Why Clifton Strengths is Different

• Based in positive psychology, focus on what is right with people, not what is wrong.
• Multicultural approach—grounded in research from all over the world, not just another Western Inventory
• Doesn’t “type” you. Highly individualized.
• Solid reliability and validity, consistent with other major personality inventories
• Give you language to recognize others for what they bring to a group
STRENGTHS PHILOSOPHY

• **Assessment of personal talent** that identifies areas where an individual’s greatest potential for building strengths exists.

• **Primary application** is a strengths-based development process used in work and academic settings.

• Talents can be **operationalized, studied, and capitalized** on in work and academic settings.

• Talents manifest themselves in life experiences, characterized by **yearnings, rapid learning, and timelessness.**
Strengths does not tell you what you can and cannot do, it shows you how you naturally go about thinking, feeling, and behaving so that no matter what the task or situation, you can accomplish it by leveraging your Top 5 Strengths.
Wrong Assumptions

- All behaviors can be learned.
- If you try hard enough, you can do it.
- The best in a role display the same behaviors.
- Weakness fixing = success

Right Assumptions

- Only some behaviors can be learned (skills, knowledge)
- The best in a role display the same outcomes using different behaviors.
- Weakness fixing prevents failure, strengths building leads to success.

Deep Dive: Power and Edge of Strengths

I. ACHIEVER

III. ADAPTABILITY
IV. ANALYTICAL
V. ARRANGER
Achiever

- Constant need for attainment; internal fire drives achievers
- Every day starts at zero, need to accomplish something meaningful by end of day
- Stamina for hard work, joy in making progress

Activator

• Catalysts for getting things started

• “When can we start?” Can sense their energy on a team.

• Planter, not tender; firefighter, not farmer (urgency)

• Can be an “action” consultant to motivate others to start (influence)

• Can be impatient, especially when people are deliberating about how to get something done
Adaptability

• Comfortable in times of change; Can narrate change to others—shows up in their interactions with others
• Looks for patterns and connections to get to the essence/truth

• Come to questions rather than conclusions, intuitive about what questions to ask
• Can help people organize large amounts of thought; “cognitive cleaning”
• Can deliver hard news in a practical, non-emotional way
• At its best-- curious, not critical
Arranger
