

How do I pin my courses?

Brightspace allows the user to pin courses to their homepage. Pinning a course to the homepage helps the user quickly access their frequently used courses.

1) In the global navigation bar, click the **course list** icon.

2) This will generate a list of all courses for which you have access. Click the **pin** icon to pin the course to the homepage.

3) Refresh the homepage, and the pinned course is now available under **My Courses**.
