz Kohut). Focus on both the clinical and the explanatory theories as they relate to the examination of religious experience and similar self states. [3]

REL 3062. Theology and Health in a Therapeutic Culture. Introduces the empirical study of the relationship between health and religion. The ways in which the disciplines of theology, religion, psychology, and medicine inform these studies are examined. [3]

REL 3063. The Body and Theological Knowledge. This class will be conducted as a seminar based on shared reading and discussion rather than lecture and will explore the question of how theological knowledge is shaped in and through the body, focusing on exploratory reading in human science research, critical theory, constructive theology, and practical theology.

REL 3064. Theories of Human Development. This course provides a general introduction to human development across the lifespan and is a survey of developmental processes that influence the growth of the physical, intellectual, socio-emotional and spiritual aspects of the person and the family. It includes a holistic approach to developmental changes that integrates theories, research, and application. Participants are encouraged to formulate a personal philosophy of what constitutes optimum growth and development. Some consideration is also given to practical implications (for example, for child-rearing and educational practices). [3]

REL 3069. Theories of Personality. A study of representative theorists within each of the four forces of psychology to clarify alternative understandings of the nature of personality and approaches to the psychological sciences. Attention is given to relationships with pastoral theology and counseling. [3] B. Miller-McLemore.

REL 3070. Gender, Sexuality, and the Family. Addresses such issues as divorce, custody, blended families, reproductive issues, infidelity and adultery, unpaid labor in the household, rape, incest, domestic violence, and coming out. The class will focus on the delivery of pastoral care and counseling related to these issues and will also address the utilization of community resources to facilitate further care. The course’s design seeks to equip those who intend to be front-line care providers; an introductory course in pastoral care is a prerequisite unless approval is given by the instructor. [3] Flesberg.

REL 3071. Seminar in Pastoral Care: Death and Dying. Addresses the issues of theology and pastoral practice that pertain to ministering to the dying and the bereaved. Participants will have opportunities to consider and to clarify their theological postures regarding theodicy, eschatology, sin and sickness, prayer, suicide, euthanasia, and hope. The course also will examine how one’s theological commitments translate into authentic acts of care such as accompanying the dying, offering support to the bereaved, and assisting the family in making decisions.

REL 3072. Pastoral Theology for Transitions and Crises. Examines various pastoral responses to persons facing transitions (e.g., birth, vocational choice, partnering, marriage, aging, and dying) and crises (e.g., illness, bereavement, and interpersonal discord). Close attention paid to the theological and psychological dimensions of these experiences. Current research in coping and religious coping theory to develop strategies for theological reflection and pastoral action. Prerequisite: 2550. [3] Flesberg.

REL 3073. Pastoral Theology: Histories and Horizons. It is important for pastoral and practical theologians to situate themselves historically, theoretically, and religiously in the field. This course will provide an overview of the history of pastoral theology from Augustine to the present, and ask, What is the operative theological anthropology? How is illness/healing understood? What practices were designed to address the “ills”? Who were the detractors of the theories and practices, both internal and external? Where is the field now, and where does it appear to be headed? Answering these questions will help students broaden their understanding of themes and issues in the field and to situate themselves in the conversation. [3]

REL 3081. Christian Spirituality and Pastoral Care. An exploration into the history and contemporary literature on spirituality within the pastoral care tradition. Topics include the differentiation between spiritual direction and pastoral care; the history of the cure/care of souls; feminist spirituality, African American spirituality, and spirituality from the margins. [3] B. Miller-McLemore.

REL 3098. Pastoral Care and Global Consumerism. This course delineates the salient features of late capitalism, often designated by the term neoliberalism, and its profound effects upon global politics and ecosystems, societies, communities, and institutions. It focuses particularly on how
contemporary technologies and cultural assumptions extend the influence of free markets into interpersonal relationships and individual selves, as well as into religious congregations, theological reflection, and the practices of pastoral care and counseling. In each instance it asserts that the effects include distorted notions of freedom, identity and tolerance, as well as affective alterations, all of which erode or even corrupt these areas of life and thus contribute to widespread human suffering. Finally, it explores possible practices for congregations and pastoral caregivers that might oppose and alleviate these effects, as well as theories that might guide such practices.

REL 3099. Pastoral Care for Persons with Mental Disorders and Addictions. In this seminar, students engage in a rigorous examination of the behavioral patterns that characterize addictions and study the effects of the addictive behavior not only on the patient but upon the patient’s family and peers. The course will also explore the different approaches to pastoral care both to the patient and to those who are affected by the patient’s illness.

REL 3102. Intermediate Modern Hebrew I. Modern Hebrew reading, conversation, and advanced grammar. Spring: greater emphasis on reading and writing, Prerequisite: one year of Modern Hebrew or its equivalent. [3] Staff.

REL 3103. Intermediate Modern Hebrew II. Modern Hebrew reading, conversation, and advanced grammar. Spring: greater emphasis on reading and writing, Prerequisite: one year of Modern Hebrew or its equivalent. [3] Staff.

REL 3107. Old Testament Theology. Traces Old Testament Theology in modern biblical criticism from the late 18th century through the mid 20th century. The class will turn to primary sources to engage both the major expressions and major critiques of the enterprise. [3] Marbury.

REL 3109. Exilic Prophecy. A study of Hebrew prophecy from the seventh and sixth centuries B.C.E., with emphasis on the prophets Jeremiah, Ezekiel, and Deutero-Isaiah. The work, literature, and thought associated with these great prophets are studied against the background of the events surrounding the Babylonian exile. [3] Knight.

REL 3111. The Pentateuch. A study of the first five books of the Hebrew Bible as the key for understanding Israelite history and theology and as the base point for some of the most critical questions in the study of biblical literature. [3]

REL 3115. The Psalms. A study of the Book of Psalms in general, along with readings of selected Psalms in Hebrew. The course will include an analysis of the types and setting of the Psalms in the life of Israel, a discussion of the religion of the poems and their poetic form, and a survey of modern scholarship in the area. [3]

REL 3117. The Ethics of Ancient Israel. A descriptive study of the ethics of Israel, seeking to understand the effect of religion and history on the Israelites’ effort to order their society and to influence moral behavior. Views of humanity, the relationship between the individual and the community, the place of politics in establishing justice, the treatment of socially vulnerable persons, and other topics. Connections drawn to such theological concepts as covenant, righteousness, and wholeness. [3] Knight.

REL 3120. Politics and the Economy in Ancient Israel. The political and economic systems of ancient Israel, with attention to the impact of the centralized monarchical government on the economy of the country, Political processes, rights, and obligations are examined, as well as economic options, stratification, and commercial and property law. Biblical evaluations, especially prophetic critiques of the abuse of power, are explored. [3] Knight.

REL 3122. Leadership in Hebrew Bible. Using Joatham’s fable (Judges 9) as a paradigm for leadership, this course examines various types of leaders in the Hebrew Bible and ancient Near East. Employing folkloristics, socio-historical criticism, and other methodologies, students will study the roles of kings, queens, priests, prophets, prophetesses, and other leaders in the ancient world. As students compare and contrast the ideologies and imagery associated with different types of authority, the class invites them to explore practical applications in their own vocations. [3]

REL 3123. The Book of Exodus. General exegesis of the Book of Exodus, concentrating on the definition of its major themes and purposes. If necessary, additional time may be allotted for those requiring extra work in Hebrew or in textual criticism. [3] Sasson.

REL 3124. Esther and Ruth. Explores the two books in the Hebrew Bible named for women. Examines Hebrew narrative technique and feminist and postmodern criticism. [3]

REL 3131. Voices of Women in the Ancient Near East. An introductory examination of the place and portrayal of women in Near Eastern antiquity and in contemporary scholarship, with special consideration of the role genre plays in their representations. [3]

REL 3135. Sexuality in the Hebrew Bible and ANE. Explores how various sexual practices (prostitution, homosexuality, heterosexuality, rape, sodomy, incest) are dealt with in the Hebrew Bible and in the larger context of the ANE. [3]

REL 3137. Autobiography and Methodological Criticism. Considerable attention given to reading and discussing texts from across the humanities field where scholars are rethinking objectivity and exploring questions of social location, personal voice, subjectivity, and different inflections of the academic “voice.” Aims to helping students experiment with different styles of academic writing and reflection in an effort to find their own voice. For graduate and advanced level students. [3] D. Sasson.
REL 3139. Book of Amos. This seminar focuses on the meanings and messages of the rhetoric attributed to the Hebrew prophet Amos; the course will raise questions about the Sitz im Leben and the social context that might have given rise to such strident social critique; the seminar will devote ample attention to the stylized presentation of the prophet’s voice in Hebrew poetry. Of paramount concern for the discussions will be the junctures where the prophet’s rhetoric offers relevant critique for the contemporary world. [3] Marbury.

REL 3142. The Old Testament in Greek. An introduction to all aspects of the Old Testament in Greek: the origins and purpose of the LXX; its translation technique; differences between various books; Origen’s Hexapla; the later translators Theodotion, Symmachus, and Aquila; contacts through St. Jerome and the Latin Bible; relations with the Dead Sea Scrolls; practical use of the modern editions; practice in use for textual criticism of the Hebrew Bible. Prerequisite: knowledge of Greek, together with at least an elementary knowledge of Hebrew. [3]

REL 3143. Death and Transfiguration in Pharaoic Egypt. This course explores the conceptual world of Ancient Egyptian mortuary religion: how the ancient Egyptians viewed death and the afterlife, prepared the body for eternity, and created lasting funerary monuments. Attention will be given to how these concepts are evoked in Ancient Israel, and how they are presented today through museum exhibitions and in popular culture. [3]

REL 3144. The Political Economy of Misery. An examination of the ways in which the intersections of various forms of oppression—such as racism, sexism, ageism, heterosexism, and classism—coalesce to form lifestyle of misery that produce social patterns of domination and subordination. [3] Emile Townsend.

REL 3150. Lives of Jesus: Ancient and Modern. An exploration of ancient and modern interpretations of the story of Jesus to see the ways in which generations of Christians have told this story to fit the needs of their own particular settings and cultures. [3] Levine.

REL 3152. Interpreting the Gospels. The Gospels through history and cultures. A survey of their interpretations from their original historical contexts, through the history of the church, and more recently in Catholic and Protestant churches after the Holocaust, in African-American churches, and in feminist circles. [3]

REL 3156. Jewish and Christian Self-Definition. Students will examine the various options (social, theological, Scriptural, practical) that confronted Jews and Christians in the first three centuries of the Common Era and the processes by which the various communities narrowed these options in their attempts to establish a normative identity. [3] Levine.

REL 3159. Semiotics and Biblical Studies. Why are several, different, and often opposed interpretations of the same biblical text equally legitimate and plausible? (This is the question raised by Ricoeur in The Conflict of Interpretations, and by Fish in Is There a Text in This Class?, and also raised by the shelves of diverging scholarly commentaries on the same biblical book.) Thus, why do interpreters of the Bible have the moral responsibility of choosing among these legitimate and plausible interpretations one which “does no harm” and to take the risk of choosing an interpretation which will be helpful, liberating, and constructive by challenging systemic evil? Semiotic theories address these questions by providing theories of the way meaning is produced through the interaction of texts, intertexts, contexts, and readers. Most helpful in biblical studies are the semiotic theories of Umberto Eco (A Theory of Semiotics and The Role of the Reader), A.-J. Greimas (Semiotics and Language), who opens the possibility to account for The Religious Dimensions of Biblical Texts, and their applications in biblical studies by Mieke Bal, in Narratology: Introduction to the Theory of Narrative: On Meaning-Making: Essays in Semiotics; and her spectacular study of Judges 4 and 5, Murder and Difference: Gender, Genre, and Scholarship on Sisera’s Death; and Loving Yusuf: Conceptual Travels from Present to Past, in which she reads biblical texts together with modern literature, feminist issues, visual art, and other religious texts (in the latter case, the Qur’an).

REL 3160. Synoptic Studies. Introduction to basic issues of synoptic research and methodology, with an emphasis on the message and theology of the individual evangelists. [3]

REL 3161. The Parables in Exegesis and Interpretation. The nature of parable as form; the history of the interpretations of parables; the study of parables in the setting of the ministry of Jesus and the theology of the Evangelists; and literary criticism and the interpretation of the parables. [3] Levine, Buttrick.

REL 3162. The Pauline Interpretation of Christianity. Pauline Christianity and its place in the early church, using the letters of Paul, the deutero-Pauline letters, and the portrait of Paul in Acts. Attention to the problems of method. Greek not required. [3]

REL 3163. Exegesis of Selected Pauline Letters. Selected Pauline letters are the base from which the character and content of Pauline theology are explored. The development of basic skills in exegesis is emphasized. [3] Patte.

REL 3164. The Gospel of John. This course addresses various theories concerning John’s historical context, narrative art, Christology, depiction of disciples, dualistic language and depictions of those outside the circle of Jesus-believers (e.g., “the world” “the Jews”), presentations of gender, ethnicity, and social status; eschatology (futurist, realized), and use/misuse within Christian teaching and preaching. [3]

REL 3165. Matthew. Through analytical approaches such as historical-critical, literary, sociological, and ideological, students will reconstruct Matthew’s audience, both actual and ideal, and explore the topics of Christology, ecclesiology, debates with the synagogue, politics, and artistry of composition. [3] Levine.

REL 3166. The Problem of Biblical Authority. A study of controversies over the authority of Scripture. Various uses of Scripture to clarify doctrinal statements about Scripture and revelation. Comparison of the views of Scripture held in early Palestinian Judaism, New Testament Christianity, selected periods of church history, contemporary evangelical and liberal circles, the Black church, and secular culture. [3]

REL 3167. History of Reception of The New Testament and Exegesis. Selected instances of the reception of New Testament texts throughout the history of the Church and today, in the East and the West, in the “first” and in the “two-thirds” world, by religious and secular readers as well as by biblical scholars. Special attention to the interface of these diverse readings and of contemporary critical interpretations. [3]

REL 3170. The Gospel of Mark. This course addresses various theories concerning Mark’s historical context, narrative art, Christology, depiction of the disciples, political views, and presentations of gender, ethnicity, and social status. Students from the graduate department of religion who enroll in this class will be required to submit an article-length paper designed for publication in a professional journal; students from the Divinity School may elect to write the paper; there will be additional sessions scheduled for students who wish to read in Greek.

REL 3173. The Book of Revelation. The Book of Revelation has puzzled interpreters for centuries and was nearly excluded from the canon in the fourth century and was shunned by Protestants during the Reformation. In this course, students will explore the reasons behind Revelation’s disputed
status. The class will begin with the text of Revelation itself, and students will learn practices of New Testament interpretation by preparing a section of text for each class meeting. Students will be pay particular attention to the literary genre and style of this book and to its social and historical context by exploring the variety of ways the text has been understood. Participants in the course will learn to recognize interpretive choices that a reader of Revelation makes and to analyze how the interpreter's social context may affect the interpretation. A range of scholarly and popular interpretations of Revelation—written, musical, and visual—will be considered. Sessions will be discussion-oriented with brief introductory lectures. [3]

REL 3174. Ethics of The New Testament. The ethical teaching found in selected documents of the New Testament (such as the Sermon on the Mount, Luke-Acts, Paul's letters). Comparison of these documents in terms of the types of behavior expected of the believers and of the basis upon which their specific ethical teachings are established. [3]

REL 3175. Monasticism in Late Antiquity. This course examines the rise of Christian asceticism in Late Antiquity. Students will study the specific historical and geographic contexts of the development of monasticism in Syria, Egypt, and its spread across the Mediterranean and beyond. The course will be primarily focused on interpreting the large body of ascetic literature which developed from the fourth through sixth centuries. Students will read various genres and monastic theologians including the sayings of the Desert Fathers and Mothers, Athanasius’ Life of Anthony, Gerontius’ Life of Melania the Younger, the works of Evagrius Ponticus, Isaac of Nineveh, Philoxenos of Mabbug and others. The course will also examine the legacy of desert spirituality for later Christian traditions and for contemporary theology and monastic practice (such as in the work of Roberta Bondi or Thomas Merton). [3] Michelson.

REL 3183. Readings in Greek: The Gospel of John. The prerequisite for enrolling in the course is successful completion of course work in the Greek language.

REL 3192. Theology in the United Methodist Tradition. A study of theology in the Methodist tradition to the present. There is a concentration on the theology of John Wesley, but attention is given to the major doctrinal foci of Methodism in its various expressions. The student is asked to develop his or her articulation of Wesleyan theology for the contemporary ecclesial situation in relation to several social concerns.

REL 3202. History of Christian Worship. Catholic and Protestant. Attention to the nature and principles of worship, the primitive tradition, Eastern rites, the Roman Mass, Protestant forms, and modern tendencies. [3]

REL 3203. Modern Christian Marriage Practices and Theologies in Historical Context. Using approaches taken from gender and ritual studies, this course will examine the modern history of Christian marriage and family construction in its cultural context. Equal emphasis will be given to early modern and contemporary American marriage, including gay marriage and polygamy. Particular attention will be paid to such issues as the gendered ideologies and practices of marriage, especially in relation to the shift from patriarchal to companionate marriage; the relationship between marriage and citizenship and civil rights; and sex, as the root symbol of marriage. We will trace these issues through the adaptations made to marriage rites and American law and consider contemporary practical challenges posed to specific religious communities. At the end of the course, students will be able to identify and analyze the gendered dimensions of marriage; apply basic theories of ritual to Christian marriage liturgies and ordinances; and place contemporary debates about the meaning of and right to marry in historical context. Grades will be based on contribution to seminar discussions and completion of a research paper. [3]

REL 3204. Religious Life in Nineteenth-Century England. The historical background of modern religious consciousness, as illustrated in Evangelicalism, the Oxford Movement, Christian Socialism, Methodism, Roman Catholicism, and other religious groups. The influence of culture, intellectual currents, and politics on religious life and thought. [3]

REL 3207. American Apocalyptic Thought and Movements. This course explores apocalyptic and millennial ideas and movements in North America from the colonial period to the present. The primary focus will be on apocalyptic themes in relation to social and political crises in the history of the United States. Particular attention will be given to apocalyptic images and ideas in popular culture.

REL 3208. The Theology of Martin Luther. Students who enroll in this seminar will explore the basic shape of Luther’s thought with particular emphasis upon the systematic interconnections of the doctrines of God, Christ, Scripture, the church, and civil society based on their relation to the central themes of justification and faith. [3] DeHart.

REL 3209. Calvin's Institutes. An examination of Calvin’s great treatise and its major topics: creation, providence, and predestination; Christology and anthropology; interrelation of justification and sanctification; the sacraments; the Church and civil society. Focus on close reading of the text and its topical organization, as well as reflection on the basic issues raised by Calvin’s thoughts as a whole. [3] DeHart.

REL 3210. Contemporary Issues in American Religion. This course invites students to reflect upon our inheritance from the late twentieth century. We will not march through the years but will consider important themes, key developments, pivotal moments, and still significant writings in order to understand better our contemporary situation. Specifically, we will study how religion has and is responding to recent social crises and cultural developments. Three themes will frame our subject. We will look at the state of organized religion, as well as consider what it means to be “spiritual not religious.” Second, by examining civil rights and wrongs, including but not limited to race, we will attempt to better understand the diverse political strategies employed by religious people. Finally, not just the public, but also the private sphere deserves attention. We will look at religious interests in the sexual revolutions (broadly construed) of the last few decades. This allows us to consider, among other things, the continuing challenge science poses to religious values and worldviews. Certainly, other topical frameworks could be developed and additional sub-topics explored. The reading done for the paper assignments will facilitate your working on topics of particular interest or delving more deeply on ones listed here. Moreover, there will be room on the syllabus for the class to suggest additional themes. A book review, two short papers, and an even shorter class presentation will be required.

REL 3212. Jesus in Modern America. The period from 1880 to 2000 featured a high level of American cultural interest in Jesus of Nazareth. More books were produced on Jesus during this period than on any other biblical figure. Through various modes of cultural production-plays, novels, movies, biblical commentaries, theologies, and moral essays-Americans depicted Jesus to meet their needs and conceptions of who this man was and what he represented for their congregations. Students will examine a wide range of “American Jesuses.” [3] Hudnut-Beumler.

REL 3214. Women and Religion in America. The role of women in American religious history. Topics include patterns of women’s ministries, religious perceptions found in different movements or groups, contrasting experiences of women in various religious traditions, and issues of historical interpretation. [3]

REL 3217. Church and State in American History. A study of the complex historical relationship between church and state in the United States. Particular attention is given to Colonial notions of biblical covenant and social contract; definitions of “religion” employed in American constitutional history; the design of nineteenth-century denominationalism and its influence on religious liberty; and the effects of pluralism on the shape and public expression of religion in the twentieth century. [3]

REL 3218. America’s Bibles. Students will explore the use of the Bible by American religious communities and their responses to scholarly investigation of biblical authorship and authority. Emphasis will be placed on the developments in the late nineteenth and twentieth centuries that contributed to the fundamentalist-modernist crisis in a variety of Protestant churches. [3]

REL 3219. The Public Role of Religion. Explores the history and cultural context of the practice of ministry in American public life, as manifested in the church, the nation, and the academy. Emphasis placed on identifying the agenda and strategies for public theology in the twentieth century and plotting their trajectories for the twenty-first century. [3]

REL 3220. Material History in American Religion. Enables students to become familiar with the use of non-textual sources to help recover the historical record, and aid in the interpretation, of people and movements in American religious history. The first half of the seminar will consist of analysis of exemplary techniques for reading the material culture and evidence of the religious past. The second half will consist of hands-on fieldwork and interpretation of aspects of American religion such as dress, architecture, foodways, rituals, money practices, visual imagery, music, and the use of time. [3] Hudnut-Beierlein.

REL 3221. American Religious Intolerance. This course studies the art of religious defamation as evidenced by 19th and 20th century exposés and memoirs. The following questions guide our study: what are the enduring anxieties that beget and tropes that express religious prejudice; what do they tell us about American society and culture; and how may these anxieties and prejudices be recognized in contemporary culture and ourselves. Memoires and exposés comprise the focus of course readings, while secondary literature provides the context and theoretical frame for our study of intolerance more generally. This term, anti-Catholicism and anti-Mormonism will provide our chief case studies, but the assignment structure and some reading assignments encourage application to other groups. Class discussion will be oriented to identifying the manner in which past and present religious prejudices continually inform one another, both sustaining and imaginatively reshaping meanings to fit instant anxieties and disparate religious groups. At the end of the course, students will better understand the history of religious intolerance in America; recognize the enduring tropes of religious intolerance; be able to critically engage such tropes as applied to different religions; and be more adept in identifying their own prejudices. Grades will be based on contribution to seminar discussions and completion of a research paper. [3]

REL 3222. Christian Mysticism. Dealing with the development of Christian practices of religious training and purification, and with the techniques of prayer for which they were undertaken, during the first six centuries. Reading and discussion of primary materials in order to discover the changing presuppositions and objectives of the practitioners. [3]

REL 3225. Ancient Origins of Religious Conflict in the Middle East. Religious oppositions in the eastern Mediterranean world from the Macca- bean revolt to the Muslim conquests of the seventh century; beginnings of religious militancy; challenges of monotheism to Greco-Roman civilization; conversion, persecution, and concepts of heresy and holy war in Christianity, Judaism, and Islam. [3] Drews, Willshire.

REL 3226. Evangelicalism, Pentecostalism, and the Shape of World Christianity.

REL 3227. The Evangelical Protestant Movement in America. An examination of evangelical traditions from the colonial period to their present manifestations in twenty-first century America, with some attention to the European background. Special attention is devoted to debates concerning the authority and inerrancy of scripture, theology, church-state relations, the role of the Christian in society, education, the relationship between science and religion, the church and racism, the moral character of America, and other areas of cultural cleavage. Cultural conflict or “wars of faith” between conservative black and white Christians studied in terms of their historical significance and political implications. [3]

REL 3228. Catholicism Since Vatican II. The Second Vatican Council has become a watermark in the Catholic Church’s self-understanding (before Vatican II/after Vatican II). Examination of the last fifty years of Catholicism’s history and their impact on various theological issues for the church today. [3] Burns.

REL 3232. The Long Reformation in Britain and America. (Also listed as History 317) How protestantism was imposed from above, received in the pew, and negotiated across the gap between the two, during the century and a half following the Reformation in England, Scotland, Anglo-Ireland, the Gaidhealtachd, and the British American colonies. Readings in anthropology of religion and of ritual supplement those in recent secondary historical literature, with a sampling of primary sources including spiritual autobiographies, diaries, church court records, and sermons. Each participant will produce a short work of original research in primary materials. [3]

REL 3233. Theology in America, 1600–1850. Theology in America from the arrival of the Puritans through the Revolutionary period was a complex mixture of academic doctrines and popular beliefs. The scope of theological ideas extended beyond religious institutions to influence cultural patterns and social issues such as war, slavery, religious persecution, and the nature of citizenship. This intermediate-level seminar examines various theologies in America, including an examination of key theologians (broadly considered) and important themes and traditions, including the Reformed Tradition, Anti-nomianism, political theologies, revivalism, and Deism. [3] Byrd.

