formation of dust. Provide appropriate exhaust ventilation where dust is formed. Avoid breathing (dust, vapor, mist, gas). Practice good chemical hygiene during and after use. Avoid release to the environment.
: This material is a water pollutant and should be prevented from contaminating soil or from entering sewage and drainage systems and bodies of water.
ntainment and cleaning up
: Clean up spills immediately, observing precautions in Protective Equipment section.
: Collect spilled material in appropriate container. Spill may be reportable . Consult section 15 for Reportable Quantities.
e
g
: To avoid risks to human health and the environment, comply with the instructions for use.
: Keep away from heat and flame. Avoid formation of dust. Provide appropriate exhaust ventilation where dust is formed. Do not breathe (dust, vapor, mist, gas). Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling.
: Keep container closed when not in use. Store in a cool dry place.
including any incompatibilities
personal protection
 Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits.
: Wear safety glasses.
: Wear protective gloves.
: Not normally needed. If ventilation is inadequate and this material is handled at elevated temperatures or dusts/fumes/mists are generated a NIOSH/MSHA approved air purifying respirator with a manufacturers approved cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known,
