What Predicts Support for Democracy? Security, Rule of Law, Prosperity, Social Media, and Elections

IIIA. Lower levels of democratic attitudes are connected to security, corruption, and economic vulnerability

Democratic attitudes are <i>lower</i> among those who:	(Lower) Support for Democracy	(Lower) Satisfaction with Democracy	(Lower) Trust in Elections	(Lower) Intolerance of Dissolving Congress
Are victims of a crime		✓	✓	
Feel very insecure	✓	✓	✓	✓
Were asked for bribe(s)	✓	✓	✓	✓
Think most/all politicians are corrupt	✓	✓	✓	
Perceive worse national economy	✓	✓	✓	✓
Report a worse household economy	✓	✓	✓	

Note: Checkmarks indicate a statistically significant negative relationships. Results of regression analysis of 2018/19 data, controlling for SES/demographic factors and including country fixed effects.

IIIB: Democratic Attitudes Vary by Social Media Use

In the LAC region, the 2018/19 AmericasBarometer finds:

- Social media use is widespread, especially WhatsApp and Facebook
- Frequent social media users are more supportive of democracy
- Frequent social media users are less satisfied with democracy and less trusting in elections (and other institutions)

Social media use is prevalent among adults in the LAC region

Support for democracy is highest among frequent social media users in the LAC region

Support for democracy = % agreeing that “democracy...better than any other form of gov’t.”

High users: Access social media on Facebook, Whatsapp and/or Twitter daily or weekly.

Low users: Access monthly or yearly.

Non-users do not access social media.

Satisfaction and trust in elections are lower among frequent social media users in the LAC region

Satisfaction with Democracy (%)

Trust in Elections (%)

IIIC: Elections are Democracy-Promoting

In the LAC region, the 2018/19 AmericasBarometer finds:

- The more proximate a national election was to the 2018/19 fieldwork, the more positive the shifts in public support for democracy
- **Mexico, Brazil, and Colombia** in particular benefitted from recent elections
- **Honduras** demonstrates that not all elections have positive consequences

The recency of elections is associated with increasing support for democracy

ING4. Democracy may have problems, but it is better than any other form of government. To what extent do you agree or disagree with this statement? 5, 6, 7 coded as “support”.

The recency of elections is associated with increasing satisfaction with democracy