REL 3234. The History of Theodicy in the Christian Traditions. The story of Christianity has the notion of God who suffers with and in our place at its crux. This course surveys the variegated histories of Christian attitudes toward and responses to evil and suffering: both individually, ecclesiastically, both in its theology and praxis. Readings will range from Dorothy Day to Irenaeus of Lyons, from Toni Morrison to Shusaku Endo, from Karl Barth to Hannah Arendt. Particular attention will be given to the contemporary issue of human trafficking and global economic disparity and its global impact.

REL 3235. Twentieth-Century African American Religious History. Examines the rise of Pentecostalism, the spread of the gospel blues, how urbanization and industrialization affected black churches, the pivotal role of religion in the civil rights movement, relationship between black power and black theology, the changing roles of women in religious institutions, and the impact of post-denominationalism. [3] Dickerson.

REL 3236. Religion and the Civil Rights Movement. Students who enroll in this course should note that the seminar carries four semester hours. The seminar will examine the religious ideas and individuals that played pivotal roles in the civil rights movement by exploring the theological foundations of the black freedom struggle, the crucial impact of religion in debates about social change, and the participation of religious institutions and organizations in an effort to achieve racial equality. [4] Dickerson.

REL 3240. The Theology of Jonathan Edwards. Edwards’ thought with reference to the Reformed theological tradition, the Enlightenment, and the
REL 3243. Religion, Slavery, and the American Civil War. This seminar examines slavery in relation to the religious history of the American Civil War. Based on reading and discussion of primary and secondary sources, the seminar will begin by assessing the development of slavery in colonial America and its relation to religious groups through the American Revolution and the early republic. The seminar will examine religious themes in the debates, protests, and revolts over slavery in the nineteenth century. In addition, the seminar will examine broadly the religious history of the Civil War and its aftermath. [3]

REL 3249. Colonial American Religious History. From 1492 through the American Revolution, the Western Hemisphere saw the importation of a wide range of African and European religious practices and interaction with indigenous peoples who also observed a wide range of religions. Examines the primary and secondary literature about American religion in the colonial era, with special attention to the processes of colonization, religious competition, differentiation, and innovation. [3] Hudnut-Beumler.

REL 3250. History of Anti-Trinitarian Theology.

REL 3251. The Historiography of American Religion. This course focuses on the major important interpretive accounts of the history of American Religion. The course is designed especially for graduate students who intend to specialize within, or take a doctoral exam on, the field of American religious and church history, key problems and significant monographs in the field. [3] Hudnut-Beumler, Byrd.

REL 3254. New Religious Movements. The rise and development of new religious movements in nineteenth- and twentieth-century America. Emphasizes the following themes: utopian, restorationist, and social reform movements in relation to American primitivism and political orders; the role of text and ritual in creating and maintaining religious order and community; and the problematic nature of the sociological categories “sect” and “cult.” [3]

REL 3252. Baptism and Eucharist in Ancient and Medieval Christianity. The development of the practice and the theory of the Christian ritual of baptism and eucharist considered. Readings include descriptions and explanations of the rituals, as well as primary texts that discuss their significance and role in the Christian Church. [3] Jensen.

REL 3303. Religious Literature in Contemporary Contexts. This course will introduce recent literature that describes religious experience from a variety of religious traditions, including Christian, Jewish, Buddhist, and Muslim. Of prime concern will be how the authors recall experiences in past communities, shape alternative practices, and construct new literary forms through which to tell their stories. Readings may include Marilynne Robinson, Gilead; Richard Rodriguez, The Hunger of Memory; Kim Barnes, In the Wilderness; Paul Cowan, An Orphan in History; Julia Kristeva, The Body and the Book; Kathleen Norris, The Cloister Walk; and Mary Rose O’Reiley, The Barn at the End of the World: The Apprenticeship of a Quaker, Buddhist Shepherd. [3] D. Sasson.

REL 3304. Rabbinic Thought and Theology. The Hebrew Bible, though foundational to traditional Judaism, is not central. Traditional Judaism is the heir of Rabbinic Judaism, which emerged from the academies of the Land of Israel and Babylonia in the first through seventh centuries of the Common Era. We will focus on the Rabbinic texts that helped define Judaism for over a thousand years in the post-Temple environment. Rabbinic Judaism constitutes a revolution in religiosity, and the weapon of the revolution was the midrash, or the creative Rabbinic rereadings of the Torah. Together we will explore both the messages and the methods of Rabbinic Judaism. [3]

REL 3309. Gender, Theology, and the Religious Imagination. Explores the influence of gender (as both difference and identity) on Western theological discourse and the human religious imagination. This exploration is guided by the notion that there is much work left to do in unveiling the impact of gender in its broadest sense on where we’ve been, where we want to go, and how we’re going to get there-religiously speaking. Particular emphasis will be placed on naming the influence of gender on theological understandings of self, world, and god. A second major emphasis will be to explore the ways in which religious experience and community reflect gendered priorities. Questions related to the pursuit of gender equality will be used to frame the course as a whole. [3]

REL 3311. Modern Critics of Religion. This seminar examines the relationship between the critique of religion and the understanding of modernity under the aegis of Marx’s famous apothegm: “the criticism of religion is the prerequisite of all criticism.” To that end, it first traces the genealogy of Marx’s remark in the Hegelian tradition’s tie of religion and society as well as explores the notion of critique. Then after analysis of Marx’s own work, in particular his appropriation of religious discourse to undertake social criticism, the seminar considers critiques of religion that appear to belittle the optimistic assessment that preceded Marx’s dictum: “For Germany, the criticism of religion has been essentially completed.” The work of the two leading critics of modernity who follow Marx—Freud and Nietzsche—are addressed. [3] Geller.

REL 3312. Theologies, Traditions, and Difference. Contemporary concerns with the historical marginalization of particular groups in North American society have resulted in much attention to the topic of “difference,” whether it be ethnic, religious, racial, class, sexual, gender, or other markers of particularity. This course looks at how these important traditions have framed and responded to these issues-liberal political, Christian theological, and postmodern. Not typically read together, these theories offer modes of ethical and communal thinking and will shape the focus of the course in its investigation of how communities ought to engage difference within and beyond their bounds. Seminar. Readings will include John Rawls, Kent Greenawalt, Donald Moon, William Connolly, Derrick, A. MacIntyre, John Yoder, John Milbank, and S. Welch, among others. [3]

REL 3313. God, Economy, and Poverty. This course will focus on the ways Christian Scripture, tradition, and contemporary theology relate to poverty. Attention will be given to theology’s task of critiquing deformed concepts of God that mask or justify conditions of poverty and theology’s constructive task of articulating alternative ways of viewing the poor and eliminating the conditions of poverty. There also will be focus on ecclesial practices of life with the poor in relation to business, legal, and political solutions in the sphere of public policy. Among issues of the culture of our market society that address the exclusion or inclusion of the poor, these will be considered: lending and debt, property rights, comparative advantage, competition, consumerism, health care delivery, education, and the culture of despair. [3] Meeks.

REL 3314. Theology and Worship. This seminar seeks to understand the interrelated roles of sacrament, word, and ethics in the praxis of Christian faith in church and society. Methodologically focused, the course attends to history, major theologians, and current constructive proposals in the areas of early Christian sources, fundamental and political theology, and liturgical and sacramental theology. [3] Morrill.

REL 3321. Process Theology. Contributions made to Christian theology by the tradition of process thought, and the questions raised for process thought by the character of Christian theology. [3]

REL 3326. Seminar in Rahner, Schillebeeckx, and Metz. This reading-intensive seminar provides the opportunity to study works by three of the most significant Roman Catholic theologians of the second half of the twentieth century. Study of these three authors, then, will access a certain trajectory in systematic-theological content and methods that emerged from the era of the Second Vatican Council. [3]

REL 3330. Theology and Contemporary Continental Philosophy. Certain continental philosophers are central to the so-called “return of the religious” in contemporary thought. This course will explore the this development through readings in major figures in the field and in appropriations of and responses to their work by theologians.

REL 3333. Theology of Kari Barth. An introduction to the thought of one of the most important and controversial theologians of the twentieth century. [3] DeHart.

REL 3336. Gender and Religion [Mostly] in America. Designed for GDR students, this course explores how religion in the construction of gender ideals in America and how those ideas have shaped American religion. Consequently, course readings relate to the reciprocal affects of gendered male and female identities, especially as expressed in religious discourse and practices, as well as in specific church settings. The themes that frame our study include authority, domesticity, embodiment and sexuality. Although our readings will concern specific historical and contemporary sites of gender construction, student response to assignments need not. Moreover, the course is designed to be interdisciplinary and benefit from the variety of methods and research interests brought by you to class discussion.

REL 3340. Feminist Womanist Theology. Introduce students to the classic texts and themes of feminist, womanist, and mujerista theologies as well as to current issues and important texts on the relationships among sexuality, gender, and race, the validity of “women’s experiences” as sources for feminist theological reflection, and feminist critiques and reconstructions of traditional theological loci. [3] Armour.

REL 3342. Feminist Hermeneutics. The revisionary interpretation feminists are currently proposing in such areas as literary theory, anthropology, psychology, ethics, and philosophy and their possible effect on contemporary theology and biblical analysis. [3]

REL 3344. Racial-Ethnic Biblical Criticism. Students participating in this seminar will analyze the juncture between Early Christian Studies and Racial-Ethnic Studies with a focus on the problems of race and ethnicity in biblical texts and contexts as well as in modern and postmodern interpretations and interpreters. The grounding phenomenon of migration; representations of Self and Others, signification of race and ethnicity, approaches to race and ethnicity in the Roman Empire; approaches to race and ethnicity in early Christian texts and contexts are among the topics students will explore. [3] Mr. Segovia.

REL 3345. Latin American Biblical Criticism.

REL 3346. Kierkegaard the Theologian. An advanced exploration of Kierkegaard’s philosophy of Christian belief, with particular attention to his analysis of faith, the relation of ethics and religion, sin and human existence, and his metaphysical and theistic assumptions. Based on close reading and classroom analysis and discussion of selected texts from the pseudonymous authorship. [3] DeHart.

REL 3348. Queer Theology. This course examines emergent queer theology in relationship to the theological and cultural issues (historical and contemporary) that it seeks to address.

REL 3350. Materialist Biblical Criticism. Focuses on the question of political economy and the resultant constructions and relations of social class, an angle of vision closely associated with the liberation criticism of the 1970s and beyond but also with roots in earlier Marxist approaches to the Bible; the course deals with the juncture between economic studies and Biblical criticism, both with regard to the texts and contexts of early Christianity and the interpretations/interpreters of such texts and contexts in modernity and postmodernity; course will consider a study of political economy, approaches to the political economy of the Roman Empire, and the trajectory of materialist criticism.

REL 3351. Postmodern Theory: In the Wake of the Death of God. If modernism is understood to be the age of the subject, the age that begins when self-consciousness says, “I think, therefore I am” (Descartes, 1638), making itself the foundation of its very existence, postmodernity begins when this postulate of the autonomous, self-grounding subject enters into crisis and collapses. Without the individual subject as secure foundation, the presumably stable values of modern tradition since the Renaissance are undermined in all domains from market economies based on the free choices of independent individuals to aesthetic styles of subjective self-expression familiar, for example, in Romantic and Expressionist art. The new sense of a lack of foundations, of no tangible or knowable reality underlying and grounding the flux of appearances in experience, opens thought and praxis in the diverse directions that have come to be characterized as postmodern. Simulacra, inauthenticity, lack of origins or originals, hence proliferating pluralities which nevertheless evince no real distinctions from one another in a consumer society of mass production are some of the typical manifestations of this postmodern milieu. We will undertake to survey important theoretical responses to this predicament particularly from philosophers of religion, primarily those in the continental tradition writing currently.

REL 3352. Paul Tillich and the Future of Theology. This course will engage in close readings of Paul Tillich’s three-volume Systematic Theology with the following questions in mind: what is Tillich’s role in the future of Christian Theology? In what ways must Tillich’s project be modified if it is to be viable for any future constructive Christian theology? How does our knowledge of the world’s religious traditions require a rethinking of content and structure of Tillich’s system? [3]

REL 3354. Philosophies of Classical India. This course will introduce students to the central themes of classical Indian philosophy in both Hindu and Buddhist traditions. Is Indian philosophy really a type of philosophy? Why has ancient Indian thought generally been excluded from the history of philosophy? These questions will be examined as will the nature of Indian philosophy itself. The course will then proceed to explore the varieties of Indian thought with an examination of the philosophical perspectives of the six “mainstream” schools (darsana) of Hindu thought and their interaction
with the diverse forms of Buddhist philosophy in ancient India. The topics for discussion will cover a range of epistemological and metaphysical issues of importance to these traditions; for example, the nature of the self, the relationship of consciousness and matter, creation, the nature and role of yoga, philosophical conceptions of the divine, and the status of the external world. [3]

**REL 3400. Social Ethics.** Focuses on an examination of religious and philosophical traditions that give rise to understandings of justice, duty, rights, and community. Attention paid to how these traditions inform moral judgments and shape the responses of moral communities. Particular examples, such as abortion, poverty, and racism employed to show how different moral traditions issue in social analysis and provide backing for normative moral judgments. [3]

**REL 3402. Ethical Issues in the Women’s Movement.** An examination of some of the central issues concerning women’s status in present-day society through a sympathetic, yet critical, reading of key feminist texts. Authors examined include Brownmiller, Daly, Beauvoir, Friedan, Greer, and Jaggar. [3] G. Welch.

**REL 3404. The Nature of Evil.** Human evil as expressed in the Shoah, religious fundamentalism, and ethnic cleansing. Theological, philosophical, biological, and literary texts. Evil transformed by scientific inquiry since 1600.

**REL 3405. Suffering, Politics, and Liberation.** Close reading of biographical and theological texts to explore the practical role religious faith plays in people’s experiences and responses to suffering caused by systemic injustice in societies. Primarily focused on Christianity in North and South America and Europe, along with examples of indigenous American religion and Islam, study includes perspectives of women and men of a variety of races.

**REL 3411. Religion and War in An Age of Terror.** Looking at both Christian and Islamic political thought, this course will wrestle with questions such as: When, if ever, is it appropriate to go to war? How has the emergence of “terrorism” as a form of war challenged traditional just war and pacifist theories? Are there ways in which religion and violence are inherently connected? How have religion and war been linked historically? In what ways do religious worldviews challenge or complement contemporary efforts at peacemaking? [3] Snarr.

**REL 3412. Christian Social Ethics.** This course is a critique of selected readings from contemporary Christian social ethical perspectives. We will employ historical and ethical analyses of case studies in order to gain some orientation to doing ethical reasoning on current perennial social issues and pursue reading in the literature of the field. The fundamental problems guiding our inquiry will be: (1) the way in which each account interprets morality as the relation between justice and good; (2) the social theoretical assumptions and views that make each of these accounts intelligible and help explain their differences, this will include special attention to the relevant intellectual and social history of each issue and its public advocates; and (3) the theological warrants for how a just society may reside in religious and secular communities of moral discourse.

**REL 3413. Ritual and Religious Experience.** Four themes that appear in classical and contemporary literature in the social sciences: religion, religious experience, ritual, and symbol. [3]

**REL 3414. Women’s Bodies, Politics and Policy Making.** In this course, students will be active participants in exploring the many dimensions of politics in the United States and abroad concerning how women have organized to subvert the oppression of women’s bodies in an effort to have a greater role in politics and the skills women need to fully participate in politics and policymaking. Students explore how politics and government, morality and religion, church and state affect women’s lives today, and examine the ways that women participate in the social and religious political process in order to influence the course of public policy. Readings and class discussion on the intersection of race/ethnicity and gender/sexuality, work/class and ability/aesthetics in policies are central to the theoretical perspectives that provide the foundation of this course.

**REL 3415. Feminist Theological Ethics.** Using resources from feminist traditions (womanist, mujerista, Asian, white), the course focuses on some major methodological, theoretical, and policy issues in feminist theological ethics. After tracing the historical development of the field of feminist theological/social ethics, we will analyze how feminists choose/use theological resources, the impact of varying theoretical frameworks on feminist analysis, major policy foci of feminists, and whether/how to stay with a “patriarchal” religious tradition. Readings from Christian, post-Christian, pagan, Islamic feminist. [3] Snarr.

**REL 3417. Tolerance, Identity, and Diversity in Modern Society.** This course will introduce students to modern political theory through concrete questions of religious tolerance, identity, and diversity. Readings will combine classic texts in early modern political thought (e.g., Hobbes, Locke) with significant contemporary works (e.g. K. A. Appiah, C. Taylor, U. Narayan, W. Cavanaugh), and case studies (e.g., John Brown and Theo van Gogh). At every point the theological perspectives implicit and explicit in the readings and cases will be given special attention. The course will also attend to the limits and paradoxes built into each of its key terms and to practical, political, and theological resources for working through and living with them. [3] Staff.

**REL 3419. Twentieth-Century North Atlantic Ethics.** An examination of figures and movements that influenced the discourse on religious ethics in both Europe and North America. Special attention to representatives of History of Religions School (Trotzsch, Ott); logical positivism, political theology (Moltmann, Metz, Habermas); neo-orthodox and existential theologies (Brunner, Barth, Buber, Reinhold Niebuhr); as well as ethics influenced by Wittgenstein. [3] Anderson.

**REL 3422. African American Political Theology.** Examination of the writings, speeches, and other cultural products (literature, films, music) of African Americans in their attempts to give prophetic expression to the politics of race, gender, and class in the North American context. The politics of abolition and reconstruction, the politics of race, and the new cultural politics of difference approached theologically, historically, and critically. [3] Anderson.

**REL 3426. Ecology and Ethics.** In this seminar we will explore relations among worldviews (theology), life on the planet (ecology), and what we ought to do about caring for the Earth and one another (ethics). We will read from the work of Sallie McFague, Rosemary Radford Ruether, Thomas Berry, various writers from Christian evangelical traditions and some from non-Christian sources as well.

**REL 3427. Race, Sexuality, Class, and Inequality.** This seminar is considered practical applications for religious leaders.

**REL 3428. Womanist Literature.** This seminar examines the Black woman’s literary tradition as a repository for doing constructive ethics. Attention will be given to how Black women of various periods, cultures, and literary traditions have brought distinctive imaginative and critical perspectives to bear on “the sacred.” In addition to addressing the complicated presence of religious themes, biblical references, and theological issues in these texts, literary and religious methods of “reading” and “writing” will be employed by comparing constructive and hermeneutical approaches among both literary writers and womanist ethicists.

**REL 3452. Seminar in Medical Ethics.** Explores a variety of topics and problems in Medical Ethics. Topics may include: Ethics, Law and Medicine, Health Care Delivery, Euthanasia and end of life decisions, Life before Birth, Issues in Reproductive Technologies, and Genetics and Ethics. [3]

**REL 3463. Women’s Bodies, Global Issues, and Religious Ethics.**

**REL 3464. Seminar: Healthcare Ethics—Theory and Practice.** This seminar examines contemporary healthcare ethics in the U.S. and the disciplinary perspectives that inform this field. Attention is given to the political and cultural forces that have shaped the chief ethical problems in healthcare.
and to the philosophical, religious and social scientific tools used to address them. A major aim of the seminar is to gain critical purchase on these tools, and to assess their uses and limits. We will explore a range of practical issues, probing the ways these concerns shape professional and public life beyond their immediate sphere of occurrence. This seminar serves as a gateway for additional work in the field. Full Year: Fall and Spring, 3 credit hours each semester; each semester employs different texts and can be taken independently.

REL 3465. Healthcare Ethics: Theory & Practice. This seminar examines contemporary healthcare ethics in the U.S. and the disciplinary perspectives that inform this field. Attention is given to the political and cultural forces that have shaped the critical ethical problems in healthcare and to the philosophical, religious and social scientific tools used to address them. A major aim of the seminar is to gain critical purchase on these tools, and to assess their uses and limits. We will explore a range of practical issues, probing the ways these concerns shape professional and public life beyond their immediate sphere of occurrence. This seminar serves as a gateway for additional work in the field. [3]

REL 3467. Ethics and Feminism. Ethics and Feminism. Implications of gender theory for understanding the Judeo-Christian moral traditions. Topics include the role of the moral subject, the social construction of gender, patriarchal consciousness, the abuse of women, black feminism, motherhood, and feminist ecology. [3]

REL 3476. Developing Grounded Theories of Preaching and Worship. Most, if not all, theories of preaching and worship are logically deduced and based primarily on philosophical, theological, personal, or tradition assumptions. But what if theories were sought through the careful phenomenological, comparative, and theological analysis of a sampling of actual practices of preaching and worship? In this course, students will learn to investigate such practices with an eye to the development of grounded theories of preaching and worship. Methods of qualitative research taught in this course may be applicable to other fields of theological inquiry as well. This course will meet the requirement for Seminar I for doctoral students in Homiletics and Liturgics. [3] McClure.

REL 3500. Religion and Culture. This course will explore the critical intersection between religion and culture in light of their relevance to past and present societies. We will examine a number of exemplary works which draw upon both historical and ethnographic approaches to the study of religion and culture. [3] Thomas.

REL 3501. Judaism in New Testament Times. The varieties of Judaism that emerged from 200 B.C.E. to approximately 200 C.E. Discussions of the Maccabees, the politics and religion of the Hasmonene dynasty, the Dead Sea Scroll community at Qumran, the Sadducees, Pharisees and Essenes, Philo, the early church and early rabbinic Judaism all placed in their Hellenistic and Roman contexts. Major themes in the development of Messianism and Apocalypticism. [3]

REL 3502. Judaism and Modernity. This course undertakes a historical and cultural analysis of the dilemmas Jewish Emancipation presented to both Jews and non-Jews in Europe, pre-eminently in Central Europe. By examining representations of Jews in a variety of popular and elite, political and philosophic, scientific and literary texts (including films) this course traces how antisemitism became entangled in the problems of gender, sexual, racial (ethnic), class, and self identity. The course has two goals. First, it seeks to explore the pervasiveness of antisemitic discourse in nineteenth- and twentieth-century European culture. Second it analyzes the implications upon Jewish identity of the double bind of modern Jewish existence before the Shoah: The European society into which many Jews sought admission demanded complete assimilation of the dominant culture, even to the point of obliterating any traces of Jewishness or Judaism; yet, often accompanying the demand was the assumption that Jews were constitutionally incapable of eliminating their difference. To fulfill these goals this course undertakes a series of close readings of primary texts supplemented by contextual histories. [3] Geller.

REL 3503. The Jewish Heritage. A survey of Jewish history and literature for a better understanding of Jesus’ Jewish roots and its important foundation of both Christianity and Islam. Sponsored by the Jewish Chautauqua Society. [3]

REL 3505. Jewish Ethics. By tracing environmental issues through the Bible, Talmud, medieval codes and mystical texts, we will analyze how contemporary Jewish environmentalists are using these traditional sources to further their own agendas. The course will be two-pronged: (1) understanding the primary genres of Jewish law and ethics as well as the mechanisms of Jewish legal development, and (2) analyzing the specific issues involved in Judaism’s complicated relationship to the environment. [3]

REL 3507. Jewish Theories of Religion. Critical analysis and discussion of modern Jewish constructions of religion: politically, symbolically, ethically, normatively, and aesthetically. Selected readings from Cohen, Buber, Rosenzweig, Kaplan, and social philosophers such as Simmel and Habermas on the function, nature, and meaning of religion in secular culture.

REL 3509. Introduction to the History and Critical Theories of Religion. Overview of the major thinkers and critical writings that have defined the scientific and critical study of religion. Not available for graduate credit. [3] Lowe.

REL 3510. Jewish/Xian Relations. Jewish/Xian Relations

REL 3511. Mythologies and Epics of South Asia. Classical Hindu and Buddhist mythologies of South Asia; Sanskrit Mahabharata and Ramayana epics; regional adaptations of mythical themes in vernacular languages; Buddhist and Islamic narratives of romance and chronicle; interpretive and performative strategies, orality, literacy, and modes of visual representation; political deployment of mythic tropes. [3]

REL 3517. Mysticism in Islam. A survey of the origins and development of Islamic mysticism, the rise of asceticism, the development of the Sufi orders, the gradual systematization of Sufi teachings, and modern forms of Sufism. The spread of Islamic mysticism was primarily due to the teachings of great thinkers such as Ibn Arabi, Rabi’a, al-Hallaj, Rumi, al-Ghazali, and others. No prior knowledge of Islam is required. [3] McGregor.

REL 3518. The Qur’an and Its Interpreters. This course will focus upon the Qur’an and the Islamic tradition of interpretation through a critical examination of the treatment of the biblical prophets, Jesus, and Satan. Interpretations will be drawn from the earliest period to the modern era. Rationalist, dogmatic, Shi‘i, and mystical schools of interpretation will be discussed. [3] McGregor.

