

Info Sheet: Enhanced Oracle Cloud Home Screen

Published: February 12, 2019

Why is the Oracle Cloud Home Screen changing?

Vanderbilt's Oracle Cloud environment will receive its regularly-scheduled quarterly upgrade during the weekend of February 15-16. The update to the Home Screen layout is a necessary component of this quarterly upgrade to Vanderbilt's Oracle Cloud environment.

17

What is changing?

This update provides a substantial improvement to the user interface.

Key improvements include:

- 1 A reorganized **Springboard** and **Navigator** clearly group applications by category and provide additional options for personalization;
- 2 **Quick Actions** reduce the number of clicks required to complete many frequently-performed activities;
- 3 A new **Things to Finish** section summarizes action items and provides direct access to new tasks; and
- 4 **News and Announcements** are available directly on the **Home Screen**.

What is not changing?

These updates do not change the underlying Oracle Cloud functionality, your roles or your access to information about your transactions.

How can I learn more about new features?

You can read about these updates in [MyVU](#) or on the [SkyVU website](#). You can also [view a short video tour](#) of the new features, which will also be available within Oracle Cloud once the updates are in place.
