MHS 3310 – A Comparison of World Healthcare Systems and Medicines

Instructor: Nathalie Dieu-Porter
Location: Nashville, TN, Paris, France and Ferrara, Italy
Dates: May 4 – May 30, 2020

Experts at the World Health Organization did a statistical ranking of the world's health care systems. They studied 191 countries and ranked them based on a set of criteria, such as the number of years people lived in good health and whether everyone had access to good healthcare. France and Italy were at the top of the list. The United States ranked 37th.

During the course, students will examine the public health management systems in France and Italy, as well as make comparisons to the American health care system and those of other developed countries.

FEES: Cost is approximate $12,588.33