REL 3519. Foundations in Hindu Traditions: Ritual and Text. The course traces the ongoing experiments of ritual processes which sought to resolve or ameliorate the inescapable migratory effect of simple human action (karma). Over the last several thousand years these experiments have followed four fundamentally different trajectories that provide us with a broad historical frame: the sacrifice/yajina of the Vedic period, meditation/ yoga, devotion/bhakati, and tantra/transgressive practices. Students will examine translations of the foundational texts that justify each of these four alternatives, pairing those with the persistence of material culture, from the sites used for consecrating kings, temple construction and iconography, domestic organization and rites of passage to sacred geography that becomes the object of pilgrimage. At the completion of the class, the student should have the conceptual vocabulary and analytical tools necessary to interpret intelligently any manifestation of the Hindu traditions they may encounter, from the ancient to the contemporary. Stewart.

REL 3520. Asian Conceptions of Wisdom, Liberation, and Enlightenment. Philosophical conceptions and practices as found in classical works, including the Bhagavad Gita, the Confucian Analects, the Tao Te Ching,
and Buddhist texts that have functioned as religious life-guides in India, China, and Japan for thousands of years.

REL 3523. Sacred Space in the Tibetan World. How is sacred space created, mediated, and reproduced in the greater Tibetan world? To investigate this question, we proceed through loci of increasing scale, from religious icons and bodies to built structures to sacred geographies. In the process, we analyze how sacred space is formed and affirmed through narrative, ritual, cosmology, and interaction with natural environments. We will attend to interactions between Buddhist, Bon, and local religious traditions, as well as to continuities and changes from premodern to modern periods. Our case studies will extend beyond the current political borders of Tibet to include ethnically Tibetan communities in India and Nepal, historically significant sites in China and Bhutan, and the circulation of Tibetan objects and bodies in America and worldwide.

REL 3524. The Holocaust: Its Meanings and Implications. This course examines the systematic destruction of European Jewry and other groups during World War II, its background, and its aftermath. It addresses the attempts by victims, bystanders, perpetrators, and their descendants and we are all their descendants—to create meaningful narratives about an event that appears to lack discernible meaning. To that end it focuses upon historical accounts, case studies, memoirs, fiction, and theology and such issues as history, memory, witness, conscience, language, evil, and otherwise that they raise. Particular emphasis is upon the many roles of film in both the Third Reich and the postwar world. National Socialism employed films to mobilize support for its rule and to inculcate its racial-eugenic worldview. In the wake of the Holocaust, film has been employed for other purposes: to document, to bear witness, to mitigate or reduce its import, to provide meaning, to unmask attempts to mystify or suppress the past, to explore relationships between those events and contemporary societies, to say the unsayable, to examine the life of the traumatized victim. No prior study is presupposed of these events that have come to be known as the Holocaust. [3] Geller.

REL 3525. History of the Study of Religion. Since the emergence of the “fetish” in the contact zone of European-African encounter, no other notion in the history of the study of religion has been appropriated by so many secular discourses. Understanding fetishism as delineating a discursive space in which the often misrecognized attempt is made to mediate religious, cultural, ethnic/racial, sexual, gender, and/or phenomenological difference(s) by means of material objects (or persons), this course will follow how the term (together with its cool accessories) has traversed from mercantile encounter to rationalist anthropology to philosophy to positivist sociology to political economy to anthropology to sexology to psychoanalysis to aesthetics to postcolonial analysis. [3] Mr. Geller.

REL 3530. Religion and Film.

REL 3531. Religious Narrative and the Self. This course addresses a number of issues raised by autobiographical narrative in general, and by religious autobiography in particular. These include motivations (personal salvation, testimony or witness, therapy, to mobilize believers, to proselytize); relationships among self, family, God, and religious tradition; relationships among life, death, and afterlife; life before and after conversion; role of memory and narrative; multiple selves (remembered, remembering, writing, and presupposed, as well as the recovered or false); mind and body; oral vs. written; fact vs. truth; privacy vs. publicity; ego vs. self vs. non-self; cultural, ethnic, gender, sexual, and religious differences; genre (confession, diary, memoir, novel, biography); as well as fundamental questions about the nature of autobiography: is it the narrative of how a self endeavors to know itself or, as understood from one contemporary critical perspective, by which a self constructs its own identity or, as understood by another contemporary perspective, how a narrative generates a fictitious self? In addition to the classic exemplars of the genre like Augustine and Rousseau, emphasis will be placed on the autobiographies of those for whom the dominant society has denied a self (in particular, African American and Jewish European), as well as on the demands that an event like the Holocaust makes on the autobiographical and religious consciousness of those who have as it were survived their own deaths. [3] Geller.

REL 3534. Freud and Jewish Identity. This course examines selected writings of Sigmund Freud within the context of contemporary Viennese Jewish life and antisemitic discourses. Through an analysis of Freud’s rhetoric-figures, topoi, exemplars, emphases, omissions, anomalies–it explores how psychoanalytic theory developed in response to the traumas of Jewish assimilation and of antisemitic repudiation—whether by acting them out or working through them. In particular it examines the intersections of notions of gender, sexuality, and race/ethnicity in Freud’s work where those responses especially emerge. Freud’s psychoanalytic writings will be supplemented by his letters as well as by material on the social and cultural history of his times. [2] Geller.

REL 3537. The Holocaust: Representation and Reflection. Explores fundamental questions about the nature of history and representation, the nature of the human and the divine, that the Holocaust raises. [3] Geller.

REL 3538. The Black Church in America. The development of the black church from the late 18th century to present. Major attention to black denominationalism, church leadership, and the involvement of the church in the social, cultural, intellectual, political, and economic areas of African American life. [3]

REL 3540. Reel Black Faith: Race, Religion, and Film. This course is an examination of the religious and spiritual dimensions of films selected from across the African diaspora through from the silent film era to contemporary cinema. The emphasis of this course will focus on race, gender, class, sexuality, nationality, and other aspects of social location juxtaposed with theological concepts, spiritual concerns, religious imagery, and moral values to better understand the interplay of cinematic representation of Black religious experience.

REL 3541. The Religious Thought of Howard Thurman. This course will explore the prophetic ministry of Howard Thurman (1900-1981) as a minister, scholar, poet, theologian, pastor, and mystic by focusing on key themes in Thurman’s thought through an interrogation of his intellectual foundations, spiritual formation, his particular vision of justice-making, mysticism, theological praxis, homiletics, liturgy, and doxology. There will be critical insights into Thurman’s intellectual and spiritual growth as well as offering a window onto the landscape of the defining issues, events, movements, institutions, and individuals that shaped his sacred worldview.

REL 3545. Cultural Significations and Black Religion. This course focuses on the origins and varieties of religious experience, scriptural interpretations, ritual practices, mythic narratives, symbolic representations, cultural artifacts, vernacular folk traditions, sociopolitical ideologies, and power dynamics that historically have been subsumed under the heavy-laden concept of “Black religion.” Utilizing the work of pioneering historian of religion Charles H. Long, considerable attention will be paid to the process of signifyng as a system of general theorizing about the ways in which human beings communicate, seek, and negotiate meaning and social power in both the sacred and secular spheres. Through an interdisciplinary examination of sources drawn from across the African diaspora, this course will emphasize the study of religion in the modern world as both a mode of orientation as well as a process of meaning-making, but with the description and critical analysis of Black religious phenomena—the complex matrix of sights, sounds, movements, and other sensory stimuli—in contradistinction to the invisibility and invalidation imposed upon subjugated peoples around the world by normative Western discourses. [3]

REL 3550. Materialist Biblical Criticism. Focuses on the question of political economy and the resultant constructions and relations of social class, an angle of vision closely associated with the liberation criticism of the 1970s and beyond but also with roots in earlier marxist approaches to
the Bible; the course deals with the juncture between economic studies and biblical criticism, both with regard to the texts and contexts of early Christianity and the interpretations/interpreters of such texts and contexts in modernity and postmodernity; course will consider a study of political economy, approaches to the political economy of the Roman Empire, and the trajectory of materialist criticism. [3] Segovia.

REL 3600. Practical Theology. This seminar explores the development of practical theology as an academic discipline, focusing primarily on its revitalization in the last half-century, current debates, and future potential. [3]

REL 3601. The Study of Religion. Required of entering Ph.D. students in their first semester. Discussion of such topics as the methods, diversities, connections, purposes, and contexts of religious studies. [3]

REL 3602. Theories and Practices in Critical Pedagogy; Identity Politics in Teaching Theology and Religion. This doctoral seminar explores critical, liberative and emancipatory pedagogies, and interrogates their applicability for teaching theological education and religious studies. Particular attention will be devoted to critical theories grounded in race, gender, and class analysis, as well as to the promise and problems posed by doing critical pedagogy on the margins of academe and religious life. This seminar will also survey inter/multi/dis,cri, bly pedagogical approaches in order to demonstrate the manner in which subject matters impact both knowledge production and concrete, everyday life experience. Finally, students will begin working on intellectual design and course development skills in an effort to articulate their own signature pedagogy.

REL 3619. Qualitative Research. This doctoral seminar introduces qualitative research methods geared to practical theological methodologies. Students will encounter a range of research methods and exercises drawn from various qualitative designs, but often regarded as shared practices among respective disciplines. This course weaves the philosophical and practical bases of said designs and their theories to construct or study research questions. Students will develop skills in conceptualizing and conducting a qualitative research project: determining a research question and research design, accessing a research site, collecting and analyzing data, writing up the findings, and weighing the challenges of theory building. Students will also learn about a range of ethical considerations involved in conducting research.

REL 3620. Practicum in the Teaching of Religion. Preparation for the teaching of courses in religious or theological studies through discussion of case studies, issues, and problems. Required for all graduate students in religion during the first semester in which they are serving as teaching assistants. Can be repeated. Not open to others except by permission of instructor. [0] Staff.

REL 3690. Master's Thesis Research. [0]

REL 3756. Personal and Organizational Trans/Formation. The church and the world are in great need of participants who are clear on their own missions and callings and who can lean into their gifts and passions to address the needs of organizations, issues, and other persons. This course will offer students opportunities for understanding themselves better and how to leverage what they bring for the good of the world-and how to “participate in the life of God” in transformative ways. Students will explore the development of values and vocation, human development, group processes, and organizational change. [3]

REL 3759. Pastoral Theology: History and Horizons. It is important for pastoral and practical theologians to situate themselves historically, theoretically, and theologically in the field. This course will provide an overview of the history of pastoral theology from Augustine to the present, and ask: What is the operative theological anthropology? How is illness/healing understood? What practices were designed to address the “ills”? Who were the detractors of the theories and practices, both internal and external? Where is the field now, and where does it appear to be headed? Answering these questions will help students broaden their understanding of theories and issues in the field and to situate themselves in the conversation. [3]

REL 3790. Non-Candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

REL 3800. The Dead Sea Scrolls. The materials from Qumran and other locations in the Judean Desert and Jordan Valley, with reference to their contributions to the understanding of Judaism in the period 200 B.C.E. to 100 C.E. and of earliest Christianity. Open to graduate and advanced Divinity students. Prerequisite: Hebrew. [3]

REL 3801. The Megillot. Five scrolls, each a different genre of literature, are customarily read in synagogues throughout the year: Esther (Purim), Song of Songs (Passover), Ruth (Shavuot), Ecclesiastes (Sukkot), and Lamentations (Ninth of Av). We sample them and discuss them within the context of ancient Near Eastern literature. For students with at least one year of Hebrew. [3] Sasson.

REL 3805. Book of Qoheleth. Israelite skepticism, with emphasis on the literary form, thematic coherence, and religious viewpoint of Job and Qoheleth, interpreted within the broad spectrum of Israelite wisdom and consideration of Greek influence. [3] Knight.

REL 3806. Empire and Canon. Arguably, two eras of imperial domination, the Persian and Hellenistic periods, are the most literarily active in the formation of the Hebrew Bible. This advanced-level seminar looks at the Persian imperial context as the social world from which much of the Hebrew Bible emerged. Its seminal question, “How much did Persian imperial policy shape the writings of the early Second Temple priesthood?”, will guide both the discussions and the readings. With this in mind, the course examines struggles between the priesthood, imperial authorities, and the Jerusalem populace and raises questions about specific biblical texts which may provide insights into these relationships. [3] Mr. Marbury.

REL 3808. Ancient Goddesses. This course will examine how ancient cultures (Mesopotamia, Egypt, Ancient Israel, and beyond) conceived of the feminine divine, primarily through a survey of the available literature (myths, hymns, and prayers) and iconographic evidence (statues, plaques, figurines). The roles of specific goddesses, their spheres of influence, and their place in the various pantheons will be taken into account, while also paying attention to cultic practices and religious syncretism across the cultures.

REL 3811. Modern Interpreters of Ancient Israel. Characteristic approaches to the history and religion of ancient Israel, as seen in selected writings by prominent scholars since the Enlightenment. Attention to the presuppositions of each scholar and to the view of Israel afforded in each study. Reading ability in German desired. Consent of instructor needed for non-Ph.D. students. [3] Knight.

REL 3813. History of Ancient Israel. Examination of the major areas of debate in the reconstruction of the history of ancient Israel and analysis of the important extra-biblical sources that have contributed to the scholarship on ancient Israel's history. The course will also address the roles that ancient Israel's Near Eastern neighbors played in the development of ancient Israel's history. [3] Knight.

REL 3814. Intermediate Biblical Hebrew. Designed for students who have completed an elementary course in Hebrew and need more work in the areas of grammar, syntax, and reading of Hebrew texts. [3] Knight.

REL 3815. Ugaritic. Elements of Ugaritic grammar, with reading in selected texts. Prerequisite: Elementary Biblical Hebrew. [3]

REL 3818. Aramaic. Vocabulary, forms, and syntax of Aramaic through reading of the Aramaic sections of Daniel and Ezra and of specimens of material from the Elephantine papyri, the Targums, etc. Prerequisite: 3816. [3]

REL 3820. West Semitic Inscriptions. Participants in this course will read from Hebrew, Aramaic, Phoenician, and Moabite texts, and emphasis will be placed upon relevant grammatical analyses. Prior to enrolling in this language course, students must demonstrate a proficient knowledge of Hebrew. [3]

REL 3821. Syriac. Vocabulary, forms, and syntax of classical Syriac, with readings from the Peshitta, Ephraem Syrus, etc. [3]

REL 3822. The Amarna Period. The Amarna Period (sixteenth-twelfth century B.C.E.) has been a focus of research and speculation ever since excavations at the palaces and temples of Anatolia, Canaan, Assyria, and Babylon produced rich archives that illuminated in remarkable detail this age, famous for its theological speculation. There were powerful personalities (Thothmes III, Suppiluliumas I, Ramses II, Aziru,尼pcmaddu) who sponsored ferocious classes of empires and cultures but also led powerful drives toward peacemaking. There were enormous commercial undertakings, incredible artistic achievements, and vast spiritual thirst (Akhnaten, Moses). Above all, there were wonderful documents-historical, theological, mythological, epistolary, legal, and belletristic-which will be examined in this course. [3] Sasson.

REL 3823. Literature of the Ancient Near East. Readings in the literature from Egypt, Canaan, and Mesopotamia, with special emphasis on texts relating to the culture, literature, and thought of ancient Israel. [3] Sasson.

REL 3824. Jewish Life in Persian Egypt. The Aramaic documents from the island of Elephantine offer a unique portrayal of the life of a Jewish community in fifth-century Egypt BCE. In this seminar, students will learn to read the papyri and ostraca in the original language and script, and explore the historical, linguistic, and cultural implications of the documents in relation to other texts of the Hebrew Bible. [3] Sasson.

REL 3825. The Book of Deuteronomy. An exegesis class on the Book of Deuteronomy, concentrating on defining the book's major themes and purposes as well as examining the book's poetry. [3]

REL 3827. Hellenistic Jewish Literature. In the Second Temple period, Israel's ancient library of sacred texts was becoming the Bible. This period witnessed a proliferation of enormously versatile literary texts with religious themes written in the dominant languages of the time: Aramaic, Hebrew, and Greek. Those works that are left out the Hebrew Bible, but became a part of the canonical literature of the early Christian churches, we call here Apocrypha. Pseudepigrapha, conversely, is a vague term for the ancient Jewish national literature that grew around biblical figures and events but was left out of the ancient scriptural traditions. In this course we will examine most of the Apocrypha and a selection of the Pseudepigrapha, in English, and compare them with the literature of a similar genre and period, such as testaments (Testament of Abraham, The Testament of 12 Patriarchs), romances (Joseph and Aseneth), tales of adventure (Books of Tobit, Judith, Esther), letters, apocalyptic literature, historiographies (1-2 Maccabees, Josephus), and philosophical essays (Philo). In these numerous readings, we will also look at the methods of interpretation: midrash and allegory. The canonical issues, the apocalyptic and ecclesiastical authority of the Apocrypha and Pseudepigrapha, and their use and function in the confessional and academic setting will receive due attention. [3]

REL 3828. Book of Daniel. An in-depth analysis of the Book of Daniel, with particular attention to the text's historical background and literary form. The place of the Book of Daniel within Prophetic and Apocalyptic literature will also be explored. [3]

REL 3832. Akkadian II. Reading in selected historical, mythical, legal, and epistolary texts. Consent of the instructor required. [3] Sasson.

REL 3836. Structural Exegesis of the New Testament. Structural exegesis of various texts of the New Testament using methods derived from anthropological literary criticism (Greimas, Barthes) and from structural anthropology (Lévi-Strauss). Prerequisite: Greek. [3]

REL 3839. New Testament Studies II: Ideological & Cultural Criticisms. This course constitutes the second part of a two-part introduction to New Testament Studies as presently conceived and practiced. It is an advanced course, presupposing previous and substantial work in the field and designed primarily for students in the Graduate Department of Religion. The course is also open to advanced and students in either the M.Div. or the M.T.S. degree program, although with permission of the instructor required. Contemporary biblical criticism may be approached in terms of five interpretive paradigms, each with its own distinctive though complex mode of discourse: historical criticism; literary criticism; sociocultural criticism; ideological criticism; cultural criticism. This second part will examine the role and future of biblical criticism in general as well as the methods and theories at work in the paradigms of ideological and cultural criticism. Its goal is to provide a comprehensive, critical picture of the discipline in terms of differential formations and relations of power as well as of different traditions of reading. The course will encompass three major components. First, a general introduction to the history of the discipline from the 1970s through today, with a focus on the questions raised by ideological and cultural criticisms. Second, sustained analysis of various ideological approaches (feminist and materialist criticisms, ethnic-racial and queer criticisms, postcolonial criticism, disability and ecological criticism) as well as focused consideration of cultural criticism, problematics, trajectories, critiques, interdisciplinary conversations. Finally, a brief view at both the role and the future of biblical criticism. [3] Knight.

REL 3841. Seminar in New Testament. [Variable credit]

REL 3843. Hellenistic Culture and Literature. Primary and secondary texts, presenting aspects of the history, literature, and religious traditions of the Hellenistic period (ca. 4th century B.C.E. to 4th century C.E.). Knowledge of Greek required. [3]
REL 3845. Global Interpretations of Christian Scriptures. This course will compare the interpretations of biblical texts by Christians in Africa, Asia, Latin America, and Oceania—where at present two-thirds of the readers of the Bible are with those by Orthodox Christians in Eastern Europe and the Middle East, and by Catholic and Protestant Christians in Western Europe and North America.

REL 3852. Slave Thought. Students will examine the sources and content of African American slave thought by exploring the themes of God, Jesus Christ, history, the human condition, death and the afterlife, salvation, morality, ethics, Scriptures, and the role of religion in society. Attention will be directed to the sacred world of African American slaves as revealed in narratives, tales, songs, sermons, Works Progress Administration interviews, myths, aphorisms, proverbs, and magical folk beliefs. Students in the M.Div. degree program may apply this course to the requirement in African American, race, and class studies. [3]

REL 3853. Seminar: American Revivals. This course examines selected revivals in American Christianity from the colonial period through the twentieth century. We will focus on the varieties of revival practice, including the ways in which revivals have interacted with views of ministerial authority, doctrine, the body in worship, social reform, and church architecture. Primary and secondary resources will include texts and audio-visual representations of revival experience. [3]

REL 3854. The Theology of Augustine. Development of Augustine’s thought, seen against the background of philosophical currents, biblical interpretation, social and political events, and doctrinal controversies in his time. All readings available in English translation. [3]

REL 3855. Thomas Aquinas. Systematic investigation of Aquinas’ major theological and philosophical assertions by considering his conception of the two disciplines and their relationships. All readings will be available in English translations. [3] DeHart.

REL 3859. Aquinas, Rahner, and Metz. The study of one trajectory in 20th century Roman Catholic thought beginning with the rise of transcendent Thomism, investigating closely the method and content of Karl Rahner, followed by J. B. Metz’s critique of transcendent-idealism in constructing a political theology of the subject. [3]

REL 3880. Special Topics in Religion.

REL 3881. Historiography and Ancient Israel: Chronicles. Examines issues of historiography as they relate to Ancient Israel with a particular focus on the Book of Chronicles. Focuses on the content of Chronicles as well as sociohistorical contexts and methodological issues. Ph.D. students will do an extra session with the Hebrew text. [3]

REL 3882. African American Biblical Hermeneutics. Surveys the field of discourse in African American biblical scholarship from its beginnings through the twenty-first century; students will analyze the work of the most prominent hermeneutics; discussions will emphasize the social and ideological currents that have contributed to the development of African American biblical hermeneutics as resistance discourse. [3] Marbury.

REL 3883. Ancient Goddesses. Ancient concepts of the feminine divine in literature and iconographic evidence. Specific goddesses, their spheres of influence, and their place in the various pantheons. Cultic practices and religious syncretism across cultures, including Mesopotamia, Egypt, and Ancient Israel. [3]

REL 3908. Seminar in Systematic Theology.

REL 3909. Theories of Race, Gender, Sexuality, and Disability. Recently many subfields of religious studies, including theology, have taken up theories of race, gender, and sexuality generated by scholars in the humanities and social sciences. This course will cover important texts in the theoretical literature with an eye toward their impact for constructive work in theology and other subfields. In addition to critical race theory, gender theory, and queer theory, we also will explore the emerging field of disability theory. [3] Armour.

REL 3912. Mystical Literature from Plotinus to John of the Cross. Traces the various inflections of what emerges as a strikingly unified tradition of discourse about the experience of union, union mystics, across the Middle Ages from Plotinus to John of the Cross. Particular emphasis placed on apophasis, or the failure of language, prior to this experience. [3] Franke.

REL 3924. Becoming Divine: Eastern Orthodox Theology and Spirituality. This course will engage Eastern Orthodox Theology and spirituality and ask what resources this tradition has to offer for contemporary constructive Christian theology and spirituality. The contributions of Athanasius, Nyssa, Pseudo-Dionysius, Maximus, and Palamas. This course will also engage contemporary theologians who engage components of the Orthodox tradition like Vladimir Lossky and Jean-Luc Marion. [3]

REL 3951. Methods in Ethics. A survey of various methods, styles, and contexts under which moral philosophy has been developed and transmitted in Western thought. Topics treated are classical moral philosophy (Plato, Aristotle, Cicero), Christian sources (Augustine, Thomas Aquinas), modern philosophical ethics (Spinoza, Kant, Mill, and several twentieth century thinkers). [3] Anderson.

REL 3952. Ethics and Public Policy. Students in this course, which is cross-listed with Vanderbilt Law School’s curriculum, will explore the relationship between ethical principles and public policy decisions and analyze selected public policy issues within the framework developed in the students’ reflection on ethics and the public policy process. [3] D. Welch.

REL 3953. Seminar in Sociology of Religion. Religion is a constitutive feature of social life, always shaping and being shaped by its particular social context. Indeed, the very content and form of religion itself is always and necessarily formed from the stuff of the socio-cultural world (language, symbols, ritual interactions, resources, organizations, norms, etc.). The sociology of religion has focused on this relationship of religion and its broader socio-cultural world, and has developed a particular set of preoccupations: secularization, modernization, myth and meaning-making, and the role of religion in social ordering, for example. In this course, we hope to examine and experiment with some of the core assumptions of the sociological study of religion. What does it mean to be religious? What is the relationship of religion and culture? Do we live in a secular society? How do we enact religious life? How is religion produced and re-produced? [3]

REL 3954. Methods in the Sociology of Religion. Explores the research methods employed in sociology: research design— including theory, hypothesis formation, and measurement; univariate and simple multivariate analyses. Qualitative methods also will be addressed, and ethical issues in human research will be examined. [3]

REL 3956. Philosophical Ethics in the Western Tradition. Major thinkers, movements, and issues in the Western philosophical tradition—e.g., the ethical and political thought of Aristotle and Immanuel Kant. [3] Anderson.

