

Don't Throw These Things Away During Move-Out!
Contact your RA for information on how to recycle these items in your residence hall!

Refrigerators contain ozone-depleting chemicals and oils.

The refrigerant should be removed and the metal recycled.

Computers, TVs, and monitors contain hazardous heavy metals.

These items should be sent to an electronics recycler.

The high voltage system (capacitors) that produces the microwaves may be hazardous to the environment.

Microwaves can be disassembled and the metal parts recycled.

Salvation Army is willing to take many working items & other types of donations. [Click here](#) to learn more.
