1. Identification of the substance/preparation and of the company/undertaking

Product group: Verdünner

Identification of the substance or preparation
mr-T 1090 Thinner for Photoresists

Use of the substance/preparation
Chemical Speciality

Company/undertaking identification
Company name: micro resist technology GmbH
Street: Koepenicker Str. 325, Haus 211
Place: D-12555 Berlin
Telephone: +49 30 65762192
Telefax: +49 30 65762193

e-mail: mrt@microresist.de
Internet: www.microresist.de

2. Hazards identification

Classification
Indications of danger: Irritant
R-phrases:
Flammable.
Irritating to eyes and skin.

3. Composition/information on ingredients

Chemical characterization (preparation)

Hazardous components

Full text of each relevant R phrase can be found in heading 16.

4. First aid measures

After inhalation
Provide fresh air. In case of breathing difficulties administer oxygen. If victim is at risk of losing consciousness, position and transport on their side. In case of irritation of the respiratory tract seek medical advice.

After contact with skin
After contact with skin, wash immediately with plenty of Water and soap. Change contaminated clothing. In case of skin irritation, seek medical treatment.

After contact with eyes
Immediately flush eyes with plenty of flowing water for 10 to 15 minutes holding eyelids apart. Consult an ophthalmologist.

After ingestion
Caution if victim vomits: Risk of aspiration! Rinse mouth thoroughly with water. Let water be swallowed in little sips (dilution effect). Immediately get medical attention.

Advice to doctor
Treat symptomatically.
5. Fire-fighting measures

Suitable extinguishing media
Carbon dioxide (CO2). Dry extinguishing powder. Foam.

Extinguishing media which must not be used for safety reasons
High power water jet.

Special exposure hazards arising from substance or preparation itself, combustion products, resulting gases
In case of fire and/or explosion do not breathe fumes. In case of insufficient ventilation and/or through use, explosive/highly flammable mixtures may develop.

Special protective equipment for fire-fighters
In case of fire: Wear self-contained breathing apparatus. Wear chemical resistant suit.

Additional information
Contaminated fire-fighting water must be collected separately. Use water spray/stream to protect personnel and to cool endangered containers.

6. Accidental release measures

Personal precautions
Remove all sources of ignition. The following must be prevented: inhalation. skin contact. Eye contact.
Provide adequate ventilation.

Environmental precautions
Due to danger of explosion, prevent leakage of vapors into cellars, flues and ditches.

Methods for cleaning up/taking up
Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Collect in closed containers for disposal. Clean contaminated objects and areas thoroughly observing environmental regulations.

7. Handling and storage

Handling
Advice on safe handling
Use only in well-ventilated areas. Keep away from sources of ignition - No smoking.

Advice on protection against fire and explosion
Take precautionary measures against static discharges.

Storage
Requirements for storage rooms and vessels
Keep container tightly closed and in a well-ventilated place. storage temperature: of °C: 18 up to °C: 25 Keep away from sources of ignition - No smoking. Take precautionary measures against static discharges. Suitable material for floor covering: Solvent-proof.

Further information on storage conditions
Protect against: heat. UV-radiation/sunlight.

Storage class (VCI):
3 A

8. Exposure controls/personal protection

Exposure limit values

Exposure controls

Protective and hygiene measures
When using do not eat, drink or smoke. Protect skin by using skin protective cream. After work, wash hands and face. Immediately remove any wetted clothing, shoes or stockings.

**Respiratory protection**
If technical suction or ventilation measures are not possible or are insufficient, protective breathing apparatus must be worn. Respiratory protection required in case of: aerosol or mist generation. Filter respirator (full mask or mouth-piece) with filter: A

**Hand protection**
Tested protective gloves are to be worn: Single-use gloves. Type of chemical protective gloves to choose depends on the concentration and quantity of dangerous substances as well as on work place specifications. In the cases of special applications, it is recommended to check the chemical resistance with the manufacturer of the gloves. Breakthrough times and swelling characteristics of the material must be taken into consideration. Before using check leak tightness / impermeability.

**Eye protection**
Suitable eye protection: Tightly sealed safety glasses.

**Skin protection**
For the protection against direct skin contact, body protective clothing is essential (in addition to the usual working clothes).

### 9. Physical and chemical properties

#### General information
- **Physical state:** liquid
- **Colour:** clear
- **Odour:** hydrocarbons, aromatic.

#### Important health, safety and environmental information
- **pH-Value:** not applicable

#### Changes in the physical state
- **Boiling point:** 131 °C (cyclopentanone)
- **Flash point:** 27 °C (cyclopentanone)
- **Vapour pressure:** 11.5 hPa (cyclopentanone)
- **Density (at 20 °C):** 0.95-1.0 g/cm³
- **Water solubility:** unlöslich
- **Viscosity / dynamic:** <7 mPa·s

#### Other information
- **Ignition temperature:** 445 °C (cyclopentanone)

### 10. Stability and reactivity

#### Conditions to avoid
- UV-radiation/sunlight. heat. Take precautionary measures against static discharges. Remove all sources of ignition.

#### Materials to avoid

#### Hazardous decomposition products
**Safety Data Sheet**

**mr-T 1090 Thinner for Photoresists**

Print date : 7.11.2008  
Product code : R824100  
Page 4 of 5

---

### Additional information

Formation of potentially explosive mixtures with: Air.

### 11. Toxicological information

**Acute toxicity**

- Acute toxicity, oral LD50: 3700 mg/kg species: Rat. (Anisole)
- Acute toxicity, oral LD50: >2000 mg/kg species: Rat. (cyclopentanone)

The statement is derived form the properties of the components.

### 12. Ecological information

**Further information**

product has not been tested. Do not allow uncontrolled leakage of product into the environment.

### 13. Disposal considerations

**Advice on disposal**

- Appropriate disposal / Product: Remove according to the regulations.
- Contaminated packaging: Cleaned containers may be recycled.

### 14. Transport information

**Land transport (ADR/RID)**

<table>

**Further Information**

The information is based on present level of our knowledge. It does not, however, give assurances of product properties and establishes no contract legal rights.

The above information describes exclusively the safety requirements of the product and is based on our present-day knowledge. The information is intended to give you advice about the safe handling of the product named in this safety data sheet, for storage, processing, transport and disposal. The information cannot be transferred to other products. In the case of mixing the product with other products or in the case of processing, the information on this safety data sheet is not necessarily valid for the new made-up material.

(The data for the hazardous ingredients were taken respectively from the last version of the sub-contractor's safety data sheet.)
