Steve Jobs, a Research Article

Imani Glover, T.C., A.N., Lola Viust, and Demetrius Whatley.

Brief: Inspired by the 4th grade Metro Nashville hands-on science kit, Electric Circuits. Students learn to create and diagram series and parallel circuits using wires, batteries and light bulbs.

Steve Jobs was born in San Francisco, California, on February 24, 1955, and he died in Palo Alto, California, October 5, 2011. Steve married Laurene Powell on March 18, 1991. Together they had three children. Their names are Erin, Lisa, Eve, and Reed Paul. Steve had three daughters and one son. Steve's adoptive parents were Paul and Clara Jobs. Steve grew up in the city of Cupertino, California.

Steve Jobs was an average student in high school. He graduated from high school in 1972. He attended Reed College in Portland, Oregon, for three months. After he dropped out, he continued to attend his favorite classes.
Jobs made the first Toy Story movie. He also made the iPod music player. If it weren’t for Jobs, we wouldn’t have all this technology. Jobs made A Bug’s Life in 1998, Toy Story 2 in 1999, and Finding Nemo in 2003.

If I could ask Steve Jobs a question, I would ask:
1. Why did you create the Apple Phone and everything you created?
2. How did you create the Apple Store?
Acknowledgements: The authors would like to thank their teacher, Mrs. Essex, and librarian, Dr. Streit.

About the authors: Imani, T.C., A.N, Lola, and Demetrius are fourth grade students at Ross Elementary School.