REL 3957. Seminar in Advanced Theological Ethics.

REL 3959. Moral Philosophy of Black Popular Culture.

REL 3961. Jewish Animals. Throughout the centuries verbal and visual images of animals (pigs, dogs, vermin, rodents, apes, etc.) have been used to debase and bestialize Jews. What then is going on when Jewish writers employ such animal figures in their narratives and poems? After examining the history of such anti-Jewish representations, this course will analyze the animal tales of, among others, Heinrich Heine, Franz Kafka, Gertrude Kolmar (Animal Dreams), H. Leivick (“The Wolf”), Bernard Malamud, Felix Salten (Bambi), Moacir Scliar (The Centaur in the Garden), Curt Siodmak (The Wolf Man), and Art Spiegelman. [3] Mr. Geller.

REL 3970. Reading Course in Religion, Psychology, and Culture. May be repeated. [1-3] Staff.

REL 3971. Reading Course in Pastoral Theology. May be repeated. [1-3] Staff.
Advanced capitalist societies. The popular emergence of spirituality as a contemporary mode of religiosity in promoting the well-being of children within and beyond the church. B. R. s. 

May be repeated. [0-12] Staff.

REL 3987. Reading Course in History and Critical Theories of Religion. May be repeated. [1-3] Staff.

REL 3986. Topics in Digital Humanities for Historians and Scholars of Religion. The course provides an introduction to the theory and methods of the digital humanities from the disciplinary perspectives of history and religious studies. This course is designed for graduate students of history, religion, historical theology or classics who would like to acquire research skills in the techniques of digital text editing and analysis. Students will learn the fundamentals of digital text editing and the computational analysis of digital corpora. Students will engage with theoretical questions concerning the nature of texts and the challenges of representing the past through new media. By the conclusion of the course, students will have built a working prototype of a digital database specific to their research needs. [3] Michelson.

REL 3987. Readings in Religion/Gender/Sexuality. May be repeated. [1-3] Staff.

REL 3988. Reading Course in Modern European Church History. May be repeated. [1-3] Staff.

REL 3991. Reading Course in Reformation History. [1-3] Staff.

Religious Studies

RLST 203. Jewish Theories of Religion. Critical analysis and discussion of modern Jewish constructions of religion: politically, symbolically, ethically, normatively, and aesthetically. Selected readings from Cohen, Buber, Rosenzweig, Kaplan, and social philosophers such as Simmel and Habermas on the function, nature, and meaning of religion in secular culture. [3]

RLST 221. Ethics and Ecology. Relationships among humans, nature, and the sacred. Focus on understandings of our “dominion” over non-human nature. The role of religion in shaping attitudes and behaviors regarding the environment. Topics include eco-centered ethics, “creation care,” reliance on fossil fuels, and alternative sustainable scenarios. [3]

RLST 226. Ancient Goddesses. Ancient concepts of the feminine divine in literature and iconographic evidence. Specific goddesses, their spheres of influence, and their place in the various pantheons. Cuthu practices and religious syncretism across cultures, including Mesopotamia, Egypt, and Ancient Israel. Offered on a graded basis only. [3]

RLST 240. The Nature of Evil. Human evil as expressed in the Shoah, religious fundamentalism, and ethnic cleansing. Theological, philosophical, biological, and literary texts. Evil transformed by scientific inquiry since 1600. [3]

RLST 242. Slave Thought and Culture in the American South. The religious thought of African American slaves as expressed through folklore, literature, and art. Creative ideas about the cosmos, the supernatural, the transcendent spiritual reality, natural social reality, and the human condition. Offered on a graded basis only. [3]

RLST 247. Daoist Tradition. Historical and thematic survey of the Daoist tradition in China. Philosophical classics and religious scriptures, as well as social history are covered. Daoism today. [3]

RLST 252. Reformers of the Islamic Tradition. Historical survey of Muslim reformists. Religious responses to crises in the pre-modern debates over orthodoxy and heresy; modern (Western colonialism) and recent periods. [3]

RLST 253. East Asian Buddhism. East Asian Buddhist texts. Key Buddhist ideas, values, practices, and institutions. Chronological surveys of key developments in major historical periods. [3]

RLST 261. Islam in Africa. Social and cultural development of Islam across Africa from the eighth century to the present, as illuminated by historical, ethnographic, and literary sources. Interplay between Muslims and outside religious groups, jihads in pre-colonial Africa, and Islam during European colonization. Attention to Sub-Saharan Africa. [3]

RLST 266. Devotional Traditions of South Asia: Hindu, Muslim, Sikh. Mythology of Hindu pantheon and worship through devotion or bhakti. Techniques for inculcating devotion through meditation, temple rituals, and pilgrimage. Entry of Islam into South Asia, Shi’i and Sufi practices. Sikh traditions. Role of vernacular languages in creating local traditions. Hindu-Muslim interaction, syncretism, and shared sacred space. Challenges to orthodoxy. [3]
Graduate School / Courses

RLST 269. Sacred Space in the Tibetan World. Creation, mediation, and reproduction of sacred space from artifacts to built structures to geographies. Narrative, ritual, and cosmological aspects of Tibetan Buddhist, Bon, and local religious traditions. Cases include premodern to modern periods, and local to global contexts. [3]

RLST 270W. Buddhism and the State. Models relating Buddhism and the state in ancient and modern Asia. Kingship and spiritual leadership; sacred territory and national identity; legitimation theory and its alternatives; and religious responses to the modern state. Case studies from India, Nepal, Thailand, Burma, Tibet, Mongolia, China, and Japan. [3]

RLST 272. Religion, Ecology, and Power in Africa. The interrelationship between religion and ecology in Africa; the ways power relations in pre-colonial Africa through the present have determined human-Earth relations. Divine origin and development of the Earth and its peoples; influence on African social structure, ethnically-based occupations, and stewardship over the environment. [3]

RLST 275. Chinese Religions through Stories. Analysis of narratives from various religious traditions and genres within early and medieval China. The role of narrative in Chinese religious, cultural, and political life. Primary texts in English translation. Offered on a graded basis only. [3]

RLST 292. Advanced Seminar in Arabic. Analysis of style and forms. Poetry, novels, popular literature, and historical chronicles. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

RLST 293. Advanced Seminar in Islamic Tradition. Analysis of original Arabic texts, manuscript reading, and research methods. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

Responsible Conduct in Research

RCRG 303A. Responsible Conduct of Research. Responsible Conduct of Research: Lectures and small group discussions about responsible conduct of research including individual and group responsibilities, recording and use of data, intellectual property and technology transfer, ethical questions in and about research, societal responsibility of researchers, and Federal and institutional guidelines.

Russian

RUSS 221. Survey of Russian Literature in English Translation. Main currents, writers, and works of Russian literature. The nineteenth century: Pushkin, Lermontov, Gogol, Turgenev, Dostoevsky, and Tolstoy. [3]

RUSS 223. Composition and Conversation. Development of all language skills at the intermediate-advanced level. Reading of contemporary short stories. Prerequisite: 204. [3]

RUSS 224. Composition and Conversation. Continuation of 223. Development of all language skills at the intermediate-advanced level. Reading of contemporary short stories. Prerequisite: 204. [3]

RUSS 231. Jews in Russian Culture: Survival and Identity. A course on the history of Jewish contributions to Russian culture, including literature, the visual arts, theatre, and film. Questions of assimilation, the rise of Jewish national consciousness, and interest in Jewish heritage are discussed. No knowledge of Russian required. [3]

RUSS 232. The Evil Empire: Stalin’s Russia. Life in Stalin’s Russia as portrayed in memoirs, novels, stories, poetry, films, and music. No knowledge of Russian required. [3]

RUSS 234. The Russian Cinema. Socialist Realism of the 1930s to 1950s; masterpieces of the post-Stalin era in the 1960s and ‘70s; sex and violence of the Perestroika; new post-Soviet cinema. Films by such directors as Eisenstein, Pyyrev, Romm, Tarkovsky, Mikhalkov, and Sokurov are studied and discussed within the political context. No knowledge of Russian required. [3]

RUSS 238. Dostoevsky’s Major Novels: Philosophy and Aesthetics. Major prose works in historical and social context, including The Notes from the Underground and The Brothers Karamazov. Influence on twentieth-century philosophy. Critical responses from other writers and philosophers of the nineteenth and twentieth centuries. Taught in English with texts in English translation. [3]

RUSS 257. Advanced Composition and Conversation. Prerequisite: 224. [3]

RUSS 258. Advanced Composition and Conversation. Continuation of 257. Prerequisite: 224. [3]

RUSS 289a. Independent Readings. Designed for majors and qualified undergraduates. Projects are carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 6 credits over a four-semester period in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for four semesters of RUSS 289a and 289b]

RUSS 289b. Independent Readings. Designed for majors and qualified undergraduates. Projects are carried out under the supervision of a member of the department. All projects must be approved by the department. May be repeated for a total of 6 credits over a four-semester period in 289a and 289b combined if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3; maximum of 6 credits total for four semesters of RUSS 289a and 289b]

Second Language Studies

SLS 310. Foreign Language Learning and Teaching. (Also listed as Spanish 310, Portuguese 310, French 310, German 310) Principles and practices of teaching a second language with concentration on recent interactive and communicative models of foreign language instruction. Classroom observations, journal writing, development of materials, and a small action research project. [3]

SLS 312. Second Language Acquisition Theories and Research. (Also listed as French 312 and German 312) A review of current sociocultural and cognitive theories and research. [3]

SLS 395. Special Topics in Second Language Studies. Topics in applied linguistics including second language acquisition, curriculum design, and assessment. [3]

Sociology

SOC 204. Self, Society, and Social Change. Problems and prospects for individual participation in social change; volunteering, community service, and philanthropy; role of individuals and voluntary associations in social change. [3]

SOC 230. The Family. Study of the relationship of family structure to social organization. Comparative and historical approaches to the family. Recent changes in the American family. Courtship, marriage, marital adjustment, parenthood, and family dissolution in relation to contemporary American society. [3]

SOC 231. Criminology. The nature, distribution, causes, and control of crime with emphases on contemporary American society and a broad range of types of crime. [3]

SOC 232. Delinquency and Juvenile Justice. The nature, distribution, causes and control of juvenile delinquency and the operation of the juvenile justice system in contemporary American society. [3]

SOC 233. Deviant Behavior and Social Control. The social causes of, and societal reactions to, several types of deviant behavior (e.g., juvenile delinquency, crime, sex deviance, mental illness). Examines the probable consequences of suggested solutions to reduce different types of deviant behavior. [3]

SOC 235. Contemporary American Society. Shifts in the political, economic, and social structure of the United States; changes in technology, demography, and social mores. [3]

SOC 237. Society and Medicine. Cultural and social factors in the perception, definition, diagnosis, treatment, and distribution of disease. Doctor-patient relations; role of nurses and other health professions. Social consequences of hospitals, medical technology, medical specialization, and health insurance. [3]

SOC 240. Law and Society. Examines the relationship between the legal system and other institutions with illustrations drawn from both American and other societies. The actual operation of the legal system including lawyers, courts, and police is described. [3]

SOC 244. Politics, State, and Society. The relationship between state and society; the nature and distribution of power in democratic society; the social conditions necessary for democracy; social movements and protest in political change; and the politics of public policy making. Attention to political actions, definitions of citizenship, and political ideology. [3]

SOC 246. Sociology of Religion. Theories of the nature, function, and structure of religion. Religion in America, including fundamentalism, the Black Church, and cults. How religion changes and is changed by secular society. [3]

SOC 247. Human Behavior in Organizations. Organizations are treated as resources in the production and distribution of goods and services. Case analyses from the economy are reviewed to diagnose “organizational pathologies” and to understand reciprocal impacts among organizational structures, leaders, and citizens. [3]

SOC 248. Popular Culture Dynamics. Examination of theories and research that link culture and society. Consideration of the mass media arts with particular emphasis on popular music. Focus on creators, industry, and audiences. [3]

SOC 249. American Social Movements. The effect of key social movements on American society. Comparison of the organization and success of movements such as the American Revolution, Southern Secession, Populism, Woman’s Suffrage, and Civil Rights. [3]

SOC 250. Gender in Society. Theoretical approaches to gender relations with a focus on the contemporary U.S. Evolution of gender stereotypes, gender socialization over the life course, gender in social interactions, institutional sources of gender inequality, and intersections of gender with race, social class, and sexual identity. Topics include work, school, families, health, and intimate relationships. [3]

SOC 251. Women and Public Policy in America. A study of public policies as they affect women in contemporary American society. Issues considered include participation of women in the labor force; effects of employment patterns on the family; birth control, abortion, and health care policies; child care; participation of women in political processes; divorce, child support, and custody; affirmative action policies; present governmental remedies and proposed alternatives. [3]

SOC 254. Schools and Society: The Sociology of Education. How schools affect individuals and relate to institutions: the government, the economy, social classes, and families. How social attributes, including race and class, affect academic achievement. Controversies such as desegregation and intelligence testing. [3]

SOC 257. Gender, Sexuality, and the Body. The body is a physical marker of gender and sexuality. Biological reproduction is saturated with social meanings - shaping ideas about masculinity, femininity, the gender division of labor, and heterosexuality. In this course, we will look at the body as reflexive project and as the site of historical and ideological significance. We address race, ethnicity, physical abilities, and class in explaining variations in cultural ideals. [3]

SOC 279. Contemporary Mexican Society. Sociological understanding of contemporary Mexican society. Historical roots of the modern Mexican state. Economic, political, and social institutions operating in Mexico, formal and informal structures, and their consequences. [3]

SOC 294. Seminars in Selected Topics. May be repeated for a total of 6 credits if there is no duplication in topic. Students may enroll in more than one section of this course each semester; [3; maximum of 6 credits total for all semesters of SOC 294]

SOC 301. Classical Theory. Theoretical perspectives and theorists in the early history of sociology, focusing primarily on Durkheim, Marx, and Weber. [3]

SOC 310. Sociological Inquiry. Introduction to research methods, including theory construction, sociological reasoning, study design, and specific research techniques. Normally limited to graduate students in the department. [3]

SOC 311. Multivariate Analysis I. Basic concepts in probability and statistical analysis. Multivariate analysis of sociological data, with special attention to regression analysis. The use of computers. Prerequisite: enrollment in graduate program in sociology or permission of the instructor. [3]

SOC 312. Multivariate Analysis II. The general linear model in analyzing sociological data, including analysis of variance, regression, path analysis, and parametric techniques for contingency-table analysis. Practice in the use of computers. Prerequisite: 311 or an equivalent statistics course approved by the instructor. [3]

SOC 313. Quantitative Methods Workshop. Analysis of large data sets from the social sciences or of data brought to the course by students. Scaling and measurement; nonparametric analysis of contingency tables; and
advanced topics in regression and path analysis. Prerequisite: 312 or an equivalent statistics course approved by the instructor. [3]

SOC 323. Teaching Workshop. For students wanting to improve their teaching skills. Students visit the classrooms of outstanding teachers on campus and discuss their approach to teaching; deliver lectures in the presence of critics; examine their own lectures on videotape; discuss methods of evaluation; read outstanding books on college teaching; and survey teaching materials produced by the American Sociological Association. Normally limited to graduate students in the department. Graded P/F only. [3]

SOC 329. Survey Seminar on Gender and Sexuality. Recent contributions to the field, including micro- and macro-level theories of the development of gender ideology/roles, labor force stratification, gender and social protest, and feminist methodologies. Attention to research on sexual meanings, identities, and behaviors. No credit for students who earned credit for 367 in spring 2013. [3]

SOC 331. Survey Seminar on Collective Behavior and Social Movements. Theories accounting for causes, dynamics, and consequences of collective behavior and/or social movements. Critiques of such theories for understanding historically specific revolutions, rebellions, and nonviolent forms of protest. [3]

SOC 333. Survey Seminar on Cultural Sociology. The creation of culture, including values, norms, beliefs, symbols, and life-styles. The reproduction of society through culture; institutions that purposefully preserve, produce, and transmit aspects of culture. [3]

SOC 335. Survey Seminar on Deviant Behavior and Social Control. Major works on crime, juvenile delinquency, and forms of extralegal deviance. Social control in connection with counteraction of deviance, sociology of law, and manipulation of human behavior. [3]

SOC 337. Survey Seminar on Race and Ethnic Relations. Analyses of enduring topics in the study of race and ethnicity, including stratification, discrimination, immigration, assimilation, and politics. Other topics include racial and ethnic identity and the social construction of race and ethnic categories. [3]

SOC 339. Survey Seminar on Political Sociology. Classical and modern theories about the nature and distribution of power in society and in other human groups. Social bases and implications of major political institutions, the state in particular; and political order and change. [3]

SOC 343. Survey Seminar on Social Psychology. The interaction of social structure and personality. Socialization, social perception, small groups, exchange theory, and symbolic interactionism. [3]

SOC 345. Survey Seminar on Social Stratification. Major theories and lines of research pertaining to the origin, nature, and functioning of systems of social inequality. [3]

SOC 347. Survey Seminar on Sociology of Science and Knowledge. How ideas and systems of thought are related to the social structure and culture of societies. Institutionalization of scientific and intellectual activity, scientific and intellectual communities or organizations, and social influences on the directions of research by scientists and academicians. [3]

SOC 351. Survey Seminar on Medical Sociology. Theoretical paradigms and methodologies for the study of social and cultural factors in the perception, diagnosis, treatment, and distribution of disease. Emphases on medicalization, mental health, medical technology, and roles of patients and medical professionals. No credit for students who earned credit for 363 section 1 in fall 2011 or fall 2013. [3]

SOC 355. Survey Seminar on Sociology of Family. Examinations of the family as a social institution. Principles of social organization applied to family relationships. Macro-level analyses of family structure, the effects of families on individuals, and interactions of family systems with other institutions. No credit for students who earned credit for 363 section 1 in fall 2011 or 2013. [3]

SOC 357. Survey Seminar on Sociology of Education. Comparative and functional analyses of education in society and education as society. Theories accounting for the form, role, and evolution of educational systems. Intersection of education and other institutions. No credit for students who earned credit for 363 section 1 in fall 2011. [3]

SOC 359. Survey Seminar on International Migration. Key current theoretical debates about international migration and intersection with the empirical data and case studies. Emphases on interdisciplinary and method, and comparative studies. No credit for students who earned credit for 361 section 1 in fall 2011. [3]

SOC 361. Special-Topic Seminars on Social Phenomena at the Macro Level. Each focuses on some aspect of social structure, social organization, culture, international relations, global systems, spatial organization, or the social division of labor. Cities, communities, urban areas, metropolitan areas, regions, countries, or status categories are the principal units of comparison. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC 363. Special-Topic Seminars on Institutions and Organizations. Each focuses on some type of institution-economic, educational, familial, medical, political, or religious-or some type of organization, including business firms and voluntary associations. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC 366. Special-Topic Seminars on Social Processes and Social Change. Each focuses on collective behavior, social movements, innovation and diffusion, societal development, cultural evolution, revolutions, migration, mortality, fertility, or mobility. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC 369. Master’s Thesis Research. [0]

SOC 371. Special-Topic Seminars on Methodology. Each seminar focuses on a particular kind of research method or statistical technique. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC 372. Special-Topic Seminars on Theory. Each seminar focuses on a particular theorist, a particular theoretical perspective, or the methodology of theory construction. May be repeated more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SOC 373. Workshop on Sociological Criticism. Intensive introduction to peer review for publication, using materials from journal submissions to editorial correspondence. [3]

SOC 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

SOC 390a. Directed Studies. Students work independently on topics of special interest not covered in depth in course offerings. Work in a tutorial relationship with an individual faculty member or in a student seminar, subject to faculty approval, should several students share a common interest. Prerequisite: consent of the instructor. May be repeated more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

SOC 390b. Directed Studies. Students work independently on topics of special interest not covered in depth in course offerings. Work in a tutorial relationship with an individual faculty member or in a student seminar, subject to faculty approval, should several students share a common interest. Prerequisite: consent of the instructor. May be repeated more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]
relationship with an individual faculty member or in a student seminar, subject to faculty approval, should several students share a common interest. Prerequisite: consent of the instructor. May be repeated more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

**SOC 399. Ph.D. Dissertation Research.** [0-12]

**Spanish**

**SPAN 101g. Spanish for Graduate Reading.** Survey of grammar and vocabulary, with extensive reading. Available only to graduate students for "No Credit". [0]

**SPAN 214. Dialectology.** Formation, general characteristics, distinctive features, and geographical extension of the principal dialectal regions of Spain and Spanish America. Both historical and modern dialects are considered. Emphasis on non-standard dialectal varieties of Spanish. Prerequisite: 201W and 202. [3]

**SPAN 216. Phonology.** Analysis of the production, nature, and systematic function of the sounds of the Spanish language, as well as of problems frequently experienced by non-native speakers. Both standard and dialect features of Spanish are examined. Prerequisite: 201W and 202. [3]

**SPAN 217. Contrastive Analysis of Spanish and English.** A comparison of the phonological, morphological, and syntactical structures of Spanish and English to demonstrate the similarities and differences between the linguistic systems of these two languages. Prerequisite: 201W and 202. [3]

**SPAN 218. Morphology and Syntax.** An introduction to the principles of modern Spanish morphology (word formation) and syntax (phrase structure and usage) through an analysis of the native speaker's organization of reality and use of language to reflect and to express that organization. Prerequisite: 201W and 202. [3]

**SPAN 220. The Languages of Spain.** Origins, development, and the contemporary sociolinguistic situation of the principal languages and dialects of Spain, including Castilian, Catalan, Galician, and Basque. Prerequisite: 201W and 202. [3]

**SPAN 227. Film and Culture in Latin America.** Latin American cinema from the perspective of cultural history; screenings and supplementary texts, including manifestos and critical readings. Prerequisite: 203. [3]

**SPAN 230. Development of Lyric Poetry.** Popular and traditional forms; the sonnet and other Renaissance and Baroque classical forms. Romanticism. Prerequisite: 203. [3]

**SPAN 231. The Origins of Spanish Literature.** From its beginnings to the Renaissance; the creation of a social order and a cultural tradition. Close study of three literary landmarks - Poema del Cid, Libro de Buen Amor, La Celestina - and other prose and poetry selections. Prerequisite: 203. [3]

**SPAN 232. Literature of the Spanish Golden Age.** Representative works from early modern Spain, including poetry, prose, and drama of the Renaissance and Baroque periods. Prerequisite: 203. [3]

**SPAN 233. Spanish Literature from the Enlightenment to 1900.** Essays and Neoclassic literature. Romanticism, Realism, and Naturalism. Representatives and authors from all genres. Prerequisite: 203. [3]

**SPAN 234. Spanish Literature from 1900 to the Present.** Representative authors and works. Prerequisite: 203. [3]

**SPAN 235. Spanish American Literature from the Conquest to 1900.** Development of all forms from colonial times to the end of the 19th century. Patterns of interaction of Amerindian, African, and European cultural traditions. Unity and diversity of Spanish American literature. Prerequisite: 203. [3]

**SPAN 236. Spanish American Literature from 1900 to the Present.** The works of Neruda, Borges, Paz, García Márquez and others. Prerequisite: 203. [3]

**SPAN 237. Contemporary Lyric Poetry.** From Modernism to the present in Spain and Spanish America. Prerequisite: 203. [3]

**SPAN 239. Development of the Novel.** From the seventeenth century through Realism and Naturalism in Spain and Spanish America. Prerequisite: 203. [3]

**SPAN 240. The Contemporary Novel.** New forms in the twentieth-century novel in Spain and Spanish America. Prerequisite: 203. [3]

**SPAN 244. Afro-Hispanic Literature.** From nineteenth-century slave narrative to modern writers such as Miguel Barnet, Alejo Carpentier, and Quince Duncan. Prerequisite: 203. [3]

**SPAN 246. Don Quixote.** Directed reading and intensive study of the novel. Prerequisite: 203. [3]

**SPAN 247. Spanish-American Literature of the Boom Era.** The Boom novel of the 1960s: Carlos Fuentes’ La muerte de Artemio Cruz, Julio Cortázar’s Rayuela, Mario Vargas Llosa’s La ciudad y los perros, Guillermo Cabrera Infante’s Tres tristes tigres, and Gabriel García Márquez’s Cien años de soledad. Prerequisite: 203. [3]

**SPAN 248. Spanish-American Literature of the Post-Boom Era.** The post-Boom novel from the 1970s to the present; analysis of related films. Manuel Muig’s Boquitas pintadas, Ma llamo Rigoberta Menchú, Laura Esquivel’s Coma agua para chocolate, Reinaldo Arena’s Viaje a La Habana, and Daisey Rubiera Castillo’s Rayita, sencillamente. Prerequisite: 203. [3]

**SPAN 251. Development of Drama.** Spanish theatrical works from 1600 to 1900, including the Golden age comedy, neoclassicism, romanticism, and early realism in drama. Prerequisite: 203. [3]

