SECTION 5: Fire fighting measures

5.1. Extinguishing media

Extinguishing media: Use alcohol foam, carbon dioxide, or water spray when fighting fires involving this material.

5.2. Special hazards arising from the substance or mixture

Explosion hazards: Dusts at sufficient concentrations can form explosive mixtures with air.

5.3. Advice for firefighters

Fire fighting procedures: As in any fire, wear self-contained breathing apparatus pressure-demand, (MSHA/NIO SH approved or equivalent) and full protective gear.

Indium Oxide-Tin Oxide Alloy Pieces

6.1. Personal precautions, protective equipment and emergency procedures

**General procedures**: Isolate hazard area. Keep unnecessary and unprotected personnel from entering. Eliminate all ignition sources if safe to do so. Avoid formation of dust. Provide appropriate exhaust ventilation where dust is formed. Avoid breathing (dust, vapor, mist, gas). Practice good chemical hygiene during and after use. Avoid release to the environment.

6.2. Environmental precautions

6.3. Methods and material for containment and cleaning up

**Small spill**: Clean up spills immediately, observing precautions in Protective Equipment section.

**Large spill**: Collect spilled material in appropriate container. Spill may be reportable. Consult section 15 for Reportable Quantities.

6.4. Reference to other sections

SECTION 7: Handling and storage

7.1. Precautions for safe handling

**General procedures**: To avoid risks to human health and the environment, comply with the instructions for use.

**Handling**: Keep away from heat and flame. Avoid formation of dust. Provide appropriate exhaust ventilation where dust is formed. Do not breathe (dust, vapor, mist, gas). Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling.

**Storage**: Keep container closed when not in use. Store in a cool dry place.

7.2. Conditions for safe storage, including any incompatibilities

7.3. Specific end use(s)

SECTION 8: Exposure controls / personal protection

8.1. Control parameters

8.2. Exposure controls

**Engineering controls**: Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits.

**Eye/face protection**: Wear safety glasses.

**Skin protection**: Wear protective gloves.

**Respiratory protection**: Not normally needed. If ventilation is inadequate and this material is handled at elevated temperatures or dusts/fumes/mists are generated a NIOSH/MSHA approved air purifying respirator with a manufacturers approved cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known,

or any other circumstances where air purifying respirators may not provide adequate protection.

Work hygienic practices: Practice good chemical hygiene during and after use.
