

Downloading JAVA for Coeus Users

To use Coeus, you'll need JAVA (from the Sun Developer Network) running on your computer.

There are multiple versions of JAVA that you could download; however some versions may inhibit your ability to run other Vanderbilt systems, such as BA3. The Version 1.4.2_12 of JAVA is sufficient to run Coeus and won't negatively interact with other programs on your system. The software is free and easy to download if you follow these directions.

1. Go online and navigate to the JAVA download site at this address: http://java.sun.com/products/archive/j2se/1.4.2_12/index.html
2. The J2SE 1.4.2 Page will open.
3. Click on the link entitled "Download J2RE" (circled in Figure 1).
4. The Security Information Window will open. Click 'Yes.' (Figure 2)
5. The Download Page will open.

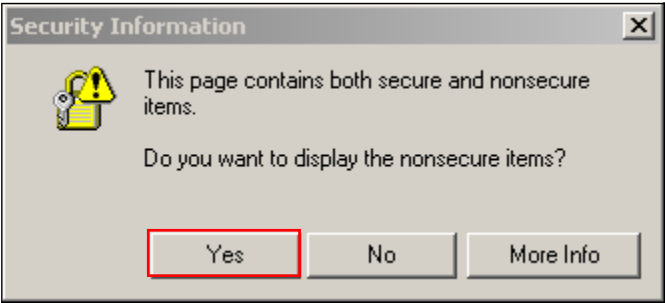

Figure 2

6. The “Select Platform and Language for your download:” option will appear. Select the Platform and (should be Windows) Language preference. (shown in Figure 3)
 7. Select the “I agree to the Software License Agreement” checkbox, then click the ‘Continue’ button (circled in Figure 3) and the screen will refresh.
 8. This will bring up the Security Information Window. Click Yes Button.’ (See Figure 4)
 9. Select “Windows Installation” under Optional Files (circled in Figure 5)
 10. Click on the orange “Download selected with Sun Download Manager” bar.
 11. The File Download Security Window will open. Click the Open Button. (See Figure 6)
 12. The Warning-Security for digital signature application Window will open. Click the Run Button. (See Figure 7)
- Java will then began loading. (Figure 8)

Figure 8

13. The Security Warning box will appear, asking if you want to trust the signed application distributed by: Sun Download Manager 2. Click start (Figure 9).
 14. The Sun™ Download Manager 2.0-License agreement will open. Click on the Accept Button (Figure 10).
 15. For Set Options and Proxies choose “Use automatic file verification when available” and click the “OK” button (Figure 11) and then click the “OK” Button on the HINTS pop-up page (Not shown).
 16. The Download Manager screen will appear. Click the Start Button (Figure 12). It will then show the status as ‘Downloaded.’
- If you have Webroot Spy Sweeper installed, you may (or may not) see the window in Figure 11. If not, skip to Step 17 and close out of the menu. If you see this window, check the box beside “Always take the selected action for msjava.dll and then click on the Allow Installation Button. Then click ‘Allow Installation.’ (Circled in Figure 13)**
17. The ‘j2re-1_4_2_12...’ icon will appear on your desktop. Double click the icon and the java installation will begin.
