

# Electronics Recycling @ Vanderbilt: Acceptable and Non-Acceptable Items

Vanderbilt's Electronics Recycling Program is so much more than computers and monitors – so many types of electronic devices can be recycled! Check the list below to see if your surplus items can be recycled. These items can be picked up by VUMC's Moving and Storage Services for surplus or recycling using the same process established for computers and monitors.

If you have questions about acceptable/non-acceptable items, please contact Vanderbilt's Recycling Coordinator at E.ARTH (3-2784) or [recycle@vanderbilt.edu](mailto:recycle@vanderbilt.edu).

Electronics recycled by Vanderbilt are shipped to SIMS Recycling Solutions in LaVergne, Tennessee.

Vanderbilt's Electronics Recycling Program is supported by Vanderbilt University Medical Center Plant Services, Vanderbilt Sustainability and Environmental Management Office (SEMO), Information Technology Services (ITS), Network Computing Services (NCS), Vanderbilt Procurement and Disbursement Department...and you !!