**SPAN 256. Love and Honor in Medieval and Golden Age Literature.** The evolution of the key themes of love and honor in works from various genres of medieval and Golden Age Spanish literature with special attention to sociohistorical context. Prerequisite: 203. [3]

**SPAN 260. Development of the Short Story.** From early manifestations in Spain through its current forms in Spain and Spanish America. Prerequisite: 203. [3]

**SPAN 271. The Theory and Practice of Literary Translation.** Theoretical approaches and their consequences for the interpretation of translated texts. Practical application of these principles in the translation of both Spanish and Portuguese texts into English. Taught in Spanish. Written work in Spanish or Portuguese. Serves as repeat credit for students who completed 294 section 3 in fall 2013 or spring 2013, or 294 section 1 in spring 2012. Prerequisite: 203. [3]

**SPAN 273. Modern Latin American Poetry.** Development of poetry in Spanish America and Brazil during the twentieth century. Major poets and movements, including both Spanish American Modernismo and Brazilian Modernismo. Poetry as a genre; composition and discussion of students’ poetry. Taught in Spanish. Serves as repeat credit for students who completed 294 section 2 in fall 2013 or 294 section 1 in fall 2012. Prerequisite: 203. [3]

**SPAN 277. Literary Genres and National Identities in Latin America.** A comparative approach to the rise of the national literary traditions from independence to the latter half of the twentieth century. Indigenous novels, abolitionist narratives, and gaucho poetry by colonial figures, including African slaves, indigenous peoples, and Argentine Gauchos. Serves as repeat credit for students who completed 294 section 1 in spring 2013. Prerequisite: 203. [3]

**SPAN 301. The Theory and Practice of Drama.** Critical works and plays from different periods. Introduction to the principles of dramaturgy. Prerequisite: 203. [3]

**SPAN 399. Ph.D. Dissertation Research.** [0-12]
period, but students may earn only up to 3 credits per semester of enrollment. [1–3; maximum of 12 credits total for four semesters of SPAN 289]

SPAN 293. Contemporary Latin American Prose Fiction in English Translation. Themes and techniques of the contemporary novel, novella, and short story written by both men and women in Spanish America and Brazil. No credit for graduate students in Spanish or Portuguese. [3]

SPAN 294. Special Topics in Hispanic Literature. Prerequisite: 203. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 295. Special Topics in Spanish Language and Linguistics. Prerequisite: 203. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 296. Special Topics in Hispanic Culture. Prerequisite: 203. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 301. Literary Analysis and Theory. (Also listed as Portuguese 301) Methods of literary analysis for the teaching of literature. The systematic application of contemporary theories - structuralist and post-structuralist - in the analysis of poetry and narrative. [3]

SPAN 302. Ibero-Romance Philology. (Also listed as Portuguese 302) Study of the evolution of the languages and dialects of the Iberian Peninsula. Analysis of selected linguistic developments and readings from medieval texts. [3]

SPAN 310. Foreign Language Learning and Teaching. (Also listed as Portuguese 310) Principles and practices of teaching a second language with concentration on recent interactive and communicative models of foreign language instruction. Classroom observations, journal writing, development of materials, and a small action research project are expected. Required of all entering teaching assistants. [3]

SPAN 314. Introduction to Latin American Colonial Studies. (Also listed as Portuguese 314) Provides a panoramic introduction to the canonical works of the colonial period from “discovery” to “independence,” as well as an overview of the theoretical debates in colonial studies within the Latin American context. Topics include the construction and reshaping of identities and otherness through various stages of Latin American cultural history, the emergence of what has been called the American consciousness during the “New World Baroque,” and the discourses of “independence” and early nation building. [3]

SPAN 330. Survey of Medieval Spanish Literature. Introduction to major works of pre-modern Spanish literature through the fifteenth century. [3]

SPAN 333. Seminar: Modernismo. The major literary movement of the end of the nineteenth century and beginning of the twentieth century in the Spanish-speaking world. Major authors, their context, and the fundamental ideological and literary shifts evident in their works. [3]

SPAN 334. Ordering and Disrupting Fictions in Latin America. Fictions of the mid nineteenth and early twentieth centuries. The racialized and sexualized nature of these imagined communities and their uncanny tendency to disassemble themselves. [3]

SPAN 335. The Spanish American Novel of the Boom Period. An examination of the Boom novel, from the 1960s: La muerte de Artemio Cruz, Rayuela, La casa verde or Conversación en la Catedral, Tres tristes tigres, and Cien años de soledad. [3]

SPAN 336. Self-Writing in Latin America. Theory and practice of self-writing; memoir, testimony, autobiography in Latin America. The connection between the body, language, and memory in a subject of both national and individual dimensions. [3]

SPAN 338. Seminar: Studies in Colonial Literature. (Also listed as Portuguese 338) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 340. Seminar: Hispanic American Essay. (Also listed as Portuguese 340) May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 341. Spanish American and Brazilian Literature I. (Also listed as Portuguese 341) Spanish American and Brazilian literature from the conquests to the end of the nineteenth century. Authors may include: Sor Juana, Matos, Alencar, Assis, and Carrasquilla. [3]

SPAN 342. Spanish American and Brazilian Literature II. (Also listed as Portuguese 342) Spanish American and Brazilian literature from twentieth century and to the present. Texts may include: Os aéreos, La guerra del fin del mundo, Ficciones, Perto do coração selvagem, and Agua viva. [3]

SPAN 343. Seminar: Studies in Golden Age Drama. The comedia nueva in cultural and critical contexts. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 344. Seminar: The Baroque. Readings in Spanish baroque literature and culture, including works by Góngora, Quevedo, Cervantes, María de Zayas, Calderón, and Gracián. [3]

SPAN 345. Seminar: Early Modern Spanish Narrative. Readings in Spanish prose fiction from 1550 to 1700, including the picaresque tradition and works by Cervantes, María de Zayas, and other writers. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 351. Comparative Methodology. (Also listed as Portuguese 351) Comparative literature as an academic discipline; scholarly and theoretical distinctions; methodologies, applications, relationship to national literature units and humanities programs. [3]

SPAN 352. Seminar: Issues in Hispanic Cinema. Possible topics include: feminine reflections in contemporary Spanish cinema; Hispanic variations on the cinematic Bildungsroman; traveling films; delivering the nation (Spain 1975–2005). [3]

SPAN 354. The Politics of Identity in Latino U.S. Literature. The writings of Latinos/Latinos from the four largest groups: Chicanos, Cuban Americans, Puerto Rican Americans, and Dominican Americans. Redefinition of borders, cultures, and languages. [3]

SPAN 361. Seminar: Studies in Eighteenth- and Nineteenth-Century Spanish Literature. A broad survey of specific topics such as: textual civil wars; literary constructions of the nation; reconstruction of the narrative genre (1700–1900); eccentricities of Spanish Enlightenment and/or Spanish Romanticism; theatrical spectacles. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 362. Seminar: The Realist Novel of the Nineteenth-Century. A multifaceted approach to the Spanish Realist novel with attention to the sociopolitical context, contemporary cultural discourses and practices; European literary and artistic currents of the day, and theoretical formulations on the genre. [3]

SPAN 363. Seminar: Modern Spanish Poetry and Poetics. Key moments of Spanish lyric poetry during the nineteenth and twentieth centuries. Theory and praxis, Romanticism, Avant-Garde, and Post-Modernism. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 369. Master’s Thesis Research. [0]

SPAN 372. Seminar: Studies in 20th- and 21st-Century Spanish Literature. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]
SPAN 373. Seminar: Studies in Spanish American Literature in a Global Context. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 374. Seminar: Studies in Inter-American Literature. (Also listed as Portuguese 374) Comparative approaches to literary texts from such New World cultures as Brazil, Spanish America, the United States, the Caribbean, and Canada (both its French and English traditions). Fluency in Spanish and/or Portuguese required; reading competency in English and French. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 375. Seminar: Studies in Trans-Atlantic Literature and Culture. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 379. Non-candidate Research. Research prior to entry into candidacy (completion of Qualifying Examination) and for special non-degree students. [Variable credit: 0-12]

SPAN 388. Special Topics in Spanish Literature. Topics vary. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 389. Special Topics in Spanish American Literature. Topics vary. For list of previous topics, please see departmental Web page. May be repeated for credit more than once if there is no duplication in topic. Students may enroll in more than one section of this course each semester. [3]

SPAN 396. Special Studies in Spanish Linguistics. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

SPAN 397. Special Studies in Spanish Literature. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

SPAN 398. Special Studies in Spanish American Literature. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 6 credits per semester of enrollment. [1-6]

SPAN 399. Ph.D. Dissertation Research. [0-12]

SPAN 399K. Half-time Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]

Special Education

SPED 3000. Education and Psychology of Exceptional Learners. Presents an overview of people who are labeled “exceptional” and the implications for education related to them. Examines the disabilities that people have and services, systems, and concepts associated with them. Includes legal, sociological, educational, political, general system theory perspectives and psychological perspectives. State and Federal law relating to education from infancy to adulthood will be related to intervention, ethics, and issues. Discuss trends and issues related to the areas of exceptionality and relate these to previous trends, issues, and attitudes. [3]

SPED 3010. Proseminar I. Advanced review of research and scientific principles, methods, and the status of research and other professional developments in special education. Required for post-master’s degree students in special education. [3]

SPED 3011. Proseminar II: Contrasting Research Methodologies in Special Education Research. The purpose of this course is to provide an overview of the frameworks and major designs within three alternative research methodologies within Special Education: single-subject research, group design, and qualitative methods. Prerequisite: 3010. [3]

SPED 3012. Research Design in Special Education. Provides in-depth analysis of group research methodology within Special Education. Design features and statistical methods are reviewed; research is critiqued; and sample studies are designed. Prerequisite: 3010, 3011. [3]

SPED 3013. Introduction to Single-Subject Research Methodology. Initial course in the use of single-subject research methodology within special education. Overview of behavioral measurement, single-subject research designs, and methods of data analysis. Critical analysis of research articles. Development of a single subject research proposal is required. Prerequisite: 3210. [3]

SPED 3014. Advanced Procedures in Single-Subject Research Methodology. Use of research procedures to investigate problems in the education of persons with disabilities. Advanced procedures in single-subject research methodology, including design strategies and experimental control, are emphasized. Design and implementation of a research study is required. Prerequisite: 3013, 3210. [3]

SPED 3015. Implementing Research in Special Education. Provides structure and support for students implementing studies in Special Education. Design and implementation issues in research are reviewed with peers and faculty participants to help students resolve problems and design better studies. Prerequisite: 3010, 3011, 3012, 3013. [1]

SPED 3016. Hierarchical Linear Modeling in Educational Research. This course provides an introduction to hierarchical linear modeling (HLM). HLM is a methodology that can be used when a dataset possesses some form of nesting or hierarchical structure. This includes conditions where data are collected among clustered units, such as students within schools or employee within organizations. It also includes many longitudinal studies, as repeated measures can be viewed as nested with persons. (Not currently offered) [3]

SPED 3017. Experimental Analysis of Behavior. Overview of basic behavioral processes. Presents information relating to human and nonhuman learning with a focus on the experimental analysis of behavior. Topics covered include environmental feedback mechanisms, schedules of reinforcement, establishing operations, multi-operant performances, discriminative stimulus control, stimulus equivalence, rule-governed behavior, behavioral pharmacology, and remembering/forgetting. The course also focuses on research methodologies and the critical analysis of research. Students apply their skills using computer-based simulations of laboratory experiments. [3]

SPED 3018. Observational Methods. This doctoral-level course addresses what is known about quantitative, systematic observation of behavior to measure behavior that may or may not be used to infer status on psychological constructs. The content emphasis is on providing students with the rationale for selecting among the many options at all stages of observational measurement. Among the topics covered are (a) classical measurement theory and Generalizability theory as they relate to observational measurement, (b) principles for selecting measurement procedures, selecting behavior sampling methods, designing coding systems, selecting appropriate metrics (including nonsequential and sequential variables), (c) sequential analysis of behavior, (d) the tension between ecological validity, representativeness, and construct validity, (e) interobserver reliability issues, and (f) other issues related to the direct observation of behavior. [3] Yoder.

SPED 3019. Leadership in Special Education. This is a doctoral seminar focusing on areas where leadership is critical to the field. Leadership in special education, regardless of career choice, requires continuing development toward excellence in teaching, research and service. The major focus of this course is to develop knowledge, understandings, and skills that continue the trajectory toward excellence and leadership abilities in these areas. At this time, this course addresses the following areas: the role of theory in leading, informing, and organizing research; research, practice, and leadership in college teaching; current research, needs, and leadership in pre-service teacher preparation; and an exploration of career choices after the Ph.D. [3]

SPED 3030. Advanced Issues in Family Intervention. Provides information on issues and practices related to families with children who have special needs. Emphasis on taking a family systems perspective and a family-centered approach to intervention. Provides strategies for effective communication for the purpose of information sharing and collaborative planning with families. Topics include definition and history of the family, family and professional relationships, professional ethics, models of working with families, service coordination, family assessment and the IFSP, promoting family participation in the IEP, and Public Laws 94-142 and 99-457. [3]
SPED 3040. Administration and Supervision in Special Education. Principles, theories and methods of administration that emphasize managerial functions. Prepares students to assume leadership roles in special education and organizations providing services for people with disabling conditions. Prerequisite: 3000 or consent of instructor. [3] (Not currently offered.)

SPED 3050. Augmentative and Alternative Communication. This course is designed to provide an overview of the field of augmentative and alternative communication (AAC) for use with young children and school-age children with severe disabilities. Specifically, the course will provide an overview of the theories that are important to the understanding of appropriate uses of AAC systems, and the course will provide information about the efficacy of these systems with students with severe disabilities. Topics will include guidelines for selecting, implementing, using, and monitoring the use of AAC systems. Corequisites: SPED 3300 and 3311. [3]

SPED 3060. Cultural Diversity in American Education. Focuses on cultural diversity and the ways in which it has been defined and treated in the American educational system. An interdisciplinary perspective informs the course, with particular attention to history, sociology, psychology, anthropology, and educational literatures. FALL. [3]

SPED 3070. Special Education Law. Survey of current law relating to special education of infants, toddlers, children and youth and adults. Emphasis is on major federal statutes and regulations, particularly the individuals with Disabilities Education Act and its regulations. Related laws include "Section 504," grants and contracts law, related state laws, leading cases (e.g., AIDS, extended school year, LRE, testing, private residential placement), IEPs, Family Service Plans. Proper APA citation and writing about laws and cases. [3] (Not currently offered)

SPED 3080. High Poverty Youth: Improving Outcomes. (Also listed as HOD 3665) Youth from high poverty backgrounds often are placed at risk for a host of unfavorable outcomes including academic failure, school drop-out, drug abuse, unemployment, and incarceration. In this class, we will be working with schools and community agencies in Nashville to improve outcomes for youth living in high-poverty neighborhoods. We will have class meetings twice weekly as well as ongoing field-based experiences. Field work will include mentoring, tutoring, or providing job readiness training to youth in neighborhood community centers or in students' high schools. [3]

SPED 3120. Field Work in Special Education Teaching. Observation, participation, and classroom teaching for graduate and professional students with a major or minor in any of the areas of exceptionality. Prerequisite: consent of instructor. [1-3]

SPED 3130. Advanced Field Work in Special Education. The second practicum for graduate and professional students with a major or minor in any area of exceptionality, with opportunity for supervised participation in community special education programs. Prerequisite: consent of instructor. [1-3]

SPED 3140. Extended Student Teaching for Graduate Students. Graduate student teaching, observation, participation, and full day classroom teaching. Designed for graduate students with no previous undergraduate student teaching experience. Prerequisite: 3120 and permission of department. [6]

SPED 3120. Management Procedures for Academic and Social Behavior. Application of behavioral principles in educational settings. Presents definition and measurement of behavior, reinforcement strategies, systematic program development, basic formats for classroom instruction, and techniques for monitoring student progress. Emphasizes procedures for increasing academic and socially appropriate behavior through simulations and practice exercises. Review of research methodologies and the critical analysis of research literature in the area of applied behavior analysis are required. Students apply their skills in classroom settings. [3]

SPED 3230. Research Methods in Special Education. The primary purpose of this course is for students to become discriminating consumers of educational research. By completing this course, students should be able to read and understand the nature and quality of the designs described in many research articles. They should be able to think critically about such work and determine whether the authors' conclusions are warranted. Students will also learn about differences between qualitative and quantitative research; and between survey, correlational, causal-comparative, and experimental research. [3]

SPED 3250. Proseminar in Intellectual Disabilities. (Also listed as PSY 325P) Variable topics. May be repeated with change in topic. [2]

SPED 3300. Methods of Instruction for Students with Intellectual and Multiple Disabilities. This course addresses research based assessment and instructional strategies for equipping students with intellectual and multiple disabilities with the skills and knowledge that will help them thrive in the classroom and beyond the school day. Particular emphasis will be placed on general instructional strategies for the acquisition and generalization of skills. In addition, strategies for implementing individualized and effective programming will be addressed. Corequisites: SPED 3050 and 3311 [3]

SPED 3310. Transition for Persons with Disabilities. Theory and practice of transition from school to community living and employment for young adults with disabilities. Legislative history and practical applications of skills such as job development and job placement. Prerequisite: 3300. [3]

SPED 3311. Field Work in Special Education: Autism, Intellectual, and Multiple Disabilities. Graduate student observation and participation in school programs for students with severe exceptionalities and/or autism. Graduates students will complete activities in the field placement tied to coursework. This course may be repeated. Prerequisite: SPED 3000. Fall Corequisites: SPED 3330, and 3360. Spring Corequisites: SPED 3050 and 3300. [2]

SPED 3320. Advanced Transition for Persons with Disabilities. Extends the course content of 3310. Greater emphasis on development of programs and interagency collaboration and development of community-based transition. Prerequisite: 3300, 3310, or consent of instructor. [3]

SPED 3330. Characteristics of Students with Intellectual and Multiple Disabilities. This course provides information on the history, nature, characteristics, and needs of students with exceptionalities. Neurological impairments resulting in motor dysfunction, sensory impairments, and the combination of these are discussed. Information is provided on the physical, medical, and educational management of students with intellectual and multiple disabilities in educational settings. Corequisites: SPED 3311 and 3360 [3]

SPED 3350. Advanced Access to General Education and Teaching Functional Academics. Graduate-level course in which a variety of curricular options are discussed for supporting students with special disabilities in accessing general education and grade level standards. Evidence-based instructional strategies for teaching reading, math, science, and social studies as functional life skills are presented. Students develop and demonstrate lesson plans and instructional units to teach students with severe disabilities. [3]

SPED 3360. Advanced Procedures for Transition to Adult Life. Graduate-level overview of history, legislation, philosophy, and practice in the areas of secondary transition and post secondary outcomes for persons with disabilities. Emphasis on issues and strategies related to promoting a successful transition from school to adult life. Students are required to evaluate high school students’ performance and develop instructional programs to apply in school or work training sessions. Corequisite: SPED 3316 [3]

SPED 3370. Seminar: Current Issues in Autism and Severe Disabilities. This course addresses critical issues, policies, and research relevant to the education of students with intellectual disabilities, autism, and multiple disabilities. Emphasis will be placed on recent advances in best practices and evidence-based interventions. This semester, the course will focus on policies and practices that promote flourishing and meaningful inclusion among children, youth, and young adults with significant disabilities. [3]

SPED 3400. Instruction and Learning in Early Childhood Special Education. Provides the historical, legal, and theoretical foundations of early intervention/early childhood special education for infants, toddlers, and preschoolers with disabilities. Includes recommended practices related to assessment and instruction for early childhood classes. Discusses typical and atypical development, assessment to identify goals and outcomes, and strategies for promoting development. [3]
SPED 3410. Screening and Assessment in Early Childhood Special Education. Provides information typical and atypical development of infants, toddlers, and preschoolers with disabilities. Includes in-depth treatment of recommended practices in assessment, instruction, application of practices in natural and inclusive environments, and working with other professionals. [3]

SPED 3420. Recommended Practices in Early Elementary Grades for Children with Disabilities. Provides information on typical and atypical development of early elementary children with disabilities. Includes discussions of the general education curriculum (literacy, mathematics, social studies, and science) and recommended practices in adapting that curriculum for children with disabilities. [3]

SPED 3500. Medical and Educational Implications of Visual Impairments. Assessment of sensory function, including integration of information from medical and rehabilitation vision care specialists, as basis for planning, implementing, and monitoring intervention/education for learners with visual impairments, with emphasis on specific visual disorders, functional use of senses, assistive technology for enhancing visual function (i.e., optical and non-optical devices), and family/child characteristics. Linking structure/function of visual system to most prevalent visual conditions, identifying implications of conditions for development and learning, and identifying appropriate accommodations for optimizing visual function. Roles of teachers of students with visual impairments; medical, educational, and rehabilitation professionals; families; and other team members in optimizing outcomes for students with visual impairments. Content provided through lectures, demonstrations, observations, laboratory dissections, and integrated fieldwork. [3]

SPED 3510. Educational Procedures for Students with Visual Impairments. Introduction to the literature, history, principles, programs, practices, and problems of the field of visual impairment/blindness. Role of teacher of students with visual impairments in providing access to the general core curriculum, providing instruction in the expanded core curriculum for students with visual impairments, and introduction to assistive technology. Using assessment and data driven decision making to guide intervention planning, implementation, and progress monitoring. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. [3]

SPED 3530. Advanced Braille. Proficiency in Nemeth code for Braille mathematics; introduction to Braille computer, music, and foreign language codes for future teachers of students with visual impairments. Introduction to strategies for teaching mathematics to students who use Braille. Students read, write, and proofread advanced Braille codes; observe teachers as they teach advanced Braille codes to students with visual impairments; and acquire technology skills required to teach and produce Braille to students with visual impairments. Prerequisite: SPED 2530 or permission of the instructor. [2]

SPED 3540. Communication and Literacy Skills for Students with Visual Impairments. Promoting/teaching communication and literacy skills, including use of assistive technology for communication and literacy (augmentative communication devices, computer-assisted instruction, keyboarding skills, non-optical devices for enhancing reading and writing, etc.) for students with visual impairments, including those with multiple disabilities. Special emphasis on learning media assessments; assessment of communication and literacy skills for intervention planning, implementation, and program monitoring; accessibility and production of appropriate learning media. Open only to individuals who have completed or are currently enrolled in a Braille class. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. Consent of Instructor required. [3]

SPED 3550. Orientation and Mobility for Teachers of Students with Visual Impairments. Lectures, discussions, and simulated activities in teaching orientation, mobility concepts and skills to students with visual impairments. Impact of visual impairment on motor and cognitive development and strategies for promoting optimal development and learning, sensory use, and independent travel, including assistive technology. Taught by an orientation and mobility specialist. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. [3]

SPED 3580. Advanced Procedures for Students with Visual Impairments. Advanced strategies for providing access to the general core curriculum and providing instruction in the expanded core curriculum for students with visual impairments, early intervention and family-centered practices, with particular emphasis on assistive technology/technology and universal design for learning. Course content provided through lectures, demonstrations, observations, and integrated fieldwork. [3]

SPED 3590. Advanced Orientation and Mobility Skills for Teachers of the Visually Impaired: Practicum. Advanced course equips orientation and mobility specialists with methods, techniques, and approaches using the long cane and other mobility devices essential in the development of safe and efficient travel skills of persons with visual impairments. Demonstration, simulation, and practicum experiences in various settings. Prerequisite: 2550 and/or consent of instructor. [3]

SPED 3600. Speech and Language for Exceptional Learners. Provides information on communication assessment and, intervention procedures useful for teachers of young children including children with disabilities and children at-risk due to poverty. Includes an overview of normal and typical language development and research on effective naturalistic communication interventions. [3]

SPED 3690. Master's Thesis Research. Open only to candidates for the Master of Science degree engaged in thesis research and writing. Consent of major professor required. [Variable credit 0-6]

SPED 3700. Applications of Technology in the Classroom. Examines the use of computer-based instruction and management systems to facilitate classroom instruction. The course includes issues related to the integration of technology into instructional design, a review and analysis of educational software, an exploration of educational considerations of technology for individuals with disabilities, an evaluation of assistive technology options, and an overview of instructional and managerial computer applications. [3] (Not currently offered)

SPED 3710. Introduction to the Gifted Learner: Conceptions, Characteristics, and Assessment. Examines issues and trends in gifted education with a focus on the specific needs and characteristics of gifted students. Outlines theoretical conceptions of giftedness and evidence-supported practices in identification and assessment - including those who may not be typically identified, such as twice-exceptional, low-income, and culturally diverse students. [3]

SPED 3720. Advanced Applications of Technology in the Classroom. Presents and examines models and techniques of instruction for integrating computer and technology into special education classroom curricula. Focuses on the development, implementation, and advanced instructional and managerial applications of technology when used with disabled individuals. Prerequisite: 3700 or equivalent. [3] (Not currently offered)

