

SustainVU

Growing Responsibly

Vanderbilt University is proud to announce the addition of a recycling coordinator!

Vanderbilt University's Environmental Team consists of collaboration between Vanderbilt Environmental Health and Safety, and Plant Operations. Concentrating on issues such as waste reduction, recycling, environmentally preferable purchasing, energy conservation, and bio-fuels for our vehicle fleet, we hope to reduce Vanderbilt's impact on the environment.

In creating the position of Sustainability Coordinator in the fall of 2006, the University recognized that the concept of "sustainability" is important to the VU family. It will become more so in the years ahead as we begin to understand the effects of global warming, limited natural resources, and the value to the University of good stewardship.

The summer of 2007, the team was pleased to add a Recycling Coordinator. Over the next few years, Vanderbilt hopes to make recycling a reality for as many goods as possible and reaching as many places on campus we can.

We work with faculty, staff and students from all parts of the University campus to implement our vision of a sustainable VU. Our web page provides information about specific projects that are happening on campus, and how you can offer suggestions. We're interested in hearing from you at:

Andrea George, PhD., CHMM

Sustainability Coordinator
Associate Director, Vanderbilt
Environmental Health and Safety

1161 21st Ave South
Nashville, TN 37232
Phone: 615.322.4551
Fax: 615.343.4951
