

NOTES:

1. Experimental modules (highlighted in gray) are considered supplemental to the AmericasBarometer, and not released for a minimum of two years, after that period interested parties can contact LAPOP with questions about how to access these data.
2. The questionnaire was a split-sample design: approximately half the respondents were randomly assigned to "Core A" (questions marked in this questionnaire with **CA**) and about half randomly assigned to "Core B" (questions marked in this questionnaire with **CB**). Questions marked with a "**T**" were included in both questionnaires (Core A and Core B). Each dataset contains a variable called "core_a_core_b", it distinguishes the questionnaire that was applied to each respondent.
