

NOTES:

1. The questionnaire was a split-sample design: approximately half the respondents were randomly assigned to "Core A" (questions marked in this questionnaire with **CA**) and about half randomly assigned to "Core B" (questions marked in this questionnaire with **CB**). Questions marked with a "T" were included in both questionnaires (Core A and Core B). Each dataset contains a variable called "core_a_core_b", it distinguishes the questionnaire that was applied to each respondent.