SPED 3730. Psychology of the Gifted Learner. Highlights internal and external factors impacting the psychological development of gifted students. Focuses on theoretical frameworks and practical strategies for the provision services, including consultation, collaboration with schools and families, counseling supports, behavioral models, and collaboration with community agencies. [3]

SPED 3740. Educating Gifted Students: Adaptations of Curriculum and Instruction. Focuses on theoretical conceptions of curriculum development and instructional modifications for mild, moderate, and highly gifted students. Includes curriculum design theoretical frameworks, differentiation strategies, and how to measure the effects of adaptations to match gifted student learning needs. [3]

SPED 3750. Organizational Structures and Planning of Gifted Programs. Focuses on theoretical frameworks for organizing and implementing evidence supported programs for the gifted; service delivery models, program evaluation, data collection, supervision models, and systemic development of programming and support structures. Attention is also devoted to poverty and cultural differences. [3]

SPED 3760. Practicum in Gifted Education. Focuses on field study, action research, or practical application of course content for providing leadership, curriculum adaptations, and program planning for a variety of gifted
learners including underserved populations and mild, moderate, and highly gifted individuals. Prerequisites: SPED 3720, 3730, 3740, 3750 [3]

SPED 3790. Non-Candidate Research. Research prior to entry into candidacy (completion of qualifying examination) and for special non-degree students. [Variable credit: 0-12]

SPED 3800. Trends and Issues in Learning Disabilities. Provides advanced study of current trends, research, and issues in mild/moderate disabilities with specific emphasis on learning disabilities. Historical perspectives and theoretical models are reviewed along with empirical research related to definitions, identification procedures, conceptualization, educational strategies, and service delivery options for individuals with learning disabilities. [3]

SPED 3810. Trends and Issues for Students with Behavior Disorders. This course focuses on an historical overview and analysis of theoretical issues regarding etiology and treatment of severe behavior disorders. The course reviews definitions, historical development, contributing factors, and major classifications of behavior disorders. An overview of research methods used in treating disordered behavior is presented. Ability to analyze, synthesize, and apply research methods related to prevention and management strategies with children and adolescents is required. [3]

SPED 3820. Issues and Procedures in the Assessment of Students with High-Incidence Disabilities. This course focuses on the diagnosis and evaluation of students with mild/moderate disabilities using a variety of developmentally appropriate curriculum based assessments, criterion-referenced, and norm-referenced tests in the academic and vocational subject areas. Emphasis is on the interpretation of information from assessments into Individualized Education Program annual goals and objectives and instructional programming strategies. Specific consideration is given to the reporting of assessment information to parents, teachers and other support personnel to determine appropriate placement levels within the continuum of services. Practical application is required. [3]

SPED 3825. Advanced Educational Testing, Assessment, and Accountability. In-depth analysis of testing, assessment, and accountability applied to general and special education. Analysis of applied issues such as standards-based reform, annual yearly progress, response to intervention, and program effectiveness. (Not currently offered) [3]

SPED 3830. Instructional Principles and Procedures in Mathematics for Students with Disabilities. The purpose of this course is to teach students principles of remediation in mathematics for students with disabilities and those at risk for academic failure. Throughout the course, emphasis is placed on instructional procedures and use of manipulatives for establishing a remedial instruction program in mathematics. [3]

SPED 3835. Instructional Principles and Procedures in Writing and Language. This course focuses on how to teach writing and language skills to students with high incidence disabilities. This course examines writing and language development, the written and language difficulties encountered by students with high incidence disabilities, assessment and instruction of writing and language difficulties, as well as cultural diversity and writing and language differences. This course involves students learning how to apply specific instructional programs in writing. The course focuses on the explicit teaching procedures as well as the use of technology for teaching writing/language skills. (Not currently offered) [3]

SPED 3840. Instructional Principles and Procedures in Reading for Students with Disabilities. Presents empirically validated instructional procedures to address the reading deficits of students with disabilities. Focuses on explicit teaching procedures, direct instruction, and instructional design principles that apply to reading. Proficiency in the development of assessment profiles, instructional lessons, monitoring of progress through curriculum-based measures, and data-based decision making are required. [3]

SPED 3845. Advanced Principles and Procedures in Reading and Writing for Students with Disabilities. This course focuses on the etiology and treatment of developmental reading and writing problems in children. Methods for designing effective instruction/interventions, principles that apply for defining current level of functioning, and monitoring learner progress are emphasized. [3]

SPED 3850. Administering Ethical Behavior Analytic Services. This course provides a forum for students to discuss challenges to the ethical practice of behavior analysis in applied settings. Students will be expected to critically analyze the pros and cons of various existing behavioral consultation models weighing the standards set forth by the Behavior Analyst Certification Board’s (BACB) Guidelines for Responsible Conduct against the fiscal limitations of a working business model. Additionally, students will be required to design (or adapt) an ethical model of consultation for their own practice. [3]

SPED 3860. Advanced Procedures in Classroom Management and Social Skills Instruction for Students with Mild/Moderate Disabilities. Focuses on current teaching practices in the field, with an emphasis on examination of research bases of effective teaching with students with behavior problems. Covers procedures for serving learners with behavior problems who are served by consultant, resource, and self contained teachers. Students are expected to synthesize and analyze research on effective teaching and management practices, and to apply the knowledge to classroom situations for students with behavior problems. [3]

SPED 3870. Accommodating Diversity in the Classroom. Explores the importance and difficulty of teaching heterogeneously grouped students in mainstream classrooms and offers specific instructional strategies for doing so effectively. Focuses explicitly and exclusively on methods to help classroom teachers instruct and manage the behavior of a broad range of students--students with and without disabilities at multiple points along the achievement continuum. (Not currently offered)

SPED 3880. Teaching Special Education in Secondary Schools. This course consists of two components. The first focuses on an overview of special education in secondary schools. Emphasis will be placed on specific secondary models, characteristics of high school students with disabilities, and dropout prevention. The second focuses on empirically-based test taking, study, self-monitoring, and self-advocacy strategies. Accommodations for students with disabilities within content areas are also emphasized. [3]

SPED 3900. Special Topics in Special Education. Explores special issues or topics related to Special Education. May be repeated for credit with change of topic. [1-3]

SPED 3930. Seminar in Special Education. Enables students to explore and acquire depth in special topic areas directly related to their own objectives. [1-4]

SPED 3937. Seminar: Issues and Trends in Early Childhood Special Education. Topical seminar in research issues relevant to early childhood/ special education. [1-3]

SPED 3950. Internship in Special Education. Supervised on-site experience in a professional role. Opportunity to demonstrate advanced competencies while serving as teacher, counselor, research associate, administrative aide, or other member of professional teams. Consent of major professor required. [1-12]

SPED 3960. Readings and Research in Special Education. Individual programs of reading or research for students. May be repeated. Consent of instructor required. [1-3]

SPED 3995. Half-time Ph.D. Dissertation Research. Ph.D. Dissertation Research. For students who have completed 72 hours and devote a half-time effort to dissertation research. [0]
Speech Language Pathology

SLP 5300. Neurology of Speech and Language. The structure and function of the nervous system, with emphasis on the neural mechanisms of speech and language. Neurologic conditions producing speech and language disorders are surveyed. FALL. [3]

SLP 5301. Acoustics and Perception of Speech and Speech Disorders. An examination of the processes of speech production, acoustics, and perception. Emphasis on relevant literature and research techniques in speech science. FALL. [3]

SLP 5304. Child Language Acquisition. The components and processes of normal language development. Relations between language acquisition and social and cognitive aspects of child development as well as literacy development. Survey of developmental psycholinguistic research. This course is appropriate for graduate students with or without previous coursework in language development. FALL. [3]

SLP 5311. Stuttering. Significant research in the field of stuttering, with emphasis on etiology and therapy. The management of fluency disturbances. SPRING. [3]

SLP 5314. Articulation Disorders and Clinical Phonetics. The etiology, evaluation, and management of articulatory defects in children and adults. Prerequisite: consent of instructor. FALL. [3]

SLP 5317. Traumatic Brain Injury. Pathophysiology of traumatic brain injury in children and adults; unique and common sequelae, the evaluation and treatment of cognitive/communicative deficits, and special problems of the population. Prerequisite 5300 or 5331 or consent of instructor. SUMMER. [2]

SLP 5319. Dysphagia. The study of the normal and disordered swallow in pediatric and adult populations. Anatomy and physiology, videofluoroscopic and other assessment procedures, as well as various treatment alternatives and techniques are included. FALL. [3]

SLP 5323. Communication in Autism Spectrum Disorders. The course addresses basic theories and principles associated with communication assessment of and intervention for children with Autism Spectrum Disorders. Auditory characteristics, causative factors, classroom structure, behavior management, communication strategies, social and peer interaction, and family-focused practices are also reviewed. This class also will provide an overview of typical social, play, and linguistic development compared to the features and behavioral characteristics of autism spectrum disorders (ASD). FALL [2]

SLP 5324. Feeding and Swallowing Disorders in Children. This course focuses on the assessment, diagnosis, and management of dysphagia in children including the role of the speech-language pathologist and multidisciplinary and family-centered, family-supported management. Prerequisite: SLP 5319. SPRING. [1]

SLP 5331. Aphasia. The study of aphasia in adults, including the neuroanatomical basis, etiologies, symptomatology, assessment, differential diagnosis, and treatment. SPRING. [3]

SLP 5335. Augmentative and Alternative Communication. This course will cover the theory, rationale, and methods for use of augmentative and alternative communication (AAC) systems with patients with physical, intellectual, and/or cognitive disabilities. Students will be exposed to various low- and high-technology AAC systems and learn how and when to apply each in the treatment of patients with complex communication needs. FALL. [2]

SLP 5336. Voice Disorders. Theories of voice production, with emphasis upon underlying mechanisms that cause vocal defects. Procedures for group and individual management. SUMMER. [2]

SLP 5338. Research Methods in Communicative Disorders. Research techniques and procedures. Analysis of research examples from the literature. Study of design of experiment, data collection, statistical analysis, and presentation of research findings. FALL. [1]

SLP 5348. Introduction to Audiology. An introduction to current issues, problems, and trends in audiology. The following topics are discussed: acoustics, anatomy and physiology of the auditory system, common pathologies of the auditory system, assessment of auditory function, audiogram interpretation, early identification and intervention, amplification and rehabilitation. This is an introductory course and is designed for students without previous coursework in this area of study. FALL [3]

SLP 5357. Professional Issues in Communication Disorders. Examines various professional issues within the fields of speech-language pathology and audiology. For example, ethics, malpractice, quality improvement, marketing, reimbursement, multicultural sensitivity, and federal legislation. SPRING. [1]

Theatre

THTR 202W. Histories of Theatre and Drama II: The European Stage. Including the Italian Renaissance, French neoclassicism, English Restoration, German and French romanticism, and the modemist movements of realism, symbolism, Dada and futurism, expressionism, epic theatre, and absurdism. [3]

THTR 204. Histories of Theatre and Drama III: The U.S. Stage. Including British colonial and revolutionary drama; frontier theatre; melodrama; minstrelsy, vaudeville, burlesque, and the musical stage; pageantry and community theatre; postwar realism; African-American, Chicana/o, feminist, and Asian-American theatre movements. [3]

THTR 206W. Contemporary Drama and Performance Criticism. Dramatic literature and performance theory. Advanced techniques in writing performance criticism. No credit for students who have earned credit for 203. Prerequisite: at least sophomore standing and 100, 100W, or 115F. [3]

THTR 232. Shakespeare in the Theatre. Selected plays and scenes. Theoretical and practical exploration of script, theatre, and audience in terms of production past and present. Prerequisite: at least junior standing. [3]

Women’s and Gender Studies

WGS 201. Women and Gender in Transnational Context. Gender as a social construction. Feminist critiques of knowledge, family and work, sexuality, health and medicine, and the women’s movement. The future of feminism in global context. Prerequisite: 150 or 150W. [3]

WGS 301. Gender and Sexuality: Feminist Approaches. Interdisciplinary introduction to the major debates, theoretical terms, and research methods in feminist, gender, sexuality, and queer studies. [3]

WGS 302. Gender and Pedagogy. Feminist theories of teaching and learning; gender and diversity in the classroom; critical pedagogy. [1]

WGS 389. Independent Study. Work in a tutorial relationship with an individual faculty member or in a student seminar, subject to faculty approval, should several students share a common interest. May be repeated for credit more than once if there is no duplication in topic, but students may earn only up to 3 credits per semester of enrollment. [1-3]

Emilie Townes.

University Honors Held by Members of the Vanderbilt Faculty

The Harvie Branscomb Distinguished Professor Award, begunug in 1964 and awarded annually for a period of one
year, recognizes the distinguished accomplishment of a faculty member in furthering the aims of the university. The
award is made by the Chancellor on recommendation of the Consultant Committee of the Faculty Senate.

1964 AMOS CHRISTIE, Professor of Pediatrics
1965 WILLARD B. JEWELL, Professor of Geology
1966 AVERY LEISERSON, Professor of Political Science
1967 NICHOLAS GEORGESCU-ROËGEN, Distinguished Professor of Economics
1968 CHARLES RAWLINGS PARK, Professor of Physiology
1969 JAMES PHILIP HYATT, Professor of Old Testament
1970 CHARLES F. DELZELL, Professor of History
1971 DEWEY W. GRANTHAM, Professor of History
1972 ELLIOT V. NEWMAN, Joe and Morris Werthan Professor of Experimental Medicine
1973 WILLIAM H. NICHOLLS, Professor of Economics
1974 BJARNI JONSSON, Distinguished Professor of Mathematics
1975 D. STANLEY TARBEI, Distinguished Professor of Chemistry
1976 JOHNN WADE, Distinguished Professor of Law
1977 WALTER HARRELSON, Distinguished Professor of Old Testament
1978 SIDNEY P. COLOWICK, American Cancer Society–Charles Hayden Foundation Professor of Microbiology
1979 GRANT W. LIDDLE, Professor of Medicine
1980 RENDIGS T. FELS, Professor of Economics

1981 DOUGLAS E. LEACH, Professor of History
1982 OSCAR TOUSTER, Professor of Molecular Biology
1983 JOSEPH H. HAMILTON, Landon C. Garland Distinguished Professor of Physics
1984 MILDRED R. STAHLMAN, Professor of Pediatrics
1985 HANS H. STRUPP, Distinguished Professor of Psychology
1986 WILLIAM C. HAVARD, JR., Professor of Political Science
1987 ALFRED A. BAUMEISTER, Professor of Psychology and Special Education
1988 LEON W. CUNNINGHAM, Professor of Biochemistry
1989 SALLIE MCFAGUE, E. Rhodes and Leona B. Carpenter Professor of Theology
1990 DAVID T. KARZON, Professor of Pediatrics
1991 LAURENCE D. LERNER, Edwin Mims Professor of English
1992 CAROLYN M. EVERTSON, Professor of Education
1993 FRANK CHYTIL, Professor of Biochemistry; General Foods Distinguished Professor of Nutrition; Assistant Professor of Medicine
1994 FRANK L. PARKER, Distinguished Professor of Environmental and Water Resources Engineering; Professor of Management of Technology
1995 MELVIN D. JOESTEN, Professor of Chemistry; Professor of Education
1996 ROBERT D. COLLINS, Professor of Pathology
1997 PAUL K. CONKIN, Distinguished Professor of History
1998 JOHN A. OATES, Thomas F. Frist Professor of Medicine
1999 TRAVIS I. THOMPSON, Professor of Psychology, Peabody College; Professor of Psychology, College of Arts and Science; Professor of Special Education; Professor of Psychiatry
2000 LAWRENCE J. MARNET, Mary Geddes Stahlman Chair in Cancer Research; Professor of Biochemistry; Professor of Chemistry
2001 ANN P. KAISER, Professor of Special Education; Professor of Psychology, Peabody College; Director, Research Program on Communication, Cognitive, and Emotional Development, John F. Kennedy Center
2002 THOMAS R. HARRIS, Professor of Biomedical Engineering and Chair of the Department; Professor of Chemical Engineering; Professor of Medicine
2003 JOHN A. PHILLIPS III, David T. Karzon Professor of Pediatrics; Professor of Biochemistry; Professor of Medicine; Investigator, John F. Kennedy Center for Research on Human Development
2004 ROBERT S. DITTUS, Joe and Morris Werthan Professor of Investigative Medicine; Professor of Medicine; Director, Division of General Internal Medicine
2005 HAROLD L. MOSES, Hortense B. Ingram Professor of Molecular Oncology; Professor of Cancer Biology; Professor of Pathology; Professor of Medicine; Director, Emeritus, Vanderbilt-Ingram Cancer Center
2006 ELAINE SANDERS-BUSH, Professor of Pharmacology; Professor of Psychiatry; Investigator, Vanderbilt Kennedy Center for Research on Human Development; Director, Vanderbilt Brain Institute
2007 CECILIA TICHI, William R. Kenan, Jr., Professor of English
2008 DANIEL B. CORNFIELD, Professor of Sociology
2009 RONALD D. SCHRAMPF, Olin Henry Ingram Professor of Engineering; Professor of Electrical Engineering; Professor of Computer Engineering
2010 WILLIAM SCHAFFNER, Professor of Preventive Medicine and Chair of the Department; Professor of Medicine
2011 DAVID JON FURBISH, Professor of Earth and Environmental Sciences; Professor of Civil and Environmental Engineering
2012 SUZIANNA SHERRY, Professor of Law
2013 DONNA FORD, Professor of Special Education
2014 JAY CLAYTON, William R. Kenan Jr. Professor of English; Director of the Curb Center for Art, Enterprise, and Public Policy
The Alexander Heard Distinguished Service Professor Award was established in 1982 to honor Chancellor Alexander Heard at the time of his retirement. The title is conferred annually, for a one-year period, upon a faculty member in recognition of distinctive contributions to the understanding of contemporary society.

1983 DAVID J. WILSON, Professor of Chemistry
1984 DAVID RABIN, Professor of Medicine
1985 ERWIN C. HARGROVE, Professor of Political Science; Professor of Education
1986 ALFRED A. BAUMEISTER, Professor of Psychology, Peabody College
1987 WALTER HARRELSON, Distinguished Professor of Old Testament
1988 FRANK L. PARKER, Professor of Environmental and Water Resources Engineering; Professor of Management of Technology
1989 W. ANDERSON SPICKARD, JR., Professor of Medicine
1990 FRANK A. SLOAN, Centennial Professor of Economics
1991 LISTON O. MILLS, Oberlin Alumni Professor of Pastoral Theology and Counseling
1992 RICHARD A. PRIDE, Associate Professor of Political Science
1993 H. CARL HAYWOOD, Professor of Psychology, Peabody College; Professor of Neurology
1994 THOMAS A. MAHONEY, Frances Hampton Currey Professor of Organization Studies
1995 KARL B. SCHNELLE, JR., Professor of Chemical Engineering; Professor of Environmental Engineering
1996 SUSAN FORD WILTSHIRE, Professor of Classics
1997 KENNETH A. DODGE, Professor of Psychology; Professor of Psychiatry
1998 PAUL K. CONKIN, Distinguished Professor of History
1999 JONATHAN I. CHANREY, Professor of Law
2000 HUGH DAVIS GRAHAM, Holland N. McTyre Professor of History; Professor of Political Science
2001 JOHN J. SIEGFRIED, Professor of Economics
2002 DAVID J. ERNST, Professor of Physics
2003 VIRGINIA L. SHEPHERD, Professor of Pathology; Professor of Biochemistry; Professor of Medicine
2004 ELLEN B. GOLDRING, Professor of Educational Policy and Leadership
2005 KATHRYN M. EDWARDS, Professor of Pediatrics; Director, Division of Pediatric Clinical Research
2006 JAMES W. GUTHRIE, Professor of Public Policy and Education; Director, Peabody Center for Education Policy; Chair, Department of Leadership, Policy, and Organizations
2007 STEVEN D. HOLLON, Professor of Psychology, College of Arts and Science; Professor of Psychology, Peabody College; Associate Professor of Psychiatry; Investigator, Vanderbilt Kennedy Center for Research on Human Development
2008 DALE C. FARRAN, Professor of Education; Professor of Psychology, Peabody College; Member, Vanderbilt Kennedy Center for Research on Human Development
2009 C. NEAL TATE, Professor of Political Science and Chair of the Department; Professor of Law
2010 NANCY J. KING, Lee S. and Charles A. Speir Professor of Law
2011 ROBERT BAPSKY, Professor of French and Comparative Literature
2012 SOHEE PARK, Professor of Psychology
2013 GREGORY F. BARZ, Associate Professor of Musicology (Ethnomusicology)
2014 TERESA A. GODDU, Associate Professor of English; Associate Professor of American Studies

The Earl Sutherland Prize for Achievement in Research was initiated in 1976. It is awarded annually to a member of the Vanderbilt faculty whose achievements in research, scholarship, or creative expression have had significant critical reception and are recognized nationally or internationally. The recipient is chosen by the Chancellor on recommendation of the University Research Council.

1976 NICHOLAS GEORGESCU-ROEGEN, Distinguished Professor of Economics
1977 STANLEY COHEN, Distinguished Professor of Biochemistry; American Cancer Society Research Professor of Biochemistry
1978 CLAIRE PICHOIS, Distinguished Professor of French
1979 GRANT W. LIDDLE, Professor of Medicine
1980 JOHN W. WADE, Distinguished Professor of Law
1981 SIDNEY FLEISCHER, Professor of Molecular Biology
1982 BJARNI JONSSON, Distinguished Professor of Mathematics
1983 DONALD A. DAVIE, Andrew W. Mellon Professor of Humanities and Professor of English
1984 CHARLES RAWLINSON PARK, Professor of Physiology
1985 JON H. KAAS, Professor of Psychology
1986 LUBOMIR HNILICA, Professor of Biochemistry
1987 HANS H. STRUPP, Distinguished Professor of Psychology
1988 JOSEPH H. HAMILTON, Landon C. Garland Distinguished Professor of Physics
1989 PAUL K. CONKIN, Distinguished Professor of History
1990 TADASHI INAGAMI, Professor of Biochemistry
1991 EDWARD FARLEY, Drucilla Moore Buffalo Professor of Theology
1992 JAMES F. BLUMSTEIN, Professor of Law
1993 THOMAS M. HARRIS, Centennial Professor of Chemistry
1994 JOHN H. EXTON, Professor of Molecular Physiology and Biophysics
1995 GISELA MOSIG, Professor of Molecular Biology
1996 HANS R. STOLL, Anne Marie and Thomas B. Walker Jr. Professor of Finance
1997 JOHN D. BRANSFORD, Centennial Professor of Psychology
1998 ALICE C. HARRIS, Professor of Linguistics and Chair of the Department of Germanic and Slavic Languages; Professor of Anthropology
1999 TRAVIS I. THOMPSON, Professor of Psychology, Peabody College; Professor of Psychology, College of Arts and Science; Professor of Special Education; Professor of Psychiatry
2000 RANDOLPH BLAKE, Centennial Professor of Psychology, College of Arts and Science; Investigator and Senior Fellow, John F. Kennedy Center
2001 F. PETER GUENGERTICH, Professor of Biochemistry; Director, Center in Molecular Toxicology
2002 DAVID M. HERCULES, Centennial Professor of Chemistry
2003 LEONARD BICKMAN, Professor of Psychology, Peabody College; Associate Dean for Research, Peabody College; Professor of Psychiatry; Director, Mental Health Policy Center, Institute for Public Policy Studies; Member, John F. Kennedy Center for Research on Human Development
2004 HERBERT Y. MELTZER, Bixler/Johnson/Mays Professor of Psychiatry; Professor of Pharmacology; Director, Division of Psychopharmacology
2005 LYNN S. FUCHS, Professor of Special Education; Nicholas Hobbs Chair in Special Education and Human Development; Investigator, Vanderbilt Kennedy Center for Research on Human Development
2007 DOUGLAS FUCHS, Professor of Special Education; Nicholas Hobbs Chair in Special Education and Human Development; Investigator, Vanderbilt Kennedy Center for Research on Human Development
2008 L. JACKSON ROBERTS II, Professor of Pharmacology; Professor of Medicine; Investigator, Center for Molecular Neuroscience
2009 DAVID ROBERTSON, Elton Yates Professor of Autonomic Disorders; Professor of Medicine; Professor of Pharmacology; Professor of Neurology; Investigator, Center for Molecular Neuroscience
2008 LENN E. GOODMAN, Andrew W. Mellon Professor of Humanities; Professor of Philosophy
2009 HAROLD L. MOSES, Hortense B. Ingram Professor of Molecular Oncology; Professor of Cancer Biology; Professor of Pathology; Professor of Medicine; Director, Emeritus, Vanderbilt-Ingram Cancer Center
2010 JOHN A. OATES, Thomas F. Frist Sr. Professor of Medicine; Professor of Pharmacology
2011 MARK W. LIPSEY, Professor of Human and Organizational Development
2012 PETER I. BUERHAUS, Valere Potter Professor of Nursing
2013 JOHN C. GORE, University Professor of Radiology and Radiological Sciences; Hertha Ramsey Cress Chair in Medicine; Professor of Biomedical Engineering; Professor of Physics and Astronomy; Professor of Molecular Physiology and Biophysics; Director, Institute for Imaging Science

The Joe B. Wyatt Distinguished University Professor Award, created to honor Chancellor Wyatt upon his retirement in 2000, recognizes the development of significant new knowledge from research or exemplary innovation in teaching, particularly accomplishments that span multiple academic disciplines. The recipient of this annual award is chosen by the Chancellor from nominations by members of the faculty and carries the title for one year.

