5) **Reference Citations in Text:** (p. 174)

   “Cite the work of those individuals whose ideas, theories, or research have directly influenced your work. . . . Citation of an article implies that you have personally read the cited work. . . . The number of sources you cite in your work will vary due to the scope of the paper (APA, 2010, p. 169).

   Cite anything that would not be considered “common knowledge.”

   - **After a paraphrase:** include authors’ last names, year of publication (no page number).

     Examples: (Sanchez & Black, 2010).
     Sanchez and Black (2010) stated that the social work perspective was very helpful.

   - **After a quotation:** put in parentheses after last quotation mark; include page number.

     Example: “The social worker played a significant role in the positive outcome” (Sanchez & Black, 2010, p. 230).

   - **Many authors:** If more than two authors, list all of them the first time, then for subsequent citations, list the first author followed by “et al.” (p. 208).

     First time example: (Anderson, Ling, Jones, Himalaya, Anderson, & Ford, 2009).
     Second time example: (Anderson et al., 2009)

7) **Quotations:** (p. 170)
- Avoid using long quotes or too many quotes.
- Use quotation marks. (Do not plagiarize!)
- For long quotations (more than 40 words): 1/2” block indent, double space, no quotation marks, followed by a citation.
- First letter of a quotation may be changed to uppercase. Punctuation at the end of the quote may be changed to fit the sentence. Any other changes must be explicitly indicated.

- Page numbers and headings are placed within the top margin.
- Number pages consecutively, beginning with the title page through the reference page(s).

9) **Section Headings:** (p. 62)
- Center the title of the paper on the first line of the first page; do not bold. This does not count as a Level 1 heading.

10) **Numbers:** (p. 111)
- Use words to express:
  - Numbers one through nine (i.e., one, two, three).
  - When the number begins the sentence (avoid this by rewording the sentence).
  - Common fractions (i.e., one fifth of the class, two-thirds majority).
- Use numerals to express:
  - Numbers 10 and above (Example: 10 books, 21 years old).
  - When grouping/comparing numbers under 10 with numbers above 10 (Example: 4 of 20 responses. Of the 15 persons responding, 3 said…).
  - When the number precedes a measurement (Example: 4-mg dose, 6 inches).
  - When writing time, date, ages, scores, points, and money sums.
