Goop Soup

Food coloring (optional)
Elmer’s white liquid glue (not school glue)
Epsom salt
Water

Measure 1 teaspoon of Epsom salt and 1 teaspoon water into small cup. Stir.
Add one drop of food coloring. Stir.
In another cup, measure about 2 tablespoons of Elmer’s glue into the cup.
Pour the Epsom salt/water mixture into the glue and stir until the mixture takes shape.

Scoop the goop out onto two paper towels. Fold the towels over the goop and press until the extra water is absorbed.