2001 DOUGLAS FUCHS, Professor of Special Education; Co-Director, Research Program on Learning Accommodations for Individuals with Special Needs, John F. Kennedy Center
LYNN S. FUCHS, Professor of Special Education; Co-Director, Research Program on Learning Accommodations for Individuals with Special Needs, John F. Kennedy Center

2002 JUDY G. OZBOLT, Independence Chair in Nursing; Professor of Nursing; Professor of Biomedical Informatics

2003 PAUL A. COBB, Professor of Education

2004 MARSHALL C. EAKIN, Professor and Chair of History

2005 GARY F. JENSEN, Professor of Sociology and Chair of the Department; Professor of Religious Studies

2006 SANKARAN MAHADEVAN, Professor of Civil and Environmental Engineering; Professor of Mechanical Engineering

2007 KENNETH A. WALLSTON, Professor of Psychology in Nursing; Professor of Psychology, Peabody College; Professor of Psychology, College of Arts and Science; Member, Vanderbilt Kennedy Center for Research on Human Development

2008 DAVID CHARLES WOOD, Centennial Professor of Philosophy; Professor of Philosophy

2009 DANA D. NELSON, Gertrude Conaway Vanderbilt Professor of English; Professor of English

2010 DAVID S. KOSSON, Professor of Civil and Environmental Engineering and Chair of the Department; Professor of Chemical Engineering; Professor of Earth and Environmental Sciences

2011 BRUCE COMPAS, Patricia and Rodes Hart Chair in Psychology and Human Development

2012 JANOS SZITAPANOVITS, Professor of Electrical and Computer Engineering

2013 TOM D. DILLEHAY, Rebecca Webb Wilson University Distinguished Chair In Anthropology and Religion and Culture

2014 OWEN D. JONES, New York Alumni Chancellor’s Chair in Law; Professor of Law; Professor of Biological Sciences

University Professorships, Named and Distinguished Professorships and Chairs

DALE P. ANDREWS, Distinguished Professor of Homiletics and Social Justice

CELIA STEWART APPLEGATE, William R. Kenan, Jr., Chair in History

ELLEN T. ARMOUR, E. Rhodes and Leona B. Carpenter Associate Professor of Feminist Theology

CARLOS L. ARTEAGA, Vice Chancellor’s Professor of Breast Cancer Research

MICHAEL ASCHNER, Gray E. B. Stahlman Professor of Neuroscience

DAVID M. BADER, Gladys Parkinson Stahlman Professor of Cardiovascular Research

HOUSTON A. BAKER, JR., University Distinguished Professor of English

H. SCOTT BALDWIN, Katrina Overall McDonald Professor of Pediatrics

JEFFREY R. BALSER, James Tayloe Gwathmey Clinician Scientist

BRUCE BARRY, Brownlee O. Currey Professor of Management

LARRY M. BARTELS, May Werthan Shayne Chair in Public Policy and Social Science

R. DANIEL BEAUCHAMP, John Clinton Foshee Distinguished Professor of Surgery

MICHAEL D. BESS, Chancellor’s Chair in History

DAVID BLACKBURN, Cornelius Vanderbilt Distinguished Chair In History

JOSEPH D. BLACKBURN, JR., James A. Speyer Professor of Production Management

RICHARD BLACKETT, Andrew Jackson Chair in American History

RANDOLPH BLAKE, Centennial Professor of Psychology

RANDY D. BLAKEY, Allan D. Bass Professor of Pharmacology

ERIC W. BOND, Joe L. Roby Chair in Economics

RICHARD M. BREYER, John B. Youmans Professor of Medicine

KENDAL SCOT BROADIE, Stevenson Chair in Neurobiology

H. ALEX BROWN, Ingram Associate Professor of Cancer Research

NANCY J. BROWN, Robert H. Williams Professor of Medicine

J. PATOUT BURNS, Edward A. Malloy Professor of Catholic Studies

WILLAM CAFERRO, Gertrude Conaway Vanderbilt Chair in History

RICHARD M. CAPRIO, Stanley Cohen Professor of Biochemistry

DAVID P. CARBONE, Harold L. Moses Professor of Cancer Research

KENNETH C. CATANIA, Stevenson Chair in Biological Sciences

WALTER J. CHAZIN, Chancellor’s Professor of Biochemistry and Physics

ALAN D. CHERRINGTON, Jacquelyn A. Turner and Dorothy J. Turner Professor of Medicine

DAVID P. CARBONE, Harold L. Moses Professor of Cancer Research

WILLIAM G. CHRISTIE, Frances Hampton Currey Professor of Finance

LARRY R. CHURCHILL, Ann Geddes Stahlman Professor of Medical Ethics

ELLEN WRIGHT CLAYTON, Craig-Weaver Chair in Pediatrics

JAY CLAYTON, William R. Kenan, Jr., Chair in English

ROBERT J. COFFEY, John B. Wallace Professor of Medicine

MARK A. COHEN, Justin Potter Distinguished Professor of American Competitive Business

ROBERT D. COLLINS, John L. Shapiro Professor of Pathology

WILLIAM COLLINS, Terence E. Adderley, Jr., Chair in Economics

BRUCE E. COMPAS, Patricia and Rodes Hart Professor of Psychology and Human Development

BRUCE COOIL, Dean Samuel B. and Evelyn R. Richmond Professor of Management (Statistics)

PETER T. CUMMINGS, John R. Hall Professor of Chemical Engineering

RICHARD L. DAFT, Brownlee O. Currey Jr. Professor of Management (Organizational Studies)

RICHARD T. D’AQUILA, Addison B. Scoville Professor of Medicine

ANDREW DAUGHETY, Gertrude Conaway Vanderbilt Chair in Economics

STEPHEN NEIL DAVIS, Mark Collie Professor of Diabetes Research

COLIN DAYAN, Robert Penn Warren Chair in the Humanities

ARTHUR A. DEMAREST, Ingram Chair in Anthropology

EMMANUELE DIBENEDETTO, Centennial Professor of Mathematics

DENNIS C. DICKERSON, Reverend James M. Lawson, Jr., Chair in History

TOM Dillehay, Rebecca Webb Wilson University Distinguished Chair in Anthropology and Religion and Culture

RAYMOND C. DUBOIS, JR., Mina Cobb Wallace Chair in Gastroenterology and Cancer Prevention

TONY LEE EARLEY, Samuel Milton Fleming Chair in English

JAMES W. ELY, JR., Milton R. Underwood Chair in Free Enterprise

RONALD B. EMESON, Joel G. Hardman Professor of Pharmacology

LYNN E. ENTERLINE, Nancy Perot Mulford Chair in English

JAMES A. EPSTEIN, Distinguished Professor of History

EDWARD H. FRIEDMAN, Gertrude Conaway Vanderbilt Chair in Spanish

Marilyn A. Friedman, W. Alton Jones Chair in Philosophy

RAYMOND A. FRIEDMAN, Brownlee O. Currey Professor of Management (Organization Studies)

MARK E. FRISSE, Accenture Professor of Biomedical Informatics

LUKE M. FROEB, William and Margaret Oehmig Associate Professor of Free Enterprise and Entrepreneurship

ISABEL GAUTHIER, David K. Wilson Chair in Psychology

JOHN G. GEER, Gertrude Conaway Vanderbilt Chair in Political Science

ALFRED L. GEORGE, JR., Grant W. Liddle Professor of Medicine

JAMES RICHARD GOLDBRING, Paul W. Sanger Professor of Experimental Surgery

MICHAEL GOLDFARB, H. Fort Flowers Professor of Mechanical Engineering

LENN E. GOODMAN, Andrew W. Mellon Chair in the Humanities
HELMUT WALSER SMITH, Martha Rivers Ingram Chair in History
HORTENSE J. SPILLERS, Gertrude Conaway Vanderbilt Chair in English
SUBRAMANIAM SIRIRAM, William C. Weaver III Professor of Experimental Neurology
WILLIAM W. STEAD, McKesson Foundation Professor of Biomedical Informatics
TONY K. STEWART, Gertrude Conaway Vanderbilt Chair in the Humanities
HANS R. STOLL, Anne Marie and Thomas B. Walker Jr. Professor of Finance
KEVIN STRANGE, John C. Parker Professor of Anesthesiology
GARY ALLEN SULIKOWSKI, Stevenson Chair in Chemistry
SHERIF ABDELWAHED, Visiting Associate Professor
CECELIA TICHI, William R. Kenan, Jr., Chair in English
JULIE ADAMS, Associate Professor of Computer Science and Associate Professor of Computer Engineering
JOHN F. AHNER, Professor of Mathematics
B.A., Ph.D. (Delaware 1967, 1972) [1974]
CHRISTOPHER R. AIKEN, Professor of Pathology, Microbiology and Immunology
B.S. (California, Santa Barbara 1983); Ph.D. (Illinois, Champaign 1991) [1995]
SCOTT F. AIKIN, Assistant Professor of Philosophy; Assistant Professor of Classics
A.B. (Washington University 1994); M.A. (Montana 1999); Ph.D. (Vanderbilt 2006) [2006]
YASIN ALAN, Assistant Professor of Management
MELINDA ALDRICH, Assistant Professor of Thoracic Surgery; Assistant Professor of Medicine (Epidemiology)
B.A. (California, Santa Cruz 1992); M.P.H., Ph.D. (California, Berkeley 2003, 2007) [2013]
AKRAM ALDROUBI, Professor of Mathematics
M.S. (Swiss Federal Institute of Technology 1982); Ph.D. (Carnegie Mellon 1987) [1997]
HOLLY M. ALGOOD, Assistant Professor of Medicine; Assistant Professor of Pathology, Microbiology and Immunology
B.S. (Mount Union 1998); Ph.D. (Pittsburgh 2003) [2008]
MICHAEL L. ALLES, Research Professor of Electrical Engineering
BRANDON A. ALLY, Assistant Professor of Neurology; Assistant Professor of Psychology; Assistant Professor of Psychiatry
CANDICE AMICH, Assistant Professor of English
ADAM W. ANDERSON, Associate Professor of Biomedical Engineering; Director, Undergraduate Studies, Biomedical Engineering
KATHRYN H. ANDERSON, Professor of Economics
VICTOR ANDERSON, Oberlin Theological School Chair; Professor of Ethics and Society
CLAUDIA D. ANDL, Assistant Professor of Surgery; Assistant Professor of Cancer Biology
PAUL A. ANDREWS, Distinguished Professor of Homiletics and Social Justice
CELIA APPLEGATE, William R. Kenan, Jr. Chair of History; Professor of History; Vice Chair of History
B.A. (Bryn Mawr 1981); Ph.D. (Stanford 1987) [2012]
ELLEN ARMOUR, E. Rhodes and Leona B. Carpenter Associate Professor of Feminist Theory; Associate Professor of Philosophy; Director of the Carpenter Program in Religion, Gender and Sexuality
B.A. (Stetson 1980); M.A., Ph.D. (Vanderbilt 1989, 1993) [2006]
RICHARD N. ARMSTRONG, Professor of History
B.A. (Western Illinois 1970); Ph.D. (Marquette 1975) [1987]
DAVID MICHAEL ARONOFF, Associate Professor of Medicine; Director, Division of Infectious Diseases
B.S. (Indiana, Fort Wayne 1991); M.D. (Tufts 1995) [2013]
CARLOS L. ARTEAGA, Donna S. Hall Chair in Breast Cancer; Professor of Medicine; Professor of Cancer Biology
LEON M. BELLAN, Assistant Professor of Mechanical Engineering
B.S. (California State Polytechnic 2003); M.S., Ph.D. (Cornell 2007, 2008) [2013]

CAMILLA PERSSON BENBOW, Patricia & Rodes Hart Dean of Education & Human Development; Professor of Psychology

RALF BENNARTZ, Professor of Earth and Environmental Sciences
M.S. (Hamburg [Germany] 1994); Ph.D. (Freie Universitat Berlin 1997) [2013]

BRET V. BENSON, Associate Professor of Political Science
B.A. (Brigham Young 1998); M.A. (Duke 2006); Ph.D. (Duke 2006) [2006]

SUSAN BERK-SELIGSON, Professor of Spanish, Emerita
B.A. (CUNY, Brooklyn College 1967); M.A. (Pittsburgh 1971); Ph.D. (Arizona 1978) [2004]

ANDREAS BERLIND, Associate Professor of Physics and Astronomy
B.A. (Princeton 1995); Ph.D. (Ohio State 2001) [2007]

FRED H. BESS, Professor of Hearing and Speech Sciences; Professor of Otolaryngology
A.B. (Carthage 1962); M.S. (Vanderbilt 1964); Ph.D. (Michigan 1970) [1976]

KIMBERLY D. BESS, Assistant Professor of HOD

MICHAEL D. BESS, Chancellor’s Professor of History
B.A. (Reed 1979); M.A., Ph.D. (California, Berkeley 1983, 1989) [1989]

ALBERT H. BETH, Professor of Molecular Physiology and Biophysics
B.S. (Murray State 1974); Ph.D. (Vanderbilt 1977) [1977]

BHARAT L. BHUVA, Professor of Computer Engineering; Director, Graduate Studies, Electrical Engineering
B.S. (Maharaja Sayajirao [India] 1982); M.S., Ph.D. (North Carolina State 1984, 1987) [1987]

ITALO O. BIAGGIONI, Professor of Medicine; Professor of Pharmacology
M.D. (Universidad Peruana 'Cayetano Heredia' [Peru] 1980) [1986]

LEONARD BICKMAN, Professor Emeritus of Psychology; Research Professor of Psychology & Human Development
B.S. (City College of New York 1963); M.A. (Columbia 1965); Ph.D. (CUNY 1969) [1981]

DIETMAR BISCH, Professor of Mathematics; Chair of Department of Mathematics; Director of Center for Noncommutative Geometry and Operator Algebras

MARCEL BISCHOFF, Assistant Professor of Mathematics
Diploma (Georg-August-Universitat Gottingen [Germany] 2009); Ph.D. (Rome “Tor Vergata” [Italy] 2012) [2014]

GAUTAM BISWAS, Professor of Computer Science and Professor of Computer Engineering; Professor of Engineering Management

CARWIL ROBERT BJORK-JAMES, Assistant Professor of Anthropology
B.A. (Northwestern 1999); M.M.P. (Chicago, IL 1998); M.Phil., Ph.D. (CUNY 2010, 2013) [2013]

DAVID BLACKBOURN, Cornelius Vanderbilt Distinguished Chair of History; Professor of History

RICHARD J. M. BLACKETT, Andrew Jackson Professor of American History

B.S. (Florida State 1990); M.S., Ph.D. (Vanderbilt 1994, 1999) [1999]

TIMOTHY SCOTT BLACKWELL, Ralph and Lulu Owen Chair in Medicine; Professor of Medicine; Professor of Cell and Developmental Biology; Professor of Cancer Biology; Director, Division of Allergy, Pulmonary & Critical Care
B.A. (Vanderbilt 1983); M.D. (Alabama, Birmingham 1989) [1995]

RANDOLPH BLAKE, Centennial Professor of Psychology; Professor of Ophthalmology and Visual Sciences; Vice Chair of Psychology
B.A. (Texas 1967); M.A., Ph.D. (Vanderbilt 1969, 1972) [1988]

JESSE A. BLOOMER, Assistant Professor of Management
B.S. (Virginia Polytechnic Institute 1997); M.S. (Massachusetts Institute of Technology 1998); Ph.D. (North Carolina 2012) [2012]

JEFFREY D. BLUME, Associate Professor of Biostatistics; Director, Graduate Studies; Director, Biostatistics Collaboration Center
B.A. (SUNY, Buffalo 1994); Ph.D. (Johns Hopkins 1999) [2008]

ANGELA BOATMAN, Assistant Professor of Public Policy and Higher Education

PAUL E. BOCK, Professor of Pathology, Microbiology and Immunology; Professor of Medicine
B.A. (California, San Diego 1971); Ph.D. (Washington University 1976) [1991]

ROBERT E. BODENHEIMER, Associate Professor of Computer Science; Associate Professor of Electrical Engineering; Director, Undergraduate Studies, Computer Science

JAMES W. BODFISH, Professor of Hearing and Speech Sciences; Professor of Psychiatry

NICOLAS P. B. BOLLEN, E. Bronson Ingram Chair of Finance; Professor of Finance

KIRILL BOLOTIN, Assistant Professor of Physics
B.S., M.S. (Moscow Institute of Physics and Technology [Russia] 1998, 2000); Ph.D. (Cornell 2006) [2009]

ERIC W. BOND, Joe L. Roby Professor of Economics; Vice Chair of Economics
B.S. (Lehigh 1974); M.A., Ph.D. (Rochester 1977, 1979) [2003]

WILLIAM JAMES BOOTH, Professor of Political Science

MARK R. BOOTHBY, Professor of Pathology, Microbiology and Immunology; Professor of Medicine

SETH R. BORDENSTEIN, Associate Professor of Biological Sciences; Associate Professor of Pathology, Microbiology and Immunology

DARRYL J. BORNHOP, Professor of Chemistry

ALAN R. BOWERS, Associate Professor of Civil and Environmental Engineering

AARON B. BOWMAN, Assistant Professor of Neurology; Assistant Professor of Pediatrics
B.S. (Brigham Young 1995); Ph.D. (California, San Diego 2000) [2006]

STEVEN J. BRANDT, Professor of Medicine; Professor of Cancer Biology; Professor of Cell and Developmental Biology
B.S. (Duke 1976); M.D. (Emory 1981) [1980]

MARY A. BRANTLEY, Assistant Professor of Ophthalmology & Visual Sciences

GENE W. BRATT, Associate Professor of Hearing and Speech Sciences
B.A. (Calvin 1969); M.A. (Michigan State 1975); Ph.D. (Vanderbilt 1980) [1988]
STACEY FLOYD-THOMAS, Associate Professor of Ethics and Society

SARAH FOGEL, Professor of Nursing
B.M. (Boston University 1978); M.M. (Wayne State 1982); M.S.N., Ph.D. (Vanderbilt 1994, 2001) [1994]

AGNES B. FOGO, John L. Shapiro Chair in Pathology; Professor of Pathology, Microbiology and Immunology; Professor of Pediatrics; Professor of Medicine
B.A. (Tennessee, Chattanooga 1976); M.D. (Vanderbilt 1981) [1987]

LEONARD FOLGARAIT, Professor of History of Art

CHRISTOPHER J. FONNESBECK, Assistant Professor of Biostatistics

DONNA Y. FORD, Professor of Special Education

JAY H. FOWKE, Associate Professor of Medicine; Associate Professor of Graduate School / Faculty

JOSÉ GIL-FÉREZ, Assistant Professor of Mathematics
B.A. (Washington University 1984) [1988]

JONATHAN M. GILLIGAN, Associate Professor of Earth and Environmental Sciences
B.A. (Johns Hopkins 1971); M.S. (Pennsylvania 1973); Ph.D. (Yale 1980) [1986]

MALCOLM GETZ, Associate Professor of Economics

RENÉ H. GIFFORD, Associate Professor of Hearing and Speech Sciences; Associate Professor of Otolaryngology; Director of Pediatric Audiology & Director of Cochlear Implant Program
B.S. (Arizona State 1995); M.S. (Vanderbilt 1997); Ph.D. (Arizona State 2003) [2011]

JOSÉ GIL-FERÉZ, Assistant Professor of Mathematics

LESLEY GILL, Professor of Anthropology

JONATHAN M. GILLIGAN, Associate Professor of Earth and Environmental Sciences
B.A. (Swarthmore 1982); Ph.D. (Yale 1991) [1994]
TROY A. HACKETT, Associate Professor of Hearing and Speech Sciences

MARIA HADJIFRANGISKOU, Assistant Professor of Pathology, Microbiology and Immunology
B.S. (Clarion 2005); Ph.D. (Texas, Houston 2007) [2012]

RICHARD F. HAGLUND, JR., Stevenson Professor of Physics; Professor of Physics
B.A. (Wesleyan 1967); M.A. (Stony Brook 1968); Ph.D. (North Carolina 1975) [1984]

BARD BARBARA HAHN, Distinguished Professor of German; Professor of German

MAUREEN K. HAHN, Research Assistant Professor of Pharmacology
B.A. (Pennsylvania 1987); M.S. (Pittsburgh 1993); Ph.D. (Wayne State 1999) [2002]

SUE T. HALE, Associate Professor of Hearing and Speech Sciences

LEO HALEVI, Associate Professor of History; Associate Professor of Law

DENNIS G. HALL, Vice Provost for Research; Dean of the Graduate School; Professor of Physics; Professor of Electrical Engineering
B.S. (Illinois, Champaign 1970); M.S. (Southern Illinois 1972); Ph.D. (Tennessee 1976) [2000]

ROGER HALL, Professor of Education; Chair of Teaching & Learning

JOSEPH H. HAMILTON, Landon C. Garland Distinguished Professor of Physics
B.S. (Mississippi 1954); M.S., Ph.D. (Indiana, Bloomington 1956, 1958); D.Sc. (Mississippi 1982); Doctorate (Johann Wolfgang Goethe [Germany] 1992); D.Phil. (hon., Bucharest [Romania] 1999); D.Phil. (hon., St. Petersburg State [Russia] 2001); D.Phil. (hon., Joint Institute for Nuclear Research [Russia] 2004); D.Phil. (hon., Shukla [India] 2006); D.Sc. (hon., Berea 2007) [1958]

HEIDI E. HAMM, Aileen M. Lange and Annie Mary Lyle Chair in Cardiovascular Research; Professor of Pharmacology; Professor of Ophthalmology and Visual Sciences; Professor of Orthopaedic Surgery and Rehabilitation
B.A. (Atlantic Union 1973); Ph.D. (Texas 1980) [2000]

JACOBUS H. HAMMAN, Associate Professor of Religion, Psychology, and Culture; Director of the Program in Theology and Practice

MOZHDEH AMELIA HAMRAEI, Assistant Professor of Medicine, Health and Society
B.A., Ph.D. (Emory 2007, 2013) [2013]

STEPHEN R. HANN, Professor of Cell and Developmental Biology
A.B. (California, Berkeley 1974); Ph.D. (California, Riverside 1981) [1986]

TIMOTHY P. HANUSA, Professor of Chemistry
A.B. (Cornell 1978); Ph.D. (Indiana, Bloomington 1983) [1985]

DOUGLAS P. HARDIN, Professor of Mathematics; Professor of Biomedical Informatics
B.E.E. (Georgia Institute of Technology 1980); M.E.E. (Stanford 1982); Ph.D. (Georgia Institute of Technology 1985) [1986]

FRANK E. HARRELL, Professor of Biostatistics; Chair of the Department of Biostatistics
B.S. (Alabama, Huntsville 1973); Ph.D. (North Carolina 1979) [2003]

JOEL F. HARRINGTON, Professor of History; Chair of History

PAUL A. HARRIS, Associate Professor of Biomedical Informatics; Research Associate Professor of Biomedical Engineering
B.S. (Tennessee Technological 1987); M.S., Ph.D. (Vanderbilt 1993, 1996) [1999]

RAYMOND C. HARRIS, JR., Ann and Roscoe R. Robinson Chair in Nephrology; Professor of Medicine; Professor of Molecular Physiology and Biophysics; Director, Division of Nephrology
B.S. (Yale 1974); M.D. (Emory 1978) [1988]

VICKI S. HARRIS, Assistant Clinical Professor of Psychology & Human Development; Assistant Clinical Professor of Psychiatry

DAVID G. HARRISON, Betty and Jack Bailey Chair in Cardiology; Professor of Medicine; Professor of Molecular Physiology & Biophysics; Professor of Pharmacology; Director Division of Clinical Pharmacology
B.S. (Oklahoma State 1970); M.D. (Oklahoma 1974) [2011]

FIONA E. HARRISON, Assistant Professor of Medicine

EVA M. HARTH, Associate Professor of Chemistry; Associate Professor of Chemical and Biomolecular Engineering; Associate Professor of Pharmacology

KATHERINE E. HARTMANN, Associate Dean for Clinical and Translational Scientist Development; Lucas E. Burch Chair of Reproductive Physiology and Family Planning; Professor of Obstetrics and Gynecology; Professor of Medicine; Deputy Director for the Institute of Medicine and Public Health; Adjunct Professor of Obstetrics and Gynecology at Meharry Medical College

