Balancing Butterfly

Materials:
Two pennies per student
One die-cut butterfly per student
Tacky craft glue

Directions:
Glue two pennies under the butterfly. Before the glue dries, move the pennies around to create a butterfly that will balance on the tip of your finger. Allow the glue to dry. Share your butterfly and the wonder of balance with your family and friends.

Note: Place a dab of glue on wax paper on each of the tables or stations. Provide toothpicks for students to use to put the glue on the pennies.