FREDERICK R. HASELTON, Professor of Biomedical Engineering; Professor of Ophthalmology and Visual Sciences

ALYSSA H. HASTY, Associate Professor of Molecular Physiology and Biophysics
B.S. (Tennessee Technological 1994); Ph.D. (Vanderbilt 1998) [2002]

DEBORAH H. HATTON, Associate Professor of Special Education
B.A. (Auburn 1974); M.S. (Florida State 1980); Ph.D. (North Carolina 1990) [2000]

ANTONIS K. HATZOPoulos, Associate Professor of Medicine; Associate Professor of Cell and Developmental Biology

JACEK J. HAWIGER, Distinguished Professor of Medicine; Louise B. McGavock Chair; Professor of Molecular Physiology and Biophysics M.D. (Copernicus School of Medicine [Poland] 1962); Ph.D. (National Institute of Public Health [Poland] 1967); M.A. (hon., Harvard 1987); M.D. (hon., Copernicus School of Medicine [Poland] 1992) [1990]

KELLY L. HAWS, Associate Professor of Management
B.B.A., M.B.A. (Mississippi State 1999, 2000); Ph.D. (South Carolina 2007) [2013]

BENJAMIN R. HAYES, Assistant Professor of Mathematics
B.S. (Washington 2009); Ph.D. (California, Los Angeles 2014) [2014]

P. LYNN HAYES, Associate Professor of Hearing and Speech Sciences
B.A. (Lenoir-Rhyne 1980); M.S. (Wisconsin, Milwaukee 1985); Ed.D. (Pittsburgh 1991) [2007]

SIMON WILLIAM HAYWARD, Professor of Urologic Surgery; Professor of Cancer Biology

DAVID R. HEAD, Professor of Pathology, Microbiology and Immunology
B.A. (Rice 1964); M.D. (Texas, Dallas 1968) [2000]

STEPHAN HECKERS, William P. and Henry B. Test Chair in Schizophrenia Research; Professor of Psychiatry; Professor of Radiology and Radiological Sciences; Professor of Psychology; Chair of the Department of Psychiatry

CRAIG ANNE HEFLINGER, Associate Dean for Graduate Education; Professor of Human and Organizational Development
B.A. (Vanderbilt 1973); M.A. (Peabody 1975); Ph.D. (Vanderbilt 1989) [1989]
CHRISTINA KARAGEORGOU-BASTEA, Associate Professor of Spanish

GABOR KARSAI, Professor of Electrical Engineering and Computer Science, Professor of Computer Engineering; Associate Director of the Institute for Software and Integrated Systems

EHAB S. KASASBEH, Assistant Clinical Professor of Medicine
B.S., M.D. (Jordan 1996, 2001) [2013]

GENNADI KASPAROV, Stevenson Professor of Mathematics
Ph.D. (Moscow State [Russia] 1974); Ph.D. (Russian Academy of Sciences, Moscow 1984) [2002]

Piotr KASZYNSKI, Associate Professor of Chemistry
M.S. (Technical University of Warsaw [Poland] 1985); Ph.D. (Texas 1991); Habilitation (Lodz [Poland] 2007) [1993]

HOWARD M. KATZENSTEIN, Scott and Tracie Hamilton Chair in Cancer Survivorship; Professor of Pediatrics
B.S. (Illinois, Champaign 1987); M.D. (Illinois, College, Medicine, Chicago 1991) [2013]

IRINA N. KAVERINA, Associate Professor of Cell and Developmental Biology
M.S. (Lomonosov Moscow State [Russia] 1989); Ph.D. (Russian Academy of Sciences 1992) [2005]

KAZUHIKO KAWAMURA, Professor of Electrical Engineering, Emeritus; Professor of Engineering Management, Emeritus; Director of Center for Intelligent Systems; Research Professor of Electrical Engineering
B.E. (Waseda [Japan] 1963); M.S. (California, Berkeley 1966); Ph.D. (Michigan) 1972) [1981]

TRICA KEATON, Associate Professor of African American and Diaspora Studies
B.A. (California, Los Angeles 1988); M.A. (Middlebury 1991); M.A. (California, Los Angeles 1992); Ph.D. (California, Berkeley 2001) [2009]

ELLEN M. KELLY, Associate Professor of Hearing and Speech Sciences
B.A. (Saint Bonaventure 1981); M.S., Ph.D. (Syracuse 1984, 1989) [2007]

SHAUL KELNER, Associate Professor of Sociology and Jewish Studies; Director of the Jewish Studies Program
Ph.D. (CUNY) 2002) [2005]

PEGGY L. KENDALL, Assistant Professor of Medicine; Assistant Professor of Pathology, Microbiology and Immunology
B.S. (Texas 1982); M.D. (Texas, Southwestern Medical 1996) [2003]

BRENTON KENKEL, Assistant Professor of Political Science
B.A. (Kentucky 2008); Ph.D. (Rochester 2014) [2014]

JESSICA KENNEDY, Assistant Professor of Management
B.S. (Pennsylvania 2004); Ph.D. (California, Berkeley 2012) [2014]

ANNE K. KENWORTHY, Associate Professor of Molecular Physiology and Biophysics; Associate Professor of Cell and Developmental Biology
B.A. (Kenyon 1989); Ph.D. (Duke) 1994) [2001]

THOMAS W. KEPHART, Professor of Physics
B.S. (Virginia Polytechnic Institute 1971); M.S. (North Texas State 1976); Ph.D. (Northeastern 1981) [1985]

DOUGLAS S. KERNODLE, Associate Professor of Medicine; Associate Professor of Pathology, Microbiology and Immunology

DINEO KHABELE, Assistant Professor of Obstetrics and Gynecology; Assistant Professor of Cancer Biology
B.A., M.D. (Columbia 1989, 1994) [2008]

HOWARD S. KIRSHNER, Professor of Neurology; Professor of Psychiatry; Professor of Hearing and Speech Sciences
B.A. (Williams 1968); M.D. (Harvard Medical 1972) [1978]

ELA W. KNAPIK, Associate Professor of Medicine; Associate Professor of Cell and Developmental Biology

DOUGLAS A. KNIGHT, Drucilla Moore Buffington Professor of Hebrew Bible
B.A. (Ottawa [Canada] 1965); M.Div. (California Baptist Theological Seminary 1968); Doctor in (Georg-August-Universität Göttingen [Germany] 1973) [1973]

VICTORIA F KNIGHT, Assistant Professor of Special Education
B.A. (California, Santa Cruz 1987); M.A. (Northern Colorado 2005); Ph.D. (North Carolina, Charlotte 2010) [2013]

BJORN C. KNOLLIMANN, Professor of Medicine; Professor of Pharmacology
M.D. (Cincinnati 1993); Ph.D. (Georgetown 1999) [2005]

PAUL LAIBNIS, Professor of Chemical and Biomolecular Engineering

MICHAEL P. KREYLING, Gertrude Conaway Vanderbilt Chair of English; Professor of English; Chair of English

M. KURTULUS, Assistant Professor of Operations
B.S. (Koç University [Turkey] 1998); M.S. (Bilkent [Turkey] 2002); M.S., Ph.D. (Institut Européen d’Administration des Affaires (INSEAD) [France] 2002, 2005) [2005]

VERA M. KUTZINSKI, Martha Rivers Ingram Professor of English

ROBERT F. LABADIE, Professor of Otolaryngology; Professor of Biomedical Engineering

JOHN LACHS, Centennial Professor of Philosophy

DANA BORDEN LACY, Associate Professor of Pathology, Microbiology and Immunology; Associate Professor of Biochemistry
B.S. (North Carolina 1994); Ph.D. (California, Berkeley 1999) [2006]

PAUL E. LAIBNIS, Professor of Chemical and Biomolecular Engineering

DAVID LAIRD, Assistant Professor of the Practice of Education

PETER LAKE, Martha Rivers Ingram University Distinguished Professor of History and the History of Christianity; Professor of the History of Christianity

JONATHAN LAMB, Andrew W. Mellon Professor of the Humanities

JOSEPH M LAMBERT, Assistant Professor of the Practice of Special Education
B.A. (Brigham Young 2007); M.A. (Northeastern 2009) [2013]
L. JACKSON ROBERTS, William Stokes Chair in Experimental Therapeutics; Professor of Pharmacology; Professor of Medicine B.A. (Cornell College 1965); M.D. (Iowa 1969) [1977]

DAVID ROBERTSON, Elton Yates Professorship in Autonomic Disorders; Professor of Medicine; Professor of Neurology; Professor of Pharmacology B.A., M.D. (Vanderbilt 1969, 1973) [1978]

BETSEY ANN ROBINSON, Associate Professor of History of Art; Associate Professor of Classics A.B. (Radcliffe 1990); A.M. (Harvard 1995); Ph.D. (Pennsylvania 2001) [2008]

WILLIAM FRANCIS ROBINSON, Assistant Professor of History; Associate Director of Latin American Studies B.A. (Johns Hopkins 1984); M.A. (Florida 1988); Ph.D. (Auburn 1999) [2002]

WILLIAM H. ROBINSON III, Associate Professor of Electrical Engineering and Associate Professor of Computer Engineering; Director, Undergraduate Studies, Computer Engineering B.S. (Florida Agricultural and Mechanical 1996); M.S., Ph.D. (Georgia Institute of Technology 1998, 2003) [2003]

DAN M. RODEN, Assistant Vice Chancellor for Personalized Medicine; Associate Professor of Medicine; Professor of Pharmacology B.Sc., M.D.C.M. (McGill [Canada] 1970, 1974) [1981]

JOEL RODRIGUE, Assistant Professor of Economics B.A. (Manitoba [Canada] 2001); M.A., Ph.D. (Queen’s [Canada] 2002, 2008) [2008]

ANNA WANG ROE, Professor of Psychology; Professor of Biomedical Engineering B.A. (Harvard 1984); Ph.D. (Massachusetts Institute of Technology 1991) [2003]

RUTH ROGASKI, Associate Professor of History B.A. (Pennsylvania 1984); M.A., Ph.D. (Yale 1990, 1996) [2003]

BRIDGET R. ROGERS, Associate Professor of Chemical and Biomolecular Engineering B.S. (Colorado 1984); M.S., Ph.D. (Arizona State 1990, 1998) [1998]

ANTONIS ROKAS, Cornelius Vanderbilt Chair in Biological Sciences; Associate Professor of Biological Sciences; Associate Professor of Biomedical Informatics B.Sc. (Crete [Greece] 1998); Ph.D. (Edinburgh [U.K.] 2001) [2007]

LOUISE A. ROLLINS-SMITH, Associate Professor of Pathology, Microbiology and Immunology; Associate Professor of Biological Sciences; Associate Professor of Pediatrics B.A. (Hamline 1969); M.S., Ph.D. (Minnesota 1972, 1977) [1987]

HANNA ANDREA ROMAN, Mellon Assistant Professor of French B.A. (Grimmell College 2006); Ph.D. (Johns Hopkins 2013) [2014]

JORGE CARLOS ROMAN APONTE, Assistant Professor of Mathematics and Medicine, Health, and Society B.S. (2007); M.Stat., Ph.D. (Florida 2009, 2012) [2012]

SAMUEL TRENT ROSENBOOM, Associate Professor of Biomedical Informatics; Associate Professor of Medicine; Associate Professor of Pediatrics B.A. (Northwestern 1992); M.D., M.P.H. (Vanderbilt 1996, 2001) [2002]

SANDRA J. ROSENTHAL, Jack and Pamela Egan Professor of Chemistry; Professor of Chemistry; Professor of Pharmacology B.S. (Valparaiso 1987); Ph.D. (Chicago 1993) [1996]

NORBERT ROSS, Associate Professor of Anthropology M.A., Ph.D., Habilitation (Freiburg [Germany] 1995, 1998, 2002) [2003]

GERALD ROTH, Assistant Professor of the Practice of Computer Science B.S. (Gonzaga 1982); M.S. (Santa Clara 1987); M.S., Ph.D. (Rice 1993, 1997) [2006]

RUSSELL L. ROTHMAN, Associate Professor of Medicine; Director, Vanderbilt Center for Health Services Research B.S., M.P.P., M.D. (Duke 1992, 1996, 1996) [2002]

CHRISTIANNE L. ROUMIE, Associate Professor of Medicine; Associate Professor of Pediatrics B.A. (Douglass [Canada] 1994); M.D. (New Jersey Medical 1998); M.P.H. (Vanderbilt 2005) [2004]

BERNARD ROUSSEAU, Associate Professor of Otolaryngology; Associate Professor of Hearing and Speech Sciences; Associate Professor of Mechanical Engineering B.S., M.A. (Central Florida 1998, 2000); Ph.D. (Wisconsin 2004) [2005]

DEBORAH W. ROWE, Associate Professor of Education B.S. (Kentucky, Lexington 1976); M.Ed. (Wake Forest 1982); Ph.D. (Indiana, Bloomington 1986) [1986]

DARIN ROWELL, Adjunct Professor of Management B.S. (Mississippi State 1989); M.B.A. (Millsaps 1994); M.A. (Pennsylvania 2014) [2014]

DANIEL H. RUBIN, Professor of Medicine; Professor of Pathology, Microbiology and Immunology B.A. (Stony Brook 1969); M.D. (Cornell 1974) [1992]

EDWARD L. RUBIN, University Professor of Law and Political Science; Professor of Political Science A.B. (Princeton 1969); J.D. (Yale 1979) [2005]

EDWARD L. RUBIN, University Professor of Law and Political Science; Professor of Political Science A.B. (Princeton 1969); J.D. (Yale 1979) [1977]

EDWARD L. RUBIN, University Professor of Law and Political Science; Professor of Political Science A.B. (Princeton 1969); J.D. (Yale 1979) [2005]

H. EARL RULEY, Professor of Pathology, Microbiology and Immunology B.A. (Stanford 1974); Ph.D. (North Carolina 1989) [1992]

WILLIAM E. RUSSELL, Cornelius Vanderbilt Chair; Professor of Pediatrics; Professor of Cell and Developmental Biology B.S. (Michigan 1972); M.D. (Harvard 1976) [1990]

EDWARD B. SAFF, Professor of Mathematics B.S. (Georgia Institute of Technology 1964); Ph.D. (Maryland 1968) [2001]

KAMAL SAGGI, Frances and John Downing Family Chair; Professor of Economics; Chair of Economics; Director, Graduate Program in Economic Development B.A. (Ohio Wesleyan 1990); M.A., Ph.D. (Pennsylvania 1992, 1995) [2010]

SAFA N. SALARI, Assistant Professor of Pathology, Microbiology and Immunology B.S. (University of the Punjab [Pakistan] 2004); M.B.B.S. (King Edward Medical [Pakistan] 2004) [2013]

JANOS SALLAI, Adjunct Assistant Professor of Computer Engineering: Research Scientist/Engineer of Institute for Software Integrated Systems M.S. (Technical University of Budapest [Hungary] 2001) [2008]

DAVID C. SAMUELS, Associate Professor of Molecular Physiology and Biophysics B.A. (Washington University 1983); Ph.D. (Oregon 1990) [2009]

MARIANO SANA, Associate Professor of Sociology M.A., Ph.D. (Pennsylvania 1998, 2003) [2009]

CHARLES R. SANDERS II, Aileen M. Lange and Annie Mary Lyle Chair in Cardiovascular Research; Professor of Biochemistry; Professor of Medicine B.S. (Milligan 1983); Ph.D. (Ohio State 1988) [2002]

MAUREEN SANDERSON, Professor of Obstetrics & Gynecology at Meharry Medical College; Adjunct Professor of Medicine at Vanderbilt University School of Medicine B.S. (Ohio State 1979); M.P.H. (Texas, Houston 1984); Ph.D. (University of Washington 1996) [2010]

SAMUEL A. SANTORO, Dorothy Beryl and Theodore R. Austin Chair in Pathology; Professor of Pathology, Microbiology and Immunology; Professor of Biochemistry; Chair of the Department of Pathology, Microbiology and Immunology B.S. (Emory 1972); Ph.D., M.D. (Vanderbilt 1979, 1979) [2003]
RONALD G. WILEY, Professor of Neurology; Professor of Pharmacology
B.S., Ph.D., M.D. (Northwestern 1972, 1975, 1975) [1982]

D. MITCHELL WILKES, Associate Professor of Electrical Engineering and Associate Professor of Computer Engineering
B.S. (Florida Atlantic 1981); M.S., Ph.D. (Georgia Institute of Technology 1984, 1987) [1987]

CHRISTOPHER S. WILLIAMS, Associate Professor of Medicine; Associate Professor of Cancer Biology
B.Sc. (Brigham Young 1982); Ph.D., M.D. (Vanderbilt 1999, 2002) [2005]

JOHN V. WILLIAMS, Associate Professor of Pediatrics; Associate Professor of Pathology, Microbiology and Immunology
B.S. (Virginia 1990); M.D. (Medical College of Virginia 1994) [2002]

RICHARD H. WILLS, Anne Marie and Thomas B. Walker, Jr., Associate Professor of Accounting; Associate Professor of Accounting

KEITH T. WILSON, Thomas F. Frist Sr. Chair in Medicine; Professor of Medicine; Professor of Pathology, Microbiology and Immunology; Professor of Cancer Biology
B.A. (Cornell 1982); M.D. (Harvard Medical 1986) [2005]

DANNY G. WINDER, Professor of Molecular Physiology and Biophysics; Professor of Psychiatry
B.S. (North Georgia College and State University 1999); Ph.D. (Emory 1995) [1999]

ALAN E. WISEMAN, Associate Professor of Political Science; Associate Professor of Law

JAMES E. WITTIG, Associate Professor of Materials Science and Engineering

ARTHUR WITULSKI, Research Associate Professor of Electrical Engineering

MARK WOLERY, Professor Emeritus of Special Education
B.A. (Tennessee Temple 1969); M.Ed. (Virginia Commonwealth 1975); Ph.D. (University of Washington 1980) [2000]

MARK A. WOLLEAUSER, Professor of English
A.B. (Stanford 1979); Ph.D. (Yale 1986) [1994]

DAVID C. WOOD, W. Alton Jones Professor of Philosophy; Professor of Philosophy

MYRNA HOLTZ WOODERS, Professor of Economics

GEOFFREY F. WOODMAN, Assistant Professor of Psychology
B.A., Ph.D. (Iowa 1997, 2002) [2006]

CHRISTOPHER V. WRIGHT, Louise B. McGavock Chair; Professor of Cell and Developmental Biology

DAVID W. WRIGHT, Stevenson Chair of Chemistry; Professor of Chemistry; Chair of Chemistry
B.A., B.S. (Tulane 1988, 1989); Ph.D. (Massachusetts Institute of Technology 1993) [2001]

EDWARD WRIGHT-RIOS, Associate Professor of History
B.S. (Illinois, Champaign 1987); M.A. (Vanderbilt 1998); Ph.D. (California, San Diego 2004) [2004]

JULIAN WURTH, Associate Professor of Philosophy; Acting Chair of Philosophy
B.A. (Chicago 1993); Ph.D. (Pennsylvania 2000) [2009]

DAOXING XIA, Professor of Mathematics
B.S. (Shandong University of Technology [China] 1950); Doctorate (Zhejiang [China] 1952) [1984]

YAQIONG XU, Assistant Professor of Electrical Engineering
B.S. (Wuhan [China] 1997); Ph.D. (Chinese Academy of Sciences, Beijing 2002); Ph.D. (Rice 2006) [2009]

YUAN XUE, Associate Professor of Computer Science and Associate Professor of Computer Engineering
B.S. (Harbin Institute of Technology [China] 1998); M.S., Ph.D. (Illinois, Champaign 2002, 2005) [2006]

XINGLI YANG, Assistant Professor of Medicine; Assistant Professor of Pharmacology
B.S. (Guanxi [China] 1982); M.S. (Mississippi State 1994); Ph.D. (Alabama, Birmingham 2000) [2006]

THOMAS E. YANKELOV, Professor of Radiology and Radiological Sciences; Professor of Physics; Professor of Biomedical Engineering; Ingram Associate Professor of Cancer Research; Associate Professor of Cancer Biology
B.A. (Louisville 1996); M.A., M.S. (Indiana, Bloomington 1998, 2000); Ph.D. (Stony Brook 2003) [2005]

PAUL J. YODER, Professor of Special Education; Research Professor of Hearing and Speech Sciences
B.S. (Louisiana State 1978); M.S. (Peabody 1979); Ph.D. (Northern Carolina 1985) [1986]

JOHN D. YORK, Natalie Overall Warren Chair in Biochemistry; Professor of Biochemistry; Chair of the Department of Biochemistry
B.S. (Iowa 1986); Ph.D. (Washington University 1993) [2012]

HYE YOUNG YOU, Assistant Professor of Political Science

JAMEY D. YOUNG, Assistant Professor of Chemical and Biomolecular Engineering; Assistant Professor of Molecular Physiology & Biophysics
B.S. (Kentucky, Lexington 1999); Ph.D. (Purdue 2005) [2006]

PAMPEE PAUL YOUNG, Associate Professor of Pathology, Microbiology and Immunology; Associate Professor of Medicine
B.A. (Rice 1990); Ph.D., M.D. (Texas, Southwestern Medical 1996, 1998) [2003]

CHANG YU, Associate Professor of Biostatistics
B.S. (University of Science and Technology of China, Hefei 1990); M.S. (Southern Maine 1993); M.S. (Minnesota 1995); Ph.D. (Yale 1998) [2004]

HONG YU, Assistant Professor of Neurological Surgery
A.B. (Harvard 1998); M.D. (Vanderbilt 2002) [2013]

LIVIU ANDREI ZAHA, Assistant Professor of Clinical Medicine
M.D. (University of Medicine and Pharmacy “Carol Davila” [Romania] 2004) [2013]

ALEXANDER ZAIFA, Associate Professor of Surgery
B.S., M.S. (Saint Petersburg State Technical [Russia] 1983, 1986); Ph.D. (Mendeleev University of Chemical Technology [Russia] 1995) [2005]

DAVID HAROLD ZALD, Professor of Psychology; Professor of Psychiatry
B.A. (Michigan 1989); Ph.D. (Minnesota 1997) [2000]

ANDRES ZAMORA, Associate Professor of Spanish
B.A. (Universidad Complutense de Madrid [Spain] 1984); M.A. (Auburn, Montgomery 1986); Ph.D. (Southern California 1994) [1998]

ELIZABETH ZECHMEISTER, Associate Professor of Political Science; Co-Director of the Latin American Public Opinion Project
B.A. (Loyola 1994); M.A. (Chicago 1998); Ph.D. (Duke 2003) [2008]

CHRISTOPH MIRKO ZELLER, Associate Professor of German

ROY ZENT, Thomas F. Frist Sr. Chair in Medicine; Professor of Medicine; Professor of Cell and Developmental Biology; Professor of Cancer Biology

BING ZHANG, Associate Professor of Biomedical Informatics

ENXIA ZHANG, Research Assistant Professor of Electrical Engineering
B.S., M.S. (Nanjing [China] 2000, 2003); Ph.D. (Shanghai Institute of Microsystem and Information Technology, CAS [China] 2006) [2008]

QI ZHANG, Assistant Professor of Pharmacology
B.S. (Fudan [China] 1997); Ph.D. (Pennsylvania 2004) [2010]

XINLAN ZHANG, Assistant Professor of Medicine
M.D. (Zhejiang Medical [China] 1989); M.P.H. (Vanderbilt 2003) [2005]

ZHONGMING ZHAO, Ingram Associate Professor of Cancer Research; Associate Professor of Biomedical Informatics; Associate Professor of Cancer Biology; Associate Professor of Psychiatry
B.S. (Zhejiang [China] 1991); M.S. (Peking [China] 1996); Ph.D. (Texas, Houston 2000); M.S. (Houston 2002) [2009]
DECHAO ZHENG, Professor of Mathematics

WEI ZHENG, Professor of Medicine; Director, Vanderbilt Epidemiology Center; Chief, Division of Epidemiology

ANDRIES ZIJLSTRA, Assistant Professor of Pathology, Microbiology and Immunology; Assistant Professor of Cancer Biology

RON W ZIMMER, Associate Professor of Public Policy & Education

MARY M. ZUTTER, Assistant Vice-Chancellor for Integrative Diagnostics at Vanderbilt University Medical Center; Louise B. McGavock Chair; Professor of Pathology, Microbiology and Immunology; Professor of Cancer Biology
B.S. (Newcomb 1976); M.D. (Tulane 1981) [2003]

LAURENCE J. ZWIEBEL, Cornelius Vanderbilt Chair in Biological Sciences; Professor of Biological Sciences; Professor of Pharmacology
B.S. (Stony Brook 1980); M.S. (Michigan 1982); Ph.D. (Brandeis 1992) [1998]
